

# Fall 2019

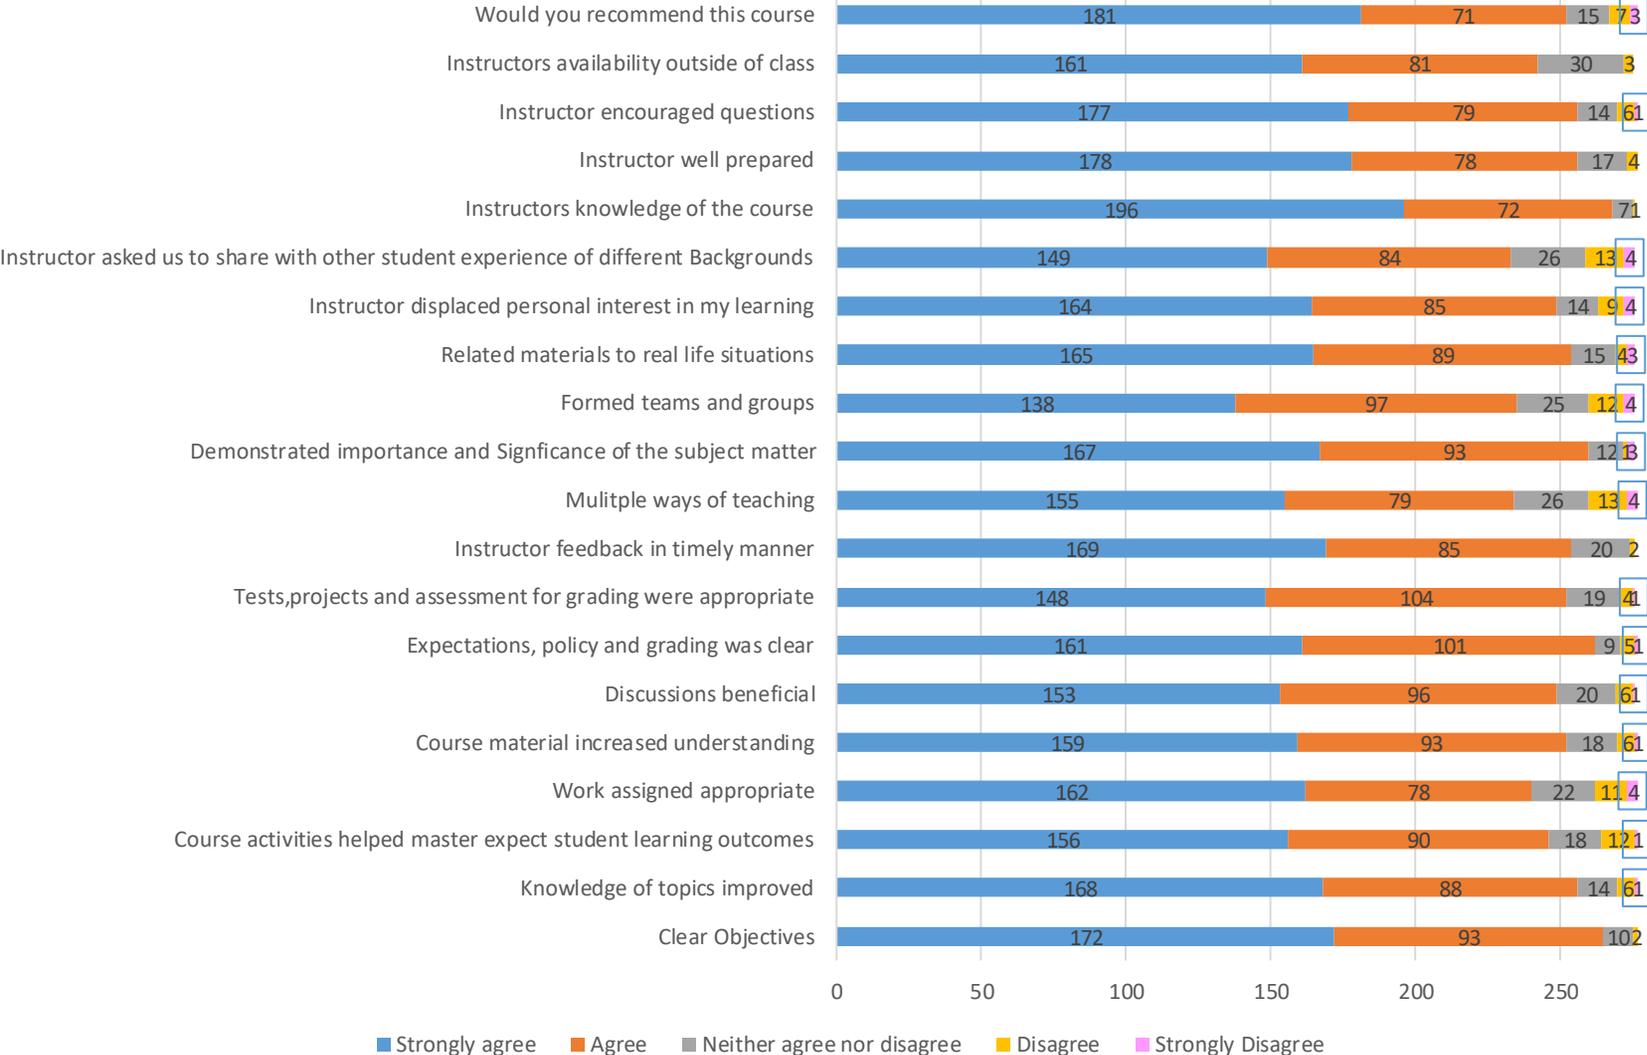

The following data encompasses surveys completed for faculty during the Fall 2019 semester. Faculty who were on the evaluation cycle were included in this survey. Faculty could also opt in and ask for surveys to be set up for other classes. These were not used as part of the evaluation cycle for those faculty. Approximately 300 students provided survey feedback.

All identifying information has been removed from this report. The reports shared with faculty and deans had the specific information that has been removed in this report.

### Fall 2019 Student Survey Cumulative Report

### Qualitative Data Question 1: What did you like the most about this course? Why?

Students provided qualitative information about their experience.

- Idk.

- The teacher because she is the nicest and the kindest teacher I have ever meet in my entire life.
- I enjoyed the labs, I like to be given the information and questions all at once it seems more realistic. In real life, I will be asking the questions while I'm given the information most of the time.
- How helpful [deleted faculty name] is.
- Its hands on. I like that because I can learn better and experience the experiments more effectively.
- I like how the class is formatted and the timeline of assignments.
- It was online.
- Teacher was responsive and reasonable with grading, missing a due date one time, etc. I liked that the format stayed the same so I knew what to expect.
- Lab projects.
- The amount of homework each week. It was a good amount that I was able to get done in a timely manner without getting anxious about getting everything in on time.
- The Instructor, because he made the course fun and different every day. Plus provided real life examples and experiences to help us relate and understand better.
- The true false, because it easy points.
- How helpful the teacher is and how much he's willing to give so the students can succeed.
- How he makes his lectures interesting.
- The teacher is a nice guy.
- Labs, because it was hands on.
- [Deleted faculty name] is very helpful with questions and works with his students to help them reach their goals.
- I like [deleted course name] so it was a fun class for the most part personally just because of my interest.
- I enjoyed when class was held that the teacher explained how to do the problems.
- Learning about elements.
- How good [deleted faculty name] was about getting back to us because it helped out my grade a lot.
- The class was easier when the teacher was in class (had to take a personal live).
- I enjoyed the labs. I thought that they were very informational and helpful in grasping the concepts.
- Getting a haircut done well is a good feeling.
- Love making people pretty.
- Learning many new things!
- The challenges.
- Learning more in depth about things and getting to be hands on.
- I really like how [deleted faculty name] teaches us, how she comes at a subject makes it easy for me to learn.
- The hands on we get to do and all of the help from my teacher
- I liked the hands on portion of this course because it gets you ready for the real world.
- The teacher because she was very helpful.
- [Deleted faculty name] knows what she is talking about with almost anything that I have to ask. She understands and helps us learn as best as she can.
- It was very interesting and I learned a lot from it.
- I liked the hands on and being in the salon.
- I felt I was always understood and heard. All my concerns and questions always answered in the best ways. I've never learned so much from an instructor in such a short amount of time, along with it not being overwhelming.

- I like the fact that it is a degree that is fairly easy and obtainable and has incredible room for career growth and continuing education within the fashion industry.
- Hands on.
- I loved laws and rules.
- I liked how willing to help me in any way possible my instructor was.
- Very helpful with information.
- She really was there for us and you can tell she has a real passion for this industry and for her students.
- Interesting to learn new things and get better at it.
- LEARNING NEW THINGS AND MEETING NEW AMAZING INSTRUCTORS.
- The teacher because she is very helpful.
- The helpful conversations during class that make it more educational and fun.
- [Deleted faculty name] is very good at explaining things in depth and if you don't understand something she takes the time to explain it until she gets it.
- I like how [deleted faculty name] understands and is always around to help us. Sometimes I feel as though she is around more than the first year teacher, so it's easier to ask for help.
- [Deleted faculty name] taught me a lot in the amount of time I have had her.
- Learning new things and meeting new amazing instructors.
- Getting new clients and learning as I went.
- The teacher because she was very helpful.
- All of the experience the teacher has and the way she explains everything.
- The course itself was good, but I feel like I didn't retain the information very well.
- [Deleted faculty name] is very nice respectful makes it fun and enjoyable to be in class or in the salon.
- [Deleted faculty name] knows a lot about what she is talking about.
- I learned a lot from this teacher in the time I got to spend with them this semester it was enjoyable.
- Working with my friends.
- Because I like to build things and do hands on work.
- Working at the house.
- Building.
- It is hands on.
- I like the comradery, it is fun.
- Hands-on application and practical community involvement gave more value to the course.
- Hands on.
- It shows what I will be facing in the work force.
- The hands on, troubleshooting, and how the instructor took time out of his day to help me understand the material as thoroughly as possible.
- When we go over assignments and we break down each question.
- The instructor was able to walk me through different aspects, step by step, which greatly aided the ability to troubleshoot my own errors and learn from them.
- The hands on training in the labs is amazing.
- The genuine care the instructor has for each student to ensure they are not just rote-learning but truly understand the content of the courses. His availability for any questions, and the hands-on trainers is amazing. He truly is one the best instructors/ teachers I have ever had.
- Trouble shooting, it's really fun.

- All of the hands on work and see things go together in person.
- The way he teaches is outstanding.
- [Deleted faculty name] was always willing to help and answered any questions I had.
- Hands on learning.
- The hands on because [deleted faculty name] really invested in us
- How he had time for every individual person and broke things down so everyone could understand.
- How great of a teacher he is.
- It's something I never thought about doing, but it turned out to be pretty interesting.
- I really enjoyed the hands on part of the course.
- It was challenging.
- It was a new and challenging topic, but learning it was very fulfilling.
- The problem solving was good. I enjoyed that the most.
- I liked the opportunity to experience a different part of the electrical world.
- Learning how to problem solve, and properly operate motors.
- Learning how certain motors run different equipment out in the field.
- To make sure everyone completely understands how to do the work.
- I like to learn about actually learning to wire up motors and some of the math around it. The reason why is probably because I like the challenge and it is kind of fun.
- Mainly the challenging labs for motor controls, it is a valuable skill.
- Very passionate about what he teaches.
- Labs to help understand how transformers work.
- The content.
- When it was hands on.
- The [deleted course name] we learned for calculations because I'm really not good with [deleted course name] but the instructor was more than helpful with helping me relate to the material.
- Learning calculations because it was cool to see everything come together and once they make sense they are easy and fun to do.
- The hands-on aspect of learning.
- I like how it can be used in the field!
- I enjoy about learning about a new subject.
- Training with stuff we'll use in the field.
- Very well put together and organized.
- The lab work.
- The work.
- How friendly the instructor is. It makes you feel welcome
- That it prepared me for [deleted course name], although they both went hand in hand and in the same direction.
- How the course was set up (Syllabus).
- She is always involved with class and making sure we knew and understood what she was talking about.
- My teacher was willing to work with me even though i was messing up.
- How understanding the teacher was toward her students.

- Everything, [deleted faculty name] is one of the BEST instructors I've had this year!
- I liked how my instructor taught the class and how she wasn't hard on us and assignments were easy.
- He's very patience with us, he feels that it's important to be involved in the discussion with other classmates as well. It almost feels like we are actually in class instead of online. 😊
- What i like most about this course is that we share and read each other feedback on each other's essay papers.
- Watching video over topics we are talking about.
- I liked how I never felt alone or singled out and how it didn't matter where you were from or what age you were the instructor treated us all as equals.
- My instructor is helping me done a lot of works.
- I enjoyed how much the teacher cared for the students and wants everyone to succeed.
- Learning because i enjoy learning.
- The teacher and his teaching methods.
- I like that he allowed me to join in on the class so late in the semester and helped me catch on right away.
- Allows us to write about what we want to write about. Not by what the instructor wants us to write.
- He was understanding to all the students. He cared about his students and how everybody was doing in the class.
- This was a [deleted course name] class and I like how my writing skills have improved significantly. Specifically structuring papers was where I learned the most in.
- I really like when he starts class discussions because it allows us to get our peers thoughts on things.
- I enjoyed taking this course mainly because of how easy it is to communicate with [deleted faculty name]. He relates with us students and it makes class so much more enjoyable to go to. The best thing about his class is going through lecture and him letting us take the quiz during that time. I also enjoy all of our discussions. He always keeps our minds thinking.
- I like how [deleted faculty name] teaches the most. The way he is flexible with things and lets you redo something you messed up on has helped me improve more than a lot of my other classes.
- The professor is very good at teaching and I actually learned something.
- I like the way that he had the class set up with the schedule and how he handled things. This course so far has been my favorite and professor [deleted faculty name] is an amazing teacher along with being extremely helpful and gives back to the class in every way he possibly can. He takes the time to make sure every single student is doing their personal best and he doesn't make you feel like you're just another student. He makes sure that every student knows they have value and truly cares about the whole class along with showing extreme passion in his work. I loved this course and was extremely grateful that I got to take it with such a good instructor.
- The instructor being very helpful and understanding.
- I liked the amount of writing we had to do because that actually helped me learn about writing papers in the correct way.
- I enjoyed the discussion about the stories, and her thoughts on the subject.
- I like the projects within the course because I like researching about learning about different things.
- I was able to improve my writing skills. I also enjoyed the class discussions weekly.
- I like how the course is structured because it's easy to learn.
- The personality of the teacher.
- The smooth but firm operation of the entire course. It forced me to become more precise on completing assignments.
- The collaborative essays that students worked on together in groups. This gave me a chance to work with other students who had different skills of writing and I was able to learn from them, as well as helping other students grow in their writing skills.
- The work is appropriate and we are given enough time to do the assignments.
- The feedback i get on all my papers

- I liked how he started with a different introduction every day. I really thought that on different introduction days got my mind going.
- Class discussion question because I learn more.
- I enjoyed the fact that she is always energetic. She takes so much interest in her job that it's hard not to want to learn from her.
- [Deleted faculty name] is an amazing professor! She's very personable and genuinely cares about her students and their stories/backgrounds. Through her memoirs she assigns in this class, she relates them back to you and remembers every detail of them. It makes you feel important to her which is really nice. She always brings her a-game, even when the students are less prepared or disrespectful. She always keeps her energy high and keeps class moving in the right direction.
- The reading. I like to learn how children learn.
- I can use everything learned in this class to assist in the development of the grandchildren I am raising.
- 
- It can be used in my every day job
- I liked the discussions the most because you got to put your point of view and were able to see your class mate's point of views as well, so it gave me a different perspective of the situations.
- Doing in class activities
- She made it easy for students who work, and have families but still have the desire to accomplish school. I would recommend her to any new student coming into the confusion of college.
- The assignments. I really liked how the assignments were different every time which helped.
- the discussions help with learning and team work
- It gets me one step closer to my degree.
- You knew everyone who was in class and our teacher was very well knowledge.
- I liked free writing. It gave us a chance to discuss topics with our classmates
- that we were able to learn a lot about the books and how he related it to his previous experiences
- I like the examples that he uses because it's from his time in his past profession.
- I honestly enjoyed everything in this course. It's a really good way to learn all about these things and that we discussed them together.
- There's a lot of hands on luring and that's how I like to learn.
- I like learning how the drawings correspond with what we were making.
- You learn something new every day!
- That [deleted faculty name] will put his input in and ask questions.
- The learning.
- I like all part of the course.
- Learning about motion controls, and teacher was very helpful took his time to make sure we understood.
- It helped me to understand how things work me in the real world.
- Learned new things and improve.
- My favorite part of this course was learning about PLC's. It's something I can use almost every day at my job. I got a very good basic understanding of how PLC's work and how to read and understand ladder logic.
- I liked the hands on learning.
- I enjoy the enthusiasm of the instructor. He thoroughly enjoys the subject material, and is able to give real life situations where you can apply the skills learned.
- I liked that [deleted faculty name] was very patient in helping us understand the material no matter how many questions we had. She was very informative especially during lecture, and if she didn't know the answer she went out of her way to find out the answer for us.

- The hands on skills are my favorite because I learn best by doing them and practicing them.
- Hands on learning.
- Doing test outs in the lab.
- Getting to work hands on with the skills. It was easier to understand them by practicing them.
- I have enjoyed learning about disease processes.
- Causes, prevention and treatments for different diseases.
- To be honest, I really didn't like this course. I loved the material but I feel the instructor did not present it real well. I did most of my learning like an online student would for this class. I feel that if I'm paying to have a lecture I should be able to get a beneficial one.
- I like when we do interactive activities during class. It really makes the time go faster and helps me to get into the material.
- The course is interesting and easy to understand.
- My favorite thing about this course was the cahoots because it gave such an amazing learning opportunity with some friendly competition. Also, discussing the answers to the cahoots questions was really beneficial.
- Having classmates who feel the same as I do and we study/teach together.
- The book has some of the information needed for my other classes.
- Cooperation of the instructor to the students.
- I enjoyed the content because it actually got into the human body and issues that could arise
- I really like learning about the processes of different diseases and medical conditions and learning how they correlate with one another. I like learning this course as a whole because of that reason; I find the diseases processes very interesting and can teach others about them as well.
- I liked doing the journals, it helped me with my own goals and being able to look back on them to see what my year was like.
- Doing the journals because I like writing down my thoughts when I work out.
- The pace.
- The setup of the class was well organized and easy to follow. The instructor set up the course for the student to be successful
- I liked this course because of the homework. It was the same assignments every week pretty much which helped with developing a consistent homework schedule. Also, the book we read at the beginning of this class was very interesting and informative.
- I like how this course is self-paced because it makes for an easier learning experience.
- This class has allowed me to learn more about fitness and my health.
- How it was set up and had all the deadlines listed because it was easy to compare to my high school schedule.
- I liked learning about the history and events involving the medical industry.
- I liked everything about this course as I learned a lot.
- I liked that the instructor could relate to the students. He was closest in age and was very knowledgeable about our class, he could definitely drop the hammer on some of the students. I think he was letting them take advantage of him most of the year. I felt like I said more to the students acting like idiots than the instructor. Also letting some of the slower students take longer to accomplish tasks he should allow us that get it more move on. I don't get up early for class to wait till 12 to do or learn anything. I need to get what I paid for right?
- All the hands on work because it really helps me prepare for next year.
- The course is very orientated around hands on learning and the small class size makes it easier to learn.
- I can't decide between these two so I'm listing both. -Going out on service calls, I learn a lot by doing those. -I can ask the instructor anything about [deleted course name] & he doesn't make me feel like an idiot for asking.
- The hands on part of it.
- [Deleted faculty name] was very helpful in my learning process.
- I liked how everything was set up with the assignments and I learned a lot.

- The discussions, since they made it really easy to see others viewpoints.
- The way the instructor incorporated learning materials.
- I enjoyed learning about the different types of racism and how people dealt with this
- That conflicting viewpoints of topics that had adequate backing to them were both given a voice, and nothing felt that there was a leaning one way or another as the base material for the class was varied. I think I like this the most simply because there can and will be a lot of emotion with such social topics and it is best to give a chance for ideas and views to be talked about in an open manner with-out the sense of instructor bias or hostility with-in the learning group.
- It was all at our own pace.
- Interesting.
- How easy it was to contact the instructor and get a reply nearly instantly.
- How specific my instructor was. And he was always down to help. Cared about his students and didn't want us to fail.
- How organized my professor was.
- I liked learning about the different types of [deleted course name] and how to do them. In my career I will most likely have to do [deleted course name] so it is valuable to me to learn the different types.
- I have really enjoyed the class discussions as well as the instructor's comments. I appreciate that the instructor grades our work in a timely manner and is very helpful when it comes to our mistakes.
- I liked the challenge of the [deleted course name] which helped me become a better at [deleted course name].
- How helpful the instructor was, and would answer our emails fairly quick. He was genuine and cared about our education.
- I liked the different learning styles he incorporated. I also liked the way he had the course set up, it was easy to understand and follow along with.
- I liked how he gave good feedback to the students quickly.
- I liked how [deleted faculty name] explained everything really well. He let us know the expectations and what we should be doing every week.
- I liked how we had discussions about a certain topic each week and were able to reply to other students.
- I like that he gives us detailed rubrics and gives us a good amount of time to do assignments/projects.
- How if we had questions he would get back to us fast and made sure we knew what was going on.
- If I had questions I was able to reach out to him so that the problem could be resolved.
- I really like talking about [deleted course name] and talking about different topics with our [deleted course name] because I learn a lot while listening to other classmates [deleted course name].
- The instructor, always helpful and cheerful.
- I liked how flexible [deleted faculty name] was with his hours and how he set up each week for us so we knew exactly what we were expected to complete.
- It applies to real life experiences and improves knowledge about simple communications.
- [Deleted faculty name] as our instructor. The class was easy-going and fun. One of the few classes I always looked forward to going to.
- I liked that I learned in this class. The instructor was good at helping to learn in a way where I wanted to and it just stayed with me.
- I liked how she helps students understand more about the content, because some students, myself included don't speak in fluent English and I think the students understand the content because of how she helps them understand more.
- [Deleted faculty name] is a great teacher and person! I really enjoy her class.
- That she was very fluent with her teaching and showed many examples to help us.
- How the teacher explain subjects.
- I admired the fact that the instructor take time outside of class to help students.
- How she explains everything so well and how we do practice questions to understand everything.
- Learning about real life experiences that could happen in the operating room.

- I enjoyed learning about the [deleted course name] of each specialty.
- This course is so directly related to what our goals of becoming are. This isn't just a class we take for credits - it teaches us all about [deleted course name] and everything we need to know to be a great [deleted course name].
- Learning procedures and instruments is hands on and that makes it easier to learn and remember.
- The lecture when the instructor taught it. I got nothing out of us putting our [deleted course name] on a poster board and reading it to the class. I would have had students make a power point or pick out a You tube video to watch and visually learn that way. I feel like the students did not know what the surgeries were for so why make them teach the class too.
- I had the chance to improve my [deleted course name]
- Be able to learn and gain knowledge of this field.
- Learning how to [deleted course name] and the friends I've made.
- I liked it because of the way and technique [deleted faculty name] used to teach us. It's not just about welding but also friendship and honesty!
- Learning how to [deleted course name], it's something I have never done before and the teacher is really nice about it because he knows I just started [deleted course name] so he helps me out when I need it!
- The instructor is very good.
- Hands on experience.
- Learning new stuff, you can never learn enough.
- You learn a lot as you go.
- This is something I look forward in doing.
- [Deleted course name] because i like [deleted course name].
- Being able to [deleted course name] every day.
- The hands on experience
- 1 year of college only, cheap, good professor.
- There is way more to [deleted course name] then just laying beads, I have learned that they are so many ways the [deleted course name] can be better or worse.
- The amount of hands on learning.

## Qualitative Data Question 2: What would you change about this course? Why?

Students provided qualitative information about their experience.

- Nothing.
- Nothing.
- I would find an activity that isn't inquisitive to use the site is just plainly bad. The grammar that is used is often wrong and can make the question confusing. The questions can be confusing on their own sometimes making it hard to find what it is asking for.
- Nothing.
- Nothing.
- The number of assignments due every week can be overwhelming to students taking multiple courses. The time span needed for labs can be a bit much

and the labs can be somewhat confusing. The answers on all assignments are expected to completely match with answers on the answer key or full credit is not given.

- I would like to have a way to update/change my answers on the labs for half credit because the labs are where most of my grade is suffering.
- Having more clarification about what is expected for the labs.
- The amount of time labs took.
- I would like to have a grading outline for our labs. Unclear.
- Going for classroom level and see the difference.
- I wouldn't change a thing!
- Nothing, I believe the course is beneficial the way it is now.
- Nothing.
- Nothing.
- Being able to understand his lecture notes more.
- More online class videos.
- The problem sets, because most of the time i get them wrong.
- I would like it to be less [deleted course name] involved.
- I personally feel that the homework does not help with practice as much as it should and that we should do more practice as a class because that helped me out more rather than trying to figure it out on my own with the textbook. Hearing other students questions and watching the instructor demonstrate solutions helped the material sink in better and that gave me a better understanding verses trying to further my knowledge by attempting it on my own at home without help or the ability to get a question or concern answered right on the spot. So I personally just prefer in class demonstrations and explained work much more than textbook problems being sent home with us.
- I would try to find a better substitute teacher if the main teacher has to leave. The class going online was a major fail for me personally, I felt like I was trying to teach myself and I was unable to comprehend what was going on or even how to do it.
- Don't put the class online for a couple weeks find a new teacher.
- Make sure we get a sub in teacher if a teacher goes on leave because it was impossible to learn without a teacher.
- In the group I was in for our lab, I was the only one who did things and everyone just copied off of my paper. I would like it if we rotated groups or made sure everybody did their part or something like that.
- Try making things a little less repetitive, but that's a little hard to do with this class.
- Nothing.
- Nothing.
- More details.
- Nothing it was fine.
- I'm just not really into hair, which is no one's fault, so I don't really have an opinion.
- Probably nothing.
- Nothing.
- Nothing.
- I wish we would learn more from our first year teacher so It wouldn't all be put on the responsibility of the others
- N/A.
- More time to go in depth in hair cutting and color.
- Nothing.

- I personally would want there to be more education on clipper cutting and ethnic hairstyling.
- Break up theory hours more to be able to concentrate and keep my mind focused.
- Less theory hours and more hands on experience.
- N/A.
- Have an actual nail tech teacher.
- Consistency of educators.
- Nothing.
- NOTHING.
- Nothing.
- We need to be taught more than just reading from the book and being put on the floor.
- Nothing.
- Nothing really.
- Diversity in different styles.
- Nothing, [deleted faculty name] does a great job.
- N/A
- Nothing.
- Nothing.
- Nothing.
- The favoritism needs to stop.
- Nothing.
- Maybe some more visuals for better learning.
- Maybe some more one on one time.
- N/A.
- Alternating weeks at the house at classroom.
- Nothing because I don't think nothing should be changed.
- Less classroom.
- Less classwork.
- Gives us jobs in little groups of two.
- More hands on learning less classwork.
- The course structure itself could only be changed based on the discretion of the instructor due to so many moving parts in the process of the remodel project. Communication of subcontractors and the city could be better prepared perhaps so students don't need to wait for them.
- Make it more advanced so i could actually learn something.
- I would like to see more lab time.
- Get rid of the suitcase trainers. I hate them as they felt like time killers to keep me busy rather than learning new things.
- Nothing.
- Not a damn thing, for a first time student....this has been perfect for learning.
- Nothing comes to mind.
- There is nothing I would change - there is always more to learn, review, and do to keep us busy and in-tune with how each different course ties together.
- Nothing because the way he is doing things now is really helping me learn.

- Nothing.
- Nothing everything is taught well.
- Some more time during the week to do labs. There is a lot to cover and the labs are very time consuming.
- The instructor cares and always tries his absolute best.
- Nothing.
- Nothing.
- Nothing.
- Nothing he is awesome.
- Nothing it is laid out pretty good.
- I would have a little more lecture time for the first week to fully understand some of the basic components of the lab portion.
- Go into more deep conversations in class about the subject matter.
- Introduce the reading and drawing of the line diagrams during the first year. The drawing of the line diagrams is by far the hardest concept to grasp.
- Nothing it is made out well and well planned.
- Nothing to change.
- More working problems on the board.
- More interacting by drawing on the board. More up front of the class.
- Slow things down and get more people to understand what you are doing the subject.
- I would like to change maybe some of the diagrams, so that we re-drew some of them before people stumbled onto them for my labs. I feel like I could have learned more if it was done that way so I could understand what I was drawing.
- Start on line diagram studies in the first year. It would be very beneficial.
- More explanation about how to start a lab
- The Lab Volt exercises are tedious and needlessly complicated and convoluted. They do not contribute to an understanding of the course material, the time would be much better spent on classroom instruction/transformer lab work.
- More labs because I'm more of a hands on learner.
- The lab book just needs to be more informal with what it is asking for.
- More step by step notes rather than examples.
- Nothing.
- Had trouble with my transformer a couple times during lab!
- Time.
- More field type work.
- How long the class is.
- Better transformers.
- Nothing.
- Nothing. There are not any problems.
- Probably students that are overly loud. Gets in the way of one's education.
- Nothing.
- Nothing.
- Stay on track with homework, so I'm not trying to fight at the end of the semester to pass.
- It was a good course to me and I would take it the same way again.

- Nothing.
- Nothing.
- No changes
- I wouldn't change nothing about this class everything about this class everything was good in this class
- nothing
- I would change the topics of the assignment to give variety.
- There's nothing should be changed because everything perfect.
- No I wouldn't want anything to change because the assignments challenges students and is also manageable.
- Nothing at all.
- Nothing.
- I like the course the way it is.
- N/A
- Nothing.
- Nothing, this class engages the shyest of students and fits to anybody's style of learning
- Nothing.
- I wouldn't change a thing. I've recommended this class to four of my friends and now they will all be taking his [deleted course name] class with me next semester!
- Nothing really, everything about this course benefited me with my learning and I have enjoyed it.
- I would change nothing. It's a great class.
- There's not a single thing I would change about this course because he made it to where everything was easy to manage around other classes and personal life and he never made us feel pressured or stressed about anything.
- N/A
- The quizzes are almost too difficult for a simple course as [deleted course name]. I understand you need to learn and know the topic to achieve a good score. Still, the teacher would complicate the quizzes to a point that a simple concept as verbs and adverbs would be too difficult to understand and learn because the quizzes are so sophisticated. My Brother is currently going to a division one college and admitted that this class was harder than his [deleted course name] class that he attended.
- Nothing.
- I would spend more time on teaching lessons than on the discussion posts. I need more time to learn things that will actually be on tests, and more time learning about
- I wouldn't change anything about this course. Every assignment transitions into the final paper.
- I would lessen the amount of group work because I don't enjoy working in groups as often as we do.
- The way she sets up assignments and the way she has collaborative writing activities scheduled.
- The collaborative writing activities most likely. This is due to the typical students who are not adequate enough to handle group assignments.
- For the collaborative essays, I would make the groups, if possible, groups of three instead of four. It gets to be a bit more challenging to keep on top of what has been completed.
- I wouldn't change much because it is fine the way it is.
- I like the readings, but there is too much for me personally.
- I would change that the papers and assignments that are due pop up on D2L like every other class.
- Nothing change.
- I'd like for the notes to be slower. I am a note taker and sometimes we move too fast to get the notes, but not too fast to understand the material.
- Nothing! Everything about this course is great.

- Nothing, I like it the way it is.
- I thought this class had a perfect balance.
- Nothing.
- I wouldn't change anything. I really enjoyed this course.
- Have more explanation.
- Nothing.
- Some of the quizzes were hard I think study guides.
- Nothing because the way the instructor teaches it is spot on.
- Nothing.
- Nothing.
- I also liked watching videos about officers making stops. Watching more videos would be the only thing I would change.
- Nothing because he does a good job teaching and isn't afraid to help if you ask.
- The amount of time he gets. We do a lot of discussions and I feel that he runs out of time when we are done discussing.
- In my opinion I wouldn't change anything.
- I wouldn't change anything, it's just fine the way it is.
- Nothing.
- Time it starts 8:15.
- Nothing.
- Nothing.
- Nothing.
- Nothing.
- N/A.
- The only issue I see with the course is a lack of computers for the amount of students. We had a few students who had to wait to be able to use the computers.
- Unsure about that, I liked the class.
- The only thing I would change about the course would be some of the other students. They slowed down the progress for the students that wanted to learn. Other than that, the class is very informative and has helped me with my current job classification.
- The only thing I would change about this course is more help in the work book/study guide book with the activities sheets.
- Meeting for this class at least twice a week would be nice. With having only one day of class not everyone is able to come back to work on skills or review for tests. If we had a second day that we could use to review for tests the following week and practice skills on each other when everyone is there would be nice.
- Some other technical colleges do not make students who have their CNA retake the class because a lot of it is what you get trained on in your CNA class.
- I think the course is fine as it is now.
- Maybe a little bit more time but otherwise it is all good.
- I think that some of the tests are over so much information that it's intimidating. I'd like to see smaller units in future classes. Cardio is huge.
- Give myself more time to read and understand the content.
- I would change the instructor. I feel like having someone who would engage the students and provide beneficial feedback instead of saying the answer are in your book would help.
- I think one thing I would change about this course is to do more activities during the lecture time. Sometimes when we lecture for a long time you start to feel not as interested and need a little activities to get back into it.

- I would not change anything about the course.
- N/A.
- Instructor, she was not good at teaching us this material.
- The instructor, I don't feel like I have learned anything from sitting in this class.
- I did not like the teacher. When we asked her questions she would say it is in the book or say we will get to that later and never would. She told us to call ATI or other sites we would use and wouldn't listen to our questions based on the sites.
- As of now, I do not have feedback as to what to improve in this course because overall, I feel like students need to read the content to know what we are learning about.
- I would change the amount of journaling. I like it, and it's a good idea but sometimes it tends to get to be a bit much. I don't always seem to have time to write it down when I am doing something in the exact moment, but I try my best.
- Nothing, for me it was fine.
- Nothing.
- I think the class is fine the way it is.
- I would not change anything in terms of the books and assignments used in this course. However, I do think the teacher could be a little more organized on his class page. Normally on D2L course pages an instructor will list weekly assignments and due dates as well as other information about upcoming exams. Whereas for this class there was no assignment schedule on the syllabus and I had to go looking for what assignments I needed to get done through the different tabs like discussion, quiz, assignments, grading, which was kind of a hassle if you forgot to check all of them.
- I suggest adding more interactive assignments with other classmates and constructive feedback from the instructor. Even though it is an online course, it should still have students feeling included and reassured with their progress through discussion or feedback. Also, I suggest spell-checking assignments and quizzes. The grammar errors I've encountered didn't feel very professional for a college-level course.
- The teacher rarely checks in on students, possibly because we are all completing our work on time. It just seems strange that he rarely emails or posts announcements.
- Maybe make the quizzes deadlines every week not just a bunch at once because I found myself procrastinating.
- Most of the time the quizzes are not related to what we learned. And all information that we should know should be put on the slides. Because he doesn't put certain information on the presentation, but instead he speaks of them. I think to help those who need, or learn better with visual learning, seeing what he speaks should be put onto the slides. He also speaks of things that aren't related to what we are learning.
- I won't change anything about this course.
- Only thing I would change is his mannerism he could have been more of a teacher than a friend.
- To do more service calls and less simulation to fully see all different types of scenarios.
- Fully navigating through a subject before exploring another. We seem to learn about something one day and then something completely different the next sometimes.
- Have a secondary plan for students who finish a project faster than others. I dislike sitting around & want to keep doing something.
- Nothing.
- Nothing.
- I don't see anything wrong with the course.
- None.
- Quite a bit of homework, which is fine. But the amount of books is a little much. Less books would be better as college students do not have a lot of excess money.
- I cannot think of anything as nature of the class is all online.
- N/A.
- Nothing.

- Add a little bit more time to get prepared for the longer [deleted course name]. Give more of a lesson on how to get yourself prepared. Also if you should memorize the whole [deleted course name].
- Nothing at all. Great course, great instructor!
- Do not have a time limit on [deleted course name].
- I would have liked to spend more time on learning how to prepare notecards for [deleted course name]. I find this task very difficult and it was not something that was really taught in the class. There was a small PowerPoint on the topic, but that was it.
- I would not change anything!
- I think the course is set up good the way it is.
- I would not change much, but maybe add a stronger lesson in about outlining.
- Nothing honestly, it was great!
- There is not much I would change.
- I would change the tests. We were expected to complete one or two small tests per week. Making these tests twice as big and having them every other week or every third week would be beneficial.
- Don't require as many outlines because a lot of people just read from their [deleted course name].
- I do not think there is anything that I would change
- More education on how to upload, and some support if we can't get all the requirements like 5 people, maybe lower the amount.
- How many [deleted course name] there are, because I felt that there were too many for this time.
- Me personally I wouldn't change nothing about the course. I think this course was a great learning experience for me.
- Nothing.
- I would either slim down the number of quizzes given or discussions.
- I don't think I'd change a whole lot about this course because it was very educational, fun, and realistic.
- Nothing!
- I wouldn't change anything about this class.
- Nothing.
- More discussion.
- Not having it at 8:00 in the morning.
- Nothing.
- N/A.
- Nothing because she teaches it well.
- Learning 15-20 [deleted course name] instruments every week. I would lessen the number of instruments to learn per week.
- A procedure that is more complicated or has a lot of steps or may be interesting watching YouTube videos with the teachers input also is beneficial.
- I wish we could learn more in the lab and by using the things that we will need to know for real life.
- No poster board projects. Do a power point everyone would benefit from that than how the instructor does it now. I would have the instructor use the D2L for YouTube videos for learning like other instructors do because I am a visual learner and students need more options than only one way to teach.
- Have more equipment and tools to use.
- Having more options of material to work with beside steel. Like Aluminum, etc!
- Nothing.
- Get new tools!
- Nothing.

- Nothing.
- Nothing.
- Having more time with the equipment.
- Nothing.
- The location of the classes, 30 minutes from town.
- Nothing easy to understand.
- Nothing.
- Have the instructor give us projects so a broke college student doesn't have to go out and spend their money to get a grade in the class.
- Have a shop that's actually completed.
- Nothing.
- Nothing.
- More space, when everyone brings in projects during the winter the shop gets full.
- Nothing.

### Qualitative Data Question 3: Additional Comments

Students provided qualitative information about their experience.

- None.
- No.
- Discussion questions and tests opening early would be beneficial to students wanting to work ahead.
- Glad this class was offered online!
- None.
- I think this is a great option for students who can't make it to campus every day.
- Everything is good so far with the course
- N/A
- I enjoyed this course very much.
- Nope.
- None.
- Not a bad course other than the way homework was presented sometimes along with the small quizzes too because they take too much out on a grade. I always study and even if I go into it feeling like I had it I didn't always because the quizzes were out of so little points that if you got just even one question wrong that was automatically a C grade for the quiz (ex. a 3 out of 4 was already a 75%). Labs were very interesting though and I enjoyed those.
- Over all I enjoy this class, the teacher is great no problems with him at all. Just wish that the online part would have been better.
- Not having a teacher for personal leave made it very hard to get good grades during that time.
- I struggled with this class a little bit since [deleted faculty name] went on personal leave, but he did a good job of letting us have multiple opportunities to get our grades up because of the circumstances.
- Nope.

- Nope.
- N/A
- None.
- Really like having [deleted faculty name] as a teacher here.
- This school needs [deleted faculty name].
- This school needs [deleted faculty name].
- N/A
- None
- NOPE.
- The first year teacher is never anywhere to be found and when we finally find her she's usually getting a facial from her daughter.
- [Deleted faculty name] is very sweet and bubbly and i really enjoy having her as a teacher.
- N/A
- Nope.
- None
- When our first year instructor is nowhere to be found for hours at a time and is found getting a facial from her daughter, there are times that [deleted faculty name] is involved in this.
- I get along very well with [deleted faculty name] but i feel like she is gone a lot of the time from the classes when i need help, I've also asked several times to learn more about skincare and no one has taught me.
- Sometimes it seems like she is often times with just the estheticians so it is hard for us [deleted course name] girls to get any help.
- N/A
- None
- nun bod
- Nothing
- None
- This instructor has been phenomenal and in my years as a student, including my time at other universities this instructor has gone way above and beyond. The other instructor has been pretty vague in their teaching and this instructor has helped us to at least understand a bit better how to succeed in those other courses.
- No
- This instructor poured his heart into the lessons, even outside the classroom by creating new worksheets to aid in our learning while also working them out himself in order to make sure he was "in the same mindset" as his students....thereby enabling him to help us figure things out.
- [Deleted faculty name] is a great instructor. He is very willing to assist and stay late to help you with any issues you may have. [Deleted faculty name] treats us all as peers and not subordinates. His teaching style is on a level even someone with no prior experience, like myself, can understand and grasp. He helps create a great learning and working environment. We learn, and we have a lot of fun.
- [Deleted faculty name] is an exceptional instructor who truly has the passion to teach and cares that his students understand and are able to practically implement the variety of topics that are covered.
- No
- No
- [Deleted faculty name] is easily the best teacher I've ever had.
- No
- Very good instructor.

- She always involves politics and never looks at the other viewpoint. We would spend one day a week reading an article or story that didn't benefit me one bit. My level of knowledge on grammar is very minimal, she is a very sophisticated teacher and I think she should be teaching a much harder class for students that are interested in this subject.
- She seems very passionate about writing and literature.
- She is a really great teacher. I learned a lot of new skills that I can carry on with me.
- She means very well, but has an interesting time trying to connect with students.
- I definitely learned some significant information, pertaining to this course over the past couple months. I'm really glad I registered for this course in the fall, I can now say it paid off.
- Through this class, I have been able to grow and learn the necessary tools for writing which has made me more confident skills as a writer.
- N/A
- N/A
- I like this class and my teacher I am always enjoy when she's teaching in class. She has different action from other teacher. I always enjoy it.
- N/A
- [Deleted faculty name] rules!
- Nope
- Thank you for making this a great experience.
- None
- N/A
- Enjoyed this class.
- N/A
- I enjoy this class very much.
- [Deleted faculty name] does a really good job getting to know his students. He really wants them to learn what he is teaching.
- N/A
- Would like to see a second class of it.
- None
- No comment
- I have learn a lot from this class because of the way [deleted faculty name] presents the subject.
- The teacher is great and good example for the future students.
- The class was informative and has helped me understand electronics for my job.
- I would highly recommend this course mostly because [deleted faculty name] teaches it. She is by far my favorite teacher I have had.
- Really great class. [Deleted faculty name] teaches things in such a greater depth then some teachers I've had in the past. She really wants to succeed and will help you do that!
- No
- None
- [Deleted faculty name] had a rough first few weeks and improved greatly as an instructor as the semester went on.
- Interested in learning this course.
- None at this time.
- [Deleted faculty name] is a great instructor and is always willing to go out of her way to help the students. You can tell that she wants the best for the students and wants to see us succeed.

- None
- N/A
- It seems maybe the instructor is used to teach [deleted course name] students. She did not want to spend time on questions we asked, we asked her to try different way of teaching and she did for 2 lectures then went back to reading straight from the book and power point. I feel I could have done better online teaching myself.
- I heard other teachers did amazing in this section, but I did not like [deleted faculty name]. Being in her class stressed me out and I ended up not going to some of hers because it made me very upset.
- It's been a great semester!
- No
- None
- No additional comments.
- This class is self-focused and acceptable in terms of independence; however, the assignments felt very mundane and repetitive with little to no constructive feedback. Although this is an online class, it doesn't excuse the lacking of interaction that a traditional, on-campus class offers.
- What he teaches is interesting. But the execution of presenting the information could be better. And I think he should show more care towards his students.
- None
- For his first year I think my instructor did a very good job. He defiantly needs improvement, but knowing this was his first yeah he did a satisfactory job, he could take care of the goofing around and general laziness some of the student would take advantage.
- I enjoy this class 100% and would recommend other people to join this class.
- That's a negative.
- Not today.
- No
- All is good.
- None
- N/A
- Nope
- Nope
- *I thought [deleted faculty name] did a really good job with this class overall and was very patient with everything.*
- This is a great class and I would recommend it to other students!
- None
- I enjoyed this course, and [deleted faculty name] really helped me enjoy this class. I liked how there were always videos and other content that we could refer to.
- {Deleted faculty name} is an incredible teacher and he is great and answering any questions you have, in class or out of class, in a timely manner.
- I really like [deleted faculty name] and how he made each student feel important and showed to us that he cared about is. It was a great course and I learned tons.
- I had a great time in this class I would recommend it.
- I like this course, but I wish I could have more time for [deleted course name].
- I had a great time with this course.
- Great course.
- [Deleted faculty name] has taught me so much about public speaking in the very short time I have had him!
- [Deleted faculty name] is a great instructor, he listens to everyone and keeps things interesting to learn about.

- Nada
- I like the small group of students rather than a 20-30 students.
- No
- No
- This class made my first semester of first year a good experience.
- She is a good instructor!
- Favorite hands-on class!
- I would have this teacher be mentored by an experienced teacher like [deleted faculty name] to help her improve and enhance her course if she continues to teach. And [deleted faculty name] needs to watch how she talks to students because she knows how to hurt people and I think that needs to be addressed as well.
- Everything seemed to go smoothly.
- [Delete faculty name] the best teacher ever.
- Thank you [deleted faculty name]!
- No
- No
- Nothing else
- No
- The teacher should teach more instead of just watching YouTube for 1 hour in the morning and then telling us to go [deleted course name] whatever.
- More [deleted course name].
- No
- No
- None
