***Local Westland FBM Crop Summary***

---

**Rented Land**

Crop	Average	Production	Production Costs
	Yield	Costs	less gov't payment
Corn.....	183.44 bu.....	\$3.71.....	\$3.58
Soybeans.....	47.00 bu.....	\$8.94.....	\$8.80
Wheat.....	67.47 bu.....	\$7.09.....	\$6.55

**Owned Land**

Crop	Average	Production	Production Costs
	Yield	Costs	less gov't payment
Corn.....	189.03 bu.....	\$3.36.....	\$3.04
Soybeans.....	49.41 bu.....	\$7.71.....	\$7.16
Wheat.....	72.76 bu.....	\$5.63.....	\$5.15

## State Livestock Summary 2020

Dairy Finishing /Cwt	
Net Return	\$ 7.44
Average Daily Gain	2.42
Average Purchase weight	469
Average Sales Weight	1424
Average Feed Cost/Hd	\$ 769.59
Average Purchase Price/Hd	\$ 550.25
Average Sales Price/CWT	\$ 107.20

Dairy/Cow	
Milk Sold (lbs)	25285.00
Net Return	\$ 207.96
Total Direct & Overhead	
Expense/Cwt	\$ 14.38
Average Number of Cows	282.6
Feed Cost/CWT of Milk	\$ 9.59
Average Milk Price	\$ 18.41

Dairy Replacement Heifers/ HD	
Net Return	\$ (335.63)
Total Direct Expense	\$ 808.61
Total Direct & Overhead	\$ 913.13
Feed Cost	\$ 879.00
Death Loss	3.40

Beef Cow Calf/Cow	
Net Return	\$ (98.72)
Weaning Percentage	87.90
Average Weaning Weight	529
Feed Cost/Cow	564.72

Finish Beef/CWT	
Net Return	9.19
Average Daily Gain	2.51
Average Purchase Weight	720
Average Sales Weight	1458
Average Feed Cost/Hd	\$ 583.40
Average Purchase Price/CWT	\$ 149.00
Average Sales Price/CWT	\$ 121.82

Hogs Weaning to Finish/CWT Carcass Sold	
Net Return	9.46
Average Daily Gain	1.34
Average Purchase Weight	14
Average Sales Weight	269
Average Feed Cost/Hd	92.45
Average Purchase Price/Hd	41.83
Average Sales Price/CWT	93.88

## **Observations from 2021 Westland FBM Annual Report and 2022 Cashflows:**

### **Overall thoughts on 2021:**

1. 2021 was a year of rising corn and soybean prices driven by different weather events.
2. Draught was a major story locally. The summer was extremely dry for most of the area. Late summer (August) there started to be more rain for most of the Westland FBM area. October turned extremely wet around Herman and west.
3. Wind storms were also a major issue late in the growing season. Corn was laid flat and was difficult to harvest in some areas.
4. Even though the weather was challenging, yields for the most part were outstanding. Much better than anyone anticipated. Once individuals started combining, they were not sure where all of the bushels came from.
5. The trade war with China and Co-Vid 19 were still factors in the market place early in the year. As the year wore on, the weather took over as the major factor in the market place.
6. China continued their buying surge of US corn and soybeans. This began after the November 2020 election and continued through 2021.
7. South America experiencing a draught was also a major driver of commodity prices.
8. The last of the Co-Vid 19 pandemic government payments came in early April. CFAP -3.
9. Many producers took advantage of forgivable PPP loans that were offered to businesses in 2021. There were two rounds and were forgivable and non-taxable. These were offered by the Federal Government in response to the pandemic effects on the market place from 2020 to 2021. Typical amount of each loan was \$20,832.
10. Most farmers saw an accrual gain on crop that was not priced as of January 1, 2021.
11. The 2021 analysis saw gains much better than anticipated in the 2021 cashflows. These gains were mostly because of the accrual gain in 2020 grain that was marketed higher than anticipated on the cashflow, more government money (PPP & CFAP-3), higher prices & better yields than anticipated on the cash flow.
12. MNDAK had a much better year. Sugar prices were strong, yields were good, and extraction from the rebuilt plant seem to lead to better payments. Still hard for the sugarbeets to compete with the profitability of corn with much less input expense and labor.
13. The dairies in the area are having an effect as more individuals in the group are raising corn silage and some alfalfa. Individuals are looking for the manure as a cheaper source of fertilizer.

### **Referring to Net Comparison's page in the Westland Summary Book**

1. Gross Farm Income is the highest level (\$657,766) it has been since 2013.
2. Net Cash Farm Income is at the highest level (\$128,106) since 2014.
  - a. This is the cash available to pay family living, taxes, and make principle payments in the year.
  - b. \$64,644 of that money was from government payments (PPP, CFAP, & WHiP)
  - c. Still a big percentage of income is from government payments as has been for the last 4 years.
3. Inventory Change (\$108,043) is the largest since 2012.
  - a. More grain held in the bin as prices were rising at the end of the year.

- b. There are also issues getting new machinery because of the same issue. Consequently more equipment is getting used longer and being fixed instead of replaced.
- 5. Government payments per acre were down \$30 per acre.
- 6. Going into 2022, fertilizer is up sharply. \$230-\$250/acre is common if fertilizer was not bought before October.

### **Soybeans on Owned and Rented Land**

- 1. Yields were up 1.69 bpa from 2020 (48.41 bpa).
  - a. Right on the 5 year average of 48.28 bpa
- 2. Net return per acre was up \$50.43/acre compared to 2020.
  - a. Net return was \$169.20/acre which is the highest since 2012.
  - b. Net Return however was dwarfed by the net return on corn.
  - c. A lot of soybeans were sold out of the field while prices were over \$11.00/bushel.
  - d. Soybeans still on hand at the end of the year and not contracted were priced at \$13.00/bushel.
  - e. Average priced received by the producers ranged from \$11.00 to \$13.30/bushel.
  - f. Dryness in South America and Chinese demand has raised prices.
- 3. Cost for raising soybeans has increased \$18.81/acre from 2020 to 2021
  - a. Repairs were up \$5.00/acre
  - b. Fertilizer costs were up \$6.00/acre
  - c. Land Rent were up \$7.00/acre.
- 4. The number of acres of seed and edible bean acres among the group was down this past year.
  - a. However profitability of the edible bean acres grown was up in 2021.
  - b. Net return on Kidney and Navy beans in 2021 was similar to the corn return per acre.
- 5. Government payments on Soybean acres was down dramatically from 2020.
  - a. There were \$70.97 of government payments in 2020 and \$9.68 in 2021 per acre.
  - b. PPP money and CFAP was not included in the 2021 government payments.
  - c. Other farm income = CSP payments.
  - d. Government payment for 2022 crop was only the PLC payment for wheat base acres.

### **Wheat on Owned and Rented land**

- 1. Wheat had a much better year in 2022. Yield and price were up.
  - a. Wheat yield of 67.38 was the highest since 2017.
  - b. Yield was 15 bushel better than 2020.
  - c. Price was up \$3.35/bushel from the 2020 analysis.
- 2. Lack of profitability has eroded the number of acres among the group over the years.
- 3. Net return of \$121.39/acre was the highest since 2012.
  - a. Net return was up \$127.76/acre from 2020.
- 4. The dry weather was excellent for the yield and quality of the wheat crop.
- 5. Expenses were up for growing wheat from 2020 \$13/acre.
- 6. Wheat return per acre was still below return for corn and soybeans.

- b. Big difference from 2012 is that most of this grain was priced at end of the year or in early 2022.
  - c. More grain held again because of increased profitability and rising prices.
- 4. Net operating profit (Net cash Income + Inventory change) (\$260,852) up for the second year in a row.
  - a. Highest the operating profit has been since 2012.
  - b. Input suppliers have noticed and expenses will be up in 2022.
  - c. Working capital has rebounded and is at it's best levels since 2012 for most producers.
  - d. Machinery, parts, and land prices have gone in price as the year has gone on.
- 5. Land Rent both the median and average cost per acre was up.
  - a. Average was \$211.10 up from \$193.86 in 2020.
  - b. Median was \$178.82 up from \$168.66 in 2020.
  - c. Median is the middle of all the reported cost per acre (listed)
  - d. Average can be skewed by acres at too high or low compared to the majority of producers.
- 6. Net Worth change was double what it was in 2020 (\$288,693 compared to \$144,309).
  - a. Government payments were \$64,644 of that increase.
- 7. Term debt coverage (4.92) rose to the highest level since 2012.
  - a. Term debt coverage is the ability of the business to repay debt.
  - b. Must be above 1.0.
- 8. Family living was up (\$62,008) for a median family of 3.
  - a. Family Living was up as families started doing more activities as the effects of the pandemic started to wane.
- 9. Average of the producer in the Westland Farm Business Management Group is 47 and been farming for 23 years.

#### **Corn an Owned and Rented Land Reports:**

- 1. Yields were down 4 bushels from 2020.
  - a. Wide variety in yields (227 bpa to 34 bpa) depending on rain and wind.
  - b. Test weights were generally up and the quality of the corn was very good.
- 2. Other crop income is generally CFAP 3 payment.
- 3. Net return on rented ground was \$315.31/acre. Highest return per acre since 2012.
  - a. \$5.49 was the average price received. Unpriced bushels were put on the balance sheet at \$5.90/bushel at the end of the year. Priced bushels were put on the balance sheet at the price they were contracted for.
  - b. Highest average price since 2012.
  - c. Fertilizer was up \$10/acre from 2020. Fertilizer will be up considerably for 2022.
  - d. Overall corn income was up \$254/acre. Expenses were up \$20/acre.
- 4. Repairs were up \$19/acre of raised corn.
  - a. Parts are up as there are supply issues due to workers being out because of the pandemic.

## **Sugarbeets Owned and Rented**

1. Profitability returned to the MNDak Sugarbeet Cooperative after 5 negative years.
2. The crop was good and as a result the producers had to leave 5% in the field.
3. The improvements made in the plant seem to be working. Sugar percentage was up again and sugar extraction rates in the plant are up.
4. Sugarbeet price per ton was up again (\$44/ton) after reaching a low of \$25/ton in 2019.
5. Sugar price continues to rise as with all of the other commodities.
6. Return on a per acre basis (\$253.98) was second only to corn return per acre.
7. Unlike 2020, there was no government payment money that came into boost the return to profitability.
8. Cost of raising an acre of sugar beets rose \$28.17/acre from 2020.
9. Share price has stabilized but because of the profitability of corn and the shortage of labor, there doesn't seem to be any interest of new producers to add sugar beet acres.

## **Finish Cattle**

1. Cattle were more profitable than they have been the last 2 years.

## **Over all Thoughts going into 2022**

1. 2021 has a strong resemblance to 2012 with strong prices and really good yields.
  - a. A big difference from 2012 is the amount of grain that was priced as of January 2022 compared to January 2012. We should not see accrual losses we saw in 2013.
  - b. Input prices have lept up as they did at the end of 2012 going into 2013.
2. Prices have continued to rally as we go farther in to 2022.
  - a. The Ukrainian – Russian war has pushed prices to record levels. Volatility is as much as I have seen in my life time.
  - b. There are excellent opportunities to price 2022 crop at profitable levels if we get average production.
3. There is a wide disparity in fertilizer prices for 2022 crop.
  - a. Producers who booked fertilizer before October have a much lower cost.
  - b. There will be a \$100/acre fertilizer cost difference between the highest and lowest cost producer in the Westland Farm Management group in 2022.
  - c. There will be less soybean acres that will be fertilized next year due to cost.
4. Inflation is alive and well in the agriculture sector.
5. Availability of chemical, parts, and machinery are a concern.
6. Interest rates have crept higher and are one of the concerns going into 2022.
  - a. Most producers have locked in most of their long term loans that were on variable rates.
7. The labor shortage in manufacturing and Co-vid 19 effects have reduced the supply of parts and available new equipment.
  - a. New equipment has gone up considerably and there are long waits to even get the equipment.
  - b. Used equipment has gone up in relation to the absence of new equipment.

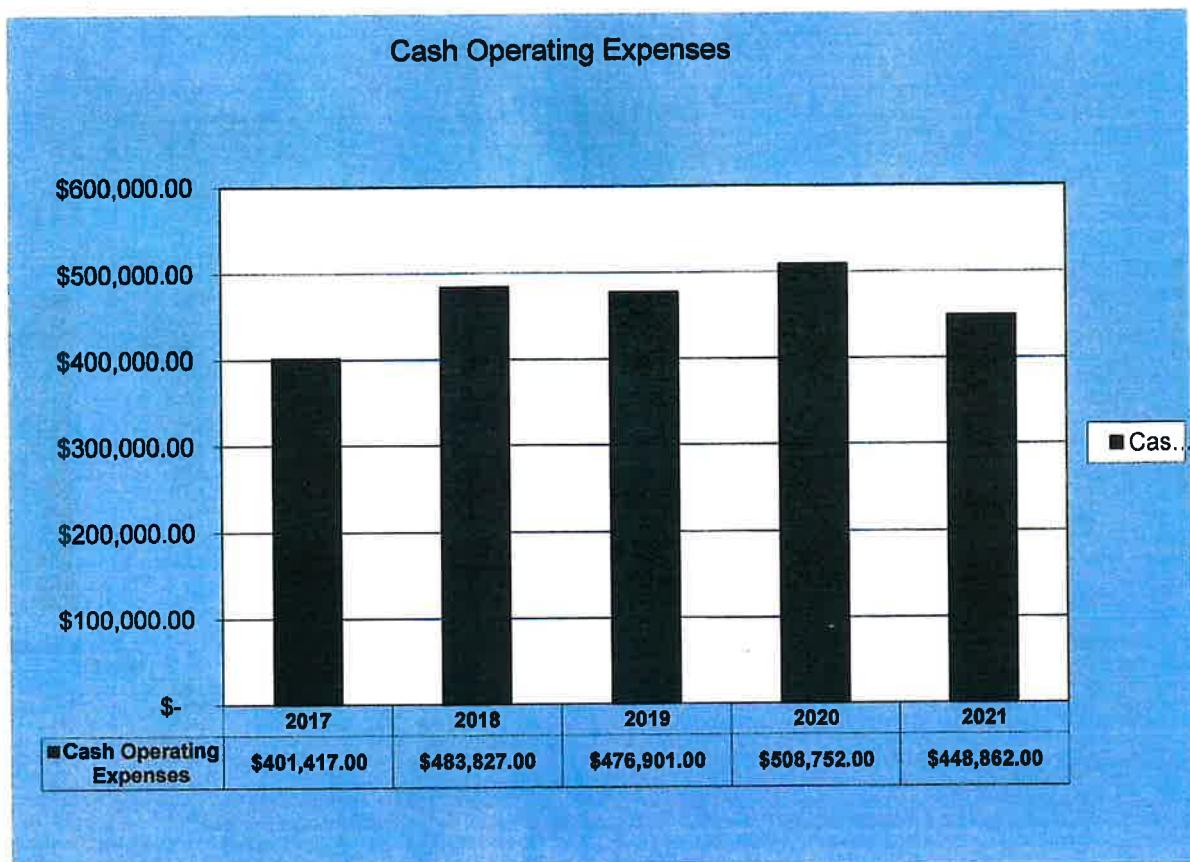

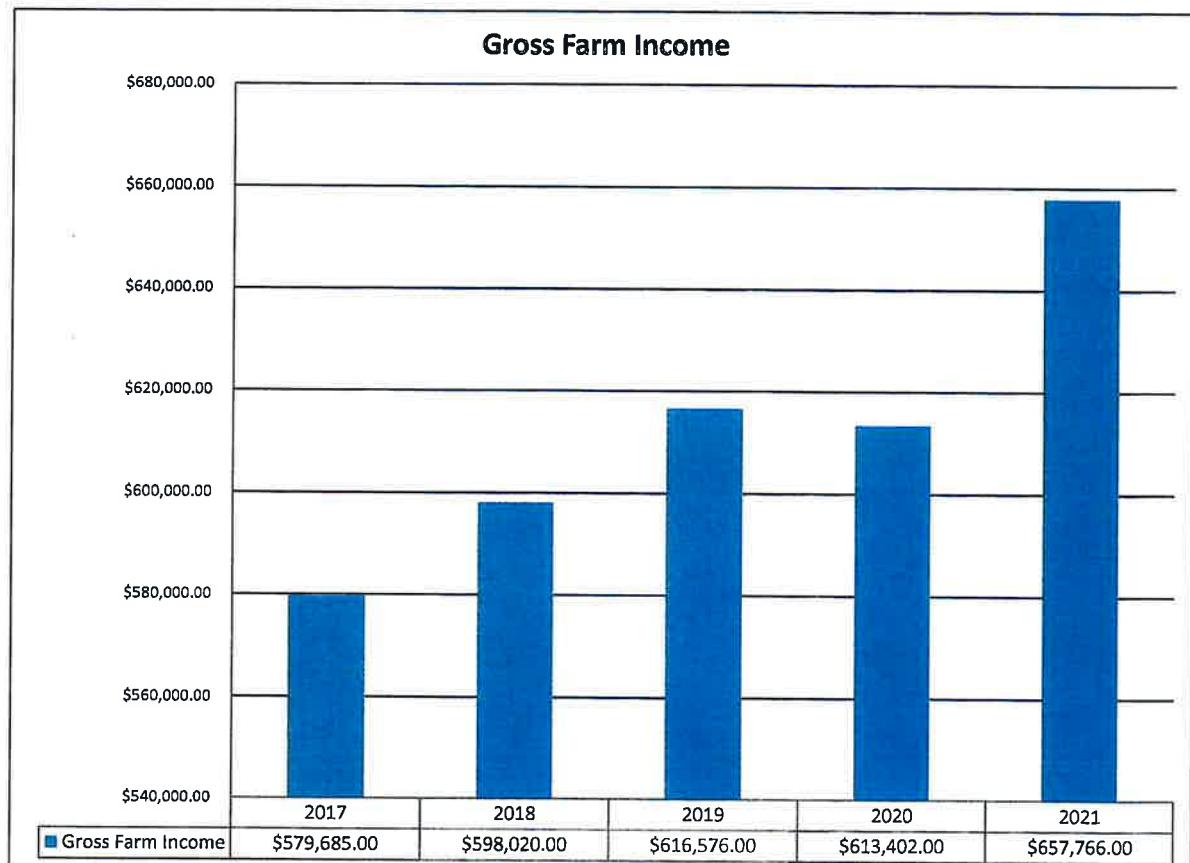

- c. Equipment is being repaired instead of new being bought. The repairs however are also quite expensive.
- 8. Even with the increase in costs of inputs, profitability looks strong for 2022.
- 9. Rising fuel costs are a concern for all sectors and transportation costs could continue to fuel the inflation.
- 10. Livestock producers and end users of the commodities are a big concern. We must keep them viable and profitable.
- 11. Cattle prices have looked favorable however feed cost continue to rise as corn costs continue to rise.
- 12. Cattle typically have been one to two years behind the commodities in profitability.
- 13. Discipline continues to be a necessity in these times.
  - a. Costs must be controlled as much as possible.
  - b. Machinery purchases must be done strategically and within the cashflow.
  - c. Purchases to strictly avoid taxes are the quickest ways to get yourself into trouble.
  - d. Remember to figure in the tax consequence for purchases that are not tax deductible (mostly land).
  - e. Working capital must be maintained!
- 14. We know from experience that this profitability will end. We must prepare and that starts with adequate working capital!
- 15. How far out to market crop is always a dilemma. Prices are good for 2022 where we have most of our inputs locked in. However for 2023, we cannot lock inputs and while prices look promising, we must not get too carried away until we know what inputs will do.
  - a. Selling a percentage of 2023 production is probably warranted. However, the big unknown is cost of inputs and breakevens of the 2023 crop.
- 16. Transitioning between generations is huge in the viability of the farm business.
  - a. If you're in your mid to late 50's or early 60's...time to get working on it!
  - b. If you're older than that, we are past due especially if there is another generation coming to farm.
  - c. I am happy to help you. I have worked with ways that have set the next generation well and some that have made it almost impossible for them to succeed.
  - d. It's a relief for everyone once it is done and in place.
  - e. Ignorance is not bliss for everyone!!
- 17. It is always my pleasure to work with all of you!
  - a. All of you do your best and a great job under the circumstances that you have.
  - b. We all have strengths and weaknesses. My job is to help you as much as I can to give you the tools to strengthen some of those weakness.
  - c. We cannot control everything and the best we can do is control the things that we can. We need to understand the difference and do the best we can.
- 18. Have a safe and Profitable 2022!

## Financial Summary - Detail 2021

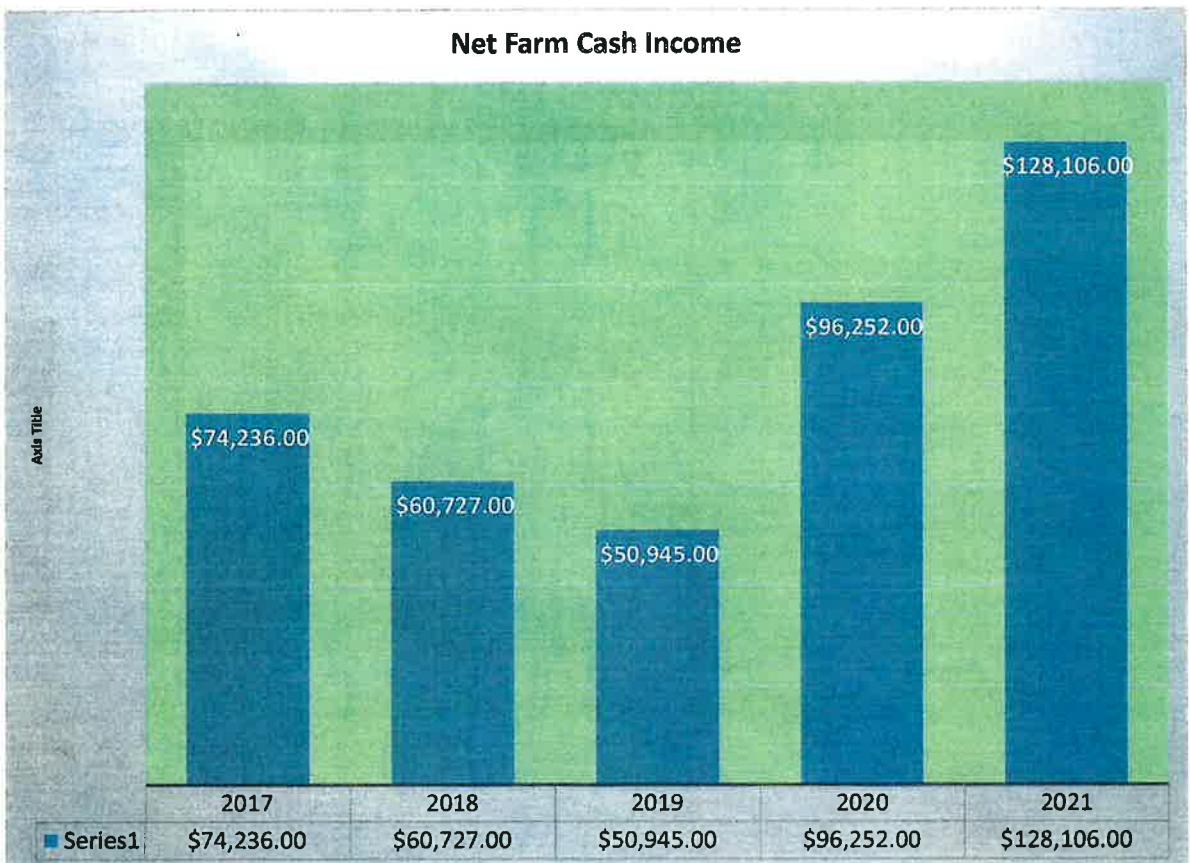

### Benchmark Report, 66 Farms

	Group Median	Count	10%	20%	30%	40%	50%	60%	70%	80%	90%	100%

## SUGARBEET YIELD VS. NET RETURN

# How Do Farms Stack Up Historically?

## Historical information for Southwest, South Central & Southeast Minnesota

The source of the green, yellow, and red credit risk rating is from "Weighing the Variables" by David M. Kohl.  
He considers the six (6) color coded factors below to be key indicators of financial credit quality.

	Green	Early Yellow	Late Yellow	Red
The farm business enjoys a competitive position				
The farm business has some early caution signs				
The farm business could face some major obstacles				

### Current Ratio

## ***How does your Farm Stack Up?***

### ***Southern Minnesota Farm Business Management Data***

Below is a summary of the low, average, and high farms using the 21 Financial Standards Measures. The numbers listed below are intended to provide a general overview of the farm situation for the current year and over a five year period. The current year data provides a snapshot of the conditions that represent the present while the five year data provides a longer term look at these factors to enable their use in potential decision making activities.

<b>Evaluation Chart</b>	<b>Low Farms</b>		<b>Average</b>		<b>High Farms</b>		<b>Your Farm</b>
