## The Minnesota State Colleges and Universities System

Minnesota West Community & Technical College is a member institution of the Minnesota State Colleges and Universities System. Minnesota State Colleges and Universities System is the largest single provider of higher education in the state of Minnesota. Minnesota State Colleges and Universities System has 31 public colleges and universities on 54 campuses and includes community colleges, technical colleges, comprehensive community and technical colleges, and universities.

"Minnesota West Community & Technical College is an open enrollment institution committed to equal opportunity. Students with limited English proficiency will have equal opportunity in the admissions process."

### Minnesota State Colleges & Universities

Wells Fargo Place  
30 7th St. E., Suite 350  
St. Paul, MN 55101-7804  
651-296-8012
History

Minnesota West Community & Technical College is a comprehensive community and technical college with five southwestern Minnesota campuses, located in Canby, Granite Falls, Jackson, Pipestone, and Worthington and four learning centers located in Fairmont, Marshall, Luverne, and Redwood Falls. Minnesota West provides students with the opportunity to earn an Associate degree, Diploma, or Certificate.

Minnesota West has a long standing tradition of providing quality liberal arts/transfer and technical education. On January 1, 1997, Worthington Community College and Southwestern Technical College merged as Minnesota West Community & Technical College.

The four campuses that comprised Southwestern Technical College began as local area vocational schools. The individual campuses have a history dating back 30 years. The campuses were originally under the jurisdiction of the local high school board of education and offered programs that served the local and regional economy. On July 1, 1985, the four area technical institutes at Canby, Granite Falls, Jackson, and Pipestone were officially merged to form Southwestern Technical Institute. The Minnesota State Legislature renamed all technical institutes as technical colleges on July 1, 1989. Southwestern Technical College was a member institution of the former Minnesota Technical College System and on July 1, 1995, became a member institution of the Minnesota State Colleges and Universities (MnSCU) system.

The former Worthington Community College was established in 1936 as an institution of higher education by and under the jurisdiction of the local school district to meet the post secondary education needs of the community and surrounding area. The first campus was located in the Worthington High School, and in 1966 the College moved to its current 76 acre campus located to the north of Lake Okabena. In 1964 Worthington Junior College was transferred to the State Junior College Board and was named Worthington State Junior College. In 1973 the name was changed to Worthington Community College and the College was placed under the jurisdiction of the Minnesota Community College System. On July 1, 1995, Worthington Community College became a member institution of the Minnesota State Colleges and Universities system.

Four centers in Fairmont, Marshall, Luverne, and Redwood Falls have been added to Minnesota West Community & Technical College to serve the students of those areas.

Mission Statement

Minnesota West Community & Technical College is dedicated to serving the varied educational needs of our diverse populations in affordable, accessible and supportive settings.

Mission Goals

1. To provide pre-professional and liberal arts courses which lead to Associate in Arts or Associate in Science degrees. The courses are designed to transfer to a four-year college or university and will apply toward a baccalaureate degree.
2. To provide certificate, diploma, and Associate in Applied Science degree courses for students working to develop and enhance occupational or technical competence leading toward employment or further education.
3. To provide learning opportunities for people of varying ages, backgrounds, and abilities with a particular focus and commitment to retraining and lifelong learning.
4. To provide continuing education, management education, and customized training for professions, businesses, and industries.
5. To provide facilities for programs, activities, conferences, teleconferences, and courses to meet community needs.
6. To provide extended educational opportunities by means of flexible scheduling and delivery.
7. To provide effective and efficient use of resources through partnerships with agencies, other educational institutions, businesses and industries.
8. To provide continuous improvement processes via assessment, evaluation and upgrading of programs and services, and to support the professional development of college personnel.
9. To provide the resources to meet the contemporary standards of facilities, informational resources, technology, and teaching strategies to ensure quality educational outcomes.
10. To provide comprehensive student services enabling academic and personal growth toward lifelong learning.
General Information

Affirmative Action/Nondiscrimination

It is the policy of Minnesota West Community & Technical College to undertake and maintain a program of affirmative and positive action and of nondiscrimination as determined by MnSCU policy 1B.1 in educational opportunities and employment. No person shall be discriminated against in the terms and conditions of employment, personal practices or access to and participation in, programs, services, and activities with regard to race, sex, color, creed, religion, age, national origin, disability, marital status, status with regard to public assistance, sexual orientation, or membership or activity in a local commission as defined by law. Contact Karen Miller, Affirmative Action Officer; 1011 First Street West; Canby, MN 56220. Phone 507-223-7252 or email karen.miller@mnwest.edu.

Individuals with Disabilities

It is the policy of the College to provide access to and encourage participation in programs, services, and activities to qualified individuals with known disabilities as required by Federal and State statutes.

Students with certain types of disabilities should be aware that some programs and courses require specific physical abilities. Please consult with the instructor and/or counselor for advisement and accommodations prior to enrollment.

College ADA Coordinator for employees is Karen Miller who can be reached at: karen.miller@mnwest.edu

College ADA Coordinator for students is Linda DeGriselles who can be reached at: linda.degriselles@mnwest.edu

Consumer Information/Student Right to Know

Minnesota West Community & Technical College, in compliance with the Title VI of the Educational Amendments of 1976 to the Higher Education Act and subsequent Federal Legislation, will provide and disseminate consumer information to all prospective and enrolled students. This information shall include, but not be limited to the following: admission requirements, financial aid programs, costs, job placement, probation policy, campus crime statistics, student retention, refund policy, and transfer. Students who do not have a high school diploma or GED can obtain one while attending Minnesota West. The Campus Dean, Registrar, or the Student Services staffs on each campus are designated as the persons available to all enrolled students and prospective students regarding consumer information. This information is made available upon request through publications and mailings.

Data Privacy

All actions concerned with data collected and filed or stored at the College shall be administered in compliance with the provisions of Minnesota Statutes, Section 13.01 to 13.87. The President or designee shall be the responsible authority concerning Directory Information or Public Data, Private Data, and Confidential Data. Requests to obtain data should be made under the Minnesota Government Data Practices Act and the College may require a fee to retrieve Public Data.

Under Section 13.04 of the MGDPA, individuals who are the subjects of government data have the right to access private data about themselves or to release this information to other individuals. The subject must make a request in writing and sign the required Minnesota West form for release of this data. There is no fee charged to the individual for accessing or releasing this data.

Accreditation and Approvals

Minnesota West Community & Technical College is a member of the Minnesota State Colleges and Universities System, which consists of 31 public colleges and universities on 54 campuses.

The College is accredited by the Higher Learning Commission, a Commission of the North Central Association of Colleges and Secondary Schools (NCA). View the institutional Self Study and the Request for Institutional Change for the Higher Learning Commission on our website in the “About Us” section.

NCA may be contacted at the following address:

Minnesota Transfer Curriculum and General Education

Students who complete the Minnesota Transfer Curriculum (MnTC) and then transfer to any other Minnesota public baccalaureate degree-granting university will have fulfilled all lower division general education requirements. There are ten goals within the required credits. One course may fulfill a maximum of two goals; however, credits will only be counted once in total.

Minnesota West Community & Technical College adheres to the General Education definition embedded in the Minnesota General Education Transfer Curriculum guide. Its mission and goals resonate to those ideals.

The MnTC is a framework that integrates a body of knowledge and skills with a study of contemporary concerns — all essential to meeting an individual’s social, personal and career challenges. Competencies needed are identified as common membership in the human community; personal responsibility for intellectual, lifelong learning; an awareness that we live in a diverse world; and the basic skills of discovery, integration, application, and communication.

Area 1. Communication

Goal: To develop writers and speakers who use the English language effectively and who read, write, speak, and listen critically. As a base, all students should complete introductory communication requirements early in their collegiate studies. Writing competency is an ongoing process to be reinforced through writing-intensive courses and writing across the curriculum. Speaking and listening skills need reinforcement through multiple opportunities for interpersonal communication, public speaking, and discussion.

Student Competencies: Students will be able to:
1. understand/demonstrate the writing and speaking processes through invention, organization, drafting, revision, editing, and presentation.
2. participate effectively in groups with emphasis on listening, critical and reflective thinking, and responding.
3. locate, evaluate, and synthesize in a responsible manner material from diverse sources and points of view.
4. select appropriate communication choices for specific audiences.
5. construct logical and coherent arguments.
6. use authority, point-of-view, and individual voice and style in their writing and speaking.
7. employ syntax and usage appropriate to academic disciplines and the professional world.

Area 2. Critical Thinking

Goal: To develop thinkers who are able to unify factual, creative, rational, and value-sensitive modes of thought. Critical thinking skills will be taught and used throughout the general education curriculum in order to develop students’ awareness of their own thinking and problem-solving procedures. To integrate new skills into their customary ways of thinking, students must be actively engaged in practicing thinking skills and applying them to open-ended problems.

Student Competencies: Students will be able to:
1. gather factual information and apply it to a given problem in a manner that is relevant, clear, comprehensive, and conscious of possible bias in the information selected.
2. imagine and seek out a variety of possible goals, assumptions, interpretations, or perspectives which can give alternate meanings or solutions to given situations or problems.
3. analyze the logical connections among the facts, goals, and implicit assumptions relevant to a problem or claim; generate and evaluate implications that follow from them.
4. recognize and articulate the value assumptions which underlie and affect decisions, interpretations, analyses, and evaluations made by ourselves and others.

Student Requirements: Students will fulfill this area by completing:
1. gather factual information and apply it to a given problem in a manner that is relevant, clear, comprehensive, and conscious of possible bias in the information selected.
2. imagine and seek out a variety of possible goals, assumptions, interpretations, or perspectives which can give alternate meanings or solutions to given situations or problems.
3. analyze the logical connections among the facts, goals, and implicit assumptions relevant to a problem or claim; generate and evaluate implications that follow from them.
4. recognize and articulate the value assumptions which underlie and affect decisions, interpretations, analyses, and evaluations made by ourselves and others.

Student Requirements: Students will fulfill this area by completing:
40 or more credits of general education. Most courses teach one or more of the critical thinking student competency areas.

Area 3. Natural Sciences

Goal: To improve students’ understanding of natural science principles and of the methods of scientific inquiry, i.e., the ways in which scientists investigate natural science phenomena. As a basis for lifelong learning, students need to know the vocabulary of science and to realize that while a set of principles has been developed through the work of previous scientists, ongoing scientific inquiry and new knowledge will bring
changes in some of the ways scientists view the world. By studying the problems that engage today’s scientists, students learn to appreciate the importance of science in their lives and to understand the value of a scientific perspective. Students should be encouraged to study both the biological and physical sciences.

Student Competencies: Students will be able to:
1. demonstrate understanding of scientific theories.
2. formulate and test hypotheses by performing laboratory, simulation, or field experiments in at least two of the natural science disciplines. One of these experimental components should develop, in greater depth, students’ laboratory experience in the collection of data, its statistical and graphical analysis, and an appreciation of its sources of error and uncertainty.
3. communicate their experimental findings, analyses, and interpretations both orally and in writing.
4. evaluate societal issues from a natural science perspective, ask questions about the evidence presented, and make informed judgments about science-related topics and policies.

Student Requirements: Students will fulfill this area by completing a minimum of two science courses:
1. One course must be from Biology:
   - BIOL 1110 Principles of Biology (4)
   - BIOL 1115 Human Biology (3)
   - BIOL 2201 Human Anatomy (4)
   - BIOL 2202 Human Physiology (4)
   - BIOL 2220 Animal Biology (4)
   - BIOL 2230 Plant Biology (4)
   - BIOL 2240 Genetics (3)
   - BIOL 2270 Microbiology (4)

2. One course must be from Chemistry or Physics:
   - CHEM 1100 Introduction to Chemistry (3)
   - CHEM 1101 General Inorganic Chemistry I (4)
   - CHEM 1150 Survey of Chemistry (4)
   - PHYS 1100 Survey of Physics (3)
   - PHYS 1201 Fundamentals of Physics I (4)
   - PHYS 1202 Fundamentals of Physics II (4)
   - PHYS 2121 General Physics I (5)

Area 4. Mathematical/Logical Reasoning

Goal: To increase students’ knowledge about mathematical and logical modes of thinking. This will enable students to appreciate the breadth of applications of mathematics, evaluate arguments, and detect fallacious reasoning. Students will learn to apply mathematics, logic, and/or statistics to help them make decisions in their lives and careers. Minnesota’s public higher education systems have agreed that developmental mathematics includes the first three years of a high school mathematics sequence through intermediate algebra. (Recommendation from the intersystem Mathematics Articulation Council. Adopted by all systems in February 1992.)

Student Competencies: Students will be able to:
1. illustrate historical and contemporary applications of mathematical/logical systems.
2. clearly express mathematical/logical ideas in writing.
3. explain what constitutes a valid mathematical/logical argument (proof).
4. apply higher-order problem-solving and/or modeling strategies.

Student Requirements: Students will fulfill this area by completing any one of the listed courses:
1. Any 3-5 credit Math course numbered MATH 1105 or higher:
   - MATH 1105 Intro to Probability and Statistics (4)
   - MATH 1107 Concepts in Math (3)
   - MATH 1111 College Algebra (3)
   - MATH 1113 Pre-Calculus (4)
   - MATH 1118 Applied Calculus (4)
   - MATH 1121 Calculus (4)

Area 5. History and the Social and Behavioral Sciences:

Goal: To increase students’ knowledge of how historians and social and behavioral scientists discover, describe, and explain the behaviors and interactions among individuals, groups, institutions, events, and ideas. Such knowledge will better equip students to understand themselves and the roles they play in addressing the issues facing humanity.

Student Competencies: Students will be able to:
1. employ the methods and data that historians and social and behavioral scientists use to investigate the human condition.
2. examine social institutions and processes across a range of historical periods and cultures.
3. use and critique alternative explanatory systems or theories.
4. develop and communicate alternative explanations or solutions for contemporary social issues.

Student Requirements: Students will fulfill this area by completing a minimum of 9 credits from three of the following areas:

Economics
- ECON 1101 Introduction to Economics (3)
- ECON 2201 Principles of Macroeconomics (3)
- ECON 2202 Principles of Microeconomics (3)

Geography
- GEOG 1100 Introduction to Geography (3)
- GEOG 1101 Introduction to Physical Geography (4)
Area 6. The Humanities and Fine Arts

Goal: To expand students' knowledge of the human condition and human cultures, especially in relation to behavior, ideas, and values expressed in works of human imagination and thought. Through study in disciplines such as literature, philosophy, and the fine arts, students will engage in critical analysis, form aesthetic judgments, and develop an appreciation of the arts and humanities as fundamental to the health and survival of any society.

Student Competencies: Students will be able to:
1. demonstrate awareness of the scope and variety of works in the arts and humanities.
2. understand those works as expressions of individual and human values within an historical and social context.
3. respond critically to works in the arts and humanities.
4. engage in the creative process or interpretive performance.
5. articulate an informed personal reaction to works in the arts and humanities.

Student Requirements: Students will fulfill this area by completing a minimum of 9 credits from three of the following departments (note: a minimum of two credits must be taken from each of the three countable areas):

**Art**
- ART 1101 Beginning Drawing (3)
- ART 1103 Display and Exhibition (1)
- ART 1114 Watercolor (3)
- ART 1115 Beginning Painting (3)
- ART 1118 Arts and Crafts (3)
- ART 1120 Art Appreciation (3)
- ART 1124 Introduction to Ceramics (3)
- ART 2230 Computer Graphics (3)
- *ART 2235 Special Topics (1-3)
- ART 2240 Art History (3)
- ART 2245 Art History II (3)

**English**
- ENGL 1105 Introduction to Literature (3)
- ENGL 1141 Writing and Reading Poetry (2)
- ENGL 1143 Writing and Reading Fiction (2)
- ENGL 2201 American Literature I (3)
- ENGL 2202 American Literature II (3)
- ENGL 2221 British Literature I (3)
- ENGL 2222 British Literature II (3)
- ENGL 2203 Midwestern Literature (3)
- ENGL 2231 Classical Mythology (2)
- *ENGL 2235 Special Topics in Literature (1-3)

**History**
- HIST 1111 Western Civilization I (3)
- HIST 1112 Western Civilization II (3)

**Humanities**
- HUM 2121 The Turbulent '60s (4)
- HUM 2201 The Many Faces of Mexico (2)

**Music**
- MUSC 1101 Fundamentals of Music (3)
- MUSC 1104 American Popular Music (3)
- MUSC 1105 Enjoying Music (3)
- MUSC 1110 Introduction to Rock Music (3)
- MUSC 1111, 1112, 2111, 2112 Chorale (1)
- MUSC 1131, 1132, 2131, 2132 Pop Singers (1)
- MUSC 1140, 1141, 2140, 2141 Piano Lessons (1)
- MUSC 1145, 1146, 2145, 2146 Vocal Lessons (1)

**Philosophy**
- PHIL 1101 Introduction to Philosophy (3)
- PHIL 1102 Philosophy of Religion (2)
- PHIL 2201 Introduction to Ethical Theory (1) and one of the following three: PHIL 2202 General Applied Ethics (1), PHIL 2205 Business Ethics (2), PHIL 2222 Medical Ethics (1)
- PHIL 2230 World Religions (3)

**Speech**
- SPCH 2210 Oral Interpretation (3)

**Theater**
- THTR 1101 Introduction to Theater (3)
- THTR 1102 Acting Basics (2)
- THTR 1104 Survey of Musical Theater (3)
- THTR 1105, 1106, 2105, 2106 Theater Production (1-3)
- THTR 2122 Introduction to Film (3)
- *THTR 2235 Special Topics (1-3)

* Special topics classes are presented to the Curriculum Committee prior to being taught. They are accepted as credits in a transfer curriculum area only if it is satisfactorily documented to the Curriculum Committee that more than 50 percent of the student competencies listed for that area are accomplished.

Area 7. Human Diversity

Goal: To increase students' understanding of individual and group differences (e.g., race, gender, class) and their knowledge of the traditions and values of various groups in the United States. Students should be able to
evaluate the United States' historical and contemporary responses to group differences.

Student Competencies: Students will be able to:
1. understand the development of and the changing meanings of group identities in the United States' history and culture.
2. demonstrate an awareness of the individual and institutional dynamics of unequal power relations between groups in contemporary society.
3. analyze their own attitudes, behaviors, concepts and beliefs regarding diversity, racism, and bigotry.
4. describe and discuss the experience and contributions (political, social, economic, etc.) of the many groups that shape American society and culture, in particular those groups that have suffered discrimination and exclusion.
5. demonstrate communication skills necessary for living and working effectively in a society with great population diversity.

Student Requirements: Students will fulfill this area by completing any one of the listed courses (2 credit minimum):
ENGL 1105 Introduction to Literature (3)
ENGL 2201 Survey of American Literature I (3)
ENGL 2202 Survey of American Literature II (3)
*ENGL 2235 Special Topics in Literature (2-3)
HIST 1101 American History I (4)
HIST 1102 American History II (4)
HIST 1121 World History I (3)
HIST 1122 World History II (3)
HUM 2201 The Many Faces of Mexico (2)
HUM 2121 The Turbulent 60's (4)
*HUM 2235 Special Topics in Humanities (2-3)
PSYC 1101 Introduction to Psychology (4)
PSYC 1150 Developmental Psychology (3)
SOC 1102 Social Problems (3)
SOC 1102 Social Problems (3)
SOC 2210 Marriage and the Family (3)
SOC 2224 Racial & Ethnic Minorities (3)
*SOC 2235 Special Topics in Sociology (2-3)

* Special topics classes are presented to the Curriculum Committee prior to being taught. They are accepted as credits in a transfer curriculum area only if it is satisfactorily documented to the Curriculum Committee that more than 50 percent of the student competencies listed for that area are accomplished.

Area 8. Global Perspective

Goal: To increase students’ understanding of the growing interdependence of nations and peoples and develop their ability to apply a comparative perspective to cross-cultural social, economic and political experiences.

Student Competencies: Students will be able to:
1. describe and analyze political, economic, and cultural elements which influence relations of states and societies in their historical and contemporary dimensions.
2. demonstrate knowledge of cultural, social, religious and linguistic differences.
3. analyze specific international problems, illustrating the cultural, economic, and political differences that affect their solution.
4. understand the role of a world citizen and the responsibility world citizens share for their common global future.

Student Requirements: Students will fulfill this area by completing any one of the listed courses for a minimum of 2 credits:
ART 2240 Art History I (3)
ART 2245 Art History II (3)
ENGL 2221 Survey of British Lit I (3)
ENGL 2222 Survey of British Lit II (3)
GEOG 1100 Intro to Geography (3)
HIST 1111 Western Civilization I (3)
HIST 1112 Western Civilization II (3)
HIST 1121 World History I (3)
HIST 1122 World History II (3)
NSCI 1100 Issues in the Environment (3)
PHIL 2230 World Religions (3),
PSCI 1101 Intro to Political Science (3)
SPAN 1101 Spanish I (4)
SPAN 1102 Spanish II (4)
SPAN 2201 Spanish III (4)
SPAN 2202 Spanish IV (4)

Area 9. Ethical and Civic Responsibility

Goal: To develop students’ capacity to identify, discuss, and reflect upon the ethical dimensions of political, social, and personal life and to understand the ways in which they can exercise responsible and productive citizenship. While there are diverse views of social justice or the common good in a pluralistic society, students should learn that responsible citizenship requires them to develop skills to understand their own and others’ positions, be part of the free exchange of ideas, and function as public-minded citizens.

Student Competencies: Students will be able to:
1. examine, articulate, and apply their own ethical views.
2. understand and apply core concepts (e.g., politics, rights and obligations, justice, liberty) to specific issues.
3. analyze and reflect on the ethical dimensions of legal, social, and scientific issues.
4. recognize the diversity of political motivations and interests of others.
5. identify ways to exercise the rights and responsibilities of citizenship.
Student Requirements: Students will fulfill this area by completing any one of the listed courses for a minimum of 2 credits:
PHIL 2201 Introduction to Ethical Theory (1)
and one of the following three: PHIL 2202 General Applied Ethics (1), PHIL 2205 Business Ethics (2), PHIL 2222 Medical Ethics (1)
PSCI 1201 American Government and Politics (3)
PSCI 2202 State and Local Government (3)

Area 10. People and the Environment
Goal: To improve students’ understanding of today’s complex environmental challenges. Students will examine the interrelatedness of human society and the natural environment. Knowledge of both biophysical principles and sociocultural systems is the foundation for integrative and critical thinking about environmental issues.

Student Competencies: Students will be able to:
1. explain the basic structure and function of various natural ecosystems and of human adaptive strategies within those systems.
2. discern patterns and interrelationships of biophysical and sociocultural systems.
3. describe the basic institutional arrangements (social, legal, political, economic, religious) that are evolving to deal with environmental and natural resource challenges.
4. evaluate critically environmental and natural resource issues in light of understandings about interrelationships, ecosystems, and institutions.
5. propose and assess alternative solutions to environmental problems.
6. articulate and defend the actions they would take on various environmental issues.

Student Requirements: Students will fulfill the area by completing any one of the listed courses (2 credit minimum):
NSCI 1100 Issues in the Environment (3)
PSCI 2210 Environmental Politics (3)
GEOG 1101 Intro to Physical Geography (3)
Transfer information

Preparing for Transfer
Students currently enrolled at Minnesota West Community & Technical College:

1. Discuss plans with the campus transfer specialist.
2. Review the information on the Minnesota Transfer Web site at http://www.mntransfer.org/
3. Call or visit intended transfer college.
4. Obtain the following materials and information: college catalog, transfer brochure, course syllabi, information on admissions criteria and on materials required for admission (e.g., portfolio, transcripts, test scores).
5. Review these materials and make an appointment to talk with an advisor/counselor. Bring a current college transcript for the admission counselor, transfer specialist and department advisor to review. Transcripts from any college that is part of the Minnesota State Colleges and Universities (MnSCU) system are available electronically for the advisors to view.

Understanding How Transfer Works
1. The receiving college or university decides which credits transfer and whether those credits meet its degree requirements. The accreditation of both the sending and the receiving institution can affect the transfer of the credits earned.
2. Institutions accept credits from courses and programs like those they offer. They look for similarity in course goals, content, and level. “Like” transfers to “like.”
3. Not everything that transfers counts toward graduation. Baccalaureate degree programs usually count credits in three categories: general education, major/minor courses and prerequisites, and electives.
4. If there are changes in career goals or major, student may be able to complete all degree requirements within the usual number of graduation credits.
5. Apply for transfer admission as early as possible and prior to the deadline. Be sure to enclose application fees and other required documents.
6. If student has not heard from the intended college of transfer after one month, they should call or check on the application’s status.
7. The transfer college will send a written evaluation of which courses transfer and which do not. How courses specifically meet degree requirements may not be decided until orientation or a major is chosen.
8. For questions about evaluation, call the college and speak with the transfer specialist. If not satisfied, student may appeal.

Your Rights as a Transfer Student
1. A clear, understandable statement of an institution’s transfer policy.
2. A fair credit review and an explanation of why credits were or were not accepted.
3. A copy of the formal appeals process.
4. A review, on request, of student eligibility for financial aid or scholarships.

u.select
u.select is a free web-based transfer information system that can be accessed by any Internet user (www.transfer.org/uselect/login.htm).

Users have direct access to information on courses, course equivalencies, and program requirements among participating institutions across Minnesota and the United States. u.select enables students to immediately see how courses will transfer and apply towards a degree at a u.select institution.

Using u.select, students can
- view course equivalency guides to see how courses transfer from one institution to another.
- view degree program requirements to see what is expected to complete a particular degree program.
- maintain a list of courses and grades for use in running a planning guide.
- run an unofficial planning guide (degree audit) to see how courses may transfer and apply to a degree program.
- view course descriptions directly from u.select or from a u.select institution’s Web site.

Note:
Information obtained through u.select should be considered unofficial and must be verified through the Records Department of the degree granting school.
The following degrees and awards are available through Minnesota West:
Associate in Arts (A.A.)
Associate in Science (A.S.)
Associate in Applied Science (A.A.S.)
Diploma
Certificate

**Associate in Arts (A.A.) Degree Requirements**

Minnesota West offers the first two years of course work which is designed for transfer to a baccalaureate degree at four year colleges and universities. Some examples of majors for which Minnesota West offers the first two years of preparation (A.A.) are listed below. The following are examples:

- **Art**
- **Biology-Fish-Wildlife**
- **Business – PreBusiness**
- **Business Education**
- **Chemistry**
- **Chiropractic**
- **Computer Information Science**
- **Economics**
- **Elementary Education**
- **Environmental Sciences**
- **Health**
- **Home Economics**
- **Law Enforcement – Corrections**
- **Law – PreLaw**
- **Liberal Arts**
- **Mathematics**
- **Occupational Therapy**
- **Physical Education**
- **Pre-Dental**
- **Psychology**
- **Recreational/Parks**
- **Administration**
- **Secondary Education**
- **Sociology**
- **Special Education**

The Associate in Arts Degree can be used to fulfill the freshman-sophomore general education requirements at all state universities in Minnesota, at all colleges within the University of Minnesota and at most other four-year colleges and universities. The degree is the basic graduation award toward which most students will work if they intend to transfer. It emphasizes a broad general education.

**To earn an A.A. degree,** students must complete the following requirements:

1. A minimum of 60 credits, 20 of which must be earned at Minnesota West Community & Technical College.
2. A grade point average of 2.00 (“C”) or better.
3. A minimum of 40 credits of general education. This fulfills the Minnesota Transfer Curriculum. The credit requirements in each of the ten listed areas of emphasis must be met. Courses may count in no more than two of the areas of emphasis, but no individual course can count more than once in Areas 1-6. One-credit courses will apply to the MnTC only if two or more one-credit courses are completed in the same discipline (i.e. two semesters of Chorale or two semesters of Theater Production).
4. Fulfill a minimum of 4 credits from two of the three areas. HLTH 1101, CSCI 1102, or any Physical Education course.
5. Electives sufficient to total 60 credits.

**Associate in Science (A.S.) Degree Requirements**

Minnesota West Community & Technical College offers the first two years of various majors leading to the baccalaureate or professional degree in several technical areas. This list is not all-inclusive. Students may work toward the Associate in Science (A.S.) degree with one or more of the following as their major field:

- **Agriculture**
- **Agri. Business**
- **Ag Production Management**
- **Business Management**
- **Child Development**
- **Computer Applied Technology**
- **Computer Science**
- **Food Science**
- **Forestry/Natural Resources**
- **Human Services**
- **Individualized Studies**
- **Law Enforcement**
- **Network Specialist**
- **Plant Science, GIS/GPS**
- **Pre-Dentistry**
- **Pre-Engineering**
- **Pre-Optometry**
- **Pre-Pharmacy**
- **Registered Nurse**
- **Web Development**

Students planning to continue their education in engineering, medicine, medical technology, pharmacy, veterinary medicine and other such fields are advised to carefully plan their programs with a counselor. In such cases, students are encouraged to follow the requirements of the institution to which they will be transferring.

**To earn an A.S. degree,** students must complete the following requirements:

1. Successful completion of 60 semester credits of which at least 20 must be earned at Minnesota West Community & Technical College.
2. A grade point average of 2.0 (“C”) or better.
3. A minimum of 30 credits selected from at least 6 of
the 10 goal areas in the Minnesota Transfer
Curriculum.
4. Fulfill at least a 30 credit core of technical courses
unique to the program being completed.

**Associate in Applied Science (A.A.S.)
Degree Requirements**

The Associate in Applied Science Degree is granted for
successful completion of occupational programs. The
A.A.S. career programs are designed to prepare
students for entry into chosen occupations. An A.A.S.
degree may be designed to transfer to a related
baccalaureate major. Students planning to continue for
a four-year degree should be aware that acceptance of
degree/technical credits at the four-year institution is
dependent upon the policies of the institution.

**To earn an A.A.S. degree,** students must complete the
following requirements:

1. 60-72 semester credits, 20 of which must be earned
   at Minnesota West Community & Technical College.
2. A grade point average of 2.0 ("C") or better.
3. 30 semester credits shall be program related,
   occupational or technical credits.
4. 25% of total semester credits must be in general
   education, selected from three of the ten goal areas
   of the Minnesota Transfer Curriculum.

**Diploma Requirements**

A diploma may be awarded for successful completion of
a program intended to provide students with
employment skills. The diploma programs are identified
in the Programs of Study section of the catalog and
require:

1. Between 30-72 semester credits.
2. General education courses as part of the program
   as established through consultation with the
   program advisory committee if diplomas are
   awarded for 45 credits or more.
3. 15% of the credits in general education if diplomas
   are awarded for under 45 credits.
4. At least 1/3 (33%) of the credits to be completed at
   Minnesota West.
5. A grade point average of 2.0 ("C") or better.

**Certificate Requirements**

1. 9 - 30 semester credits.
2. 0 general education courses required
3. 100% of credits shall be completed at Minnesota
   West for certificates 9-15 credits in length and at
   least 12 credits for certificates 16-30 credits in
   length.
4. A grade point average of 2.0 ("C") or better is
   required.

**Honorary Degree**

Honorary degrees may be awarded by Minnesota West
Community & Technical College. The College may
award an honorary degree based upon the intended
recipient’s field(s) of contributions, achievement,
service, and distinction.
Programs of Study

Accountant, A.A.S.

Locations: Canby, Granite Falls, Jackson, Pipestone, Worthington and Online

Accountants examine, analyze and interpret accounting data for the purpose of giving advice and preparing financial statements. Accountants also post details of business transactions, such as receipts, disbursements and payroll.

- **ACCT 1104** Special Projects 1
- **ACCT 1110** Payroll Accounting 3
- **ACCT 1115** Computerized Acct Applications I 2
- **ACCT 1120** Spreadsheet Concepts & Applications 2
- **ACCT 1122** Database Concepts & Applications 2
- **ACCT 2100** Intermediate Accounting I 4
- **ACCT 2101** Intermediate Accounting II 2
- **ACCT 2105** Auditing 3
- **ACCT 2110** Income Tax I 4
- **ACCT 2115** Cost Accounting I 4
- **ACCT 2120** Fund/Nonprofit Accounting 3
- **ACCT 2125** Computerized Acct Applications II 2
- **ACCT 2130** Intermediate Accounting III 2
- **ACCT 2135** Internship 2
- **ADSA 1132** Calculators 1
- **BUS 2201** Principles of Accounting I 4
- **BUS 2202** Principles of Accounting II 4
- **BUS 2241** Business Law and Ethics 3
- **BUS 1104** Business Math 3
- **CSCI 1102** Introduction to Microcomputers 3
- **GSCL 1105** Job Seeking Skills 1

General Education Requirements 20
- **ENGL 1101** Composition I 3
- **ECON 2201** Principles of Macro Economics 3
- **NSCI 1100** Issues in the Environment 3

Humanities Electives - Art, Foreign Languages, 3
- Literature, Music, Philosophy, Theater, Western Civilization

General Education Electives 8
- English, Biology, Chemistry, Math above 1000 level, Physics, Natural Science, Art, Foreign Language, Literature, Music, Philosophy, Theater, Western Civilization, Economics, Geography, History, Political Science, Psychology, and Sociology

Total Credits 73

Accountant, Diploma

Locations: Canby, Granite Falls, Jackson, Pipestone, Worthington and Online

Accountants examine, analyze and interpret accounting data for the purpose of giving advice and preparing financial statements. Accountants also post details of business transactions, such as receipts, disbursements and payroll.

- **ACCT 1104** Special Projects 1

**Receptionist, Certificate**

**Locations: Canby, Granite Falls, Jackson, Pipestone, Worthington, and Online**

Receptionists perform a wide variety of office tasks such as: keyboarding or typing business correspondences, reports, business forms, and other documents using word processing equipment. They also greet customers and other visitors, determine their needs and refer callers to the person who can help them. When not busy with callers, they may type, file, operate a switchboard, open and sort mail, schedule appointments, prepare travel vouchers and do simple bookkeeping.

**Agriculture, A.S.**

**Location: Worthington**

Students selecting this option can transfer to upper division institutions with majors in several broad agriculture areas. Students are encouraged to review the requirements of the College to which they intend to transfer and discuss their plans with a counselor or the instructors in that area. The following specific requirements are designed to help students attain the basic transfer requirements for most four-year institutions offering agriculture.

1. Successful completion of a minimum of 60 credits, 20 of which must be earned at Minnesota West Community & Technical College.
2. A grade point average of 2.00 ("C") or better.
3. Meet the minimum of 30 credits of general education as required by the A.S. degree.
4. Fulfill a minimum of 30 credits of core technical courses unique to the agriculture program in the transfer institution, including a minimum of 18 credits in agriculture.

**Agriculture Business, A.S.**

**Location: Worthington**

This two-year program is designed to prepare students for employment in agri-business or for continuing their education at a four-year institution. Graduates of this program may find job opportunities in sales, services, and management positions in agriculture related firms and industries. Students who plan to transfer are encouraged to review the requirements of the transfer institutions and plan their programs accordingly. Students in this program will
receive the A.S. degree upon successful completion of the following requirements and suggested courses:

1. Successful completion of a minimum of 60 credits, 20 of which must be earned at Minnesota West Community & Technical College.

2. A grade point average of 2.00 ("C") or better.

3. Meet the minimum of 30 credits of general education as required by the A.S. degree.

4. Fulfill a minimum of 30 credits of core technical courses in the areas of business and agriculture from the following:

**Business Courses - a minimum of 12 credits including:**
- BUS 1101 Introduction to Business 4
- BUS 2201 Principles of Accounting I 4
- AGRI 2251 Principles of Farm & Ranch Mgmt 4

**Agriculture Courses - a minimum of 18 credits including an Agri-business internship of at least 2 credits. Agriculture credits may be chosen from the following:**
- AGRI 1101 Intro to Animal Science 3
- AGRI 1102 Principles of Agronomy 3
- AGRI 1103 Introduction to Soil Science 3
- AGRI 1110 Introduction to Horticulture 3
- AGRI 1121 Dairy Technician 2
- AGRI 1125 Custom Application 2
- AGRI 1151 Farm Records & Bus. Analysis 4
- AGRI 1152 Ag Marketing & Pricing 3
- AGRI 2201 Principles of Animal Nutrition 3
- AGRI 2202 Weed Control 3
- AGRI 2203 Soil Fertility & Fertilizers 3
- AGRI 2204 Intro to GPS/GIS 3
- AGRI 2212 Corn & Soybean Production 3
- AGRI 2214 Machinery Principles & Mgt. 3
- AGRI 2216 Introduction to Meat Science 3
- AGRI 2235 Special Topics in Agriculture 1-3
- AGRI 2251 Principles of Farm & Ranch Mgmt. 4
- AGRI 2299 AGRI-Business Internship 2-8

**Agriculture Business Management, A.A.S.**

**Location: Worthington**

This two year program is designed to prepare students for employment in agribusiness. Graduates may find employment opportunities in sales, services, and management positions in the Agriculture business sector.

- ENGL 1101 Composition I 3
- ECON 2201 Macro Economics 3
- ECON 2202 Micro Economics 3

- AGRI 2299 Internship 2-8

*Electives include AUTO 1194 and AUTO 1195.

**Agriculture Business Marketing, A.A.S.**

**Location: Worthington**

A.A.S. students selecting this option are looking to seek employment upon completion of this degree. This degree will provide the student with the skills necessary to work in the Agriculture business area. The areas of possible employment include, but are not limited to, ag sales and services, with skills necessary for seeking entry-level management positions.

**General Education Requirement**

- ENGL 1101 Composition I 3

- ENGL 2276 Technical Writing 3
- CSCI 1102 Introduction to Microcomputers 3
- AGRI 2299 Internship 2-8

*Electives include AUTO 1194 and AUTO 1195.

**Agriculture - Plant Science GIS/GPS, A.S.**

**Location: Worthington**

The Plant Science GIS/GPS Associate in Science degree is designed to provide students with several options. One option is a career in the emerging field of Precision Agriculture. Examples of employment would include soil griding, nutrient management planning and variable rate application. The second option allows the student to continue on to a Bachelor's degree in this field with an emphasis in Agronomy.

- AGRI 1102 Principles of Agronomy 3
- AGRI 1103 Introduction to Soil Science 3
- AGRI 2202 Weed Control 3
- AGRI 2203 Soil Fertility & Fertilizers 3
- AGRI 2204 Intro to GPS/GIS 3
- AGRI 2212 Corn & Soybean Production 3
- AGRI 2214 Machinery Principles & Mgt. 3
- AGRI 2216 Introduction to Meat Science 3
- AGRI 2235 Special Topics in Agriculture 1-3
- AGRI 2251 Principles of Farm & Ranch Mgmt. 4
- AGRI 2299 AGRI-Business Internship 2-8

*Electives include AUTO 1194 and AUTO 1195.

**Total Credits** 64

**Total Credits** 64
**Agriculture - Precision Agriculture Application**

**Technician, Certificate**

**Agriculture - Production Agriculture, Diploma**

**Location: Worthington**

This diploma allows the student to immediately enter the field of Production Agriculture. The student’s primary focus with this diploma is twofold. The learner will either enter the workforce in direct support of production agriculture such as seeking employment at an elevator or working as an employee or entrepreneur in livestock and/or crop production.

**Agriculture Production, A.A.S.**

**Location: Worthington**

This A.A.S. degree in Agriculture Production is designed for the student whose career is in production Agriculture. This degree has two options, one is an Agronomy emphasis and the other option is an emphasis in Animal Science. The student will focus on course and lab work closely aligned to prepare the student to enter this field. This program is composed of many courses in Agriculture leading to a graduate with extensive preparation in Production Agriculture.

**Agriculture Production Management, A.S.**

**Location: Worthington**

This two-year program is designed to prepare students for employment in production agriculture as farm operators or in fields of employment related to farm production or for continuing their education at a four-year institution. Students who plan to transfer are encouraged to review the requirements of the transfer institution and plan their programs accordingly. Students in this program will receive the A.S. degree upon successful completion of the following requirements and suggested courses:

1. Successful completion of a minimum of 60 credits, 20 of which must be earned at Minnesota West Community & Technical College.
2. A grade point average of 2.00 ("C") or better.
3. Meet the minimum of 30 credits of general education as required by the A.S. degree.
4. Fulfill a minimum of 30 credits of core technical courses in Agriculture. An agriculture production management internship of at least 2 credits is required.

Art, A.A.

Location: Worthington

The following is a suggested Minnesota Transfer Curriculum (MnTC) program for students interested in obtaining a four-year degree in art.

ENGL 1101 Composition I 3
SPCH 1101 Introduction to Speech 3
Choose one of the following: 3
ENGL 1102 Composition II 3
ENGL 2243 Composition: Creative Writing 3
ENGL 2276 Composition: Technical Writing 3

Social Science Electives** 3-6
Biological Electives 3-4
ART 1101 Beginning Drawing 3
ART 1115 Beginning Painting 3
ART 2240 Art History 3
ART 2245 Art History II 3
Choose one of the following: 3-4
NSCI 1100 Issues in the Environment 3
PSCI 2210 Environmental Politics 3
GEOG 1101 **Intro to Physical Geography 4

Students choose one of the following which are NSCI, PSCI or GEOG:

Chemistry or Physics Electives 3-5
Math Electives 3
MUSC 1105 Enjoying Music 3
HIST 1111 Western Civilization I 3
HIST 1112 Western Civilization II 3
ART 1124 Introduction to Ceramics 3
ART 2215 *Intermediate Ceramics 3
ART 1103 *Display and Exhibition 1
PSYC 1101 Introduction to Psychology 4

Total Credits 60

Fulfill a minimum of 4 credits from two of the three areas. HLTH 1101, CSCI 1102, or any Physical Education course.

* Consult counselor/advisor
**If either PSCI 2210 or GEOG 1101 is taken to meet Areas 5 and 10, only three credits in SOC SCI is required.

Auto Body, Rod, Custom & Restoration, Diploma

Location: Granite Falls

The Auto Body, Rod, Custom and Restoration industries offer a variety of career tracks that allow technicians to immediately see the results of their efforts. Technicians in each of these areas may repair classic damaged vehicles to their "pre-accident condition ". They may also be involved in the complete construction or different phases in the construction of a "hot rod" or "custom car ". The technician may also be called upon to perform the "restoration" of a classic car or muscle car.

Students in the two year diploma program spend the first year gaining valuable hands-on experience in areas such as welding, sheet metal repair or fabrication, fillers, adhesives and complete refinishing. Students that choose to continue through the second year of training learn the skills of advanced sheet metal fabrication, mechanical systems, chassis, body and frame modification, as well as color matching spot repairs, custom painting, automotive electrical systems and basic auto upholstery. Diploma Students also are required to complete 9 credits of General Studies or General Education Electives.

General Studies/General Education Electives 9
TRAB 1200 Basic Automotive Welding 3
TRAB 1206 Plastic Filler & Adhesives 3
TRAB 1215 General Body Lab 5
TRAB 1240 Intro to Auto Body 3
TRAB 1250 Overall Color Application 3
TRAB 1255 Assorted Vehicle Technology 4
TRAB 1260 Vehicle Construction 3
TRAB 1265 Introduction to Color 3
TRAB 2100 Color Matching & Blending/ Spot Repairs 3
TRAB 2111 Auto Body Mechanical Repairs 3
TRAB 2112 Auto Body Electrical 3
TRAB 2130 Custom Paint Layout & Applic 4
TRAB 2210 Metal Fabrication 3
TRAB 2215 Modified Vehicle Construction I 4
TRAB 2222 Advanced Metal Pars Fabrication 2
TRAB 2230 Modified Vehicle Construction II 4-5
TRAB 2235 Basic Auto Upholstery & Trim 3
TRAB 2260 Specialty Body Modifications 3
Total Credits 68

Auto Body, Rod & Custom, Certificate

Locations: Granite Falls

TRAB 2100 Color Matching & Blending/ Spot Repairs 3
TRAB 2111 Auto Body Mechanical Repairs 3
TRAB 2112 Auto Body Electrical 3
TRAB 2130 Custom Paint Layout & Applic 4
TRAB 2210 Metal Fabrication 3
TRAB 2215 Modified Vehicle Construction I 4
TRAB 2222 Advanced Metal Pars Fabrication 2

TRAB 1260 Vehicle Construction 3
TRAB 1265 Introduction to Color 3
TRAB 2210 Metal Fabrication 3
Total Credits 30
Automotive Technology, A.A.S.

Locations: Jackson

The automotive technician inspects, tests and diagnoses vehicles to determine necessary maintenance and repair. They drive vehicles analyzing specific systems such as: the brake system, suspension system, and transmission/driveline systems. They also analyze engines for cylinder compression and fuel consumption, while listening for sounds indicative of malfunctions. The automotive technician uses advanced diagnostic data to perform all maintenance and repairs. Using micrometers, calipers and thickness gauges, the technician can measure a component for excessive wear. Specific components are often disassembled for further inspection and evaluation; these components include the engine, transmission and differential.

AUTO 1100 Intro to Transportation 2
AUTO 1111 Electrical 4
AUTO 1120 Air Conditioning 2
AUTO 1121 Adv. Heating & Air Conditioning 2
AUTO 1126 Steering and Alignment 4
AUTO 1131 Brakes 4
AUTO 1136 Engine Technology & Lab 5
AUTO 2190 Summer Internship (after 2nd semester) 4 or 6

General Education - 18 credits as follows:
ENGL 1101 Composition I, 3 credits
NSCI 1110-Issues in the Environment, 3 credits
PSYC 1101-Intro to Psychology, 4 credits
Humanities Electives, 3 credits; Art, Foreign Language, Literature, Music, Philosophy, Theatre, Western Civilization
General Education Electives - 5 credits as follows:
English, Biology, Chemistry, Math above 1000 level, Physics, Natural Science, Art, Foreign Language, Literature, Music, Philosophy, Theater, Western Civilization, Economics, Geography, History, Political Science, Psychology, and Sociology

Total Credits 72

Automotive Technician, Diploma

Locations: Jackson

The automotive technician inspects, tests and diagnoses vehicles to determine necessary repair required. Technicians start engines and listen for sounds indicative of malfunctions. They drive vehicles noting performance of parts such as clutch, gears and brakes. They also analyze the motor for cylinder compression, fuel consumption, wheel alignment, and steering using a variety of testing devices. The automotive technician plans work procedures using charts, technical manuals and experience. A variety of lifting devices are used to gain access to the underside of vehicles. Disassembling units, such as engines, transmissions and differentials to inspect parts for wear is also done by technicians. Wear will be measured by using micrometers, calipers, and thickness gauges. Technicians may repair and replace parts. General auto service of vehicles may also be a part of the automotive technician’s duties.

AUTO 1100 Intro to Transportation 2
AUTO 1111 Electrical 4
AUTO 1120 Air Conditioning 2
AUTO 1121 Adv. Heating & Air Conditioning 2
AUTO 1145 Engine Performance I 2
AUTO 1126 Steering/Suspension/Alignment 4
AUTO 1131 Brakes 4
AUTO 1136 Engine Technology & Lab 5
AUTO 2190 Summer Internship (after 2nd semester) 4
AUTO 2106 Automatic Transmissions 5
AUTO 2112 Manual Drive Train & Axles 5
AUTO 2121 Engine Performance II 5
AUTO 2122 Advance Engine Performance III 5
AUTO 2145 Body Computer Controlled Electrical Systems 5

General Education or Related 10 credits would include the following classes:
GSSS 1100 - Human Relations, GSCL 1105 - Job Seeking Skills, GSCM 1120

Technical Writing or the following General Education classes:
English, Biology, Chemistry, Math above 1000 level, Physics, Natural Science, Art, Foreign Language, Literature, Music, Philosophy, Theater, Western Civilization, Economics, Geography, History, Political Science, Psychology, and Sociology

Total Credits 64

Automotive Advanced Engine Performance & Electrical, Certificate

Locations: Jackson

AUTO 2121 Engine Performance II 5
AUTO 2122 Advance Engine Performance III 5
AUTO 2145 Body Computer Controlled Electrical Systems 5
AUTO 2190 Summer Internship (after 2nd semester) 4

Total Credits 19

Automotive Drivetrain Systems, Certificate

Locations: Jackson

AUTO 1126 Steering and Alignment 4
AUTO 1131 Brakes 4
AUTO 2106 Automatic Transmissions 5
AUTO 2112 Manual Drive Train Axles 5

Total Credits 18

Automotive Engine Repair & Electrical, Certificate

Locations: Jackson

AUTO 1100 Introduction to Transportation 2
AUTO 1111 Electrical 4
AUTO 1120 Air Conditioning 2
AUTO 1121 Adv. Heating & Air Conditioning 2
AUTO 1145 Engine Performance I 2
AUTO 1136 Engine Technology & Lab 5

Total Credits 17

Biology - Fish - Wildlife, A.A.

Location: Worthington

The program listed below is only a suggested guide, and the specific courses required vary among the four year colleges. The student planning a degree in these areas should contact the Biology Department and the counselors at Minnesota West-Worthington campus for assistance with
curriculum planning. This degree meets the Associate in Arts and MnTC requirements and will take five or six semesters to complete. Students desiring the Associate in Science degree may be able to complete the program in four semesters.

ENGL 1101 Composition I 3
Choose two of the following: 7-9
MATH 1111 College Algebra 3
MATH 1113 Pre-Calculus 4
MATH 1121 *Calculus I 4
CHEM 1101 General Inorganic Chemistry I 4
CHEM 1102 General Inorganic Chemistry II 4
BIOL 1110 Principles of Biology 4
SPCH 1101 Introduction to Speech 3
Choose one of the following: 3
ENGL 1102 Composition II 3
ENGL 2276 Composition: Technical Writing 3
ENGL 2243 Composition: Creative Writing 3
PHYS 1201 Fundamentals of Physics I 4
PHYS 1202 Fundamentals of Physics II 4
BIOL 2220 Animal Biology 4
BIOL 2230 Plant Biology 4
BIOL 2270 *Microbiology 4
Social Science Electives** 6-9
Choose one or two:
CHEM 2201 Organic Chemistry I 5
CHEM 2202 Organic Chemistry II 5
Choose one of the following:
NSCI 1100 Issues in the Environment 3
PSCI 2210 Environmental Politics 3
GEOG 1101 **Intro to Physical Geography 4
Humanities Electives 9
Total Credits 60

Fulfill a minimum of 4 credits from two of the three areas. HLTH 1101, CSCI 1102, or any Physical Education course.

*Depends on high school preparation and transfer institution.

**If either PSCI 2210 or GEOG 1101 is taken to meet Areas 5 and 10, only six credits in SOC SCI is required. Some institutions require ECON 2201.

Biotechnology Lab Technician, A.A.S.
Location: Worthington
Biotechnology is the application of biological organisms, systems, and/or processes to learn about the science of life and the improvement of the value of materials and organisms such as pharmaceuticals, crops, and livestock. Biotechnology is a relatively new and fast-developing field that integrates knowledge from several traditional sciences: biochemistry, chemistry, microbiology, and chemical engineering. Graduates may work in labs for companies in the areas of pharmaceuticals, food processing, molecular biology, agricultural research, and product analysis.

CSCI 1102 Introduction to Microcomputers 3
BIOL 1110 Principles of Biology 4
CHEM 1101 General Inorganic Chemistry I 4
MATH 1105 Statistics 4
ENGL 1101 Composition I 3
BIOL 2270 Microbiology 4
BIOT 1101 Introduction to Biotechnology 3
PHYS 1100 Survey of Physics 3
SPCH 1101 Introduction to Speech 3
BIOT 2205 Molecular and Cellular Biology 3
BIOT 2210 Biotechnology Methods I 4
CHEM Organic and Biological Chemistry 3
Recommended Electives 3
ENGL 2276 Technical Writing 3
BIOT 2220 Biotechnology Methods II 4
BIOT 2225 Analytical and Investigative Lab Techniques 4
BIOT 2297 Internship 2
Recommended Electives 4
Total Credits 64

* For recommended electives, choose from:
Genetics, Animal Science, Agronomy, Animal Biology, Plant Biology, and College Algebra

Business Administration, A.A.
Location: Worthington
Upon completion of the program listed below, the student may transfer to an upper division school of business and complete his/her requirements for the Bachelor of Arts or Bachelor of Science degree in Business. Students may also choose to delay the completion of their formal education and seek employment knowing that when they decide to return to school the credits they have earned at Minnesota West-Worthington will allow them to enter an upper division program on either a full or part-time basis. This program meets the Associate in Arts and MnTC requirements.

ENGL 1101 Composition I 3
MATH 1111 College Algebra 3
or
SPCH 1101 Introduction to Speech 3
Chemistry or Physics 3-4
PSYC 1101 Introduction to Psychology 4
BUS 1101 Introduction to Business 4
BUS 2201 Principles of Accounting I 4
BUS 2202 Principles of Accounting II 4
ECON 2201 Principles of Macroeconomics 3
ECON 2202 Principles of Microeconomics 3
MATH 1105 Introduction to Probability and Statistics 4
Biology Electives 3-4
Social Science Elective*** 3
Humanities Electives 9
Choose one of the following:
ENGL 1102 Composition II 3
ENGL 2276 Composition: Technical Writing 3
ENGL 2243 Composition: Creative Writing 3
Choose one of the following:
NSCI 1100 Issues in the Environment 3
PSCI 2210 Environmental Politics 3
GEOG 1101**Intro to Physical Geography 4
Total Credits 60

Fulfill a minimum of 4 credits from two of the three areas. HLTH 1101, CSCI 1102, or any Physical Education course.

Note: See advisor/counselor for areas MnTC 8 and 9
**Depends on transfer institution
***If either PSCI 2210 or GEOG 1101 is taken to meet Areas 5 and 10, the SOC SCI requirement is fulfilled.
**Business Education, A.A.**

Location: Worthington

This curriculum is designed for students who plan to teach Business Education courses in high school. The general education courses will vary depending upon the student's interest and the requirements of the College or university to which the student intends to transfer. The student may take a somewhat reduced load from what is listed below. This program meets the Associate in Arts degree and MnTC requirements. It is based on the Board of Teaching approved major at Winona State University. All students who plan to enroll in education programs MUST complete the PPST (Pre-Professional Skills Test) before enrolling in junior level education courses. The PPST bulletin is available in the Student Services Office.

- Social Science Elective**
- Humanities Electives
- Total Credits

Fulfill a minimum of 4 credits from two of the three areas. HLTH 1101, CSCI 1102, or any Physical Education course.

* Placement depends on the students starting proficiency.
** Depends on transfer institution.
*** If either PSCI 2210 or GEOG 1101 is taken to meet areas 5 and 10, the SOC SCI requirement is completed.

**Business Management, A.A.S.**

Location: Worthington

This degree is designed for students planning to enter the job market after completion of the program or to continue their education in four-year colleges. It prepares students for entry-level positions in offices, private industry, civil service, and a variety of business fields. The following are the requirements for obtaining a degree in this area. (A course in keyboarding and/or keyboarding proficiency is strongly recommended). To complete the degree students must fulfill the following requirements:

1. Successful completion of a minimum of 60 credits of which at least 20 must be earned at Minnesota West Community & Technical College.
2. A grade point average of 2.0 ("C") or better.
3. Meet the minimum of 30 credits of general education as required by the A.S. degree.

**Business Management - 30 credits (see below table)**

</tr>
</tbody>
</table>

Choose a minimum of twelve (12) electives credits from the following:

- **BUS 1104** Business Mathematics
- **BUS 2232** Professional Selling
- **BUS 2241** Business Law
- **BUS 2275** Human Resource Mgmt.
- **ECON 2202** Principles of Microeconomics
- **BUS 2242** Business Communications

*Transfer with validation by the receiving institutions:

Methods of validation:

- Institutions have the option of course validation or
- Students can "test out" or "deferred credit" test out by exam at the receiving institution deferred credit by successful completion of one specified advanced course in the program. The total number of program credits required shall not exceed that for students who entered the institution as first year students.

**Course may be waived by petition.
Business Management Computer Emphasis, A.S.
Location: Worthington
This Business Management Computer Science Emphasis Program is a cooperative effort between the Business Department and the Computer Science Department. The program is designed to prepare students academically with an interdisciplinary background in business decision-making and computer science. Students earn an A.S. Degree in Business Management Computer Emphasis upon successful completion of the following requirements:

1. Successful completion of a minimum of 60 credits, 20 of which must be earned at Minnesota West Community & Technical College.

2. A grade point average of 2.0 ("C") or better.

3. Meet the minimum of 30 credits of general education as required of the A.S. degree.

4. Business Management Computer Emphasis - a minimum of 30 credits including: (See below)

A. Required (Core) Courses
BUS 1101 Introduction to Business 4
*BUS 1104 Business Mathematics 3
BUS 2201 Principles of Accounting I 4
BUS 2202 Principles of Accounting II 4
BUS 2221 Principles of Management 3
CSCI 1102 Introduction to Microcomputers 3
CSCI 2100 Advance Micro Applications 3
CSCI 2140 Elec. Spreadsheets/Graphics 3

B. Choose a minimum of 2 credits of electives from the following:
BUS 2200 Intro to Management Info Systems 3
BUS 2230 Principles of Marketing 3
BUS 2232 Professional Selling 3
BUS 2233 Advertising 3
BUS 2241 Business Law 3
BUS 2275 Human Resource Management 3
CSCI 2200 Visual Basic Programming 4
CSCI 2215 Web Programming I 3
CSCI 2240 Fundamentals of Programming I 4
CSCI 2250 Java Programming 4
CSCI 2290 Tech. Capstone Seminar 1

NOTE: Students who did not take two years of a world language in high school may need one year of college credit in a language to meet state university preparation requirements.

Business – PreBusiness Preparation, A.A.
Location: Worthington
The associate in arts degree is a liberal arts transfer degree. While an A.A. degree might include a core of courses appropriate to a major field at the baccalaureate level, its focus is on general education or the first two years of a four-year preparation. To complete the degree, students must fulfill the following requirements:

1. Successful completion of a minimum of 60 credits of which at least 20 must be earned at Minnesota West Community & Technical College.

2. A grade point average of 2.0 ("C") or better.

3. A minimum of 40 credits of General education. This fulfills the MN Transfer Curriculum.

Recommended Areas:
Area 1: Communications
Area 2: Critical Thinking
Area 3: Natural Science
Area 4: Mathematical/Logical Reasoning - MATH
   1111 College Algebra is the required math class.
Area 5: History and the Social and Behavioral Sciences - ECON 2201Macroeconomics
   and either Psychology or Sociology.
Area 6: The Humanities and Fine Arts
Area 7: Human Diversity
Area 8: Global Perspective
Area 9: Ethical and Civic Responsibility
Area 10: People and the Environment

4. 18 credits selected from the list below:
   BUS 2201 Principles of Accounting I 4
   BUS 2202 Principles of Accounting II 4
   ECON 2202 Principles of Microeconomics 3
   MATH 1105 Intro to Probability & Statistics 4

   Total Required Credits 15

Electives in business chosen from the following:
BUS 1101 Introduction to Business 4
BUS 2221 Principles of Management 3
BUS 2230 Principles of Marketing 3
BUS 2241 Business Law 3
BUS 2242 Business Communications 3

5. Fulfill a minimum of 4 credits from two of the three areas, HLTH 1101, CSCI 1102, or any Physical Education course.
World Language (Students who did not take two years of a world language in high school may need one year of college credits in a language to meet state university preparation requirements.)

Management, Certificate.
Location: Canby, Granite Falls, Jackson, Pipestone, Worthington, and Online
Students in the Management certificate program will receive basic business knowledge which can be used immediately in the workplace or as part of a 2 year business degree. Students will focus on the business environment, management practices and marketing principles.

Business Management Business Management
BUS 1101 Introduction to Business 4
BUS 2221 Principles of Management 3
BUS 2230 Principles of Marketing 3
Two Business or Accounting Courses 6
Total Credits 16

Carpentry, A.A.S.
Location: Pipestone
Minnesota West's two-year Carpentry AAS Degree prepares you for a career as a carpenter in residential and commercial construction. In this program you will also study the concept of green building. Green building is a growing trend among home builders nationwide and incorporates a whole building design approach into every phase of the building process, including design, construction, energy, water efficiency, lot development, resource efficient building design to enhance the well-being
of occupants, and to minimize negative impacts on the community and natural environment.

Students interested in this program should like to work outdoors, have an interest in doing hands-on work with common building materials, possess good problem solving skills, have strong math skills, and have a healthy work ethic. They should have the desire to learn and expand their knowledge of the construction industry.

Chemistry, A.A.
Location: Worthington

Students in chemistry will take the following courses at Minnesota West-Worthington campus. This program is patterned after the University of Minnesota and is an Associate in Science degree.

ENGL 1101 Composition I 3
Advance in the field.

Enhance a child development professional's opportunity to advance in the field.

Human Services will check the background of each applicant to ensure that there is no record of child maltreatment. The curriculum shown here is designed to enhance a child development professional's opportunity to advance in the field.

Prerequisite: Completed certificate program to enter the Diploma program.

Child Development, Diploma

Location: Granite Falls

Persons completing this program would work in a variety of settings related to child care and education such as preschools, day cares, public schools, Head Start programs, and private homes (nannies). Students enrolled in the program receive instruction in safety, health, nutrition, guidance, child development, and the preparation and presentation of learning experiences to enhance all areas of a child's development. This course of study is designed to improve the quality of services children receive, to increase professionalism in graduates, and to promote the overall development of children. Lab school/and field experience in various settings provide opportunities for students to apply their knowledge and skills. The Minnesota Department of Human Services will check the background of each applicant to ensure that there is no record of child maltreatment. The curriculum shown here is designed to enhance a child development professional's opportunity to advance in the field.

Prerequisite: Completed certificate program to enter the Diploma program.

**Computer Applied Technology, A.S.**

**Location: Worthington**

The completion of the Computer Applied Technology degree offers the student an opportunity to transfer into several articulated Baccalaureate programs. While students concentrate on an area of study in computer science, they are assured that after completion of this degree, they are employable in many technical and business settings, including manufacturing companies, data processing firms, software development companies, banks, insurance companies, government agencies, colleges and universities. The degree is heavily dependent upon technology based course offerings. To complete the degree, students must fulfill the following requirements:

1. Successful completion of 60 credits of which at least 20 must be earned at Minnesota West Community & Technical College.
2. A grade point average of 2.0 (“C”) or better.
3. Computer Division requirements: 9 credits
   - ENGL 1101 Composition I
   - CSCI 1102 Introduction to Microcomputers
   - MATH 1111 College Algebra
4. A minimum of 24 credits from the four general education categories listed below:
   - Communications: ENGL 2276 or SPCH 1101
   - One or more credits from Science/Math
   - Four or more credits from Behavior/Social Science – PSYC 1101 or ECON 2201 or ECON 2202 required.
5. Fulfill at least a 30 credit core of technical courses. Note: 3 credits from Item #3, CSCI 1102 required and an additional 27 credits from the table below:

<table>

**Computer and Information Technology, A.A.S.**

**Location: Worthington**

Although successful completion of the Computer and Information Technology (CIT) program prepares the student for employment within the dynamic computer, electronic information and technology areas, the program is specifically designed to maximize transferability into the Bachelor of Applied Science (BAS) at Minnesota State University, Mankato, MN. This degree also articulates to Minnesota State University, Moorhead, MN and Southwest Minnesota State University, Marshall, MN. Students are encouraged to consult with counselors, faculty and/or advisors at Minnesota West and the transfer institution of their choice.

"Baccalaureate admission requires a 2.50 or higher GPA in core courses; to include a recommended minimum of a "B" in CSCI 2250 and a minimum of a "C" in CSCI 2255. **If not completed within A.A.S., additional mathematics will be required at Minnesota State University, Mankato.

**Computer Information Science (CIS), A.A.**

**Location: Worthington**

The Associate in Arts degree is a Liberal Arts transfer degree. While an Associate in Arts degree might include a core of courses appropriate to the transfer track to a major in Computer Information Science at the baccalaureate level, its focus is on general education.

To complete the degree students must fulfill the following requirements:

1. Successful completion of a minimum of 60 semester credits.
2. A grade point average of 2.0 ("C") or better.
3. A minimum of 40 credits of general education. This fulfills the Minnesota Transfer Curriculum.

   **A. Communications -** required ENGL1101, ENGL2276 and SPCH1101.
   **B. Critical Thinking:** Any student who completes the general education curriculum will have completed the requirements for this goal.
   **C. Natural Science**
   **D. Mathematical/Logical Reasoning:** required MATH1105 and MATH1111 or MATH1121.
   **E. History and the Social and Behavioral Sciences.**
   **F. The Humanities and Fine Arts.**
   **G. Human Diversity.**
   **H. Global Perspective.**
   **I. Ethical and Civic Responsibility.**
   **J. People and the Environment.**

4. **Computer Information Science core: 19**
   (Baccalaureate admission requires a 2.50 or higher GPA in core courses, including a minimum of a "B" in CSCI2250 and a minimum of a "C" in CSCI2255) (listed below)
   **CSCI 1102 Intro to Microcomputers 3**
   **CSCI 2250 Java Programming I 4**
   **CSCI 2255 Java Programming II 4**
   **CSCI 2280 Systems Analysis & Design 4**

**Choose one of the following courses**

**CSCI 2200** Visual Basic Programming 4
**CSCI 2240** Fundamentals of Programming I 4

5. **World Language:** (Students who did not take two years of a world language in high school may need one year of college credits in a language to meet state university preparation requirements.)

6. One PHED activity course, 1 credit.

**Computer Science, A.S.**

**Location: Worthington**

The Computer Science A.S. program is designed to provide students the option to enter the computer related job market on completion or optionally transfer to Southwest Minnesota State University at Marshall, MN to complete the Bachelor of Science in the Computer Science degree.

Computer Specialist, A.A.S.

Location: Worthington

The Computer Specialist A.A.S. Degree provides the student with a career entry employment opportunity for a wide variety of employers including manufacturers, data processing companies, banks, insurance companies, bookkeeping companies and departments, medical facilities, and government agencies. The program is designed to be heavily dependent on technology as a method of course delivery, communications, and student learning.

To complete the degree students must fulfill the following requirements:

1. Successful completion of 60 credits, 20 of which must be earned at Minnesota West Community & Technical College.
2. A grade point average of 2.0 (“C”) or better.
3. A minimum of 20 credits from the four general education categories listed below:
   A. Communications
      a minimum of 3 credits – required ENGL 1101
   B. Science/Math
      a minimum of 3 credits - required MATH 1105 or MATH 1111 or PHIL 1200
   C. Behavioral/Social Science
      a minimum of 3 credits
   D. Humanities
      a minimum of 3 credits
4. A minimum of 30 credits in career courses (listed below)

Computer Support Technician, A.A.S.

Location: Granite Falls

Computer support technicians solve software and hardware problems, set up computer systems, install new software and hardware, train users, and maintain networks. Support technicians may work directly with computer users in person or provide support over the phone through a help desk. This major provides hands-on training in computer operating system operation, the use of application software, network administration and installation, software installation and removal, computer maintenance and repair, hardware installation, and help desk skills. This training provides the students with practical knowledge needed to solve computer problems.

**Computer** Maintenance and Repair, Certificate  
**Location:** Granite Falls, Jackson  
Students in the Computer Maintenance and Repair certificate receive training in administrating, installing and configuring computers; installing, implementing and utilizing software; and upgrading and troubleshooting personal computer hardware. This program provides training in personal computer (PC) maintenance and repair, operating systems, including Windows and DOS, and help desk etiquette. This program is designed to prepare the students for CompTIA’s A+ certification. A successful graduate will be prepared to work in the fields of PC maintenance and repair, help desk and software support.

**Computer** Information Security Administration, Certificate  
**Location:** Granite Falls  
The Information Security Administration Certificate addresses the actual setup and maintenance of a secure environment designed in the Information Security Management Certificate courses. This certificate will include authentication and securing servers, workstations, and their file systems. Students will set up routers and firewalls and study computer forensics. This course is designed for the technician who will be responsible for the setup and maintenance of a secure environment.

**Computer** Information Security Management, Certificate  
**Location:** Online  
Students in the Information Security Management Certificate learn to assess the need for security; examine ethical, legal and professional security issues; assess and control risks; design secure networks; examine disaster recovery plans; educate personnel; and maintain a security program. In addition, the students learn about the theory of authentication, encryption, attacks and malicious code, and the components of a secure network including web servers and remote access. This certificate is designed for the person responsible for the security direction of the organization, including managers, accounting personnel, administrative assistants, and computer technical support personnel. This certificate is offered in an online format and can be completed in two semesters.

**Computer** Management Information Systems (MIS), A.A.  
**Location:** Worthington  
The Associate in Arts degree is a liberal arts transfer degree. While an Associate in Arts degree might include a core of courses appropriate to a transfer track in the major field of Management Information Systems at the baccalaureate level, its focus is on general education. To complete the degree students must fulfill the following requirements:

1. Successful completion of a minimum of 60 semester credits.
2. A grade point average of 2.0 (“C”) or better.
3. A minimum of 40 credits of general education. This fulfills the Minnesota Transfer Curriculum.
A. Communications ENGL 1101, ENGL 2276 and SPCH 1101 required.
B. Critical Thinking: Any student who completes the general education curriculum will have completed the requirements for this goal.
C. Natural Science.
D. Mathematical/Logical Reasoning: required MATH 1111 or higher.
E. History and the Social and Behavioral Sciences.
F. The Humanities and Fine Arts.
G. Human Diversity.
H. Global Perspective.
I. Ethical and Civic Responsibility.
J. People and the Environment.
4. Management Information Systems core: 19
   (Baccalaureate admission requires a 2.50 or higher GPA in core courses, including a minimum of a "B" in CSCI1102, CSCI1250, and a minimum of a "C" in CSCI2255) See required courses below.
   CSCI 2250 Java Programming I 4
   CSCI 2255 Java Programming II 4
   BUS 2201 Principles of Accounting I 4
   BUS 2202 Principles of Accounting II 4
5. World Language: (Students who did not take two years of a world language in high school may need one year of college credits in a language to meet state university preparation requirements.)
6. One Physical Education activity course.

[Computer] Networking Specialist, A.S.

Location: Worthington
The Networking Specialist AS program is designed to provide students with specialized skills in Microsoft technologies including preparedness for the MCSE Microsoft certification exams. Students will also gain knowledge in programming languages for local and wide area networking. Upon completion, students will be ready to enter the information technology (IT) job market or optionally transfer to Colorado Technical University, Sioux Falls, SD, to complete the Bachelor of Science in Information Technology (BSIT) degree.

To complete the degree students must fulfill the following requirements:

1. Successful completion of 60 credits, 20 must be earned at Minnesota West Community & Technical College.
2. A grade point average of 2.0 ("C") or better.
3. Computer Division requirements: 9 credits
   A. ENGL 1101 Composition I
   B. CSCI 1102 Introduction to Microcomputers
   C. MATH 1111 College Algebra
4. A minimum of 24 credits from the four general education categories listed below:
   1. Communications: ENGL 2276 or SPCH 1101.
   2. One or more credits from Science/Math. A lab science course from either Chemistry or Physics required.
   3. Four or more credits from Behavior/Social Science – PSYC 1101 or ECON 2201 or ECON 2202 required.
   4. Four or more credits from Humanities – ART 2230 and ART 2232 are required.
5. Fulfill at least a 30 credit core of technical courses. Note: 3 credits from Item #3, CSCI 1102 required, and add 27 credits from the table below.
6. World Language (Students who did not take two years of world language in high school may need one year of college credit in a language to meet state university preparation requirements).

[Computer] Networking Specialist, A.A.S.

Location: Jackson
This program prepares students to install, administer and troubleshoot networks. The network specialist courses will provide the student with the knowledge and skills necessary to provide support to a variety of network operating system platforms. This course begins with the entry-level workstation and server classes, which will introduce the student to the network environment. Once this knowledge is obtained, the student will move on to upper level classes including TCP/IP and Internet Information Server. Topics covered also include hardware and software implementation and operation and maintenance, and various software packages.

Web Development, A.S.

Location: Worthington

The completion of the Web Development Science A.S. degree
prepares the student for the evolving Internet business settings
including manufacturing, data processing firms, software
development, banking, financing and insurance companies,
government agencies, colleges, and universities. The program
involves the analysis, design, development, and maintenance of
source code supporting an Internet presence. Unique legal,
hardware/software, security, financial and risk issues related to
promoting an Internet presence are integrated with case studies
designed to demonstrate the intricacies of related programming
solutions.

To complete the degree, students must fulfill the following
requirements:
1. Successful completion of 60 credits, 20 must be earned at
Minnesota West Community & Technical College.
2. A grade point average of 2.00 (“C”) or better.
3. Computer Division requirements: 9 credits
   A. ENGL 1101 Composition
   B. FCSCI 1102 Introduction to Microcomputers
   C. MATH 1111 College
4. A minimum of 24 credits from the four general education
categories listed below:
   1. Communications: ENGL 2276 or SPCH 1101.
   2. One or more credits from Science/Math. A lab science
course from either Chemistry or Physics required.
   3. Four or more credits from Behavior/Social Science –
      PSYC 1101 or ECON 2201 or ECON 2202 required.
   4. Four or more credits from Humanities.
5. Fulfill at least a 30 credit core of technical courses.
   Note: 3 credits from Item #3. CSCI 1102 required, and
   add 27 credits from the table below.
6. World Language (Students who did not take two years
   of world language in high school may need one year of
   college credit in a language to meet state university
   preparation requirements).

Secondary Programming Language: Select a minimum
of one course from the following:
CSCI 2135 Advanced Web Techniques
   (ASP, VBScript/JavaScript) 3
CSCI 2200 Visual Basic Programming 4
CSCI 2240 Fundamentals of Programming I C++ 4
CSCI 2255 Java Programming II 4

Applications Specialist, Certificate

Location: Granite Falls, Jackson, Pipestone,
Worthington, and Online

Provides students with essential knowledge and
understanding of common business productivity software.
CSCI certificates recognize student achievement and
encourage lifelong learning. CSCI Department Disclosure:
Due to scheduling, the courses that satisfy this certificate
are not guaranteed to be offered within one semester.

Networking, Certificate

Location: Granite Falls, Jackson, Pipestone,
Worthington, and Online

The Cisco Networking Certificate includes four courses from
the Cisco CCNA curriculum and aligns to Federal standards
for networking job roles of system administrators and
INFOSEC professionals. Graduates will be prepared to take
the CCNA certification test. Cisco Certified Network
Associate (CCNA®) validates the ability to install, configure,
operate, and troubleshoot medium-size route and switched
networks, including implementation and verification of
connections to remote sites in a WAN. CCNA curriculum
includes basic mitigation of security threats, introduction to
wireless networking concepts and terminology, and
performance-based skills. The widely respected Cisco
Career Certifications bring valuable, measurable rewards to
network professionals, their managers, and the
organizations that employ them.

CSCI 1102 Intro to Microcomputers 3

Cosmetology, Diploma

Locations: Jackson and Pipestone

Students receive theory as well as practical experience in hair, skin, and nail care through classroom study, demonstrations and practical experience in the campus clinic. Areas of study include sanitation and sterilization techniques, hygiene, and grooming. Upon successful completion of hours and quota requirements mandated by the Board of Cosmetologist Examiners, students must also take a written and a skills certification test for licensure. Under the option plan, cosmetology provides extra hours for licensure in states that require more hours. Career opportunities include beauty salon owner, beauty salon manager, make-up artist, specialist in a particular branch of cosmetology, colorist, hair and scalp specialist, esthetician, stylist, manufacturer’s representative and others.

### Dental Assistant, A.A.S.

**Location:** Canby  
The Dental Assisting program is designed to prepare individuals for Dental Assisting careers in a dental office. This may be as an assistant to either a dentist or a dental hygienist in a dental practice. The program is accredited by the American Dental Association Commission on Dental Accreditation, and upon completion the student will take national and state examinations leading to certification and licensure in their field. The coursework is in bio-medical studies, dental sciences, clinical practices, and expanded functions allowed by the State of Minnesota. Students will spend ten weeks in extramural clinical experiences in area dental offices.

**Education Paraprofessional, Certificate**

**Location: Online**

This certificate program prepares graduates for employment in a K-12 school district and provides a curriculum which meets the core competencies. The curriculum will provide a career pathway for paraprofessionals which will allow them to begin, continue, and enhance their education. The curriculum is organized to move the learner through the selected course work online and through the A.S. degree without unnecessary duplication of course work. The certificate is made up of four required and five elective online classes developed by incorporating the core competencies that have been produced for paraprofessionals by the Institute on Community Integration at the University of Minnesota. The coursework is designed to begin students with a 12-credit certificate which is also part of the Child Development, Diploma; Child Development A.S.; as well as the Child Development Track of the Human Services degree.

**Electives (4 credits) from the following courses:**

**Total Credits** **64**

**Electrician, Diploma**

**Locations: Canby and Jackson**

The electrician program prepares individuals to apply their knowledge and skills to install, operate, maintain, and repair electrical apparatus and systems such as residential, commercial, and industrial electric - power wiring, and D.C. and A.C. motors, controls, and electrical distribution panels. Also, included is instruction in the use of test equipment.

**General Education requirements** **21**

These must be selected from 3 of the 10 goal areas of the Minnesota Transfer Curriculum (see page 5):

**Emergency Medical Services, Certificate**

**Location: Jackson and Marshall Center Site**

An instructional program that prepares individuals to perform initial medical diagnosis, treatment, and comprehensive care in medical crises under the general supervision of a coordinating physician. Includes instruction in all aspects of basic health care; disease, disorder, and injury symptomatology and diagnosis; emergency medical treatment procedures for various injuries and disease outbreaks; basic pharmacology; anesthetics; intravenous and other drug administration procedures; obstetrics procedures; basic surgical techniques; emergency medical equipment operation and maintenance; special care of
patients exposed to heat, cold, radiation, or contagious disease; and administrative aspects of emergency medicine. Programs may include emergency vehicle operation and patient transportation procedures, depending on level of training.

EM 1101 Introduction to EMT Basic 2.5
EM 1102 EMT Basic Completion Course 4.5
ADSM 1100 Medical Terminology 2
ADSM 1110 Anatomy & Physiology/Disease Conditions I 2
Choose 4 credit electives from the following:
ADSM 1115 Anatomy & Physiology/Disease Conditions II 2
ADSM 1120 Medical Office Procedures 3
ADSM 1125 Medical Office Procedures II 3
ADSA 1100 College Keyboarding 3
Total Credits 16

Emergency Medical Technician, Certificate
Location: Jackson and Marshall Center Site
This certificate meets the initial requirements of the EMS Regulatory Board and the National Registry for EMTs for direct employment with an Emergency Ambulance Service, basic transport service, and emergency room, law enforcement or fire department. Successful completion of this course, the practical skills exam and the designated readiness written exams allows the student eligibility to take the National Registry Exam.

(Energy) Biofuels Technology, A.A.S.
Location: Granite Falls
Today’s process plants are highly technical and completely automated. A Biofuels Technician is responsible to ensure that the plant continues to operate in the most efficient and economic way possible. To do so, the technician needs to develop a basic understanding of the biological and chemical conversion processes, industrial water treatment, as well as compound separation through distillation, molecular sieve dehydration, and evaporation. A basic understanding of instrumentation, mechanical fundamentals, laboratory techniques, and computerized process control systems are covered in this program. The Biofuels Technology, A.A.S., program has a science-based curriculum carried out over four semesters. Two 17-credit certificate programs are also offered in an online format and can be completed in one year. These certificate programs emphasize ethanol or biodiesel production.

Energy Technical Specialist, A.A.S.

Location: Canby, Granite Falls and Online

This degree, which can be completed online, will prepare students for work as technicians in energy technology and convey the skills and knowledge necessary to be successful in the traditional and renewable energy fields.

In addition to 15 General Education credits students enrolled in the Energy Technical Specialist program will study a 35 credit core curriculum providing a strong base in electrical, electronic and mechanical systems. Students will select 10 credits in an area of specialization to complete their program of study from the following: Wind Energy, Ethanol, Biodiesel, Fossil Fuels or Nuclear Power Generation.

The Energy Technical Specialist degree is offered through a partnership of multiple colleges in the Minnesota State Colleges and Universities system. Each of the partner colleges offer courses in their respective areas of expertise and the participating colleges accept transfer courses from each other.

Students entering into the Energy Technical Specialist program should realize that the energy industry is highly specialized and there are extraordinary employment characteristics associated in some areas of the power industry. Depending on the energy company, hiring managers may require a federal background check, drug and alcohol testing, and a physical if necessary for a position.

Energy Wind Energy Technology, A.A.S.

Location: Canby

As energy costs continue to escalate, the demand for lower cost, more efficient, and renewable energy sources continue to be explored. The career of Wind Energy Technician includes everything from installation and repair to troubleshooting of wind energy towers. This technician will be capable of working closely with clients with an understanding of environmental issues and politics, written technical skills, and data interpretation.

(Energy) Windsmith, Certificate

**Location: Online**
The Windsmith Certificate is designed as an introductory to the Wind Energy Industry. Individuals wanting to increase their working knowledge of this field are best suited for this course. However, students may be able to secure employment as a Technician by completing the Windsmith Certificate.

This certificate will introduce students to how the wind works, its reliability, and the related economic, environmental, and political issues. Students will also be introduced to the basic operating principles of wind energy systems and status of the industries past and future. OSHA safety regulations and standards that pertain to the construction and maintenance of wind turbines and the energy industry will also be covered. In addition, concepts of AC and DC circuits, as well as basic hydraulic applications are incorporated into the Windsmith certificate.

NSCI 1100 Issues in the Environment 3
PSCI 1201 American Government & Politics 3

**Courses to fulfill remaining MnTC/AA Degree*** 0-6
AGRI 1103 Introduction to Soil Science 3
AGRI 2204 Introduction to GPS/GIS 3
Electives 2

**Total Credits 60**

Fulfill a minimum of 4 credits from two of the three areas. HLTH 1101, CSCI 1102, or any Physical Education course.

**Depends on program emphasis**

***See Counselor/Advisor***

For most fields of engineering, the first two years of the program provide students with a needed foundation in math and science. In addition, students begin fulfilling general education requirements for graduation. Actual specialization in such fields as computer, agricultural, aeronautical, chemical, civil, geological, material processing, electrical, mechanical and industrial engineering generally begins in the junior year.

In an effort to meet the needs of each student, Minnesota West-Worthington campus offers three engineering tracks, each allowing graduates to transfer as juniors.

Fluid Power Technology, A.A.S.

**Location: Granite Falls**

Fluid power is the technology of generating, controlling, and applying smooth, effective power of pumped or compressed fluid, either a liquid (hydraulics) or air (pneumatics) to push, pull, rotate, regulate, or drive virtually all of the mechanisms of modern industry. Fluid Power Technicians perform such tasks as:

- Designing fluid power systems
- Installing fluid power systems and components, such as pumps, motors, compressors, valves, cylinders, and accessories.
- Troubleshooting and maintaining fluid power systems on such equipment as industrial machines, construction and agricultural machines, airplanes, ships, over-the-road vehicles and material handling devices.
- Testing and manufacturing fluid power systems and components.
- Conducting research on new concepts, applications, and improvements of fluid power systems
- Manufacturing components and systems.
- Marketing and selling fluid power systems, working closely with customers of fluid power manufacturers and distributors.

**Food Science, A.S.**

**Location: Worthington**

Food Science degrees are limited almost exclusively to land grant universities, although some state universities do have Food Science Technology majors. The Associate in Science degree listed below would prepare students to complete the first two years of a bachelor's degree in a science option of a Food Science Degree program. The degree requirements listed below are based primarily on the requirements of the University of Minnesota and Minnesota State University, Mankato. The degree requirements for schools in Wisconsin (U of W-River Falls), North Dakota (NDSU), South Dakota (SDSU) and Iowa (Iowa State University) are very similar in the areas of communications and math/science. Calculus and Organic Chemistry requirements may vary, as well as social science, humanities, and physical education. This does not meet the MnTC requirements. Students planning to attend the University of Minnesota are advised to complete the Associate in Arts degree and the MnTC.

**Total Credits**

* Depends on high school preparation
** Depends on transfer institution
*** Minimums only BIOL 2250 and 2260 are required at Minnesota State University, Mankato MATH 1121 and 1122 are required at the University of Minnesota
An additional semester is required to complete the AA degree and MnTC requirements. Students should take the following courses: five credits in SOC SCI; five credits in HUM; PSCI 2210, GEOG 1101 and ECON 2202 are strongly recommended; PHIL 2201 AND 2202, and HIST 1111 are strongly recommended; HLTH 1100 for three credits; two-six credits to meet Areas 8,9,10 if not met by HUM and SOC SCI requirements. This will total 13-20 additional credits.
Forestry/Natural Resources, A.S.

Location: Worthington

Four-year college graduates in the field of forestry are responsible for the management of approximately one-third of the land area of the United States. The educational program in the School of Natural Resources (University of Minnesota) prepares the student in forest resource development and forest science curricula in the art, science and business of managing forest lands for all their products (timber, water, wildlife, grazing, and recreation). Forest products, forest engineering and forest marketing graduates are directly involved in the harvesting, processing, distribution and marketing of forest products in the nation. The recreation resource management curriculum specializes in manufactured housing, marketing, pulp and paper, wood science and technology as well as the management and marketing of recreation areas.

The College of Natural Resources at the University of Minnesota has many options or areas of specialization within the broad area of forestry. All of these programs require a broad science background, and the following is only one possible two-year course of study. Upon completion of this program, the student earns the AS degree.

AGRI 1103 Introduction to Soil Science 3
BIOL 1110 Principles of Biology 4
BIOL 2220 Animal Biology 4
BIOL 2230 Plant Biology 4
CHEM 1101 General Inorganic Chemistry I 4
CHEM 1102 General Inorganic Chemistry II 4
CHEM 2201 Organic Chemistry I 5
ECON 2201 Principles of Macroeconomics 3
ENGL 1101 Composition I 3
ENGL 1102 Composition II 3
MATH 1105 *Intro to Probability & Statistics 4
MATH 1121 ***Calculus I 4
PHYS 1201 Fundamentals of Physics I 4
PHYS 1202 Fundamentals of Physics II 4
SPCH 1101 Introduction to Speech 3
Total Credits 60

* Required for forest resources and forest science majors for the Itasca Biological Sciences Program
** Depends on the area of specialization
*** Minimums only.
**** Depends on high school preparation

An additional semester is required to complete the A.A. degree and MnTC requirements. Students should take six credits in HUM; two-six credits in SOC SCI (PSCI 2210 recommended); two-six credits to meet areas 7,8 and 9 of MnTC if not complete as part of HUM/SOC SCI requirements. This will total 10-20 additional credits.

Healthcare Supervision & Leadership, Certificate

Location: Online

This Internet-based certificate will provide the opportunity for the incumbent frontline leaders and supervisors/workers from all departments of healthcare facilities to pursue advanced training in the areas of Employment, Customer Services, Personnel Supervision, Leadership, Legal Compliance, Finance, Industry Trends and Marketing as these topics relate to the healthcare environment. The Internet platform will allow healthcare personnel to pursue advanced training without leaving their facility or placing undue hardships on their current positions and/or employment status. The curriculum will provide for independent practice and virtual role-playing, and the student will be able to interact with college instructional staff via email.

Management and Supervision in Healthcare, A.S.

Location: Online

The Management and Supervision in Healthcare A.S. program is designed to provide students with the education needed to enhance their management skills. This Internet based A.S. program will provide the opportunity for healthcare workers to gain advanced training in pursuing a management position in healthcare. Frontline leaders within healthcare facilities can also pursue advancement in their assigned areas. The Internet platform allows students to continue their education without leaving their facility and without placing undue hardships on their current positions and/or employment status. The curriculum will provide for independent practice and virtual role playing, and the student will be able to interact with college instruction staff via email and discussion groups. Students will have the option upon completing the A.S. degree to transfer to a university to complete a four-year degree.

To earn an A.S. degree students must complete the following requirements:

1. Successful completion of 60 semester credits of which at least 20 must be earned at Minnesota West Community & Technical College.
2. A grade point average of 2.00 ("C") or better.
3. A minimum of 30 credits selected from at least 6 of the 10 goal areas in the Minnesota Transfer Curriculum. (see page 5)

Students can ensure seamless transfer of course work at a receiving institution by contacting the institution of transfer for information relating to advanced course work or test out procedure.

**Home Economics (Human Ecology), A.A.**  
**Location: Worthington**  
There are many programs available in the field of home economics: costume design, dietetics, fashion merchandising, food service, home management, textiles and clothing, foods in business, community nutrition, etc. Each has different requirements. Because of this diversity, it would be misleading to list absolute requirements for all home economics programs. At Worthington, it is possible to take at least one, and more often, two years of courses required for any of the home economics programs. Be sure to check with your advisor to ensure that you are getting the appropriate courses for your major and transfer institution.

You are strongly encouraged to earn the Associate in Arts degree and meet the MnTC requirement if attending the University of Minnesota or a state university. The two-year program outlined below meets these requirements.

Human Services, A.S.

Location: Worthington

The Human Services Program is designed for students interested in the helping professions. Academic and skills-oriented classes, agency visits, and supervised work experiences prepare students for employment in a variety of settings, or for continuing their education in four-year colleges. Human Services majors may choose one of two tracks:

1. Students selecting the Generalist track design their programs of study according to their areas of interest. While taking a core of foundation courses, students prepare for entry-level work or for later specialization in fields such as social welfare, special education, disabilities, family services, or counseling.

2. Students in the Child Development track prepare to work with young children in their own homes, in day care centers, preschools, or other specialized settings; or for future careers in education, child development and related fields. Courses and internship experiences are designed to help students work toward credentials as a child care professional.

Qualifications: To be admitted to internships, students must have an overall GPA of 2.00 (“C”); a 2.50 in career courses; complete outlined courses outlined in the first three terms; complete a four-hour seminar in the fall semester of the second year; complete a formal application process; and be approved following an interview with the Human Services Coordinator.

Students are awarded an A.S. degree in Human Services upon successful completion of the following requirements.

Individualized Studies A.S.

Location: Worthington and Online

This degree program is designed for working adults and/or students who have well-defined career goals. The program is intended to provide students with the opportunity to develop specific competencies and earn an Associate of Science degree in career fields that are not available through existing degree programs at Minnesota West Community & Technical College. This program is not intended to provide certification in any field.

The program requires submission of a written degree plan initiated by the student with assistance from an academic counselor/faculty member. The plan must also demonstrate transferability to at least one four-year accredited institution, even when it may not be the intention of the student to transfer immediately after completing this degree.

Career-area credits may be earned in traditional courses, independent study projects and internships. Credits may be transferred from other institutions in accord with Minnesota State Colleges and Universities’ residency requirement for earning the Associate of Science degree.
To earn an A.S. degree, students must complete the following requirements:
1. Successful completion of 60 semester credits of which at least 20 must be earned at Minnesota West Community & Technical College.
2. A grade point average of 2.0 (C) or better.
3. A minimum of 30 credits selected from at least 6 of the 10 goal areas in the Minnesota Transfer Curriculum.
4. Fulfill at least a 30 credit core of technical courses unique to the program being completed.

**Law (pre-law), A.A.**

**Location: Worthington**

Law schools in Minnesota do not require specific undergraduate major or courses as pre-law preparation. Rather, they recommend that students acquire a broad education such as is usually assured in a liberal arts program. Special emphasis is placed on the development of skills in oral and written expression. Pre-law students should choose a major and plan a program which is as broad as possible while still being consistent with degree requirements. The student is ultimately responsible of registering in courses that fulfill degree and transfer requirements. Professional advisement is available to the student while he/she pursues his/her course work. Many pre-law students major in history, political science and business administration, though other departmental majors provide good background for law study. Most law schools emphasize that students present a major demonstrating depth of knowledge of the particular field, accompanied by a wide variety of electives that meet the MnTC requirements. The program outlined below meets the AA degree and MnTC requirements. It is recommended that a pre-law student pursue a course of study leading to the Associate in Arts degree and that whatever the intended major, it include the following courses:

<table>

Fulfill a minimum of 4 credits from two of the three areas. HLTH 1101, CSCI 1102, or any Physical Education course.

* THTR 2210, HIST 1111 AND 1112, PHIL 2201 AND 2202 and proficiency in a second language are strongly recommended.
** SOC courses, PSYC 1101, 1150, 2221, ECON 2201, 2202, are strongly recommended.
***BUS 2201, 2202 and courses from HUM and SOC SCI areas listed above as well as foreign languages are strongly recommended.

**Law Enforcement, A.S.**

**Location: Worthington**

The Law Enforcement program is designed with a set of core courses, which have been designed to be flexible and to assist students in preparing for a variety of careers in Law Enforcement. The Law Enforcement program being offered at Minnesota West will provide persons in southwest Minnesota the opportunity to complete a quality peace officer training program without having to leave the area. The curriculum has been designed in collaboration with the Minnesota Peace Officer Standards and Training (POST) Learning Objectives and is Minnesota POST Board approved. Students will have the option to pursue licensure and begin their career upon completing the Associate degree or transfer to a university to complete a four-year degree. There is an articulation agreement in place with Minnesota State University - Mankato for this major. The curriculum has been designed in collaboration with other programs to meet the Learning Objectives approved by the board and based on the following subject areas:

- A. History and overview of the criminal justice system
- B. Minnesota Statute law
- C. Criminal law and criminal procedures
- D. Juvenile justice system and procedures
- E. Patrol procedures
- F. Criminal investigation and testifying
- G. Human behavior and crisis intervention
- H. Defensive tactics and use of force
- I. Cultural awareness and response to crime victims

### Law Enforcement, A.A.S.

**Location: Worthington**

Students planning to pursue the Associate in Arts degree option will attend Minnesota West for two years and upon completion of a liberal arts degree, transfer on to a four year college or university. Students who pursue the Associate in Arts degree do not participate in skills training. This degree option is suitable for students who are not seeking immediate employment in the law enforcement field.

An Associate in Arts degree will prepare you for employment in the following career fields: FBI, ATF, DEA, or Criminal Justice. This program meets the MnTC and the Associate in Arts requirements.

**Electives to total 60 credits. Suggested electives include:**

---

**Liberal Arts, A.A.**

**Location: All Campuses and Online**

The Liberal Arts Program leads to a Bachelor of Arts or Bachelor of Science degree. The following outline should be used as a guide for students seeking a broad and general foundation in the arts and sciences during the first two years.

This program will provide the student an opportunity to test several occupational areas before making a final decision by acquainting him/her with all the basic fields of human knowledge. The program outlined will meet the requirements for the Associate in Arts Degree and Minnesota Transfer Curriculum. The Associate in Arts degree can be used to fulfill the freshman-sophomore general education requirements at all state universities and most four-year colleges and universities in other states. The degree is the basic graduation award toward which most students will work if they intend to transfer. It emphasizes a broad general education. A year of world languages may be required at some schools in some majors. In order to obtain an Associate in Arts degree, students must complete the following uniform requirements:

Medical Administrative Secretary, A.A.S.

Locations: Canby, Granite Falls, Jackson, Pipestone, Worthington, and Online

A medical secretary performs the confidential administrative and clerical work of a medical office. The variety of duties may include bookkeeping, billing, scheduling appointments, and processing insurance claims. Medical secretaries may be responsible for telephone, mail, transcription and typing duties. Other duties include ordering laboratory tests and supplies, as well as receiving, interviewing and instructing patients.

General Education Requirements: 20
ENGL 1101 Composition I 3
NSCI 1100 Issues in the Environment 3
PSYC 1101 Introduction to Psychology 4
SOC 1101 Introduction to Sociology 3
SPCH 1101 Speech 3

Humanities Electives choose from: 3
Art, Foreign Language, Literature, Music, Philosophy, Theater, Western Civilization

Medical Assistant, A.A.S.

Location: Luverne

Medical Assistants help physicians examine and treat patients, as well as perform routine tasks needed to keep an office running efficiently. In small practices, medical assistants handle both clerical and clinical duties and report directly to the office manager or physician. Those employed in large practices tend to specialize in a particular area under the supervision of department administrators. Clinical duties may include patient scheduling, receptionist duties, medical record management, office correspondence, medical insurance procedures, and management of office accounts, fees, and collections. Clinical duties may include interviewing patients, patient education, taking vital signs, preparing patients for examination and assisting the physician during exams, performing routine laboratory testing and electrocardiography, sterilizing instruments, and administering medications. Students enrolling in the medical assistant program must possess a high school diploma or GED. Prior to participating in the clinical
Medical Assistant, Diploma  
Location: Luverne  
The Medical Assistant program at Minnesota West is designed to prepare students for employment in the medical field. Successful completion of all required program courses and general education courses with a grade of “C” or better is necessary to graduate. 

Students in the medical assistant program will undergo a background study as required by Minnesota law. Graduates of the Minnesota West Medical Assistant program are eligible to earn certification by taking the American Association of Medical Assistant's Certification Exam.

## Medical Laboratory Technician, A.A.S.

### Location: Luverne

The Medical Laboratory Technician (MLT) program at Minnesota West is designed to prepare students for employment in the medical, clinical, research and public health laboratories. A MLT collects and/or receives patient specimens and performs general laboratory tests to aid physicians in the diagnosis and treatment of disease. The MLT program combines academic general education with a concentration in the basic sciences, didactic studies in medical laboratory science and clinical training (externship) in a hospital laboratory. It is recommended that students enrolling in the Medical Laboratory Technician program have a science and math background. Prior to participating in the clinical externship, student must submit health information and undergo a background study as required by Minnesota law. Successful completion of all required course with a grade of C (75%) or better is necessary to graduate. Student must test into MATH 0098 level.

Accredited by: The National Accrediting Agency for Clinical Laboratory Science (NAACLS); 8410 West Bryn Mawr Avenue – Suite 670; Chicago, IL 60631; (773) 714-8880

### Phlebotomy, Certificate

### Location: Luverne

The curriculum prepares the student for employment as a Phlebotomist/Laboratory Assistant in a hospital, laboratory, or clinic. The training is designed to prepare students to collect specimens, perform venipunctures and dermal punctures, prepare and transport specimens, and perform laboratory computer operations. Full-time students can complete the academic portion of the program in two semesters. The clinical portion of the program is by arrangement, and completion may vary by student. Successful completion of all required program courses and general education courses with a grade of C (75%) or better is necessary to graduate. Enrollment notes: A physical exam; hepatitis immunization; entrance assessment; application fee; and a copy of high school transcript, diploma or GED are all needed for enrollment. Students in...
Nursing courses must be taken in sequence. The following course sequence is required for completion of this program. Only students who have been accepted into the Nursing program are allowed to take the nursing courses. The non-nursing courses listed may be taken either before or during the program, with the exception of the prerequisite courses which must be taken before the beginning of the program. Nursing courses must be taken in sequence.

Prior to graduation, a licensure preparation exam (HESI) is required. A student with a HESI score over 900 or HESI remediation with four weeks of completion of the spring semester progresses toward graduation. The HESI is an indicator of success on the NCLEX-PN test.

*Clinical situations are a part of the program and are done locally in area medical facilities. On-campus and distance learning students need to be prepared to travel to local clinical sites as part of the program.

### Nursing A.S. – Registered Nurse

**Location: Pipestone, Worthington and Distance**

Nursing, A.S. is designed for Licensed Practical Nurses who wish to obtain the Associate in Science in Nursing degree. It is an entrance point for mobility students who have graduated from another nursing program or have completed Minnesota West’s Practical Nursing program. After successful completion of the Nursing A.S. Program, students are awarded the Associate degree in Nursing and are then eligible to take the NCLEX-RN examination. At this point, students are also eligible to articulate to BSN/BAN program in the MnSCU system. Admission requirements include: a minimum decision score of 80 on the NLN exam, a grade of C or higher in all required coursework, a minimum GPA of 2.5, and completion of the courses described below. NURS 2100, Professional Nursing Transition is required prior to entrance into Fall Semester nursing classes for students who have graduated from another nursing program or are returning to Minnesota West’s Nursing program.

LPN Licensure is required prior to taking any NURS courses (exception NURS 2100) in the program.

The following course sequence is required for completion of this program. Only students who have been accepted into the Nursing program are allowed to take the nursing courses. The non-NURS courses shown may be taken either before or during the program.

**Prerequisites**

- Completion of practical nursing program
- (Advanced Standing) 9
- CSCI 1102 Intro to Microcomputers 3
- BIOL 2245 Medical Terminology 2
- BIOL 2201 Anatomy 4

**Total Credits** 24-26

- BIOL 2202 Physiology 4
- ENGL 1101 Composition I 3
- NURS 2120 Nursing Across Lifespan 4
- NURS 2140 Professional Nursing Skills Lab 2
- NURS 2180 *Clinical Applications 2
- PHIL 2201 Intro to Ethical Theory 1
- PHIL 2222 Medical Ethics 1
- NURS 2220 Nursing Across Lifespan II 4
- NURS 2230 Trends and Issues 1
- NURS 2280 *Clinical Applications 3
and 10, only three credits of Social Science electives are required. 

Recommended electives include: ENGL 1102, humanities, social sciences (HIST 1101, 1102, geography, political science or economics), chemistry, NSCI 1100, BIOL 1115, PSYC 1101.

Humans: choose from the areas of art, literature, theatre, HIST 1111, 1112, music, or any course with HUM designator.

Prior to graduation, a licensure preparation exam (HESI) is required. A student with a HESI score over 900 or HESI remediation within four weeks of completion of the spring semester progresses toward graduation. The HESI is an indicator of success on the NCLEX-RN test.

**Occupational Therapy, (pre-occupational therapy) A.A.**

**Location: Worthington**

Occupational therapy is treatment by means of mental and physical activities, including arts and crafts. The ultimate objective of the occupational therapist is to help individuals restore themselves to their highest level of independence through improvement of their physical, emotional and social well-being. You may complete the Associate in Arts or the Associate in Science degree depending on the transfer institution. The program listed meets MnTC and is an Associate in Arts program.

| ART 1118 | Arts and Crafts | 3 |
| BIOL 1110 | Principles of Biology | 4 |

| **Social Science Course** | 3 |
| **Total Credits** | 60 |

Fulfill a minimum of 4 credits from two of the three areas. HLTH 1101, CSCI 1102, or any Physical Education course.

* If either PSCI 2210 or GEOG 1101 is taken to meet Areas 5 and 10, only three credits of Social Science electives are required.

**Optometry (pre-optometry), A.S.**

**Location: Worthington**

Students planning to pursue the pre-optometry program at Minnesota West-Worthington campus are advised to determine quite early in their program where they plan to complete the degree requirements. The lower division courses are similar for pre-optometry programs, but in most cases the applicant must complete a prescribed set of courses if he/she is not accepted for study. These courses are available at Minnesota West-Worthington campus for the pre-optometry major. We will assist you in gaining acceptance for further training. Students planning to study as optometrists are expected to perform in the "B" range and above. The following program is patterned after the University of Minnesota. Students are encouraged to complete the Associate in Arts degree or the Minnesota Transfer Curriculum requirements. **THIS WILL TAKE ONE ADDITIONAL SEMESTER.** To complete the Associate in Arts degree and MnTC requirements, students should add: five credits of HUM courses; five credits of SOC SCI courses; two-nine credits to meet Areas 8, 9, 10 (if not met through HUM or SOC SCI courses); three credits of PSYC 1150; This is a total of 15-26 additional credits

**Total Credits** 60

* Depends on transfer institution
** Minimums only
*** Depends on high school preparation and placement.

To complete the Associate in Arts degree in one additional semester, students should take: five credits HUM; three credits HLTH 1101; three credits PSCI 2210, NSCI 1100 or GEOG 1101; one credit PHED Activity (if not previously completed); three credits SOC SCI; six credits to meet MnTC Areas 8 and 9 if not previously met by HUM/SOC SCI courses. three credits of HLTH 1110 is strongly recommended. This totals 11-24 additional credits.

NOTE: The transfer institution of all applicants requires the Pharmacy College Admission Test (PCAT). Applications for the PCAT are available in the counseling office.

Physical Education, Health, Recreation/Parks Administration, A.A.

Location: Worthington

The lower division courses for these three areas of concentration are basically the same. Therefore, we have listed them under a common heading in the program of study. The student is advised to check with Minnesota West-Worthington campus counseling staff for the exact requirements for the four-year college he/she intends to attend.

Recreation/Parks Administration majors may specialize in one of several areas of concentration. The area desired should be determined while in attendance at Minnesota West in order to meet the transfer requirements. Additional credits in business courses may be in order for some receiving colleges. The curriculum requirements below meet the MnTC requirements.

BIOL 2250 Anatomy & Physiology I 4
BIOL 2260 Anatomy & Physiology II 4

Social Science Electives** 9

**Total Credits** 60

Fulfill a minimum of 4 credits from two of the three areas.
HLTH 1101, CSCI 1102, or any Physical Education course.

* If either PSCI 2210 or GEOG 1101 is taken to meet Areas 5 and 10, deduct three credits from SOC SCI requirements.

Plumbing Technology, A.A.S.

Location: Pipestone

The Plumbing Technology program prepares students for work in all phases of plumbing using a variety of hand and power tool skills. Course work includes training in assembly, installation and repair of pipes, fittings and fixtures which make up water supply or waste disposal systems. Minnesota State plumbing apprenticeship and other certification is attained upon completion of the program.

The Plumbing Technology graduate studies building plans and working drawings to determine work aids and plans the sequence of installation according to print specifications and codes. The majority of plumbers enter the trade as apprentices, working toward journeyman and master status in residential, commercial and industrial work. Plumbers work in various sized shops in many communities, and employment exists nationwide.

### Powerline Technician, A.A.S.

**Location:** Jackson  
The Powerline Technician major is designed to train students to become apprentices in powerline construction and maintenance. Students learn basic skills and applications in transmission and distribution. Persons trained in this field work for power companies installing and maintaining overhead and underground powerlines. They install equipment such as overvoltage and overcurrent protective devices, transformers, capacitors, and regulators. Powerline technicians are employed by investor owned power companies, consumer owned power companies, municipalities, and by electrical contractors.

### The 16 credits of General Education required are:

Truck Driver, Certificate
Location: Worthington
The Truck Driving Training major is designed to provide students with the knowledge and skills that are necessary to obtain a commercial class A driver’s license (CDL). The program offers a well rounded curriculum that begins with basic operating principles and continues through advanced driving techniques. Students will receive range training in backing and maneuvering and over-the-road driving practice. As students advance in their training, they will learn high level skills such as coping with various road hazards and heavy traffic. Students will operate trucks that are empty and fully loaded on flat terrain and on various grades and strive for optimum fuel economy and vehicle efficiency. Also included in student training will be non-driving skills such as time and money management, trip planning, log maintenance, and techniques for coping with a driver’s life style. An emphasis will be placed on projecting an appropriate image expected by future employers.

Prerequisites: New applicants must be able to pass a Department of Transportation physical examination submit to a DOT Drug Test and Motor Vehicle Record check. They must also possess a valid driver’s license and provide a printout of their driving record which must be free from any serious violation within the past 12 months.

Program Information: Students under 21 years of age are restricted to driving within the state of their residence (intra-state driving).

Management Programs

More information on Minnesota Management programs is available at http://www.mnwest.edu/training-management

**Computerizing Small Business Management, Diploma**

Locations: Canby, Granite Falls, Jackson, Pipestone, Worthington

Computerizing Small Business is a program designed to assist the small business owner in maximizing the effectiveness of office computerization and accounting applications. Program instructors target instruction to areas that will enable entrepreneurs to meet their business and family goals. A structured program is used to analyze current systems, evaluate business applications for the computer, identify the advantages of computerized systems, and examine software & hardware currently available. This program may use a combination of individualized on-site instruction, tailored to the specific business needs, and classroom delivery. The mission of the Computerizing Small Business program is to encourage more businesses to take advantage of the cost savings and productivity improvement opportunities available through efficient office automation. This is accomplished through instruction that helps the business owner better understand and thus simplify the computerization process and use of application software.

Prerequisites:
To be eligible for enrollment in Computerized Small Business Management courses, the student must be a small business operator or must secure the consent of the instructor.

**Farm Business Management, Diploma**

Locations: Canby, Granite Falls, Jackson, Pipestone, Worthington, and southwestern Minnesota

This diploma program is designed to provide education to farm owners and operators or persons interested in farming. The purpose of the program is to assist students in meeting their business and personal goals. This is best accomplished through the use of quality records and sound business decisions. Effective financial management in the business is the best way for the business to maintain that competitive edge. Instructors in Minnesota's Farm Business Management Education Programs deliver the program using a variety of methods. The primary delivery method is through individualized instruction at the student’s business. Instructors meet with the students on a regular basis to evaluate the business and develop individual educational plans. Instruction is also delivered via the traditional classroom, small group meetings, field trips, and tours.

Prerequisites: To be eligible for enrollment in Farm Business Management courses, the student must be a farm business operator or manager or must secure the consent of the instructor.

**Advanced Farm Business Management, Certificate**

Locations: Canby, Granite Falls, Jackson, Pipestone, Worthington, and southwestern Minnesota

This certificate program is designed to provide instruction for students who have completed the other programs in the Farm Business Management curriculum. Students in this program will learn about key factors in business management for the long term: Risk Management, Strategic Planning, and Business Plan development. Prior instruction in Farm Business Management lays the groundwork for continued enhancement of financial management skills for the students in this program. Students will focus on using financial trends in their business to fine-tune the focus and strategize opportunities for the long-term profitability of their business.

**Lamb and Wool Management, Diploma**

**Location: Pipestone**

The Lamb and Wool Management Program is concerned with developing the sheep enterprise operator's ability to organize and manage resources to meet family and business goals. Good management requires a sound knowledge of economic and scientific principles because they are the framework for a profitable sheep enterprise. Good management provides a perspective that considers the relationship of all parts to the whole farm business. Good sheep management requires knowledge of sheep production practices and animal science, as well as new technology developments in the field. The Lamb and Wool Management Program is concerned with the development of a person's knowledge of economic, management, and scientific principles and using them in a profit oriented decision making process that enables them to meet their goals.

**Prerequisites:** To be eligible for enrollment in Lamb and Wool Management courses, a student must be a sheep producer or must secure the consent of the instructor.

**Program Delivery:** Curriculum is delivered through a combination of classroom, lab, on-farm instruction and individual instruction. This option is available only for students within 125 miles of Pipestone, Minnesota or through permission of the instructor.

Small Business Management, Diploma

Locations: Canby, Granite Falls, Jackson, Pipestone, Worthington, and southwestern Minnesota

The Minnesota Small Business Management education program is concerned with the organization of an entrepreneur's resources in such a way as to assist the family in meeting their family and business goals. Often these goals involve generating new profit. Good management requires a sound knowledge of economic principles because they are the framework for small business operation and organization. Good management ties all perspective, showing the relationship of all parts to one another, and to the whole small business. Management must understand various alternatives that can be used in decision making. Small business management instruction is concerned with the development of an entrepreneur's knowledge of economic principles and with the decision-making process.

Prerequisites: To be eligible for enrollment in Small Business Management courses, the student must be a small business operator or must secure the consent of the instructor.

Customized Training Services

Customized Training Services offers short term, part time credit and clock hour courses, continuing education units, and customized training to individuals, businesses, industries and agencies. Customized Training Services provides access to a wide array of experts and consultants in many fields.

Courses are provided days, evenings, and weekends. Training can be provided on-site, on any Minnesota West Community & Technical College campus, at the Minnesota West Marshall Center or at a convenient off-site meeting location.

Types of training/education provided:
- Training for new employees
- Retraining for existing employees
- Technical assistance
- Research and development for new training programs
- Continuing education for individuals

Customized Training Services Program Areas:
Services fall into 5 program areas:
- Computer Technology
- Management and Professional Development
- Manufacturing and Applied Technology
- Health and Wellness
- Public Safety

COMPUTER TECHNOLOGY:
Computer training enables an organization or individual to get the maximum productivity from a most important business tool, the computer. A mobile lap-top personal computer laboratory, instructor and training in various Windows and Microsoft Office applications is available. Training can be customized to meet company and individual needs. The campus locations and customized options put quality computer instruction within reach. The classes are offered at the campus sites or can be customized to target the specific applications and skill levels of employees.

MANAGEMENT AND PROFESSIONAL DEVELOPMENT:
Personal and professional growth is an important component in maintaining managers, management trainees, and skilled employees.

Customized Training Services provides the training foundation for:
- Organizational Development
- Performance Management
- Project Management
- Supervisory and Human Resource Mgt.

MANUFACTURING AND APPLIED TECHNOLOGY:
The training that is available through Manufacturing and Applied Technology include such areas as OSHA, Safety, Welding, Automation Skills, Fluid Power Fundamentals, AutoCAD, Machine Tool, Manufacturing Practices and Quality Control, Contractors Continuing Education, Commercial Vehicle Inspection Recertification, Steam Boiler and much more.

OSHA and Safety:
OSHA and Safety training programs for businesses, industries, and municipalities are designed to meet or exceed standards set forth by regulatory agencies.

Welding:
Minnesota West's mobile welding unit has twelve wire feed welding stations and has the capability of bringing welding and blueprint reading for welder training direct to the customer's doorstep.

HEALTH AND WELLNESS:
Minnesota West Community & Technical College offers diverse health programming for individuals, facilities, and persons seeking professional CEU’s. Programs are offered on the various campuses or at work sites.

Today's health care personnel are challenged by increased technology and expanded levels of accountability. Programs are customized to work with all members of the health care team in an effort to assist them in meeting these challenges.

Continuing Dental Education:
Minnesota West provides continuing dental education for Dentists, Hygienists and Dental Assistants and is an approved sponsor for continuing dental education for the Minnesota Board of Dentistry and Dental Assisting National Board.

PUBLIC SAFETY:
Customized Training Services provides training to Fire and Rescue personnel as well as Law Enforcement officers within the service area. The wide range of training programs in these areas also provides unique opportunities for business and industry as well as municipalities.

Safety Programs:
First Aid and CPR courses are readily available or may be customized to meet an organization’s needs. All courses have been designed to meet or exceed the recommendations of the American Heart Association, the American Red Cross, The National Safety Council, and the American Medical Association.

Fire and Rescue:
The wide range of training programs in Fire and Rescue offer unique opportunities for industry personnel as well as fire and rescue personnel in communities. This training is highly mobile and many courses encompass hands-on learning. The mobile Confined Space, Live Burn, and Ventilation Training Simulators can be brought on-site to provide valuable training to municipalities as well as industries. Training programs can be designed that will meet OSHA and other state and federal requirements.
Law Enforcement and Personal Safety:
Minnesota West is a POST Board accredited educational institution for Law Enforcement continuing education. Training may be customized for Law Enforcement Agencies, Security Organizations, and Business and Industry.

Minnesota West Marshall Center/MERIT Center:
Marshall Emergency Response & Industrial Training Center is located at 1001 Erie Road, Marshall, MN. The purpose of the MERIT Center is to provide a site and equipment for the training of emergency responders including fire fighters, city and county law enforcement personnel, emergency medical service personnel, regional emergency managers, business and industry personnel and other related persons in southwest-west central Minnesota. The city of Marshall owns the actual building site and Minnesota West Customized Training Services is mandated to provide the training through a number of venues at the site. The training is available as open enrollment classes or classes for specific companies and industries. Minnesota West personnel maintain offices at the site.

Customized Training Services for Minnesota West Community & Technical College are delivered at the Marshall Center. The Center is located within the Minnesota Emergency Response and Industrial Training Center located at 1001 Erie Road/County Road 33 in Marshall, MN.

The Center provides highly specialized hour-based and credit-based technical courses which are designed to upgrade the skills of the incumbent workforce in the area. The center is fully staffed with Customized Training coordinators and support staff, and includes a classroom complex. For more information about the training possibilities offered through Minnesota West Customized Training Services, call the Marshall Center at 507-537-7051 or 1-800-576-6728.

Check out our web site at: www.mnwest.edu/training
COURSE DESCRIPTIONS

ACCOUNTANT (ACCT)

ACCT 1104 1
Special Projects
Encourages students to identify, analyze and record transactions by the completion of a business simulation project. Topics covered include the accounting cycle, accounting for a merchandising business, accounting system design, special journals, subsidiary ledgers and work ethics. Concurrent enrollment with ACCT 1102 or BUS 2201.

ACCT 1110 3
Payroll Accounting
Covers the various state and federal laws pertaining to the computation of payment of salaries and wages.

ACCT 1115 2
Computerized Accounting Applications I
Introduces the use of computers and related software used in the accounting function of the business environment. Topics include the accounting function of the business environment. Topics include general ledger accounting, payroll procedures, accounts receivable, and accounts payable. Prerequisite: BUS 2201 or high school/college bookkeeping or accounting coursework.

ACCT 1120 2
Spreadsheet Concepts and Applications
Uses a computerized spreadsheet system for business applications. Topics include document creation, storage and retrieval, editing, printing, and file distribution.

ACCT 1122 2
Database Concepts and Applications
Uses a database system for business applications. Topics include electronic files, file creation and flexible stored procedures.

ACCT 2100 4
Intermediate Accounting I
Explores accounting theory and concepts with an analysis of the influence on financial accounting by various boards, associations, and governmental agencies. Prerequisite: BUS 2202.

ACCT 2101 2
Intermediate Accounting II
Continues the comprehensive study of accounting theory and concepts. Prerequisite: ACCT 2100.

ACCT 2105 3
Auditing
Studies the methods and procedures used to verify the completeness and accuracy of accounting records. Topics include professional ethics, the audit process, nature of evidence, internal control, audit sampling techniques, the audit examination, and audit reports.

ACCT 2110 4
Income Tax I
Explains and interprets the Internal Revenue Code as applied to individual and business returns. Computerized software will be used to prepare actual income tax returns.

ACCT 2115 4
Cost Accounting I
Studies cost accounting as a management tool for planning, organizing, and controlling costs associated with the manufacturing process, whether using job costing or process accounting. Prerequisite: BUS 2202.

ACCT 2120 3
Fund/Nonprofit Accounting
Focuses on the application of generally accepted accounting principles for state and local governmental units. Prerequisite: BUS 2202.

ACCT 2125 2
Computerized Accounting Applications II
Continues the use of computers and related software used in the accounting function of a business. Prerequisite: BUS 2202.

ACCT 2130 2
Intermediate Accounting III
Studies accounting theory and concepts. Prerequisite: ACCT 2101.

ACCT 2135 2
Internship
Provides practical experience with a business utilizing skills/knowledge learned in accounting programs.

ADMINISTRATIVE ASSISTANT (ADSA)

ADSA 1100 3
College Keyboarding I
Covers basic skill development and the use of a computer keyboard to produce various business documents including letters, envelopes, reports, memos, tables, and employment documents. In addition to formatting business documents, focus will be placed on keyboarding speed, accuracy, and proofreading skills.

ADSA 1105 3
College Keyboarding II
Covers production keyboarding using a computer to complete a variety of business applications. Business documents will be produced including letters, envelopes, reports, memos, tables, and forms. Also included is the continued development of keyboarding speed, accuracy, and proofreading skills. Prerequisite: ADSA 1100.

ADSA 1111 3
Office Management
Covers general office principles, practices, and procedures in theory with practical applications. Various topics will be covered including: office equipment, computer skills, communication skills, administrative duties, ‘typical’ office duties, and personal and professional development.

ADSA 1116 2
Machine Transcription
Covers the use of computer equipment, transcription units, and word processing software to transcribe dictated business documents. Emphasis will be placed on preparing realistic forms and materials, building speed and accuracy, proofreading, correcting errors, using punctuation, grammar, and spelling rules, and using reference materials. Prerequisite: ADSA 1100.

ADSA 1122 2
Word Processing I
Covers using a computer system with word processing software to perform basic word processing applications. Topics covered include preparing and managing documents, formatting and enhancing documents, and customizing documents.

ADSA 1123 2
Word Processing II
Continues Word Processing I with a focus on increased proficiency in operating word processing software. Topics covered include enhancing and organizing text along with realistic word processing projects. Prerequisite: ADSA 1122.

ADSA 1126 2
Advanced Office Applications
Designed as a capstone course to integrate and reinforce the skills and knowledge learned in previous business courses in the Administrative Assistant program. Computer applications will be utilized in projects that simulate those used in an office environment. Projects will emphasize quality and meeting deadlines. Prerequisites: ADSA 1100, ADSA 1122 or instructor approval and successful completion of, or concurrent enrollment in, ACCT 1120 and ACCT 1122.
ADSA 1130  
Office Accounting Concepts  
Provides students with a basic knowledge of accounting concepts and procedures. The accounting cycle for service and merchandising businesses will be covered by analyzing business transactions, recording transactions in a variety of journals, preparing financial reports, and accounting for cash and payroll.

ADSA 1131  
Office Accounting Concepts II  
Provides the opportunity to apply basic knowledge of accounting concepts and procedures. Students will apply basic accounting procedures through the use of simulations, software packages, etc. Prerequisite: ADSA 1130.

ADSA 1132  
Calculators  
Introduces the development of the touch system on calculator keyboards and microcomputer number pad keyboards. Students will develop speed and accuracy using the touch system for the four basic arithmetic operations and solving business problems.

ADSA 1136  
Desktop Publishing  
Introduces students to the concepts, terminology, techniques, and applications of desktop publishing. The student will integrate text and graphics to produce professional-quality publications.

ADSA 1141  
Customer Service for the Office Professional  
Covers the basic skills necessary to work effectively with customers. Basic customer service communication skills including telephone, technology and writing are covered. Also included are customer retention, motivation, leadership and problem solving strategies.

ADSA 1145  
Supervisory Management  
Introduces the skills required to effectively direct the work of others in the business world by working through people to develop and empower them. Important supervisory management concepts are stressed as well as how to apply the principles of management in the real world.

ADSA 1150  
Personal Finance  
Provides students with the basic concepts of personal financial management. It covers budgeting, consumer credit, personal financial planning, effective purchasing of consumer goods and services, insurance, investment, and retirement planning.

ADSA 1176  
Business Communications  
Covers oral and written communication skills needed in the professional workforce.

ADSA 1180  
Records Management  
Covers the flow of records utilized for client/customer information processing.

ADSA 1190  
Presentation Graphics  
Covers the concepts of developing electronic slide shows using a computer application program. The keys to effective presentations are covered along with various printing techniques. This course covers more advanced presentation techniques including animation and sound. The basics of scanning and manipulation graphics are also covered.

ADSA 1195  
Intro to Voice Recognition Software  
Covers basic skill development and the use of voice recognition software. Topics covered include creating personal profiles; learning voice commands and proper techniques; and creating, proofreading, navigating, and editing documents.

ADSA 1200  
Special Projects  
Involves shadowing various employees at business sites. Approximately three visits will be involved and reports will be done on each.

MEDICAL ADMINISTRATIVE ASSISTANT (ADSM)

ADSM 1100  
Medical Terminology I  
Introduces word analysis, spelling, and usage of word roots, prefixes, suffixes, and abbreviations common to the medical profession. Emphasis on understanding, pronouncing, and spelling diagnostic terms.

ADSM 1105  
Medical Insurance and Coding  
Provides an introduction to medical and dental claim forms preparation and processing. It will include CPT, ICD-9-CM, HCPCS, and ADA coding, terminology, and forms preparation.

ADSM 1110  
Anatomy & Physiology/Disease Conditions I  
Introduces human anatomy and systems with emphasis on terminology, abbreviations, and diagnostic tests for the human body through study of diseases by anatomical systems. The emphasis is on terminology, abbreviations, and symptomatic, diagnostic, and operative terms.

ADSM 1115  
Anatomy & Physiology/Disease Conditions II  
Continues human anatomy and disease with emphasis on terminology, abbreviations, and disease process. The study of diseases follows anatomical systems. Prerequisite: ADSM 1110.

ADSM 1117  
Anatomy & Physiology/Disease Conditions  
Covers the relevant structures, functions, and diseases of body systems. It emphasizes clinical applications and medical terminology. Emphasis will be placed on the signs, symptoms, diagnostic measures, and treatment regimes of diseases.

ADSM 1120  
Medical Office Procedures I  
Provides medical office career information, with emphasis upon medical ethics and professional liability. Additional topics covered include: medical receptionist tasks, working with patient files, medical records, word processing, and billing.

ADSM 1125  
Medical Office Procedures II  
Continues Medical Office Procedures I. Medical topics covered include: medical insurance, DRGS, HMOs, CPT and HCPCS coding. This also covers the integration of medical office tasks: basics of computer operation, mail handling, medical document production, insurance forms completion, and making meeting and travel arrangements.

ADSM 1130  
Medical Machine Transcription I  
Teaches transcription of dictated medical material into a variety of usable medical documents. The emphasis is on authentic forms and material; building typing speed and accuracy; and proofreading and correcting errors. Must be taken concurrently with ADSM 1100.

ADSM 1135  
Medical Machine Transcription II  
Continues Medical Machine Transcription I. Transcription of dictated medical material into a variety of usable medical documents is continued, using word processing equipment. The emphasis is on experience with authentic medical material, continuing to build typing speed and accuracy, advanced editing, advanced proofreading, and enhancement of the ability to find and correct error.

ADSM 1137  
Medical Machine Transcription III  
Provides advanced medical transcription training in various medical and surgical specialty units.

ADSM 1140  
Applied Medical Terminology  
Explores the meaning for Latin and Greek elements or word parts. This increased knowledge will enable you to interpret and understand complex medical terms, providing a basic knowledge of the language of medicine and an understanding of how complex medical terms are formed. Included will be pharmaceutical terms, generic, and brand name drugs, and abbreviations common to the medical profession.
ADSM 1165
Diagnosis Coding
Provides students with an understanding of ICD-9-CM diagnostic coding: a statistical classification system for selecting diagnoses in healthcare settings. Students will learn how to apply official guidelines to provide the most accurate codes for billing and statistical analysis. Prerequisites: BIOL 2245 or ADSM 1100; ADSM 1105, ADSM 1140, and either ADSM 1110 and ADSM 1115 or HC 1151 and HC 2120.

ADSM 1170
Procedure Coding
Provides an entry-level background for using procedural classification systems in healthcare settings. The course presents coding format and basic and specific coding principles. Exercises will be used to demonstrate requirements for accurate coding. Prerequisites: BIOL 2245 or ADSM 1100; ADSM 1105, ADSM 1140, and either ADSM 1110 and ADSM 1115 or HC 1151 and HC 2120.

ADSM 2297
Internship
Designed to provide the student with occupational experience in the Medical Administrative Secretarial field. It is designed to provide on-the-job experience in an approved health setting as the training site. Prerequisite: Instructor approval.

AGRICULTURE (AGRI)

AGRI 1101
Introduction to Animal Science
Provides students with an introduction to animal science with an emphasis on the fundamental concepts of physiology, nutrition, animal breeding and management as applied to beef cattle, dairy cattle, poultry, sheep and swine production. 2 lec, 2 lab

AGRI 1102
Principles of Agronomy
Explores the principles and practices of plant and related sciences as applied to increasing productivity and improvement of field crops. Emphasis is on crop selection and improvement through the breeding of crop varieties, seeds and seedlings, crop growth and development, crop production hazards, and the harvest and storage of field crops. 2 lec, 2 lab

AGRI 1103
Introduction to Soil Science
Introduces students to the origin, formation, and classification of soils. This includes the physical, chemical, and biological properties of soils, soils as a medium for plant growth, elements, water, air, organic matter, and plant and animal life in the soil. 2 lec, 2 lab

AGRI 1110
Introduction to Horticulture
Emphasizes the growth process in production of fruits, vegetables, flowers, lawns, trees, and shrubs. Studies include planning, preparation and care of home grounds. Fundamental concepts in plant identification, growth, culture, landscape and design are also studied.

AGRI 1121
Dairy Technician
Provides for introduction to the Dairy Industry as a technician. The emphasis will be on employment skills and milking skills. 1.5 lec, 1 lab

AGRI 1125
Custom Application
Designed for the student pursuing a career in crop production or agronomy services area. The student will receive hands-on instruction in the safe operation and calibration of custom sprayers and spreaders. The student will be prepared for and issued the Minnesota State Custom Application exams for categories A, C, & D, leading to licensure in those areas.

AGRI 1151
Farm Records & Business Analysis
Emphasizes the maintenance and analysis of farm records. Special attention is given to the use of the Minnesota Farm Account Book and the analysis procedure. Topics include calculation of earnings, efficiency factors, total business and enterprise analysis.

AGRI 1152
Agricultural Marketing and Prices
Explores the economics of agricultural marketing, organization of markets and marketing enterprises, marketing policy, and price trends of agricultural commodities.

AGRI 2201
Principles of Animal Nutrition
Covers the classification and function of nutrients, digestion, and utilization of feeds. This includes nutrient requirements for livestock and poultry, nutrient composition, and feeding standards. Prerequisite: AGRI 1101 or consent of instructor.

AGRI 2202
Weed Control
Surveys the principles and methods of weed control and the modes of action of herbicides. 2 lec, 2 lab

AGRI 2203
Soil Fertility and Fertilizers
Explores the chemical elements in the soil and plants, soil testing and tissue testing, fertilizer and lime recommendations, and fertilizer nutrients. 2 lec, 2 lab

AGRI 2204
Intro to GPS/GIS
Intended to serve as an introduction to GPS (Global Positioning Systems) and GIS (Geographical Information Systems) with an emphasis on agricultural uses and precision farming.

AGRI 2212
Corn and Soybean Production
Explores practices used in corn and soybean production, variety and hybrid selection, seed bed preparation and planting, fertilizer programs, water management, weed control, harvesting, storage and marketing.

AGRI 2214
Machinery Principles and Management
Covers the utilization of farm equipment from the purchasing of equipment and managing the costs to the operation and maintenance of agricultural equipment.

AGRI 2216
Introduction to Meat Science
Evaluates the principles of conformation, quality, and finish of animal carcasses. A comprehensive look at the meat industry. Studies include composition of meat animals, product identification, nutrient values, pricing and marketing.

AGRI 2235
Special Topics in Agriculture
Covers a wide range of issues of current interest. Topics will be chosen to meet the needs of students. The class may be retaken for credit if the topic varies.

AGRI 2251
Principles of Farm and Ranch Management
Emphasizes utilization of land, labor, capital and management in the organization and operation of a farm. Includes the organization of a farm and the decision-making processes involved in establishing a farm business. Analyzing, budgeting, and using principles of economics are considered in the decision making process.

AGRI 2297
Agriculture Production Management Internship
Places students on a farm operation to gain further experience in agricultural production management under the supervision of the agriculture department staff.

AGRI 2298
Agriculture Lab Tech Internship
Places students in area businesses or industries specializing in the appropriate technology to gain practical experience. Students may select an emphasis area in food technology, soil and water, or plant science.
AGRI 2299
Agri-Business Internship
Places students in an area agri-business for one semester to gain practical experience in agricultural sales and service and agricultural business management.

**ART (ART)**

ART 1101 (Meets Goal Area: 6)
**Beginning Drawing**
Combines work in various drawing mediums. This includes experimentation with traditional and contemporary styles, problems in perspective, composition, and imagination.

ART 1103
**Display and Exhibition** (Meets Goal Area: 6)
Exposes the student to organization, management and the design and hanging of gallery displays. Students will be responsible for the preorganization and arrangement of displays. The course will cover both theory and practical experience with gallery management.

ART 1114 (Meets Goal Area: 6)
**Watercolor**
Introduces traditional and contemporary techniques of transparent watercolor with practical experiences in solving painting problems in various styles.

ART 1115 (Meets Goal Area: 6)
**Beginning Painting**
Introduces traditional and contemporary painting techniques. Students will explore their own visual communication style. Students will learn processes for canvas preparation.

ART 1118 (Meets Goal Area: 6)
**Arts and Crafts**
Teaches basic skills using art materials and supplies. Encourages a creative approach to the application of these skills through a variety of techniques. Students will learn appropriate methods of presenting art experiences to individuals with various learning levels and/or disabilities. A resource book containing step by step methods and procedures of instructing others will be produced by each student. Prerequisite: STSK 0090 or evidence of college level reading ability through assessment test or prior college coursework.

ART 1120 (Meets Goal Area: 6)
**Art Appreciation**
Teaches the technical aspects of art, and to the creative mental process which takes place in both the making and viewing of art. This course is also offered on demand. Prerequisite: STSK 0090 or evidence of college level reading ability through assessment test or prior college coursework.

ART 1124 (Meets Goal Area: 6)
**Introduction to Ceramics**
Creating clay objects using the potter's wheel and hand building techniques. Students also learn to operate a kiln and apply glaze finishes.

ART 2201
**Intermediate Drawing**
Uses materials from ART 1101 with increased emphasis on individual creativity and artistic development. Prerequisite: ART 1101.

ART 2215
**Intermediate Painting**
Emphasizes technical and creative application of paint. Students will be encouraged to explore the creative process using a wide variety of painting surfaces, techniques and subject matter. Prerequisite: ART 1115.

ART 2224
**Intermediate Ceramics**
Reinforces beginning design experiences by combining methods of construction. Greater emphasis will be placed on glazing and finishing. Prerequisite: ART 1124.

ART 2230 (Meets Goal Area: 6)
**Computer Graphics**
Explores the creative Photoshop techniques of image blending, shadows, image enhancement, type, and background effects. We will also focus on Web applications such as: interface design, slicing, rollovers, animations and optimization.

ART 2232
**Advanced Computer Graphics**
Explores students to photographic manipulation and applied illustrative techniques using Photoshop. Some topics to be covered are: raster vs. vector images, scanning and editing photographs, using a digital camera, designing and manipulating text to communicate ideas, and drawing basic objects for the purposes of illustration.

ART 2235 (Meets Goal Area: 6)
**Special Topics**
Covers a wide range of art topics and media. Topics will be chosen to meet the needs of art students. The class may be retaken for credit if the topic varies.

ART 2240 (Meets Goal Area: 6, 8)
**Art History**
Includes the study of painting, sculpture and architecture from the Paleolithic (Stone Age) period through the Early Renaissance. 6, 8

ART 2245
**Art History II**
Includes the study of painting, sculpture and architecture from Renaissance through the Post Modern Era: Art since 1980.

**AUTOMOTIVE TECHNOLOGY (AUTO)**

AUTO 1100
**Introduction to Transportation**
Covers the correct procedures for servicing and maintaining vehicles. Shop safety, use of service manuals and bulletins, writing repair orders, and parts requisitions will be addressed.

AUTO 1111
**Electrical**
Presents the basic fundamentals of electricity and electronics, sources of electricity, circuits, magnetism, resistance, coils, capacitance, instruments, diodes, and solid-state devices. Emphasis is placed on the testing and repair of the electrical systems, starter motors, alternators and regulators. Students will identify parts, operation, testing, and overhaul procedures.

AUTO 1120
**Air Conditioning**
Covers the theory, principles, diagnosis, testing, and repairs of the air conditioning systems operations.

AUTO 1121
**Advanced Heating & Air Conditioning**
Covers the theory, principles, diagnosis, testing, and repairs of the air conditioning and heater systems. Also covered is the automatic temperature control systems and operations.

AUTO 1126
**Steering and Alignment**
Prepares students with the necessary skills to diagnose and repair steering and suspension systems. This course teaches suspension systems using leaf springs, coil springs, MacPherson struts, torsion bars and wheel balance. It also covers the principles of operation, disassembly, checks and adjustments of power and manual steering gears, and manual and power rack and pinion systems. Also taught are the procedures required for checking and adjusting wheel alignment.

AUTO 1131
**Brakes**
Covers the basic principles of brakes, hydraulic systems, disc and drum brakes, parking brakes and power assist units. Emphasis will be placed on operation, diagnosis, and repair of various types of braking systems.
AUTO 1136 5
Engine Technology & Lab
Covers the fundamentals of internal combustion engine operation, repair, and maintenance, the procedures for removal, replacement, diagnosing, rebuilding, and assembly. Proper tool and equipment application and failure diagnosis are emphasized in this course.

AUTO 1140 1
Special Projects
Encourages students to identify, develop, explain, and complete their own automotive projects. The special projects course must receive the approval of the instructor prior to implementing the project. Special projects must challenge the student’s current level of technical skills.

AUTO 1145 2
Engine Performance I
Enables students to master the proper techniques necessary to diagnose and repair computer systems by using diagnostic computer systems and scanners. This course will also cover emission control components testing and repair.

AUTO 1194 1
Commercial Drivers License Permit
Prepares students with the necessary content to pass the required test for the State of Minnesota to receive a Class A permit. The tests the State requires are: General Knowledge, Air Brakes, Combination and Pre-trip Inspection.

AUTO 1195 2
Commercial Drivers License
Allows students to learn the proper driving techniques associated with interstate, highway and city driving along with parking and DOT requirements. Prerequisite: Students must have a current Minnesota Class A permit.

AUTO 2106 5
Automatic Transmissions
Prepares students with the necessary skills to diagnose and repair automatic transmissions and transaxles. This course teaches the theory of operation of automatic transmissions and transaxles and the related components. The fundamentals of service of the components of the transmissions will be introduced and practiced in this course.

AUTO 2112 5
Manual Drive Train & Axles
Prepares students with the necessary skills to diagnose and repair manual driveline components. This course covers standard automotive and light truck clutches, drivelines, differential/4x4 and manual transmissions/transaxles. The clutch section includes design, adjustment, overhaul, diagnosis and repair of mechanical and hydraulic systems. The driveline section includesphasing alignment and balance. The manual transmission/transaxle section teaches the operation theory and repair.

AUTO 2121 5
Engine Performance II
Prepares students with the necessary skills to diagnose and repair all systems related to engine performance. It teaches the theory and repair of automotive engine systems. It includes ignition systems, emission controls, electronic engine controls, and engine performance diagnosis.

AUTO 2122 5
Engine Performance III
Prepares students with the necessary skills to diagnose and repair all systems related to engine performance. It teaches the theory and repair of automotive engine systems. It includes ignition systems, emission controls, electronic engine controls, and engine performance diagnosis.

AUTO 2135 3
Ford Computer Controls and Fuel Injection
Covers the theory and operation of the Ford Electronic Engine Controls (EEC) and Ford CFI, EFI, and SEFI fuel injection systems. Diagnosis and repair will include EEC I, II, III, IV, and MCU systems with main emphasis on the EEC IV system, including self-test, pin-point testing and intermittent diagnosis.

AUTO 2145 5
Body Computer Controlled Electrical Systems
Covers the advanced theory of operation, diagnosing and repair of electrical components such as power windows, power seats, ABS brakes, power steering, automatic computer control transmission, A/C climate control, theft deterrent systems, and chassis electronics control systems. Prerequisite: AUTO 1145.

AUTO 2150 2
Special Problems II
Intended to provide training in service and maintaining of vehicles. The class will stress shop safety and the proper use of personal safety equipment. The student will work on a number of specialized projects relating to the automotive industry.

AUTO 2160 6
Special Projects
Intended to provide training in servicing and maintaining of vehicles. The class will stress shop safety and the proper use of personal safety equipment. The student will work on a number of specialized projects relating to the automotive industry.

AUTO 2190 1
Summer Internship
Provides a good overview of what has been covered in the classroom by seeing the way these principles are put to work in the dealership. Hands-on experiences allow the student to disassemble, inspect, evaluate, repair and adjust, and reassemble key elements of the automobile systems.

BIOLOGY (BIOL)

BIOL 1100 3
Survey of Biological Science
Introduces major concepts of biology which include cell structure and function, reproduction, development, interrelationships among organisms, classification, heredity, adaptation and evolution. Special emphasis will be placed upon understanding of the science of biology and its significance to everyday life. 2 lec, 2 lab

BIOL 1110 (Meets Goal Area: 3) 4
Principles of Biology
Investigates fundamental principles of biology with special emphasis on the composition of living things and living systems, the chemistry of living things, natural selection, cell structure and function, metabolism emphasizing bioenergetics and biosynthesis, the cell cycle, and genetics. Prerequisite: STSK 0090 or evidence of college level reading ability through assessment test or prior college coursework. 3 lec, 2 lab

BIOL 1111 (Meets Goal Area: 3) 4
Human Biology
Covers some of the fundamental topics in biology emphasizing the human. Students will explore the structure and function of healthy human body systems and investigate numerous abnormalities and disease states. Additional topics will include human development, aging, human genetics, DNA technology, genetic engineering, biotechnology, and ecological interactions. Prerequisite: STSK 0090 or evidence of college level reading ability through assessment test or prior college coursework. 2 lec, 2 lab

BIOL 2201 (Meets Goal Area: 3) 4
Human Anatomy
Covers structures of the human body from the cellular to organ system level. This course includes study of the human body organization, tissues and organ systems: integumentary, skeletal, muscular, nervous, endocrine, circulatory, lymphatic, respiratory, urinary, digestive, and reproductive. Laboratory exercises support the lecture and include hands-on dissections that coincide with the organ systems covered in the lecture topics. Prerequisite: BIOL 1110 or BIOL 1115. 3 lec, 2 lab

BIOL 2202 (Meets Goal Area: 3) 4
Human Physiology
Covers through an applied and systematic approach the physiology of the cells, tissues, organs, and organ systems of the human body. Laboratory exercises support the lecture and include hands-on dissections that coincide with the systems covered in the lecture topics. Prerequisite: BIOL 2201. 3 lec, 2 lab
BIOL 2220 (Meets Goal Area: 3) 4
Animal Biology
Investigates animal taxonomy, morphology, physiology, evolution and ecology. Laboratory exercises emphasize the structure and function of animals representing the major animal phyla. Prerequisite: BIOL 1110. 3 lec, 2 lab

BIOL 2230 (Meets Goal Area: 3) 4
Plant Biology
Covers the fundamental concepts of plant biology, including plant diversity, taxonomy, morphology, physiology, development, and reproduction. Other topics which will be covered include: viruses, bacteria, and fungi. Laboratory exercises deal with plant, bacteria, and fungi structure and function. Prerequisite: BIOL 1110. 3 lec, 2 lab

BIOL 2235 Special Topics in Biology
Covers a wide range of issues of current interest. Topics will be chosen to meet the needs of students. The class may be retaken for credit if the topic varies.

BIOL 2240 (Meets Goal Area: 3) 3
Genetics
Covers the fundamentals of plant and animal genetics and includes the study of modes of inheritance, mechanisms of gene action, human genetics, and the behavior of genes in populations. Lecture and lab included. Prerequisite: BIOL 1110. 2 lec, 2 lab

BIOL 2245 Medical Terminology
Provides students in any of the health science disciplines or pre-professional studies with working knowledge of the terminology used in the health professions. Prerequisite: STSK 0090 or evidence of college level reading ability through assessment test or prior college coursework.

BIOL 2270 (Meets Goal Area: 3) 4
Microbiology
Covers the fundamentals of the science of microbiology, microscopy, structure and function of cells, metabolism, microbial growth and control, genetics, and recombinant DNA technology. Also covered is a survey of the microbial world including bacteria, viruses, and pathogenic fungi, protozoa and multicellular organisms. The interaction between the microbe and its host is covered as well as environmental and applied or industrial microbiology. Laboratory exercises are designed to reinforce lecture material and provide an opportunity for students to (1) master microbiological techniques, (2) develop critical thinking skills, and (3) learn to analyze and present data. Prerequisite: One of these courses: BIOL 1110, CHEM 1101 or CHEM 1150 is recommended. 2 lec, 4 lab

BIOT 1101 Introduction to Biotechnology
Introduces the field of biotechnology and its applications in industry and agriculture. Components will consist of lectures coordinated to labs, which demonstrate the application of this science to this emerging field. 2 lec, 2 lab

BIOT 2201 Organic and Biological Chemistry
Covers organic functional groups - physical and chemical properties, various specific organic molecules and their role in industry and/or the environment, lipids, proteins, enzymes, nucleic acids, protein synthesis and metabolism. Prerequisites: CHEM 1100 or CHEM 1101. 2 lec, 2 lab

BIOT 2205 Molecular and Cellular Biology
Covers the cellular functions and molecular structures of both prokaryotic and eukaryotic organisms. Topics will include DNA, RNA and protein synthesis, DNA replication, recombination and insertion methods, isolation and purification methods of biological molecules, principles of immunology and virology, and DNA technology. 2 lec, 2 lab

BIOT 2210 Biotechnology Methods I
Introduces the student to the equipment commonly used to support a modern biologies lab. Topics will include instrument care and calibration, laboratory records and statistics, media and product preparation, GMP/GLP regulations, governmental regulations and methods for isolating and purifying targeted biological molecules. 2 lec, 4 lab

BIOT 2220 Biotechnology Methods II
Extends the concepts and theories from Biotechnology I and applies these techniques to small and large scale production. Areas covered will include cell culture, immunoassays, fermenters, inventory control and quality control. Prerequisite: BIOT 2210. 2 lec, 4 lab

BIOT 2225 Analytical and Investigative Lab Techniques
Introduces the student to quantitative analysis of biological components and products. Students will have to process raw samples, identify which assay is appropriate for the sample, and report assay results. Topics include cell fractionation, chromatography, electrophoretic techniques, fluorescence, spectrophotometry, and microscopy among others. Prerequisite: BIOT 1101. 2 lec, 4 lab

BIOT 2227 Biotech Internship
Provides the student with on the job experience in the field of biotechnology.

BUS 1101 Introduction to Business
Provides students with vital exposure to the major business functions in a dynamic free enterprise environment. The course offers students relevant exposure to background information necessary to execute decision-making in a multitude of business specialties. Fundamentals are emphasized in such areas as management, marketing, financing and information systems.

BUS 1104 Business Mathematics
Emphasizes mathematical concepts through practical applications in business situations covering percentages in business (mark-ups, discounts), payroll and taxes, finance charges, inventory and depreciation.

BUS 1105 Introduction to Entrepreneurship
Presents information on starting a new business, developing a business plan, buying an existing business, and understanding the realities of the entrepreneurial lifestyle. Entrepreneurial issues involved in managing and growing an entrepreneurial venture will be covered in a separate class. This course is intended for all students at Minnesota West regardless of their major.

BUS 2105 Introduction to Entrepreneurship
Presents information on starting a new business, developing a business plan, buying an existing business, and understanding the realities of the entrepreneurial lifestyle. Entrepreneurial issues involved in managing and growing an entrepreneurial venture will be covered in a separate class. This course is intended for all students at Minnesota West regardless of their major.

BUS 2200 Introduction to Management Information Systems
Develops a broad understanding of MIS concepts by studying the basic principles and techniques of developing computer-based information systems for management decision-making and problem solving. The fundamental concepts of organization, management information and decision systems will be presented and discussed in class. Advanced spreadsheet commands and functions will be used for case studies. Prerequisite: CSCI 1102. Recommend CSCI 2220 or consent of instructor.

BUS 2201 Principles of Accounting I
Includes an introduction to the accounting system; the processing of accounting data, the purpose and construction of financial statements, and the development of accounting theory and techniques. This course is a prerequisite to all other courses in accounting.
BUS 2202  
Principles of Accounting II  
Continues Accounting I. Transactions advance from sole proprietorship to partnership and corporate account practices. Examines corporations' and stockholders' equity. Includes accounting as a planning, analysis, and control tool facilitating the decision-making process of management. The analysis and comparison of financial statements are emphasized. Prerequisite: BUS 2201.

BUS 2221  
Principles of Management  
Studies the general principles of management planning, organizing, staffing, directing and controlling the establishment. Emphasis is placed on the development of goals, policies, and systems necessary to coordinate all resources of an organization to achieve objectives. The importance of adequate managerial communication and motivation in accomplishing specific purposes, and the decision-making and problem-solving process are emphasized.

BUS 2230  
Principles of Marketing  
Analyzes the role and importance of marketing as a directing force in a business organization and its relationship to our society. Emphasis is placed on principles, methods, and problems involved in the marketing operations of the firm, including development, pricing, marketing channels, and promotion.

BUS 2232  
Professional Selling  
Emphasizes the role and nature of professional selling and the total marketing and promotional effort in accomplishing the objectives of a business enterprise. The principles, practices, and psychology of salesmanship are stressed with a study of customer buying/behavior/motivational theories.

BUS 2233  
Advertising  
Studies the role of advertising and its relationship to the total promotional and marketing efforts of any organization selling goods/services/ideas. Emphasis is placed on selecting the right appeals, layout, and media in reaching the target market. The total communication process is studied in light of various consumer psychology/behavioral theories.

BUS 2241  
Business Law  
Involves the study of the practical aspects of contracts, negotiable instruments, agency, and other legal matters of importance to business men and women. The proper procedures in connection with adequate evidence in cases of legal proceedings will be considered. Business ethics are an integral part of every aspect of law.

BUS 2242  
Business Communications  
Covers theory and offers practice in the fundamentals of good business communications. Emphasis is placed on the construction of effective (and positive) business letter writing. Resume writing, cover letters, interviewing techniques, memos and reports are also integral parts of the course. Prerequisite: ENGL 1101 or consent of instructor.

BUS 2275  
Human Resource Management  
Provides an analysis of the importance of personnel management in accomplishing the established objectives of a business. Utilization of human resources is emphasized. Management's proper relationship with labor unions, governmental authorities, and the total community is studied.

BUS 2297  
Internship  
Offers students paid or unpaid work experience closely related to their academic and career pursuits. Activities are closely supervised by college instructors and on-the-job supervisors.

CHILD DEVELOPMENT (CDEV)  
CDEV 1200  
Professional Relations  
Explores career opportunities for working with children in a variety of child development programs. This course also examines job requirements, duties, regulations, and issues, skills, and personal characteristics for becoming successful professionals in early childhood settings.

CDEV 1240  
Family and Community Relations  
Guides students in learning how to develop positive relationships with families of varied racial, economic, and cultural backgrounds. Students will examine the importance of the family/early childhood staff relationship and study methods of effective communication. Community organizations and networks which support families will be studied.

CDEV 1262  
Creative Activities  
Explore means of developing children's creativity in art, music, drama. Students learn to design age-appropriate activities with paints, paper, sculpture, wood, chalk, recyclables, song, dance, instruments, puppets, and related materials. The course includes lab and field experience. Prerequisite: DHS background study.

CDEV 1266  
Foundations of Child Development I Lab  
Provides an overview of typical and atypical child development across cultures, from prenatals to school age including physical, social, emotional, language, cognitive, aesthetic, and identity development. It integrates developmental theory with appropriate practices in a variety of early childhood and education settings. Emphasis is on application of theory in a variety of Early Childhood settings. It must be taken concurrently with HSER 1266. Prerequisite: DHS background study.

CDEV 1268  
Children's Health, Nutrition and Safety Lab  
Examines how to provide a healthy and safe environment while providing proper nutrition to young children. It sets high-quality expectations regarding policies, procedures, healthful environments, sanitation standards, and preventative care. The emphasis is on application of theory in a variety of early childhood settings. This course also examines the responsibilities of a mandated reporter of child abuse and neglect. Must be taken concurrently with HSER 1268. Prerequisite: DHS background study.

CDEV 1269  
Guidance, Managing the Physical & Social Environment Lab  
Provides an exploration of the physical and social environments that promote learning and development for young children. It includes child guidance techniques for individual and group situations. Emphasis is placed on problem-prevention strategies, positive child guidance methods, and strategies to help children develop self-control. Emphasis is on the application of child guidance methods in a variety of early childhood settings. Must be taken concurrently with HSER 1269. Prerequisite: DHS background study.

CDEV 1340  
Planning and Implementing  
Examines the role of the teacher in early childhood settings for children ages 3-7. It applies knowledge of child development as it relates to individual children, communities, curriculum, and communication activities. The course work includes lab and field experience. Prerequisite: DHS background study.

CDEV 1510  
Internship  
Provides an opportunity to apply knowledge and skills in a child development setting. Students will observe and assess children's development and behavior, implement a variety of learning experiences that are developmentally appropriate, and maintain professional relationships. Prerequisite: DHS background study.

CDEV 2200  
Infant and Toddler Development and Learning Experiences  
Provides an overview of infant and toddler development (ages birth to three years). Students will integrate knowledge of developmental needs, developmentally appropriate environments, effective observations/assessments, and planning and teaching strategies. The course work includes lab and field experience. Prerequisite: DHS background study.
CDEV 2235  
Special Topics in Child Development  
Explores specific areas of the Child Development field to meet specialized student needs or interests. This class may be retaken for credit if the topic varies.

CDEV 2560 (Meets Goal Area: 3)  
Language & Literature Learning Experiences  
Provides an overview of language and literacy learning experiences in either home or center-based settings. Students integrate knowledge of child development, learning environments, and teaching methods to promote whole language, conversation, literature, literacy, and bi-lingualism.

CHEMISTRY (CHEM)

CHEM 1100 (Meets Goal Area: 3)  
Introduction to Chemistry  
Covers the metric system, atomic structure, periodic law, formulas, nomenclature, chemical bonding, chemical equations, solutions, acids, bases, and a little nuclear chemistry. This course is designed for students who are not planning to major in the science field. It can be used as a stepping stone to get ready for CHEM 1101. 3 lec, 3 lab

CHEM 1101 (Meets Goal Area: 3)  
General Inorganic Chemistry I  
Introduces students to fundamental concepts of chemistry, equations and reactions, stoichiometry, the periodic table and properties, atomic structure, molecular orbitals, hybridization, gas laws, solutions, colloids and active metals. Prerequisite: High school Algebra or MATH 0099, or concurrent enrollment in MATH 0099 and high school Chemistry. 3 lec, 3 lab

CHEM 1102  
General Inorganic Chemistry II  
Continues CHEM 1101 with emphasis on chemical kinetics, equilibrium, acids and bases, ionic equilibria, solubility products, electrochemistry (Redox), coordination compounds, transition elements and nuclear chemistry. Prerequisite: CHEM 1101. 3 lec, 3 lab

CHEM 1150 (Meets Goal Area: 3)  
Survey of Chemistry  
Prepares students in pre-health science programs requiring one course of chemistry. The specific intent of the course is to provide the necessary chemistry background for students to proceed into introductory survey courses of such areas as biochemistry, microbiology, and physiology; as well as to furnish a broader and deeper basis for understanding the related techniques and problems in today's society. Selected topics given special emphasis are: state, properties and phase changes, acid-base concepts, use of pH, aqueous equilibria, families of carbon compounds, typical organic reactions, and macromolecules of biological importance. 3 lec, 2 lab

CHEM 2201  
Organic Chemistry I  
Studies the chemistry of carbon and its compounds with emphasis on structure, properties, reactions of alkanes, alkenes, dienes, alkenes, alkyl halides, alcohols, cyclic hydrocarbons. Includes mechanisms and stereochemistry. Prerequisite: CHEM 1101. 4 lec, 3 lab

CHEM 2202  
Organic Chemistry II  
Continues CHEM 2201 with emphasis on benzene, aromatic substitution reactions, aldehydes, ketones, carboxylic acids, amines, phenol, carbohydrates, amino acids and proteins. Prerequisite: CHEM 2201. 4 lec, 3 lab

COSMETOLOGY (COSM)

COSM 1100  
Preclinic Introduction  
Provides an introduction to cosmetology, nail technology or skin care, including professional image, Minnesota laws and rules, safety, sanitation, anatomy, electricity and light, and chemistry. This course will contribute 80 hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements.

COSM 1105  
Preclinic Hair Care  
Provides elementary hair service skills including trichology, shampooing, conditioning, cutting and styling. This course will contribute 80 hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements. Prerequisite: Completion of or concurrent enrollment in COSM 1100.

COSM 1110  
Preclinic Nail Care  
Provides an introduction to nail care including manicuring, pedicuring, and artificial nails. This course will contribute 80 hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements. Prerequisite: Completion of or concurrent enrollment in COSM 1100.

COSM 1115  
Preclinic Chemical Control  
Provides an introduction to cosmetology chemicals and their applications. This includes curl reformation—permanent waving, soft curl perming, and chemical relaxing. This course will contribute 64 hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements. Prerequisite: Completion of, or concurrent enrollment in COSM 1105 and COSM 1110.

COSM 1120  
Preclinic Skin Care  
Provides an introduction to dermatology, facials, and make-up. This course will contribute 80 hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements. Prerequisite: Completion of, or concurrent enrollment in COSM 1100.

COSM 1125  
Preclinic Hair Color  
Provides an introduction to temporary, semi-permanent and decolorization hair color services. This course will contribute 80 hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements. Prerequisite: Successful completion of, or concurrent enrollment in COSM 1115.

COSM 1130  
Advanced Hair Care  
Provides students with an opportunity to develop the practical skills necessary for entry-level salon work concentrating on chemical hair control, safety procedures and sanitation, hair shaping, hairstyling, haircoloring, thermal curling, shampooing, scalp and hair conditioning, manicuring, artificial nails and skin care, facials and makeup. This course will also provide lecture hours concentrating on hair cutting and styling. This course will contribute 96 hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements. Prerequisites: Successful completion of, or concurrent enrollment in preclinic courses.

COSM 1135  
Salon Preparation  
Provides students with an opportunity to develop the practical skills necessary for entry-level salon work concentrating on chemical hair control, safety procedures and sanitation, hair shaping, hairstyling, haircoloring, thermal curling, shampooing, scalp and hair conditioning, manicuring, artificial nails and skin care, facials and makeup. This course will contribute 96 hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements. Prerequisites: Successful completion of, or concurrent enrollment in preclinic courses.

COSM 1140  
Clinic I  
Provides students with an opportunity to develop the practical skills necessary for entry-level salon work.

COSM 1145  
Clinic II  
Provides students with an opportunity to develop the practical skills necessary for entry-level salon work concentrating on chemical hair control, safety procedures and sanitation, hair shaping, hairstyling, haircoloring, thermal curling, shampooing, scalp and hair conditioning, manicuring, artificial nails and skin care, facials and makeup. This course will also provide lecture hours concentrating on hair cutting and styling. This course will contribute 96
hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements. Prerequisites: Successful completion of, or concurrent enrollment in preclinic courses.

COSM 1150
COSM 1150
Clinic III
Provides students with an opportunity to develop the practical skills necessary for entry-level salon work concentrating on chemical hair control, safety procedures and sanitation, hair shaping, hairstyling, hair coloring, thermal curling, shampooing, scalp and hair conditioning, manicuring, artificial nails and skin care, facials and makeup. This course will also provide lecture hours concentrating on hair cutting and styling. This course will contribute 96 hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements. Prerequisites: Successful completion of, or concurrent enrollment in preclinic courses.

COSM 1155
COSM 1155
Clinic IV
Provides students with an opportunity to develop the practical skills necessary for entry-level salon work concentrating on chemical hair control, safety procedures and sanitation, hair shaping, hairstyling, hair coloring, thermal curling, shampooing, scalp and hair conditioning, manicuring, artificial nails and skin care, facials and makeup. This course will also provide lecture hours concentrating on thermal pressing, artificial hair care, shampooing, conditioning/scalp care and draping. This course will contribute 96 hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements. Prerequisites: Successful completion of, or concurrent enrollment in preclinic courses.

COSM 1160
COSM 1160
Clinic V
Provides students with an opportunity to develop the practical skills necessary for entry-level salon work concentrating on chemical hair control, safety procedures and sanitation, hair shaping, hairstyling, hair coloring, thermal curling, shampooing, scalp and hair conditioning, manicuring, artificial nails and skin care, facials and makeup. This course will contribute 96 hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements. Prerequisites: Successful completion of, or concurrent enrollment in preclinic courses.

COSM 1165
COSM 1165
Clinic VI
Provides students with an opportunity to develop the practical skills necessary for entry-level salon work concentrating on chemical hair control, safety procedures and sanitation, hair shaping, hairstyling, hair coloring, thermal curling, shampooing, scalp and hair conditioning, manicuring, artificial nails and skin care, facials and makeup. This course will provide lecture hours concentrating on facial shape, facials, applying makeup, hair removal such as tweezing and waxing. This course will contribute 96 hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements. Prerequisites: Successful completion of, or concurrent enrollment in preclinic courses.

COSM 1170
COSM 1170
Clinic VII
Provides students with an opportunity to develop the practical skills necessary for entry-level salon work concentrating on chemical hair control, safety procedures and sanitation, hair shaping, hairstyling, hair coloring, thermal curling, shampooing, scalp and hair conditioning, manicuring, artificial nails and skin care, facials and makeup. This course will contribute 128 hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements. Prerequisites: Successful completion of, or concurrent enrollment in preclinic courses.

COSM 1175
COSM 1175
Clinic VIII
Provides students with an opportunity to develop the practical skills necessary for entry-level salon work concentrating on chemical hair control, safety procedures and sanitation, hair shaping, hairstyling, hair coloring, thermal curling, shampooing, scalp and hair conditioning, manicuring, artificial nails and skin care, facials and makeup. This course will contribute 96 hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements. Prerequisites: Successful completion of, or concurrent enrollment in preclinic courses.

COSM 1181
COSM 1181
License Preparation for Cosmetology I
Provides students with an opportunity to develop the practical skills necessary for entry - level salon work concentrating on chemical hair control, safety procedures and sanitation, hair shaping, hairstyling, hair coloring, thermal curling, shampooing, scalp and hair conditioning, manicuring, artificial nails and skin care, facials and makeup. This course will prepare students for their written state examinations and completion of skill certification. This course will contribute 64 hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements. Prerequisites: Successful completion of, or concurrent enrollment in preclinic courses.

COSM 1182
COSM 1182
License Preparation for Cosmetology II
This course is a continuation of COSM 1181. Provides students with an opportunity to develop the practical skills necessary for entry - level salon work concentrating on chemical hair control, safety procedures and sanitation, hair shaping, hairstyling, hair coloring, thermal curling, shampooing, scalp and hair conditioning, manicuring, artificial nails and skin care, facials and makeup. This course will prepare students for their written state examinations and completion of skill certification. This course will contribute 64 hours towards licensure. The State of Minnesota mandates the hours to go toward the hour requirements. Prerequisites: Successful completion of, or concurrent enrollment in preclinic courses.

COSM 1185
COSM 1185
Salon Operations I
This course gives students additional time to complete the required services and/or hours for licensure. Prerequisite: completion of concurrently enrolled in COSM1180,ESTH1000,NAIL1000.

COSM 1189
COSM 1189
Salon Operations II
This course gives the students additional time to complete the required services and/or hours for licensure. Prerequisite: completion of concurrently enrolled in COSM1180.

COSM 1195
COSM 1195
Salon Operations III
This course gives students additional time to complete the required services and/or hours for licensure. Prerequisite: completion or concurrently enrolled on COSM1180, ESTH1000, NAIL1000.

COSM 1200
COSM 1200
Salon Operations IV
This course gives students additional time to complete the required services and/or hours for licensure. Prerequisite: completion of concurrently enrolled in COSM1180, ESTH1100,Nails 1100.

COSM 1205
COSM 1205
Salon Operations V
This course gives students additional time to complete the required services and/or hours for licensure. Prerequisite: completion of concurrently enrolled in COSM1180,ESTH1100,NAIL1100.

COSM 1210
COSM 1210
Salon Operations VI
This course gives the students additional time to complete the required services and/or hours for licensure. Prerequisite: completion or concurrently enrolled in COSM1180, ESTH1100,NAIL1100.

COSM 1215
COSM 1215
Salon Operations VII
This course provides the additional hours needed to complete licensure in states which require more lecture hours. Prerequisite: completion or concurrently enrolled in COSM1180.

COSR 1100
COSR 1100
40 Hour Refresher Course
Provides students with the Minnesota 40 hour refresher course requirements needed for license renewal. Prerequisites: Previous Minnesota cosmetology license.
COSR 1105  
155 Hour Reactivation Course Theory  
Provides students with the theory portion of the Minnesota 155 hour reactivation course requirements for reactivating a license. Prerequisite: Previous Minnesota cosmetology license.

COSR 1110  
155 Hour Reactivation Course Practical  
Provides students with the practical portion of the Minnesota 155 hour reactivation course requirements for reactivating a license. Prerequisites: Previous Minnesota cosmetology license.

COSR 1115  
155 Hour Reactivation Course License Preparation  
Prepares students for their written and practical examinations required for reactivating a license. Prerequisite: Previous Minnesota cosmetology license.

Carpentry (CRPT)  
CRPT 1101  
Tool Safety, Construction Terms & Materials  
Covers the different types of materials and terms used on all construction sites and how to maintain and use all hand and power tools.

CRPT 1105  
Floor and Wall Framing  
Provides hands-on experience laying out building, straightening, bracing and leveling. Students layout and erect the supporting structures for residential floor and wall components.

CRPT 1110  
Roof Framing Part I  
Covers the basics of roof framing. Students will learn theory behind trusses, stick framing and loads. They will be taught how to use a framing square and roof terminology. Students completing this class will be able to build a simple gable roof system.

CRPT 1115  
Insulation, Ventilation, Vapor Barriers and Dry Wall  
Covers insulation types and values, the importance of vapor barrier and its proper placement, drywall application, taping and texturing.

CRPT 1118  
Roof Framing  
Covers the basics of roof framing. The course will teach theory behind trusses, stick framing, and roof loads. Students will be taught how to use a framing square and roof terminology. Students completing this class will be able to build a gable roof system, layout and cut hip and valley rafters, and identify types of roof trusses.

CRPT 1120  
Roof Framing Part II  
Continues Roof Framing I. Students will learn more complex roof systems of today's houses. Subjects covered will be layout of hip rafters, construction of both cut-in valleys and blind valleys, intersecting roofs as well as unequal pitched roofs.

CRPT 1125  
Estimating Blueprint Reading  
Covers how to estimate the cost of a house and gain in-depth knowledge of carpentry math. Students will learn the basic principles of interpreting blueprint reading and transferring the knowledge into a complete project.

CRPT 1130  
Stairway Construction  
Covers stair terminology, layout and construction by building a straight stairway and a quarter turn stairway.

CRPT 1132  
Interior Finish I  
Covers the identification of various interior finish materials and their appropriate application and proper installation. This includes insulation, drywall, interior doors, and all interior trim components including closet shelving. Students will also learn stairway terminology, layout, and construction and gain hands-on experience by building various types of stairs.

CRPT 1135  
Exterior Finishing Wall and Roof Covering  
Finishing the exterior of a building includes the door and window units and all the materials that cover the roof and exterior. They must also give weathertight protection to the roof and exterior walls.

CRPT 1140  
Project Planning, Estimation, Layout  
Estimate all material for house project and award bid for materials. Meet with sub-contractors, go over specifications and award bids. Students will locate boundary stakes, establish building corners and build batter boards. They will identify sewer elevations and establish all elevations necessary for excavation. Supervise excavation, build forms and pour footings for a house project.

CRPT 1142  
Blueprint Reading, Estimating & Project Planning  
Learn to read and interpret residential blueprints and do an accurate "take-off" or estimate of materials needed for a residential structure. Students will also learn site layout and establishing building elevations necessary prior to the excavation of a building site.

CRPT 1145  
Interior Trim  
Finishing interior work is the final stage in the construction of a building. It should not begin until the building is completely enclosed and all windows and exterior doors have been installed. Interior finish includes all the surface materials placed on the walls, floors and ceilings.

CRPT 1150  
Sight Layout, FO, Blueprint Reading  
Exposes students to the tools and skills necessary to lay out a building site and construction methods used to form and pour concrete footings for a building. The student will also be taught the skills needed to accurately read and interpret a complete set of working drawings for residential and light commercial construction projects.

CRPT 1155  
Building Science  
Learn about the house as a system including advanced topics in building shell components, air sealing, insulation, air quality, and health and safety.

CRPT 2205  
Foundations and Floors  
Designed to give the student hands-on experience with laying out and squaring up foundation walls, and actual construction of various types of foundation structures for a residential home. Concrete mixes, estimating, pouring consistencies, placement and finishing techniques for vertical and flatwork concrete pours are also included.

CRPT 2215  
Concrete Technology  
Covers designing concrete mixes for specific uses, preparing sub-base areas and building forms, handling and placement of concrete mixes and finishing techniques.

CRPT 2220  
Advanced Concrete Technology  
Designed to give the student hands-on experience with laying out and squaring up foundation walls and actual construction of various types of foundation structures for a residential home. Also this course covers designing concrete mixes for specific uses, estimating, pouring consistencies, preparing sub-bases and building forms, handling, placement and finishing techniques for vertical flatwork concrete pours.

CRPT 2235  
Wall and Roof Framing  
Designed for identification and assembly of all components in Western Platform framing construction in accordance with all state and local codes. Students will perform horizontal and vertical layout of interior and exterior wall assemblies. Erect, plumb and brace walls, fasten components together, and install exterior wall sheathing. Students will install roof truss systems, hand frame roof sections of various styles, including ceiling vaults and trays, install roof sheathing and apply shingles and flashings.
CRPT 2237 4
Exterior Finish and Shingling
Covers identification and application of all types of siding, shingles, soffet and facia covers and rain gutters. Also covers attic ventilation equipment installation. These skills will be developed by the construction of an on-site built residential home.

CRPT 2240 4
Framing II
Designed for identification and assembly of all components in Western Platform framing construction in accordance with all state and local codes. Students will perform horizontal and vertical layout of interior and exterior wall assemblies. Erect, plumb and brace walls, fasten components together, and install exterior sheathing. Students will get experience in various types of floor systems such as webbing trusses and joists systems. Students will install roof truss systems, hand frame roof sections of various styles, including ceiling vaults and trays, and install roof sheathing. This course also covers construction of a variety of decks, porches, and patios and the materials used in their construction and the methods of handling a variety of materials.

CRPT 2242 2
Deck and Porch Construction
Covers construction of a variety of decks, porches and patios, the materials used in their construction and the methods of handling a variety of materials.

CRPT 2245 1
Cabinet Layout and Design
Provides training to analyze cabinet needs and available spaces and design cabinets for specific uses. Drawing up of basic construction plans is an integral part of this course.

CRPT 2249 4
Cabinet Installation
Covers the installation of all types of cabinets and countertops.

CRPT 2250 5
Cabinet Construction
Explore the construction of a variety of kitchen, bathroom, utility, and specialty cabinets and countertops.

CRPT 2255 5
Cabinet Making
Analyze cabinet needs and available spaces and design cabinets for specific uses. Drawing up of basic construction plans is an integral part of this course. This course also includes the construction of a variety of cabinets including kitchen units, linen closets, vanity cabinets, and built in work stations. Students will go through the process of cabinet installation methods, counter top construction and installation, and finishing areas such as kitchens and bathrooms.

CRPT 2260 3
Interior Finish and Staircase Construction
Covers identification and application of all types of interior finish materials, installation of such materials, and finishing techniques. A variety of types of staircases will be studied and at least one or two stairways constructed.

CRPT 2265 3
Interior Finish II
Covers a variety of insulation materials, applications and insulating methods, and ventilation requirements. The student will install interior wall and ceiling coverings and apply finishing materials. This course will also cover identification of all types of interior finish materials, installation of such materials and finishing techniques. A variety of types of staircases will be studied and at least one or two stairways constructed.

CRPT 2270 2
Construction Business Management
Covers the basic principles of construction business accounting, organization of business structure, employee management, business licensing requirements, and trade knowledge, for the purpose of starting your own small business.

CRPT 2271 2
Construction Drafting and Design
Designed to acquaint the student with the design and drafting of the residential home. Chief Architect CAD software is used to generate floor plans, elevations, section views, plot plans, and details for a residential home.

CRPT 2280 3
Insulation and Interior Wall Covering
Covers a variety of insulation materials and applications and insulating methods, and ventilation requirements. The student will install interior wall and ceiling coverings and apply finishing materials.

CSCI 1100 2
Microcomputer Keyboarding
Provides basic instruction on the use of the electronic keyboard. Basic touch keying is taught to develop the student's skill in rapidly and efficiently entering information into a microcomputer via the keyboard. Includes both alphabetic and numeric entries. The course also teaches basic document formatting for various styles of personal and business documents such as letters, memorandums and compositions.

CSCI 1102 3
Introduction to Microcomputers
Provides an overview of computer information processing with the primary emphasis on the microcomputer. Students learn and apply the basic elements of word processing, spreadsheets, databases and document integration. Also introduces the basic concepts of graphics, telecommunications, the Internet and computer programming. Prerequisite: CSCI 1100 or prior keyboarding experience and evidence of college level reading ability through assessment test or prior college coursework.

CSCI 1131 2
Word Processing I
Discusses the uses of electronic word processing. Covers basic line and text editing. Primary emphasis is on preparing and managing documents as well as formatting and enhancing. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

CSCI 1150 3
Presentation Development
Discusses and demonstrates the processes of designing, developing and producing a professional electronic presentation using automated presentation graphics software. The slide show production includes outlines, speaker notes, handouts, animation, audio resources, and coordination between overhead and video sources. Prerequisite: CSCI 1102.

CSCI 1160 3
Introduction to Game Programming
Focuses on beginning level programming of computer games. Introduces basic programming concepts of looping, decision making, objects and events. Shows the important of learning curves and difficulty curves in the design and development of 2D games. Explores music, sound and graphics in game implementation. This course is for students with no programming background.

CSCI 2100 3
Advanced Microcomputer Applications
Provides a comprehensive and advanced look at the use of microcomputers in today's society. Emphasis is placed upon the integrated nature of many of today's major applications. Explores the advanced uses of and integration features of word processing documents, database files, spreadsheets and graphic presentations. Prerequisite: CSCI 1102.

CSCI 2135 3
Advanced Web Techniques
Introduces Web Programming. It covers scripting from both the Client and Server sides. Students are introduced to VBScript, JavaScript, and Active Server Pages (ASP). Students will also learn how ASP can be used so Web application can interact with Databases. Prerequisite: CSCI 2215.

CSCI 2140 3
Electronic Spreadsheets and Graphics
Explores topics of statistical applications, managing database systems, and various graphical capabilities using integrated business simulations. Internal and external program utilities to aid in scanning, importing graphics and
combining files will be introduced. Competency in statistical and logical formulas, charting techniques, database manipulation and macro design is expected. Prerequisite: CSCI 1102.

**CSCI 2150 Multimedia for the Web**
3
Explores emerging standards and futuristic trends for web site development and maintenance of text, graphics, scanned images, audio, video, dynamic and interactive elements to enhance web pages. Objects of scrolling messages, pop-up windows, applets, reaction to the state of the browser and user interaction provide dynamic content. Additional actions of the web site hierarchy, security, management and maintenance are employed through the development of a media-enhanced web site. Prerequisite: CSCI 1102 or CSCI 2215.

**CSCI 2200 Visual Basic Programming**
4
Creates graphical user interface applications through programming in Visual Basic. Topics covered are arithmetic statements, conditional statements, looping structures, data structures, sequential files, random files, design and graphics. Uses DDE, Dynamic Data Exchange, as a way of sharing electronic data between Windows applications and emphasizes problem solving using an OACD, Object-Oriented Event-Driven, approach. Prerequisite: CSCI 1102.

**CSCI 2202 Computers, Technology and Society**
4
Writing intensive course. Because technology is transforming the way society communicates, conducts business, manages personal and public information; students will use technology to investigate complex social and ethical issues associated with the use of computers and technology. Prerequisite: CSCI 1102.

**CSCI 2215 Web Programming I**
3
Discusses fundamentals of web servers, web sites and web programming in the context of using the technology to craft a conveying message to an Internet audience. An overview of the history and origins of web programming continues with the robust creation of HTML source code that supports and sustains the use of internal and external linking, multiple media elements, tables, image mapping, frames and input forms. The primary objective is to create and manage a multiple page website using HTML, DHTML, CGI and JavaScript programming code. Prerequisite: CSCI 1102.

**CSCI 2225 Special Topics in Computer Science**
4
Introduces students to specialized areas of computer science and computer usage. The class may be retaken for credit if the topic varies. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

**CSCI 2240 Fundamentals of Programming I**
4
Emphasizes concepts that provide a fundamental background for continued study in the area of computer science. Involves high-level language programming and the use of abstraction in program design. Prerequisite: CSCI 1102.

**CSCI 2245 Fundamentals of Programming II**
4
Discusses topics including object-oriented programming techniques, essential data structures such as stacks, queues, trees, sorting, and searching algorithms using a high-level programming language. Prerequisite: CSCI 2240.

**CSCI 2250 Java Programming**
4
Provides an overview of the Java programming language and special features of control structures, input/output streams, data structures, and abstraction mechanisms. Concepts include creating complete Java classes, derive new classes with effective use of inheritance, and use Java to create applets. Prerequisite: CSCI 2200.

**CSCI 2255 Java Programming II**
4
Continues with an intermediate to advanced study of Java as an object oriented programming language. Concepts include abstract data type with a Class, constructors, overloaded constructors, instance variable, final, superclasses, subclasses, inheritance, String class, constructors and methods, StringBuffer class, constructors and methods, Graphical Objects, Swing Components, Event Handling, Layout Managers, Exception Handling, Multithreading, Files and Streams. Prerequisite: CSCI 2250.

**CSCI 2280 System Analysis and Design**
4
Explores both structures and object oriented systems analysis and design methodologies and provides an understanding of the role of the systems analyst. Prerequisite: CSCI 2240 or CSCI 2250.

**CSCI 2290 Technology Capstone Seminar**
1
Studies a variety of current technology dependent business implementations. Examines ethical behavior and consequences related to issues of Internet use, copyright, security, ergonomics, and safety and health. Discusses state-of-the-art and futuristic trends within technology development. Prerequisite: CSCI 1102 and either one CSCI application course or one CSCI programming course.

**CSCI 2297 Internship**
1
Offers students paid or unpaid work experience closely related to their academic and career pursuits. Activities are closely supervised by college instructors and on-the-job supervisors. Prerequisite: CSCI 2202 or evidence of college level reading ability through assessment test or prior college coursework.

**COMPUTER SUPPORT TECHNICIAN (CST)**

**CST 1111 File Structures**
3
Covers the fundamental of personal computers including the Disk Operating System (DOS). Students will use DOS commands to perform operations such as managing file storage, creating and editing files, and understanding files and their purpose in relation to the operation of the computer. Prerequisite: Keyboard at 30 words per minute with 5 errors or less.

**CST 1125 Operating Systems**
3
Explores various operating systems including Unix, Mac and the various versions of Microsoft Windows. Specific concepts will include installing, configuring, troubleshooting and maintaining efficiency of the operating system to meet end-user needs in a production environment.

**CST 1127 Windows Desktop Operating Systems**
3
Uses the current Windows operating system. Specific concepts will include installing current, configuring, troubleshooting and maintaining efficiency of the operating systems to meet end-user needs in a production environment.

**CST 1135 Unix Operating Systems**
3
Designed to familiarize students with Unix-based operating systems. The student will use the Unix operating system for this course. Basic UNIX system concepts, architecture and administration are covered. Students have the opportunity to use fundamental UNIX commands, explore the UNIX file system, use text editors, process and manipulate files, and use the UNIX shell as a programming language.

**CST 1180 Data Security Awareness**
1
Introduces the student to the need for information security, including the ethical, legal and professional security issues. The student will develop an awareness of the types of attacks on data, who would perform such attacks, and how to defend against data loss. The student will learn how to protect their home and office computer from misuse and viruses. The student will also be presented with corporate security strategies, including policies, incident response and disaster recovery.

**CST 1182 Computer Ethics**
1
Covers the ethical issues relating to computers and technology including social networking, cell phone use, digital copyrights, and legal issues. Current events and topics related to technology and how it has changed our society will be discussed. Policies that address ethical technology issues will be developed.
CST 1190  Introduction to Networking  3
Covers the fundamentals of current networking technology. A general introduction to networking including local and wide area network technology will be presented to students. This course is designed to help candidates prepare to successfully pass the Comp TIA Network+ examination.

CST 1195  Network Basics  2
Introduces the student to networking basics, media, topologies, protocols, architectures, software and the Open Systems Interconnection (OSI) Reference Model. In addition, wide area network (WAN) technologies, security issues, the Internet and Internet tools are introduced.

CST 1200  Introduction to Information Security  3
Introduces the student to the need for information security, including the ethical, legal and professional security issues. The student will assess, identify and control security risks, identify secure network design, plan for disaster recovery, setup security policies and secure employment practices. This is the first in a series of courses designed to understand and manage information security and will touch on most aspects of information security.

CST 1220  Information Security Management  3
Explores information security management issues, including authentication, virus attacks and prevention, firewalls, intrusion detection and other security devices and topologies. The student will learn to control security risks, identify secure network design, plan for disaster recovery and setup security policies. This course covers most of the objective in Compaq's Security + exam.

CST 1250  Information Security Administration  3
Explores information security administration issues, including the hands on setup of secure environment components. This will include securing network hardware and software, intrusion detection and other security devices and topologies. The student will learn information security setup and maintenance, disaster recovery and implementation of security policies.

CST 1270  Windows XP Professional  3
Covers how to set up and support the Windows XP Professional operating system. Gain practical experience installing, configuring, and administering Windows XP Professional. As you build these real-world system support skills, you're also preparing for MCP Exam 70-270—a core requirement on the MCSE/MCSA tracks. Prerequisite: CSCI 1102 and CST 1190.

CST 1300  Computer Forensics  3
Introduces computer forensics, which is the study of a computer that has been compromised. Includes the recovery of evidence or information. In this course the student will concentrate on how to recover information from a computer or network after an attack. The student will look at both disaster recovery after a hacker or virus attack and also how to get information from a system that has been used for illicit activities. The student will use a systematic approach to gather information without destroying evidence.

CST 1400  Telecommunications I  3
Provides students with a broad overview of the telecommunications industry including knowledge and understanding of telecommunications history, terminology, tools, cable types, wiring components, basic fiber, coaxial cable, connector types, and basic telecommunications networks. This course prepares the student to be able to identify various types of telecommunications cable and connectors, to identify wire sequences by the telephone color code, to connect wire to various connecting devices and terminal blocks using proper methods and tools and to use general hand tools and special tools as needed in industry. Prerequisite: STSK 0090 and STSK 0091 or placement through assessment test levels for each course.

CST 1410  Broadband Technology  3
Provides students with basic broadband technologies knowledge and skills. The student develops an understanding for Convergent Technologies and the need for transmitting more than one type of signal simultaneously by way of divided channel. Emphasis is placed on the exploration of the technology of voice and data integration, frame relay, Synchronous Optical Network (SONET), Asynchronous Transfer Mode (ATM)/cell relay, Switched Multi-megabit Digital Service (SMDS), Broadband Integrated Services Digital Network (BISDN), Digital Subscriber Line (DSL), and Virtual Private Network (VPN). This course presents and explains the many and varied techniques, solutions, principles, and challenges both carriers and end users utilize experience, and overcome in implementing broadband and voice-over IP services. Prerequisite: CST 1400.

CST 1420  Convergence Technology  3
Studies telecommunications convergent technologies including telephone, LAN, WAN, wireless, voice, video, and internet protocol. Introduces the student to Voice, Video and Integrated Data (VVID) over IP networks to provide seamless and secure communications solutions to business and home technology needs. This includes discussions on interoperability methods and techniques to integrate disparate systems and technologies, and includes people skills development. This course includes the fundamental concepts of digital media distribution, Digital Video Distribution in Broadband, Television, Mobile, and Converged Networks. Prerequisite: CST 1180.

CST 1440  Advanced Telecommunications  3
Expands on the theory and topics from the Telecommunications I class including field experience with central office equipment and cabling. Students will work with broadband communications access systems and software and deploy services over fiber and copper-based network architectures. In addition, students will become familiar with federal and state regulations and organizations related to the telecommunications industry. Prerequisite: CST 1400.

CST 1500  Routers and Switches  3
Introduces the student to practical networking experiences within a laboratory environment. Students will study router and switch basics, configure routers, investigate routing protocols, configure switches, develop access lists and troubleshoot routing technologies. Prerequisite: CST 1190.

CST 2108  Structured Communication Systems  3
Covers structured communication systems (SCS). Students will gain practical experience in implementing many concepts in SCS by installing and terminating various cabling types, configuring voice/data and fire/alarms systems, and other equipment. The student will be able to install various SCS; select and operate the appropriate test equipment to perform test procedures perform routine maintenance; perform minor troubleshooting procedures and repairs; identify and describe industry standards, protocols and safety procedures relating to structured communication systems.

CST 2110  PC Maintenance and Repair I  3
Provides the student experience with computer hardware. Specifically, the student will learn about what pieces of hardware a computer consists of, and how they work together to make a computer functional. Disassembly and re-assembly of different classes of computers will be offered. In addition, troubleshooting procedures and repair will be covered.

CST 2120  Computer Integrated Manufacturing  4
Provides students with an opportunity to develop skills in designing, wiring, troubleshooting, and operation of electrical control circuits. A supervised time for students to hardwire and program various programmable logic controllers. Provides the student with an understanding of and the ability to use pics in all phases of industrial automation.

CST 2150  Advanced Routing Technology  3
Covers concepts and skills in advanced IP addressing techniques, intermediate routing protocols, Ethernet switching, Virtual LANs, Spanning Tree Protocol, and VLAN Trunking Protocol. Students will demonstrate the ability to apply competencies from prior networking courses, including Intro to Networking and Routers and Switches. The course consists of web-based interactive lessons and hands-on labs. This course is the third of four courses leading to the Cisco Certified Network Associate (CCNA) designation. Prerequisite: CST 1500.
CST 2160  
Wide Area Network Technology  
3  
Develops knowledge and skills in the areas of advanced IP addressing techniques, WAN technology and terminology, Frame Relay, network management, and introduction to optical networking. Students will apply knowledge from previous networking courses and be able to explain how and why a particular strategy is employed. In addition, the student will prepare for taking the CCNA Exam. Wide Area Network Technology is the last of four courses leading to the Cisco Certified Network Associate (CCNA) designation. The course consists of web-based, interactive lessons and hands-on labs. This course will be the final course in the Cisco network certificate. Prerequisite: CST 2150.

CST 2199  
Internship  
3  
Allows the student to secure "on-the-job" training and earn 2-8 semester elective credits. The student must find their own internship site and complete all paper work.

CST 2215  
PC Maintenance and Repair II  
3  
Designed to give students the opportunity to complete curriculum to become A+ certified. PC Maintenance and Repair I is a prerequisite. Software components of A+ exam will be covered. Students will also partake in business like atmosphere by troubleshooting and repairing computer problems on campus as assigned by instructor. A portfolio of repair projects completed will be maintained by the student.

CST 2223  
Windows Network Administration I  
3  
Introduces the student to Windows networking theories and practices. Concepts such as planning the network, installation, configuration, creating and managing folders, files, users and print service.

CST 2224  
Windows Client/Server Administration  
4  
Covers how to set up and support the Windows Server & clients. Course will teach students to implement, administer, and troubleshoot information systems that incorporate Microsoft Windows Server & clients. Hands-on, practical experience, and exercises will be incorporated into this course. This course helps students to prepare for Microsoft certification. Prerequisites: CST 1111 or CST 1190.

CST 2230  
Novell NetWare Administration I  
3  
Introduces the student to Novell networking theories and practices. Concepts such as planning the network, users, groups, the NDS tree, file and print services, and objects will be covered.

CST 2240  
Home Networking  
2  
Prepares students for the CompTIA HTI+ certification exam. This is a practical approach to networking technologies, audio visual systems automation methods, and telecommunication techniques that converge in integrated home technology. Prerequisite: CST 1190.

CST 2284  
Microsoft Exchange Server  
3  
Develops skills that are needed to update and support a reliable, secure messaging infrastructure. This infrastructure is used for creating, storing and sharing information by using Microsoft Exchange Server in a medium-sized to large-sized (250 to 5,000 users) messaging environment. This course offers a significant number of hands-on practices, discussions and assessments that assist students in becoming proficient in the skills that are needed to update and support Exchange Server. Prerequisite: CST 2223.

CST 2291  
Windows Network Infrastructure I  
3  
Covers how to plan a network infrastructure around features supported by Windows. Issues such as network protocol and services are introduced. This includes using the Internet work Packet Exchange/Sequences Packet Exchange (IPX/SPX) - compatible protocol to integrate with Novell Netware. Students will learn how to utilize, manage, and configure the TCP/IP protocol and features such as NetBIOS, WINS, DHCP and DNS. Students will learn to configure, manage and troubleshoot networks routing and remote access, including setting up virtual private networks (VPNs). Hands-on, practical experience exercises will incorporate into this course. This course helps students to prepare for Microsoft certification. Prerequisite: CST 1190.

CST 2293  
Windows Network Infrastructure II  
3  
Prepares students for the corresponding MCSE certification exam and for the challenges they will face as a Microsoft networking professional. Lectures, projects and exercises reinforce skills as they learn. Specific topic coverage includes: Overview of Planning a Windows Server 2003 Network, TCP/IP Architecture, Planning and Managing a TCP/IP Network, Planning and Configuring Routing and Switching, Planning, Configuring and Troubleshooting DHCP, Planning, Configuring and Troubleshooting WINS, Planning a DNS Strategy, Managing and Troubleshooting DNS, Planning and Managing Certificate Services, Planning and Managing IPSecurity (IPSec), Planning Network Access, Planning and Implementing Server Availability, Planning Server and Network Security, Problem Recovery. Prerequisite: CST 2291.

CST 2294  
Windows Active Directory  
3  
Covers how to plan, configure and administer an Active Directory infrastructure. The student will learn to configure Domain Name System (DNS) to manage name resolution, schema and replication. The student will also learn how to use Active Directory to centrally manage users, groups, shared folders and network resources and to administer the user environment and software with group policy. This course will show the student how to implement and troubleshoot security directory services infrastructure and monitor and optimize Active Directory performance. Students will deploy Windows remotely using Remote Installation Services (RIS). Hands-on practical experience with exercises will be incorporated into this course. This course helps students to prepare for Microsoft certification. Prerequisite: CST 1190.

CST 2298  
Microsoft Windows Security  
3  
Prepares students to analyze the business requirements for security and design a security solution that meets business requirements. Security that this course will cover include: controlling access to resources, auditing access to resources, authentication and encryption. Completion of this course will help students prepare for Microsoft certification. Prerequisite: CST 1190.

CST 2310  
Information Technology Customer Service  
2  
Covers the basic skills needed to work effectively with customers one-on-one or at a help desk. Basic communication, listening, telephone, writing, and problem solving skills are developed.

CST 2326  
Web Page Concepts  
2  
Covers topics necessary to maintain and support an existing Web site. Students will be proficient in adding Lists, Hyperlinks, Pictures and task lists to web pages. Publishing a web site will also be covered. Prerequisites: CSCI 1102 and CST 1190, or instructor's approval.

CST 2340  
Web Server Concepts  
3  
Introduces the student to the Internet, including setup, operation and maintenance of an Internet web server. Concepts such as installation, configuration and maintaining the server, creating and troubleshooting web pages, understanding the Internet protocols and security. We will be working with the Microsoft Internet Information server features and functions.

CST 2413  
Windows Network Administration II  
3  
Continues with the concepts learned in the Windows Network Administration I class. Concepts such as maintaining the network, installation and configuration of applications on the Network, creating and managing folders, files, users and print services are covered.

CST 2420  
Novell NetWare Administration II  
3  
Reviews the concepts learned in Novell Administration I. This course will also cover security administration, user, application and network management in addition to preparation for the Novell Netware Administration Exam.
CST 2500  Incident Response and Disaster Recovery  3
Introduces the student to the complexities involved in responding to intrusions and threats to their information systems structure. The student will prepare portions of a disaster recovery plan for information systems and test the plan in a lab environment. The student will learn the importance of planning for a disaster, what to do during a disaster, when to escalate an incident to a disaster and who needs to be involved in the planning, implementation and recovery. Prerequisite: CST 1250.

CST 2520  Ethical Hacking  2
Designed for the student to explore the tools that hackers use to gain access to systems in order to better protect their network environment. It will look at software, hardware and social engineering schemes that hackers use. The course will also cover suggestions for protecting your system from unauthorized access. Legal and ethical hacking issues will be discussed. Prerequisite: CST 1250.

CST 2600  Fundamentals of Wireless Networking  3
Designed to educate the student in the areas of wireless networking technologies and the implementation of those technologies. Emphasis is placed in the areas of design, planning, implementation, operation and troubleshooting. Prerequisite: CST 1500.

CST 2999  Special Topics  3
Introduces students to specialized areas of computer science and computer usage. The class may be retaken for credit if the topic varies.

DENTAL ASSISTING (DEN)  

DEN 1100  Oral Radiology I  3
Assists the student in understanding how radiation is produced, how radiation exposes films, and how radiation affects people. The emphasis will be on understanding the principles of protection for the patient and the operator, the techniques for exposing, processing, and evaluating high quality diagnostic radiographs which will also be taught and demonstrated.

DEN 1105  Oral Radiology II  3
Provides the student the opportunity to clinically develop and improve their skills in exposing, processing and evaluating diagnostic radiographs with minimum exposure and discomfort to the patient. The course will also cover the laws set forth by the Minnesota Department of Health in relationship to exposing radiographs on patients. Prerequisite: DEN 1100; Student must be certified in CPR before taking this course.

DEN 1110  Dental Science  3
Describes the histology and physiology of the muscular, skeletal, circulatory and nervous systems of the head and neck regions. Individual bones, muscles, arteries, veins and nerves will be identified. In addition the structures, functions and development of oral cavity will be discussed and the varied methods of individual tooth identification will be covered.

DEN 1115  Dental Health  2
Assists the student in making practical applications of the concepts and principles associated with diet and nutrition from the stand point of general health as well as dental health. The course will also emphasize the nature and causes of disease in the oral cavity and the importance of prevention of this disease with practical application in instructing patients.

DEN 1120  Chairside Assisting I  2
Assists the student in attaining skills required to be a qualified chairside assistant. It includes instrument identification and transfer, treatment room equipment, charting of the oral structures and introduction to oral evacuation. Prerequisites: DEN 1110 may be taken concurrently or with permission from the instructor.

DEN 1125  Chairside Assisting II  4
Includes instructions in the areas of care of equipment, delivery systems, oral evacuation, tray set-ups, etc. The course will assist students through hands on experience in the clinic. This course will also assist the students in understanding the specialties available in dentistry. The student will be taught to identify the materials, instruments and procedures needed in these specialties and to gain skills in assisting the dentist in performing these procedures with minimal discomfort to the patient. Prerequisite: DEN 1120.

DEN 1130  Preclinical Dental Assisting  4
Allows the student to recognize microorganisms, how they live, cause disease, spread disease and how humans protect themselves from microorganisms. Special emphasis will be placed on microorganisms that are most dangerous to health care workers. The course will also include infection control and hazardous materials principles and regulations. Additional the course will assist the student in understanding pharmacology as it relates to dental procedures. The students will also be prepared to recognize and assist with medical emergencies that may occur in the dental office.

DEN 1135  Dental Practice Management  3
Assists the student in identifying psychological variables that are significant in dealing with dental patients and coworkers. It will also include information relating to the function of the business office with emphasis on maintaining patient records, bookkeeping, appointment scheduling, filing, etc. Both manual and computerized systems will be examined.

DEN 1140  Dental Materials  3
Covers materials used in dentistry. It will include information on properties as well as practical lab applications of the materials.

DEN 1145  Expanded Functions A  3
Offers the student experience in mechanical polish, rubber dam application, topical applications, sealant application and endodontic expanded functions. (The Minnesota Dental Practice Act has made it legal for registered dental assistants and students enrolled in accredited dental assisting programs to perform these functions.) The student will gain preclinical competence in these duties through the use of typodonts and clinical competence through classmates and outside patients. Prerequisites: Evidence of passing the National Certification exam or satisfactory progress in the dental assisting program, or special permission from the instructor. Student must be certified in CPR before taking this course.

DEN 1150  Expanded Functions B  3
Offers the student experience in taking alginate impressions and related bite registrations for opposing and study models, orthodontic skills, cement removal, temporization, placing and removing periodontal dressings, suture removal, and placement and removal of matrix bands. (The Minnesota Dental Practice Act has made it legal for registered dental assistants and students enrolled in accredited dental assisting programs to perform these functions.) The student will gain preclinical competence in these duties through the use of typodonts and clinical competence through classmates and outside patients. Prerequisites: Evidence of passing the National Certification exam or satisfactory progress in the dental assisting program, or special permission from the instructor. Student must be certified in CPR before taking this course.

DEN 1155  Extramural Clinical Experience I  3
Designed to assist the student in developing the skills initiated in the classroom, laboratory and clinic. This is accomplished by working under the supervision of the dentist and his/her staff as well as the dental assisting faculty.

DEN 1160  Extramural Clinical Experience II  3
Designed to provide further assistance to the student in developing the skills started in the classroom, laboratory or clinic by working in a dental office under the supervision of the dentist and his/her staff and the dental assisting faculty.

connecting rods, and components that compliment each other so that the student can properly troubleshoot and diagnose customer complaints. Prerequisite: AUTO 1136.

DSL 2150
Advanced Engine Lab
Covers all facets of engine repair. In the laboratory, the student will practice reconditioning of the larger and more advanced engines, with overhead cams and multiple valve cylinders, and other components like jakebrakes, unit type injectors, and adjusting of these engines. This course allows the student hands-on shop experiences. The student will disassemble, inspect, evaluate, repair and adjust, and reassemble valve, valve train components, cylinder blocks, crankshafts, bearings, sleeves, pistons, rings, and other components that compliment the above. Prerequisite: AUTO 1136.

DSL 2155
Diesel Engine Control Systems
Explains the operation of all the different governors and electronically controlled engines. In the laboratory, the student operates different types of engines with their computer programs. The student will use the laptop computer to check fault codes and follow proper diagnostics for repair of the system in accordance with manufacturers’ specifications.

DSL 2160
Truck Braking System
Covers the design, construction and operation of medium and heavy-duty truck hydraulic and air brake systems and components: air compressors, air lines, valves, controls, brake chambers, linkages, and foundation brakes. In the lab component there will be an overhaul of medium and heavy-duty air brake and ABS systems. Students will test, disassemble, inspect, repair the individual components as need be on customer trucks or on school training units.

DSL 2165
Vehicle Steering and Suspension
Covers all steering systems used on medium and heavy-duty trucks. Steering axle alignment and repair is covered as well as tire wear troubleshooting. Suspension systems found on commercial vehicles. Drive axle alignment, frames, spring and air ride suspension repair and adjustment.

DSL 2170
Electronics Diagnoses of Power Train
Covers the electronic troubleshooting and diagnoses of the power train. Many transmissions today are mechanical systems that are shifted electrically through the use of an ECM that will communicate with the engine controller. The data bus needs to be understood for proper diagnoses and repair. The students will make the proper connections and determine what, if any problems are present.

DSL 2175
Truck Inspection and Preventative Maintenance
Covers preventative maintenance on medium and heavy-duty trucks. Inspections for DOT requirements, and continued best performance and safe operation of the vehicle.

DSL 2180
Computerized Diagnostic Systems
Covers the basic Windows operations needed to operate computerized diagnostic systems. Students will need to be able to operate the computer system used in the diagnostics of today’s electronic controlled engines and drive trains. They will develop reports from the programs and store them for future reference. From this information, they will learn to diagnose and make repairs to the unit being tested. They will also send information to the factory or service advisors.

ECON 2201 (Meets Goal Area: 5)
Principles of Macroeconomics
Studies the overall performance of the United States economy and comparative economic systems from the dimensions of full employment, price stability, and economic growth.

ECON 2202
Principles of Microeconomics (Meets Goal Area: 5)
Analyzes the decision-making process of the individual firm. The concepts of pricing and the allocation of resources within different market structures are explored through the use of case studies of industries.

EDUC 1100
Introduction to Education
Introduces students to early childhood, elementary and secondary education. Students will have the opportunity to examine their potential for the teaching profession. This course examines career opportunities, requirements, regulations, and professional ethics. The study of historical and social foundations of education, as well as schools in a diverse society will be included in the course. Twenty (20) hours of field experience is included. Prerequisite: Department of Human Services background study.

ELCO 1100
Electrical Circuits Fundamentals
Covers the basic concepts of electricity. Included in the course will be a brief overview of electricity and electronics, a study of resistors, Ohm’s Law, series and parallel circuits, voltage and current dividers, dc meters, Kirchoff’s laws and network theorems, conductors and insulators, batteries, magnetism and magnetic units, electromagnetic induction, alternating voltage and current, capacitance, capacitive reactance, capacitive circuits, inductance, inductive reactance, inductive circuits, RC and L/R time constants, ac circuits, complex numbers, resonance, and filters. Prerequisite: MATH 0092 or placement by exam.

ELCO 1101
DC Circuits
Covers the basic concepts of electricity. Including a basic study of safety, metric notation, atomic structure, Ohm’s Law, series, parallel, and complex circuits. Prerequisite: MATH 0092 or placement by exam.

ELCO 1105
Electrical Circuits Fundamentals Lab
Provides students with theoretical and practical experiences in electric circuits for both dc and ac using scientific method, analysis and deduction. Topics covered will be safety, resistor color code, meter use, Ohm’s law, series and parallel circuits, complex circuits, oscilloscope operation, alternating current and voltage, capacitance, capacitive reactance, capacitive circuits, inductance, inductive reactance, inductive circuits, RC and L/R time constants, ac circuits, resonance and filters, and transformers. Prerequisite: MATH 0092 or placement by exam.

ELCO 1106
AC Circuits
Covers the basic concepts of AC circuits. Included is a basic study of electromagnetic principles, sine wave principles and relationships, resistive circuits, inductive circuits, capacitive circuits, circuit analysis, and resonance. Prerequisite: MATH 0092 or placement by exam.

ELCO 1110
AC/DC I
Provides students with theoretical and practical experiences in electric circuits for both AC and DC using scientific method, analysis, and deduction. Topics covered will be safety, resistor color code, meter use, Ohm’s law, series and parallel circuits, complex circuits, electromagnetic principles, sine wave principles and relationships. Prerequisite: MATH 0092 or placement by exam.

ELCO 1120
AC/DC II
Covers the basic concepts of AC and DC circuits. Included is a basic study of resistive circuits, inductive circuits, capacitive circuits, circuit analysis, resonance, oscilloscope operation, capacitance, capacitive reactance,
Inductance, inductive reactance, RC and L/R time constants, and three phase circuits.

**ELECTRICIAN (ELEC)**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ELEC 1200</td>
<td>Residential Wiring I</td>
<td>5</td>
</tr>
<tr>
<td></td>
<td>Covers electrical safety, general safety, and the use and care of hand tools, specialty tools, and equipment used for residential wiring. The course introduces basic wiring concepts and the related NEC articles for residential wiring. Also covered is an introduction to Service Entrance Equipment and N.M. and U.F. cables and their uses.</td>
<td></td>
</tr>
<tr>
<td>ELEC 1205</td>
<td>National Electric Code I</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Provides insight into understanding many of the technical rules of the NEC. Topics include Minnesota licensing laws, definitions, requirements and calculations for electrical installations, grounded conductors, branch circuits, feeders and services. Also covered are overcurrent protection, grounding and bonding, wiring methods, temporary wiring, and conductors for wiring.</td>
<td></td>
</tr>
<tr>
<td>ELEC 1210</td>
<td>Residential and Farm Wiring II</td>
<td>5</td>
</tr>
<tr>
<td></td>
<td>Covers electrical and general safety. This course introduces blueprint reading for residential wiring. Students will learn to identify parts and their uses. The course will also relate NEC articles on branch circuits, feeders, grounding, services, and overcurrent protection to residential and farm wiring. Also covered will be specialty circuits such as ranges, dryers, air conditioners, etc. using a variety of wiring methods found in residential wiring. Prerequisite: ELEC 1200.</td>
<td></td>
</tr>
<tr>
<td>ELEC 1215</td>
<td>National Electric Code II</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Covers National Electric Code requirements for cabling, conduit, raceways, wireways, boxes, gutters, switches, and panelboards. Also included are the requirements for equipment such as cords and cables, fixtures and fixture wire, appliances, fixed space heating, motors and motor circuits, refrigeration equipment and transformers. Prerequisite: ELEC 1205.</td>
<td></td>
</tr>
<tr>
<td>ELEC 1220</td>
<td>Conduit Installation</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Introduces the raceway types used in all types of wiring. Students will learn to thread, bend, and calculate raceway size and the number of wires permitted in a conduit. This course is also an introduction to hand benders and hydraulic benders. Students will also learn to identify fittings and other material used in installing a raceway system. Prerequisite: ELEC 1220.</td>
<td></td>
</tr>
<tr>
<td>ELEC 1225</td>
<td>Electric Motors</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Covers alternating current (AC) and direct current (DC) motors and generators/alternators. Theory of operation, connections, installation and maintenance will be covered in the lecture portion of the course. The lab will give students an opportunity to determine the load characteristics and connections of AC and DC motors and generators/alternators. Prerequisite: ELEC 1100.</td>
<td></td>
</tr>
<tr>
<td>ELEC 1230</td>
<td>Safety Principles and OSHA</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>Covers various safety and laboratory practices that are common to the electrical trades and presents information on how to avoid unsafe practices.</td>
<td></td>
</tr>
<tr>
<td>ELEC 1235</td>
<td>Applied Electrical Calculations</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Covers the necessary calculations for the solution of electrical circuit problems in the industry.</td>
<td></td>
</tr>
<tr>
<td>ELEC 1240</td>
<td>Commercial Wiring</td>
<td>5</td>
</tr>
<tr>
<td></td>
<td>Introduces the material and design aspects of commercial wiring. Students will learn to read commercial blueprints. This course also covers voltage-drop calculations, motor calculations and service installations. Students will be introduced to the take off and estimating of commercial jobs. Students will also study the NEC as it relates to commercial wiring.</td>
<td></td>
</tr>
<tr>
<td>ELEC 2200</td>
<td>Low Voltage</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Covers how electronic security systems and their various hardware components and sensors work. This course will also cover the rules and regulations of installation and termination of communication wire and components. Prerequisite: ELCO 1100.</td>
<td></td>
</tr>
<tr>
<td>ELEC 2205</td>
<td>Electric Motor Controls I</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Covers electrical tools, instruments, safety, electrical symbols, line diagrams, AC manual contractors and motor starters, AC magnetic contractors and motor starters, time delay logic and control devices. Lab classes give students the opportunity to hard wire, test and troubleshoot common control circuits. Prerequisite: ELCO 1100.</td>
<td></td>
</tr>
<tr>
<td>ELEC 2210</td>
<td>National Electric Code III</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Stresses the importance of safe, efficient and well designed systems for industrial, commercial, and residential locations. This course discusses material, methods, and components used in designing electrical systems. Prerequisite: ELEC 1205.</td>
<td></td>
</tr>
<tr>
<td>ELEC 2220</td>
<td>Industrial Wiring</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Covers the installation methods and materials used in industrial wiring. Topics included are transformer and motor selection, busways, grounding, power factor correction, distribution, hazardous locations, and troubleshooting. Prerequisite: ELEC 1220.</td>
<td></td>
</tr>
<tr>
<td>ELEC 2225</td>
<td>Electric Motor Controls II</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Covers reversing motor circuits, electromechanical and solid-state relays, photoelectric controls, proximity controls, reduced voltage starting, accelerating and decelerating methods and preventive maintenance. The lab class will give the student the opportunity to hard wire and operate the control circuits. Students design control circuits and program smart motor controllers and variable frequency drives. Prerequisite: ELEC 2205.</td>
<td></td>
</tr>
<tr>
<td>ELEC 2230</td>
<td>Programmable Logic Controllers</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Covers the principles of how PLCs work and provides practical information about installing, programming, and maintaining a PLC system. Students will be given a wide range of generic programming assignments and exercises for practice with the PLC. Prerequisite: ELEC 2205.</td>
<td></td>
</tr>
<tr>
<td>ELEC 2235</td>
<td>National Electric Code IV</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Covers electrical grounding and calculations. The course will give students a better understanding of grounding and simplify some of the code requirements for acceptable field installations of grounding. This will result in a safer electrical installation for people and equipment. Prerequisite: ELEC 1205.</td>
<td></td>
</tr>
<tr>
<td>ELEC 2250</td>
<td>Heating and Air Conditioning Controls</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Introduces basic heating and cooling system installation and control. Topics included are installing heating and air conditioning systems, replacing controls, measuring instruments, and reading schematics.</td>
<td></td>
</tr>
<tr>
<td>ELEC 2260</td>
<td>Basic Refrigeration</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Covers the theory and operation of refrigeration systems, air source and ground source heat pumps, heat gain and heat loss calculations. The student evacuates, charges, and troubleshoots a basic refrigeration system.</td>
<td></td>
</tr>

</table>

**POWERTLINE TECHNOLOGY (ELPL)**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ELPL 1100</td>
<td>Pole Climbing and Equipment Operation</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Covers climbing techniques, free-hand and with a safety strap. Students will also learn installation and removal of pole hardware, setup and safe operation of digger derricks, bucket trucks, hydraulic systems, and truck driving operations. Also included in the course is the operation of elbow and squint booms, safety checkout and use of the lifting jib.</td>
<td></td>
</tr>
</tbody>
</table>
ELPL 1102  
Pole Climbing and Equipment Operations II  
4  
Covers two of the techniques used by powerline workers to elevate themselves to a safe working position for the installation, maintenance or repair of electrical equipment on powerlines. The techniques are pole climbing and safe operations of digger and basket trucks. This course is a continuation of Pole Climbing and Equipment Operations. Prerequisite: ELPL 1100.

ELPL 1106  
Electrical Distribution of Powerlines I  
4  
Covers the care and maintenance of personal tools, nomenclature and use of company tools, nomenclature and installation of pole line hardware, setting and aligning poles, stringing single phase and three phase wires, installation of armor rods, hand ties, and perfof tying. The course also covers the use of single phase and three phase transformers, overhead secondary leads, and the use of different types of slings.

ELPL 1110  
Reports, Records, and Accident Analysis  
3  
Covers types of accidents in the industry and the causes and prevention of accidents. A study of the N.E.S.C. with emphasis on Part Four, Safety of the Electrical Employee and Safe Working Rules of Electric Utilities will be conducted. The student will learn the means of getting information that tells us what must be corrected so that future accidents may be avoided. The student will be required to be on a safety committee, from which they will be appointed to an accident investigation team. Also covered is preparation and reading of construction staking sheets, retirement staking sheets, equipment installation orders, and system map reading.

ELPL 1116  
Electrical Distribution of Powerlines 2  
4  
Covers the application, care, and use of rubber goods, insulated coverup use, and the use of bucket trucks. This course also covers pole top insulator changeouts, pole replacements, and conductor transfers all simulating the line being 'Hot'.

ELPL 1121  
Electrical Distribution of Powerlines 3  
4  
Covers the function, operation, and use of fuses, circuit breakers, oil circuit reclosures and sectionalizers. Working with and around electrical equipment, and apparatus in substations will also be covered. Students will learn about the characteristics of transient voltages, types of distribution arrestors and safety. The course will also cover building overhead lines, stringing and sagging conductors, and ties and tying. Students will build OCR banks, capacitor banks, and three-phase transformer banks, work with underground distribution lines, connect sectionals cabinets, and pad-mounted transformers, and loop-feed URD lines. Chain saw safety, tree trimming, and pole-top and bucket rescue will also be discussed.

ELPL 1125  
Three-Phase AC Circuits and Transformer Banking  
3  
Covers wye and delta circuit fundamentals, neutral on grounded wye lines, corner grounds on delta lines, and ungrounded delta lines. Also offered is three-phase transformer connections using single phase transformers, angular displacement, phase sequencing, paralleling of power bank secondaries, and trouble shooting transformer banks. The student will also learn how to find problems, how to fix them, and also how to get the different voltages out of a transformer bank that industry needs today. This course will also cover load balancing and the sizing of transformers from single residential use to a large industrial load.

ELPL 1130  
'Hot' Sticking  
3  
Covers the application, care and use of 'Hot' sticks, and insulated cover up use. It will be done off the pole with belt and hooks. This course will include pole top insulator change outs, crossarm changes, replacements, and conductor transfers. The course will be taught simulating the line being 'Hot'.

ELPL 1140  
Construction of Underground Powerlines  
2  
Covers basic theory and design for the installation and construction of a high voltage underground system. Installing and constructing an actual underground system will be part of a lab project. System protection, sectionalizing, grounding procedures, and basic fault procedures on underground low and high voltage lines.

ELPL 2235  
Special Topics: Overhead Safety, Construction & Maintenance  
2  
Covers all the elements of underground installation and maintenance with a strong emphasis on safety.

ELPL 2236  
Special Topics: Underground Safety, Construction, and Maintenance  
2  
Covers all the elements of underground installation and maintenance with a strong emphasis on safety.

TELECOMMUNICATIONS (ELTL)

ELTL 2199  
Telecom Internship  
3  
Allows the student to practice competencies and skills learned in the classroom. Internship activities may include voice/data cabling, telephone system installation and any other telecommunication subjects taught at Minnesota West Community & Technical College - Jackson Campus. This course is a work/school cooperative OJT experience designed to enhance the students' educational background and aid their transition to full-time employment after graduation.

ELECTRIC UTILITY (ELUT)

ELUT 1101  
Electrical and Rigging Safety  
3  
Includes State and Federal OSHA Rules and National Electric Safety Work Rules, regarding safety in the Electrical Field. Emphasis is on personal protective equipment, personal, and company rules of safety. Instruction in elementary knots and the use of different types of slings. Outdoor lab includes pole top rescue, the safe practices of grounding, and the rigging and lowering of a crossarm.

ELUT 1105  
Blueprint, Schematics and Transit  
3  
Covers the use and interpretations of blueprints, schematic diagrams, plan and profile maps, and the symbols and abbreviations used in them. This course also covers the fundamentals for set-up, operation and use of a transit mounted on a tripod or other base.

ELUT 1110  
Transformer Banking I  
3  
Covers the construction, purpose uses and calculations for distribution transformers. Emphasis will be on installation of single or three-phase banking practices that are used in the private and public sector of the electric utility industry.

ELUT 1115  
Generation Transmission and Distribution  
3  
Designed to simulate the Power Industry. Through the use of laboratory projects, the student will receive background in understanding the concepts of generation, transmission and distribution of electric power.

ELUT 1120  
Specifications, Testing and Maintenance  
2  
Covers the procedures, specifications of testing methods, and maintenance used through out the electrical industry for new and refurnished equipment.

ELUT 2100  
Metering I  
2  
Covers single-phase metering principles, meter construction, component parts and the installation and testing of single-phase electric watt-hour meters. This course also includes the use of a meter test bench, test standards and an electric counter.

ELUT 2105  
Metering II  
2  
Continues Metering I. More emphasis is put into metering with instrument transformers, identification, testing and installation of three phase meters.
ELUT 2110 Transformer Banking II
Continues Transformer Banking I. This course will look into single-phase power banks and auto transformers used in the transmission and distribution of small and large blocks of power.

ELUT 2116 Reclosures and Protective Equipment
Covers reclosures, circuit breakers and protective devices such as fuses, lightening arresters, cut-outs, sectionalizers and the related equipment.

ELUT 2121 Protective Relays
Designed to give a broad understanding of simple and complex relays that are used in the protection of high voltage lines and substations. Emphasis is on understanding design, construction, and application, performing testing, calibrating, cleaning and adjusting relays. The following relays will be studied if time allows: overcurrent induction disc, thermal overcurrent, induction disc voltage, over/under voltage, voltage restraint, percentage differential, and transformer differential relays.

ELUT 2126 Regulators and Capacitors
Covers the methods used in producing a reliable power source by controlling voltage loss and power factor through the use of capacitors and/or regulators.

ELUT 2135 Enrichment 1
Provides a self study course. The student may select any three of the remaining four topics from Enrichment 1 and write an article about each selected topic. In each article the student will create and address eight goals.

ELUT 2140 Enrichment 2
Provides a self study course. The student may select any three of the remaining four topics or create a topic that is acceptable with instructor from Enrichment 1 and write an article about each selected topic. In each article the student will create and address eight goals.

WIND ENERGY TECHNOLOGY (ELWT)

ELWT 1100 Wind Energy Fundamentals
Surveys the historical application of wind energy. This course will discuss how wind works, its reliability, economics and environmental implications. Also studied will be wind energy applications and basic operating principles. The status of the industries future will also be discussed.

ELWT 1104 Basic Digital Circuits
Introduces students to digital and computerized equipment. This course will provide students with an understanding and application of basic digital inverters, gates and multivibrator devices. Digital codes, computer numbering systems and Boolean Algebra will also be discussed.

ELWT 1110 Mechanical Systems
Studied at the component level. Students will be introduced to gearboxes and other mechanical systems that make up the subsystems of today’s wind turbine. Fasteners, lubrications and preventative maintenance activities will receive the major emphasis.

ELWT 1120 Air Foils, Blades and Rotors
Provides an understanding of wind turbine aerodynamics and the various considerations that are involved when selecting foils for use in blade design. Blade construction, assembly and repair techniques as well as performance, operation and maintenance characteristics will be covered.

ELWT 1130 Drive Trains, Yaw Systems and Towers
Covers turbine drive train, yaw systems and tower systems. Sub-system component attachments, alignment, operating characteristics, dynamics, and the maintenance considerations will be presented. Nacelle layout and the interaction between sub-systems will be discussed.

ELWT 1140 Energy Systems
Covers the various applications of wind generated power. Stand alone, water pumping and grid connected systems as well as hybrid power systems will be discussed.

ELWT 1150 Wind Turbines
Presents turbine types, their development and their current status. The evolution of current models and sizes offered by existing companies will be traced from earlier models/sizes. The operating experiences, track record and number of turbines in operation will be evaluated for the major players in the industry. Students will be expected to carry out research and present reports on selected turbines.

ELWT 1160 Environmental, Health and Safety Wind Energy
Focuses on avoiding, minimizing and controlling (Environmental, Health and Safety) issues during the construction and operation of a project or facilities. Some of the topics to be addressed will include proper climbing techniques and certification, working at heights, working in confined space, working with rotating machinery and falling objects. Community health and safety and environmental issues will also be addressed.

ELWT 1170 Wind Energy OSHA Standards & Climbing Lab
Provides students with information regarding basic safety principles in the Wind Energy industry. A brief overview of the Occupational Safety and Health Administration (OSHA) will be discussed. The primary focus will be on OSHA regulations and standards that pertain to the construction and maintenance of wind turbines and the energy industry to include climb safety. Concurrent enrollment with ELWT 1160.

ELWT 1180 Wind Transmission/Generation/Distribution
Provides knowledge of the principles, practices and procedures of electrical power systems. Discussed will be the interconnection issues (system interaction and protection), technical challenges, safety issues and metering associated with renewable resource generation. This course will also cover operation and control of wind systems, their management and planning, operation and control, systems management and correction.

ELWT 1250 Fundamentals of Electric Motors
Covers alternating (AC) and direct current (DC) motors and generators/alternators. Theory of operation, connections, installation and maintenance will be covered in the lecture portion of the course. The lab will give students an opportunity to determine the load characteristics and connections of AC and DC motors and generators/alternators.

ELWT 2110 Turbine Siting and Construction
Introduces students to the various aspects of wind turbine and wind farm siting, construction and commissioning. Students will be engaged in observation and discussions on the use of heavy equipment such as cranes, rigging and tower assembly. Students will analyze and discuss all the events leading to a Wind Tower Production facility being brought online.

ELWT 2130 Data Acquisition and Communication
Introduces products and processes used to collect information to document and analyze turbine functions and wind farm productivity through the use of accurate, versatile and reliable electronic equipment that ranges from simple recorders to computer systems. SCADA (Supervisory Control and Data Acquisition) systems and interfacing techniques using in general RTU’s (Remote Terminal Units) and PLC’s (Programmable Logic Controllers) or other commercial modules will be covered.

EMERGENCY MEDICAL SERVICES (EMS)

EMS 1101 Introduction to EMT Basic
Follows the American Heart Association’s BLS CPR for Healthcare Provider standards and the first portion of the current National Standard Curriculum. This course meets the requirements of the core curriculum to be presented within a course to meet the initial requirements of the EMS Regulatory Board and the National Registry for EMTs for direct employment with an Emergency
EMT Basic Completion Course
Meets the requirements that are the core curriculum to be presented within a training course to meet the initial requirements of the EMS Regulatory Board and the National Registry for EMTs for direct employment with an Emergency Ambulance Service, basic transport service, and emergency room, law enforcement, or fire department. Successful completion of this course, the practical skills exam, and the designated readiness written exams allows the student eligibility to take the National Registry Exam. Modules presented include: (1) Patient Assessment (reassessment, critical thinking and decision making, communication/documentation), (2) Medical and Behavioral Emergencies and OB/GYN, (3) Trauma Emergencies, (4) Special Populations, (5) Operations. Upon successful completion of the EMT Intro and the EMT Completion course, the student will be eligible to take the National Registry of EMTs written and practical examinations. The EMT Completion course is the final portion of the current National Standards core curriculum.

EMS Wilderness Outdoor
Completes the upgrade for EMS personnel to function in a wilderness environment where transport is delayed if not impossible due to location and or circumstance. The term patient care management and definitive care skills taught in the classroom will be taught and practiced in both the classroom and field environments. Specialty skills and familiarity with SAR techniques, survival concepts, and situational assessment, as well as long view problem solving are the keys to extended patient care in often hostile environments. The ability to recognize and manage stress extreme environments placed on the body systems in both healthy individuals and those challenged by trauma or illness will be vital when you, the rescuer, are the only care available.

American Heart CPR Instructor
Designed for the health care provider to take their BLS CPR certification to a new level. It will give the individual the skills and information necessary to be a certified instructor in CPR. In addition it will cover the new AHA 2000 Guidelines and the Science behind those changes. You will receive all the necessary information on the Customized Training Centers available for membership and the criteria to maintain this certification.

Emergency Response to Terrorism
Designed to benefit industry and emergency management personnel; addressing the first 4 hours of response to a terrorist event. The goal of the program is to emphasize the planning aspect of response. Terrorist incidents that involve biological, nuclear, incendiary chemical or explosive materials are a daily occurrence in metropolitan areas, and with the current condition in our world today could soon hit the rural areas. This timely course has been developed by the U.S. Department of Justice and the Federal Emergency Management Agency. In addition it will include instructional material on The Incident Command Center its purpose, structure, personnel, and duties at a Critical Incident.

Basic Trauma Life Support
Designed for the health care provider who must evaluate and stabilize the trauma patient in or out of the hospital. The goal of the program is the planning and development of an organized approach to the treatment of trauma patients using a TEAM concept to manage this often emotional and difficult situation. Since time is critical in the management of the trauma patient, this course is intended to present the skills necessary for rapid assessment, resuscitation, and when necessary, the packaging and preparation for transport to another facility. In addition this course covers information on Advanced Spinal Care issues and care for the adult and pediatric trauma patient.
EMS 2101  EMT Refresher
Designed to refresh students at the Emergency Medical Technician-Ambulance (EMT-B). It is recognized that training at all levels of the health care team is necessary for effective patient care. It is also recognized that the majority of prehospital emergency care will be provided by the Emergency Medical Technician Basic. This includes all skills necessary for the individual to provide emergency care at the basic life support level with an ambulance service or other specialized rescue service. This course is a refresher for those EMTs that have successfully completed a basic EMT course and carry a current certification as an EMT-B. Prerequisite: Certified EMT and a current CPR certification.

EMS 2103  First Responder Refresher
Developed to provide refresher training in emergency medical care for those who are apt to be the first persons responding to an accident. In defining course scope and emphasis, it was decided that students should possess the same knowledge of patient care as an EMT, but not the same equipment skills. While emergency care is not likely to be first responders primary responsibility in the community, this individual can play an active role in the community's emergency medical services system. As the first person at the emergency scene, the first responder must be completely knowledgeable about basic principles of emergency medical care, and must know what should, as well as what should not, be done.

ENGLISH (ENGL)

ENGL 0090  Essentials of Writing I: Effective Sentences and Paragraphs
Introduces parts of speech, phrases, clauses, types of sentences, common sentence errors, punctuation, capitalization, and spelling. Students write sentences and paragraphs to demonstrate understanding of these basic skills.

ENGL 0095  Essentials of Writing II: Effective Essays
Introduces outlining, thesis statements, introductions and conclusions, transitions, direct and indirect discourse, awareness of audience, and levels of formality. Students write brief essays to demonstrate an understanding of these basic skills.

ENGL 1101 (Meets Goal Area: 1)  Composition I
Reviews and reinforces basic essay writing principles. Emphasis is on rhetorical modes of development and writing as process. Assignments include a short research paper. Prerequisite: ENGL 0095 or placement through assessment test or prior college coursework.

ENGL 1102 (Meets Goal Area: 1)  Composition II
Emphasizes information literacy, critical thinking, and style development. Assignments include a research paper. Prerequisite: ENGL 1101.

ENGL 1103 (Meets Goal Area: 1)  Research Papers
Reviews and reinforces principles of writing research papers. Emphasis is on process, analysis, and formatting. Assignments include an academic research paper. Prerequisite: Instructor consent.

ENGL 1105 (Meets Goal Area: 6, 7)  Introduction to Literature
Studies the elements, form, and content of fiction, drama and poetry.

ENGL 1141 (Meets Goal Area: 6)  Writing and Reading Poetry
Introduces students to basic elements of poetry and provides instruction in using these in the students' own writing. The class is conducted in an informal workshop environment where students will participate in offering and receiving constructive criticism about each other's writing. Prerequisite: ENGL 0095 or placement through assessment test or consent of instructor.

ENGL 1143 (Meets Goal Area: 6)  Writing and Reading Fiction
Provides instruction and experience in composing and editing fiction. Covers elements of fiction writing through reading of published and unpublished fiction. Prerequisite: ENGL 1101.

ENGL 2201 (Meets Goal Area: 6, 7)  American Literature I
Introduces prominent American writers and influential literary works that have shaped American cultural identity from the colonial period through the Civil War. The course takes a broad view of the traditional canon to include writers and works from many areas of America's past. Instructors recommend that students complete ENGL 1105 or an advanced high school literature class before registering for this course.

ENGL 2202 (Meets Goal Area: 6, 7)  American Literature II
Introduces prominent American writers and influential literary works that have shaped American cultural identity from Mark Twain to the present. The course takes a broad view of the traditional canon to include writers and works from many areas of America's past. Instructors recommend that students complete ENGL 1105 or an advanced high school literature class before registering for this course.

ENGL 2203 (Meets Goal Area: 6)  Midwest Literature
Introduces students to the rich and diverse body of Midwestern literature through the exploration of poetry, fiction, nonfiction, and drama. The course will also address various cultural, historical, and geographical matters relating to the Midwest.

ENGL 2221 (Meets Goal Area: 6, 8)  British Literature I
Studies the principal British writers, their literary forms, and significant currents of thought. Provides both an introduction to British literature and a background that will be useful in the study of other literature and cultural history from Beowulf through the 18th Century. Instructors recommend that students complete ENGL 1105 or an advanced high school literature class before registering for this course.

ENGL 2222 (Meets Goal Area: 6, 8)  British Literature II
Studies the principal British writers, their literary forms, and significant currents of thought. Provides both an introduction to British literature and a background that will be useful in the study of other literature and cultural history from Romanticism through the 20th Century. Instructors recommend that students complete ENGL 1105 or an advanced high school literature class before registering for this course.

ENGL 2231 (Meets Goal Area: 6)  Classical Mythology
Introduces students to Greek mythology through classical texts and contemporary criticism. In addition to studying the myths themselves, lectures will focus on the functions of myths and the continuing importance of Greek mythology in modern society.

ENGL 2235 (Meets Goal Area: 6)  Special Topics in Literature
Introduces students to specialized areas of literature. Topics may include literature associated with specific regions, historical periods, subcultures, economic groups, business, or social movements. The class may be retaken for credit if the topic varies.

ENGL 2243 (Meets Goal Area: 1)  Composition: Creative Writing
Provides instruction and experience in composing and editing poetry, short fiction, a literary research paper, and a writer's journal. The class is conducted in an informal workshop atmosphere. This course is an alternative for ENGL 1102 in the Minnesota Transfer Curriculum. Prerequisite: ENGL 1101.

ENGL 2276 (Meets Goal Area: 1)  Composition: Technical Writing
Provides instruction and experience in composing and editing various types of professional and technical writing. Assignments include a research paper. This course is an alternative for ENGL 1102 in the Minnesota Transfer Curriculum. Prerequisite: ENGL 1101.
ENGINEERING (ENGR)

ENGR 1101 Introduction to Engineering  1
Introduces the study of engineering. This course highlights the keys to success in engineering study, a description of the engineering profession, academic success strategies, and orientation to the engineering education process.

ENGR 1110 Auto CAD Level I  3
Introduces the student to computer-aided drafting and design utilizing the current version of AutoCAD. The AutoCAD topics covered in this Level 1 course include: an introduction to AutoCAD features, starting and setting up drawings, ergonomics, point coordinate entry methods, creation of basic 2D drawing objects, layer management, linetypes and colors, selection sets, object snap modes, AutoSnap, polar tracking, object snap tracking, construction techniques, creating and managing text objects, editing geometry, display control and drawing inquiry methods. Students completing this course successfully will have the basic AutoCAD knowledge needed to begin a career in Computer-Aided Drafting and Design. This basic knowledge is needed prior to specializing in a certain area of drafting such as mechanical, civil, electrical, architectural or structural.

ENGR 2214 Engineering Mechanics - Statics  3
Includes vector resultant of force systems in two and three dimensions, equilibrium of forces, analysis of forces acting on structural and machine elements, friction, moments of inertia, and virtual work. Prerequisites: PHYS 2121 and MATH 1122 (or concurrent).

ENGR 2215 Engineering Mechanics-Dynamics  3
Includes vectorial kinetics and kinetics, absolute and relative motion, force-mass acceleration relations, potential and kinetic energy, work, power, impulse, momentum, conservation of energy and momentum. Application to particles, particle systems, and rigid bodies will be studied. Prerequisite: ENGR 2214.

ENGR 2235 Special Topics in Engineering  3
Introduces students to specialized topics in the engineering field. Topics cover a wide range of issues of current interest and may be chosen to meet the needs of students. The course may be repeated for credit if the topic changes.

ENGR 2240 Circuit Analysis I  3
Introduces electrical circuit theory, circuit variables, circuit elements, simple resistive circuits, Ohm’s and Kirchoff’s Laws, mesh and node circuit analysis, the use of circuit theorems, and the operational amplifier. Also emphasized are the topics of inductance, capacitance, mutual inductance, response of first-order RC and RL circuits and natural step responses to RLC circuits. The computer program PSPICE will be used for circuit simulation. Prerequisites: PHYS 2122 and MATH 1122.

ENGR 2241 Circuit Analysis I - Lab  1
Provides the laboratory to accompany Circuits Analysis I. Circuit analysis concepts are reinforced by laboratory experiments in which the theories are verified. Taught concurrently with Circuit Analysis I: ENGR 2240.

ENGR 2250 Circuit Analysis II  3
Continues Circuit Analysis I to include special topics in circuit analysis to include sinusoidal analysis, phasors, sinusoidal steady-state response, average power, root-mean square values, polyphase power, complex frequency, frequency response, and two-port networks. Prerequisites: ENGR 2240, ENGR 2241 and MATH 2205.

ENGR 2251 Circuit Analysis II - Lab  1
Provides the laboratory to accompany Circuits Analysis II. Circuit analysis concepts are reinforced by laboratory experiments in which the theories are verified. Taught concurrently with Circuit Analysis II: ENGR 2250.

ENGLISH AS A SECOND LANGUAGE (ESL)

ESL 0090 Listening and Speaking  3
Provides the ESL student the opportunity to improve listening and speaking skills. The focus is on note-taking, weekly speaking and listening exercises, increasing vocabulary, and comprehension.

ESL 0091 Reading and Writing  3
Provides the ESL student the opportunity to improve reading and writing skills. Emphasis is on word recognition, vocabulary, pronunciation, and comprehension. Emphasis in writing is on grammar, spelling and structure.

ESTHETICIAN (ESTH)

ESTH 1100 Estheology Clinic/License Preparation  3
Prepares students for their written examinations and skill certification. Prerequisites: Completion of or concurrent enrollment in COSM 1100, COSM 1105.

FLPW 1100 Fluid Power Hydraulic Theory  4
Introduces basic hydraulic concepts, formulas, and applications of hydraulic components used for directional, flow and pressure control of circuits. Also provides students with the knowledge and understanding of the operation, function, and application of hydraulic pumps, continuous rotation motors, limited rotation motors, and cylinders.

FLPW 1103 Basic Hydraulics  3
Introduces basic hydraulic concepts, formulas, and applications of hydraulic components used for directional, flow and pressure control of circuits as applies to the wind turbine. Also provides students with the knowledge and understanding of the operation, function, and application of hydraulic pumps, continuous rotation motors and limited rotation motors.

FLPW 1104 Basic Hydraulics Lab  1
Introduces basic hydraulic concepts, formulas, and applications of hydraulic components used for directional, flow and pressure control of circuits as applies to the wind turbine. Also provides students with the knowledge and understanding of the operation, function, and application of hydraulic pumps, continuous rotation motors and limited rotation motors.

FLPW 1105 Fluid Power Hydraulic Lab  3
Work with some of the basic equipment and learn the fundamentals and basic hydraulic valves of fluid power. They will also study various flow controls, pumps and motors. Students will tear down, plumb and operate the various components.

FLPW 1110 Fluid Power Hydraulic Calculations  2
Uses the application of math concepts to calculate basic system parameters such as lifting force, pressures, horsepower, time, velocities, tubing sizes, unloading systems, and various parameters for hydraulic pumps and motors.

FLPW 1115 Auto Cad  2
Provides students with the knowledge and understanding of the skills necessary to design and produce mechanical blueprints, hydraulic circuit drawings, and drafts using drafting equipment and AutoCad software.
FLPW 1120  
**Pneumatics Theory**  
Covers hydraulic accessories and introduces the student to pneumatic components and circuits.

FLPW 1125  
**Industrial Electro-Mechanical Control Theory**  
Introduces basic electrical theory, relay control circuits, and electrical motor starters for controlling fluid power systems.

FLPW 1131  
**Fluid Power Lab II**  
Develop skills in plumbing, troubleshooting, and operation of basic pneumatic circuits and hydraulic circuits, as well as basic fluid power fabrication. Concurrent with FLPW 1120.

FLPW 2100  
**Advanced Systems Calculations**  
Provides students with knowledge and skills of sizing systems in both mobile and industrial applications.

FLPW 2105  
**Advanced System Lab I**  
Allows the student to design, plumb, and operate various advanced hydraulic, pneumatic, and electrical control circuits.

FLPW 2110  
**Circuit Design and Control Theory**  
Receive instruction in hydrostatic, mobile valving, pump controls, and power steering.

FLPW 2126  
**Systems Analysis**  
Provides students with knowledge of how components interact with each other in systems and what may cause them to malfunction. Prerequisite: FLPW 2100.

FLPW 2130  
**Advanced Systems Lab II**  
Provides advanced lab jobs in the following job related areas: sales, air logic, engineering, lab technician, servo/proportional valves, fabrication, and service.

FLPW 2136  
**Programmable Logic Controls**  
Receive an understanding of and the ability to use solid state programmable logic controllers and circuits to control and power phases of industrial automation. Prerequisite: ROBT 1135.

FLPW 2141  
**Proportional & Servo Control Theory**  
Provides students with knowledge and working skills dealing with electronic control of electro-hydraulic proportional and servo controls.

FLPW 2170  
**Second Year Technical Project**  
Build a project that combines previous training in the different Fluid Power Technology classes. This class can be used for the technical elective category in second year.

FLPW 2175  
**Pneumatic Certification Review**  
Review all parts of Fluid Power to help them prepare for the PNEUMATIC SPECIALIST certification test. Prerequisites: Enrolled in Fluid Power or a past graduate of Fluid Power or working in the field of Fluid Power.

FLPW 2180  
**Hydraulic Certification Review**  
Review all parts of hydraulics and help them prepare for the HYDRAULICS SPECIALIST certification test. Prerequisites: Enrolled in Fluid Power or a past graduate of Fluid Power or working in the field of Fluid Power.

**GEOGRAPHY (GEOG)**

GEOG 1100 (Meets Goal Area: 5, 8)  
**Introduction to Geography**  
Introduces various aspects of Geography. Emphasis will be given to cartography, meteorology, climatic elements, political, and population geography. Place-location is also covered. Prerequisite: STSK 0090 or evidence of college level reading ability through assessment test or prior college coursework.

GEOG 1101 (Meets Goal Area: 5, 10)  
**Introduction to Physical Geography**  
Studies the physical elements of the environment emphasizing earth-time relationships and their relationship to people, measurement of time and distance, elements of weather, climate and land form development. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

GEOG 2140  
**Introduction to Meteorology**  
Develops a basic understanding of atmospheric processes, weather systems, weather maps and forecasting. GEOG 1101 recommended. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

GEOG 2250  
**Minnesota Geography**  
Studies Minnesota’s geology, landforms, climate, mineral and rock resources, agriculture, industry and people. Special emphasis will be given to landscape development. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

**GENERAL STUDIES (GSCL, GSCM, GSSS)**

GSCL 1105  
**Job Seeking Skills**  
Create a personal inventory and a resume, write job application letters, complete a job application form, and prepare for employment interviews. A highly individualized approach to developing the critical actions and attitudes involved in job seeking and keeping.

GSCM 1120  
**Technical Writing**  
Covers both internal and external reports used in business and industry such as proposals, abstracts, interoffice communications, and technical reports. Students are exposed to formats, visuals, and documentation methods used in technical report writing. Students study writing as a process while researching and writing technical reports.

GSSS 1100  
**Human Relations**  
Designed to assist students in developing and maintaining healthy relationships within the family, social, and work structures. Self-esteem, assertive behavior, and stress management will be covered.

**HEALTH CORE (HC)**

HC 1100  
**Nutrition**  
Basic concepts of normal nutrition are presented. These concepts are applied to human needs throughout the lifespan cycle. The emphasis is on the application of these concepts in practical nursing.

HC 1115  
**Medical Terminology**  
Teaches students to recognize and build medical terms after learning the meaning of word parts. The student will also learn to pronounce word parts, enabling them to pronounce medical terms.

HC 1151  
**Body Structure & Function**  
Designed to assist students in developing a basic understanding of the normal structure and functioning of the body. Such knowledge is basic to understanding common disease processes. Students also learn to recognize and build medical terms after learning the meaning of word parts.
HC 1160  
Fundamentals of Nursing I  
Introduces concepts of basic human needs, health/illness and basic nursing skills in caring for the elderly client. Skills are demonstrated in a supervised laboratory and clinical environment.

HC 1165  
Medical Terminology  
Teaches the student to recognize and build medical terms after learning the meaning of word parts. The student will also learn to pronounce word parts, enabling them to pronounce medical terms.

HC 1175  
Nursing Assistant  
Introduces concepts of basic human needs, health/illness and basic nursing skills. Skills are demonstrated in a supervised laboratory setting and in a clinical environment. This course also covers introduction to home care. Topics include care of the child, reporting procedures, caring for special populations, homemaking skills, and hospice care.

HC 1200  
HealthCore Curriculum  
Designed to prepare students and incumbent workers to the ever changing healthcare workplace with an emphasis on patient and direct care. These topics are included: legal and ethical issues, communication, self awareness, safety and standard precautions, successful behaviors in the workplace.

HC 1290  
Health Care & Society  
Provides a basis for intellectual, practical and ethical decision making. The fundamentals of bioethics, ethical codes and legislation affecting a health professional practice, patient protection issues, professional boundaries, and legal basics are explored. Cultural and spiritual perspectives are discussed.

HC 2120  
Disease Conditions  
Introduces basic principles of disease and the study of disease by body system. The signs and symptoms, etiology, diagnosis, and treatment of each disease are explored; and prevention of disease is emphasized. Medical terminology and anatomy/physiology knowledge acquired in previous courses is applied. Prerequisite: BIOL 2245 or HC 1151 or consent of instructor.

HISTORY (HIST)  

HIST 1101 (Meets Goal Area: 5, 7)  
American History I  
Presents a survey of United States history from about 1500 to 1865 and encompasses political, economic, social, intellectual and cultural developments. Human diversity in the historical and cultural context of American history is also addressed. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HIST 1102 (Meets Goal Area: 5, 7)  
American History II  
Presents a survey of United States history from about 1865 to the present and encompasses political, economic, social, intellectual and cultural developments. Human diversity in the historical and cultural context of American history is also addressed. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HIST 1105 (Meets Goal Area: 5)  
Minnesota History  
Presents a historical survey of Minnesota beginning with a consideration of the significance of glaciers and geography and then studying the various people who chose Minnesota starting with the Ojibway and Dakota. Major emphasis is on the nineteenth and twentieth centuries. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HIST 1111 (Meets Goal Area: 6, 8)  
Western Civilization I  
Surveys European history from ancient times to the 1500s and encompasses political, economic, social, intellectual and cultural developments. This course may be taken for either Global Perspective or Humanities credit. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HIST 1112 (Meets Goal Area: 5, 7, 8)  
Western Civilization II  
Surveys European history from the 1500s to the present and encompasses political, economic, social, intellectual and cultural developments. The course may be taken for either Global Perspective or Humanities credit. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HIST 1121 (Meets Goal Area: 7, 8)  
World History I  
Includes a global and cross-cultural study of the early period of world history, including ancient civilizations. Empires and regions examined include ancient India, China, Greece, Egypt, Rome, the Americas, Africa, Southeast Asia, Japan, Medieval Europe and include the interactions of these civilizations. The study will include the emergence of the major world religions and their influence in the world cultures and civilizations. (Buddhism, Christianity, Judaism, Islam, and Hinduism). Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HIST 1122 (Meets Goal Area: 7, 8)  
World History II  
Includes a global and cross-cultural study of the modern period of world history from 1500 to the present. Topics include the influence of European expansionism and colonialism, interaction of nations and peoples, reform and change in religious pattern, and the development and spread of the Industrial revolution, Marxism, Communism, Constitutional monarchies, Representative democracies, global rearrangements or the twentieth century, decline of European colonialism, and contemporary conditions. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HIST 2202 (Meets Goal Area: 8, 9)  
Modern American Wars  
Begin with the examination of the Spanish American War, when the United States turned away from isolationism and toward global interaction. The course then examines World Wars I and II, the causes and peace settlements of each, and the significance of each conflict. The course moves on to the Cold War era and its associated conflicts, and concludes with an analysis of the Middle East and the War on Terror. Additionally, the course addresses certain social, political, economic, and intellectual questions from an ethical perspective, including genocide and disease. Emphasis is placed on the viewpoints of each nation involved in conflict and why it chose war instead of peace. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HIST 2235  
Special Topics  
Covers a wide range of issues of current interest. Topics will be chosen to meet the needs of students. The class may be retaken for credit if the topic varies. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HEALTH (HLTH)  

HLTH 1101  
Personal Wellness  
Focuses on individual wellness from a holistic perspective. Surveys personal health concerns within each of the five human health dimensions - physical, social, intellectual, emotional, and spiritual. Emphasizes the knowledge, attitudes, and behaviors of a positive lifestyle. Designed for anyone interested in enhancing their well-being. Often a required component of programs in health, human service, and education careers. Prerequisite: STSK 0090 or evidence of college level reading ability through assessment test or prior college coursework.

HLTH 1110  
Dimensions of Community/Public Health  
Introduces the field of community/public health. Acquaints students with the variety of health agencies in the public and private sectors and surveys current social health issues. Examines public health policy, health care systems in the US and abroad, epidemiology and disease prevention in communities, and health promotion in various settings/populations. A foundation course for careers in allied health, community health, and other
service professions. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HLTH 1130 3 Stress Management and Relaxation
Provides a foundation for understanding the role of stress in the modern human condition. Mind/Body/Spirit interrelationships and the emerging sciences of psychoneuroimmunology and subtle anatomy will be introduced. Experiential exploration of numerous coping skills and relaxation techniques is emphasized. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HLTH 2210 3 Human Sexuality
Explores the diverse physical, social and psychological aspects of human sexuality at all life stages within the framework of solid scientific research and critical thinking. Topics include sexual anatomy and physiology, attraction and intimate relationships, gender issues, forms of healthy sexual expression and behaviors, fertility management, STIs, sexual dysfunction, atypical sexual behaviors, sexual coercion, and commercial sex. Opportunities to clarify personal values and decisions regarding one's sexual health are woven throughout. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HLTH 2220 3 Drugs, Society, and the Individual
Explores relationships between drugs, sociocultural influences, and individual attitudes and behaviors. With an emphasis on psychoactive chemicals, this course surveys the physiological effects and psychosocial impact of a wide array of drugs. Investigates patterns of drug use; drug laws, consequences of drug abuse; addiction, intervention, treatment, recovery, and prevention strategies from both individual and social perspectives. Meets the MN teacher licensure requirement for MS122A.66 and is a foundation course for those seeking careers in education, health, and other human services professions. Prerequisite: At least one (1) of the following courses: HLTH 1101, PSYC 1101, SOC 1101, OR BIOL 1100 OR 1110.

HLTH 2235 3 Special Topics
Explores a single health topic or current health issue; offerings based on student interest and demand. Course may be repeated as topic changes.

HLTH 2240 3 Basic Nutrition
Introduces the study of food and human dietary patterns. Examines sources of nutrients, how they are processed in the body, body composition, current dietary guidelines and nutritional issues, the impact of socio-cultural factors on diet, and the impact of dietary choices on health. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HUMAN SERVICES (HSER)

HSER 1101 2 Introduction to Human Services
Introduces students to the field of human services, from its historical background to current trends and issues. Emphasis is given to various models of helping, the roles and career options of human services workers, familiarization with local human service agencies, and professional ethics and responsibilities. Prerequisite: STSK 0090 or evidence of college level reading ability through assessment test or prior college coursework.

HSER 1121 3 American Sign Language I
Teaches basic ASL communication strategies used by the Deaf. Course includes: expressive and receptive sign activities, sign vocabulary, fingerspelling and numbers, and aspects of Deaf culture. ASL Levels One - Four are designed for students interested in becoming certified Sign Language interpreters. This course is offered online only.

HSER 1122 3 American Sign Language II
Continues to teach basic ASL, grammatical structure, fingerspelling and numbers, conversational strategies, and Deaf history and culture. ASL Levels One - Four are designed for students interested in becoming certified sign language interpreters. This course is offered online only.

HSER 1131 1 Autism Spectrum Disorders
Focuses on an introduction to Autism Spectrum Disorders (ASD). Students will be given a history of ASD; an overview of the disorder as it is recognized today; diagnostic criteria for and behavioral characteristics of the specified disorders on the spectrum of autism including: Rett's Disorder, Childhood Disintegrative Disorder, Classic and High Functioning Autism, and Asperger's Syndrome. Current research; current trends in treatment, instructional strategies, current State and Federal mandates; parent support and cultural variables will also be presented.

HSER 1132 2 Behavior Management
Introduces basic principles of behavior management as it relates to the school setting. Behavioral excesses and deficits, and maladaptive and aggressive behavior will be the primary focus. Topics include the characteristics of behavior management; proactive intervention procedures; shaping; prompting; and fading; reinforcement procedures and schedules of reinforcement will also be presented. Functional Behavioral Assessment (FBA) will be a primary focus throughout the course. In addition, current State and Federal mandates will be addressed. Students who have taken PSYC 2230 - Behavior Modification should not take this course. This course cannot be substituted for PSYC 2230 - Behavior Modification.

HSER 1262 2 Creative Activities for Young Children
Explores means of developing children's creativity in art, music, drama. Students learn to design age-appropriate activities with paints, chalk, wood, paper, dough, song, dance, puppets, and related material. Required course for Human Services - Child Development Track majors. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HSER 1266 2 Foundations of Child Development
Introduces the various diagnostic categories as used within the school system. Diagnostic categories include: Autism Spectrum Disorders; Developmental Cognitive Disability; Early Childhood Special Education; Emotional/Behavioral Disorders; Physical and Other Health Disabilities; Sensory Disorders (Hearing/Vision); Specific Learning Disability; Speech/Language Disorders; and Traumatic Brain Injury. Support services including occupational therapy, physical therapy, counseling, and behavioral treatment will also be discussed. Prerequisite: STSK 0090 or evidence of college level reading ability through assessment test or prior college coursework.

HSER 1267 2 Special Needs in Children
Introduces the various diagnostic categories as used within the school system. Diagnostic categories include: Autism Spectrum Disorders; Developmental Cognitive Disability; Early Childhood Special Education; Emotional/Behavioral Disorders; Physical and Other Health Disabilities; Sensory Disorders (Hearing/Vision); Specific Learning Disability; Speech/Language Disorders; and Traumatic Brain Injury. Support services including occupational therapy, physical therapy, counseling, and behavioral treatment will also be discussed. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HSER 1268 2 Children's Health, Nutrition, and Safety
Teaches how to promote good health, physical fitness, and nutrition and to provide a safe environment for children. Topics include motor development, methods of teaching health and safety to children, recognizing symptoms of abuse, neglect, and common children's illnesses. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HSER 1269 2 Guidance: Managing the Physical and Social Environments
Teaches how to provide a secure, supportive environment for communicating both thoughts and feelings, and for fostering developmentally appropriate behavior. Emphasis is given to providing nurture, developing realistic expectations for children's behavior, setting limits and developing self-control. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HSER 2221 3 American Sign Language III
Teaches to communicate abstract concepts related to ASL. Emphasis in this course is placed on grammatical structure, sign selection and vocabulary, use
of fingerspelling in conversation, and Deaf culture. ASL Levels One - Four are designed for students interested in becoming certified sign language interpreters. This course is offered online only.

HSER 2222
American Sign Language IV
3
Continues to develop skills and strategies necessary for communicating ASL concepts. The course will focus on building students’ sign vocabulary, sign fluency and receptive skills. ASL Levels One - Four are designed for students interested in becoming certified sign language interpreters. This course is offered online only.

HSER 2235
Special Topics
Covers a wide range of issues and skill development. Topics will be chosen to meet the needs of Human Services students. The class may be retaken for credit if the topic varies. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HSER 2297
Human Services Generalist Internship
Provides supervised work experience for students in the generalist track in one or more human services agencies. Students and supervisors design the experiences to meet students' educational and career goals. Prerequisites: Internships are available only to students who have an overall GPA of 2.00 ("C"), a 2.50 in career courses, have completed the outlined courses in their first three terms, have completed a four-hour seminar in the fall semester of the second year; have completed a formal application process and have been approved following an interview with the Human Services Coordinator. 6

HSER 2298
Human Services Child Development Internship
Provides supervised work experience with children in settings such as day care, preschool, and elementary schools. Students and supervisors design the experiences to meet students' educational and career goals. Prerequisites: Internships are available only to students who have an overall GPA of 2.00 ("C"), a 2.50 in career courses, have completed the outlined courses in their first three terms, have completed a four-hour seminar in the fall semester of the second year; have completed a formal application process and have been approved following an interview with the Human Services Coordinator. 8

HUMANITIES (HUM)

HUM 2121 (Meets Goal Area: 6, 7)
The Turbulent Sixties
4
Presents an interdisciplinary (history, literature, film) and topical survey of the 1960’s. Topics will include the civil rights movement, war on poverty, Vietnam, feminism, the environmental movement and the counterculture. The course also counts as a Human Diversity course. Prerequisite: ENGL 1101.

HUM 2201 (Meets Goal Area: 6, 7)
The Many Faces of Mexico
2
Explores the cultural, historical and social realities which together form contemporary Mexico. By studying about the economic and political situation, one can understand why many Mexicans are seeking work and moving their families north. Special attention is given to the impact on Minnesota communities and the challenge to welcome and to meet the needs of the growing Latino population.

HUM 2235
Special Topics in Humanities
Covers a wide range of humanities topics. Topics will be chosen to meet the needs of students. The class may be retaken on demand for credit if the topic varies. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

HEATING, VENTILATION, AIR CONDITIONING (HVAC)

HVAC 1100
Refrigeration Fundamentals
3
Covers the basics of what heat is and how it can be moved from one place to another. Topics included are sensible heat, latent heat, super heat, and BTU’s. Other topics included are EPA laws and regulations that pertain to the refrigeration certificate.

</tr>
<tr>
<td>LAWE 2201</td>
<td>Criminal Investigation/Interview, and Interrogation</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Introduces the basic fundamentals of crime scene and post-crime investigation. The student will analyze methods of handling the crime scene, use of detection and identification purposes, and preparation of the case for prosecution. The second portion of this course will examine interview and interrogation techniques utilized by law enforcement. The course will examine in-depth basic interviews of witnesses, victims, suspects, and children. Students will also demonstrate an understanding of the differences of interviewing and interrogations. Students will perform mock interrogations to demonstrate their understanding of the interrogation process.</td>
<td></td>
</tr>
<tr>
<td>LAWE 2202</td>
<td>Criminal Investigations-Evidence Collection</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Provides the basic fundamentals of crime scene investigations. From the responsibilities of the officer who arrives first on the scene to conducting interviews of witness, victims, and suspects plus learning how to author and execute a search warrant. Learners will also learn how to prepare for courtroom testimony. Prerequisites: LAWE 1102 &amp; LAWE 1160.</td>
<td></td>
</tr>
<tr>
<td>LAWE 2210</td>
<td>Evidence Collection and Preservation</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Familiarizes students with the basic principles of the collection, examination, evaluation and interpretation of evidence. This course will focus on the application of modern science to physical evidence collection, preservation, and analysis.</td>
<td></td>
</tr>
<tr>
<td>LAWE 2215</td>
<td>CSI, MN (Basic Criminal Forensics)</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Familiarizes students with the basic principles and uses of forensic science in the context of the criminal justice systems. Forensic science which, is the study and application of science to legal processes, will be related to the collection, examination, evaluation and interpretation of evidence. This course will focus on the application of modern science to physical evidence collection, preservation, and analysis, which, if properly utilized, can be crucial in the resolution of social and legal disputes.</td>
<td></td>
</tr>
</tbody>
</table>
LAWE 2223  
**Applied Writing: Law Enforcement**  
Teaches students the proper construction and preparation of police reports using Minnesota P.O.S.T. style.

LAWE 2224  
**Police Report Writing-Employment Preparation**  
Establishes the learner's ability to write police reports in a detailed chronological order using proper format. Emphasis is placed on spelling, grammar, punctuation, and the ability to get clear and concise meaning throughout the report. Additionally, students will develop their cover letter, resume, and complete a background packet. Prerequisites: ENGL 1101 or ENGL 2276.

LAWE 2232  
**Patrol Operations**  
Designed to provide the learner with an in-depth review of the basic patrol functions for a police patrol officer. Topics include, but are not limited to, role and duties of a patrol officer, squad car familiarization, principles of traffic enforcement, officer safety issues, radio communications, calls for service, police ethics, and citizen contact and public relations.

LAWE 2233  
**Firearms-Patrol Operations**  
Familiarizes students with the different tactical responses (including mental preparedness) to situations which may occur on patrol. Students will demonstrate proficiency after receiving instruction in the safe tactical handling of handguns, shotgun, and carbines. They will also learn to understand the importance of dealing with critical incidents while occurring and after.

LAWE 2250  
**Accident Investigation-Radar-Radio-DUI Enforcement**  
Designed to provide the learner with the skills needed to investigate property and personal injury accidents. Training in radar in radar operation, radio communications, and procedures to effectively process and complete arrests for alcohol related offenses. Prerequisite: LAWE 1102.

LAWE 2251  
**Psychology of Law Enforcement**  
Covers the sources of interpersonal and intrapersonal stress in the law enforcement profession including victim crisis management strategies including dealing with and assessing people with mental illnesses. Students will be required to assess their vulnerability to these stressors and develop their own strategies and tactics for coping.

LAWE 2260  
**Applied Procedures-Civil Process**  
Provides the learner with the history of the United States Constitution and the role it plays in democracy. Constitutional limitations on government authority over private citizens are discussed and analyzed. Learners will become familiar with the procedural handling of criminal cases as applied to the peace officer. Discussions about the rules of evidence, forfeitures, criminal defense, and service of civil process along with civil liability and courtroom testimony will provide the learner with knowledge of how important the above listed areas are in the profession. The course also covers the authority to stop/detain and search and seizure.

LAWE 2290  
**Civil Service Preparation**  
Designed to help students prepare for civil service exams and to develop and refine the skills necessary to successfully interview and communicate effectively in a professional law enforcement environment. The focus will be on law enforcement civil service testing, video based scenario testing, and pre-employment preparedness.

LAWE 2293  
**Diversity-Community Policing-Victimization**  
Provides the learner with contemporary concepts of community policing. Instruction in police interaction with victims of domestic abuse, sexual assault, individuals with disabilities, and crimes motivated by bias or hatred is provided.

LAWE 2294  
**Community Leadership**  
Discusses community involvement in Law Enforcement and Crime Prevention. This course will get students involved in the community with non-profit organizations.

LAWE 2295  
**POST Seminar**  
Provides a program overview, with opportunities to discuss changes in the field and POST requirements.

LAWE 2300  
**Tactical Management**  
Designed for the learner to exercise their knowledge while applying tactical responses to everyday situations that officers face. Upon completion of the different scenarios, the student will demonstrate their writing concise reports describing what actions were taken and why. Prerequisites: LAWE 2202, LAWE 2224, LAWE 2233 & LAWE 2250.

LAWE 2310  
**Use of Force**  
Provides learners information of the concepts and techniques of defensive tactics and maintaining physical fitness. The learner's ability to confront physical and verbal threats against them will improve, which provides them with more confidence. Instruction in eliminating excessive force taken by officers will be addressed by providing the learner with the skills to react (verbally or physically) in a quick, appropriate manner. Training will also be given in the use of chemical agents, distraction devices, and less than lethal options. Prerequisite: LAWE 1120.

LAWE 2320  
**Police Leadership-Ethics**  
Familiarizes students with the leadership and ethical expectations from the public that it serves. The learner will examine the day to day ethical choices officers have to make and the consequences of making poor decisions. The learner will also demonstrate the leadership requirements an officer must possess to effectively work in modern society and within the structured environment of law enforcement.

LAWE 2330  
**Communication-Relations**  
Deciphers interpersonal communications of the learner. The learner will attempt to understand individuals (including themselves) both inside and outside of policing. The learner will become educated in active listening and responding through the evaluation of both nonverbal and verbal communication. An emphasis is placed on the learner understanding to take on a survival mindset including the emotions they may experience from both on the job and off duty. Prerequisites: LAWE 2224 & LAWE 2233.

LAWE 2340  
**Traffic Law-Traffic Stops**  
Examines the elements which violate the traffic laws of MN. The learner will demonstrate an understanding of these laws by applying their knowledge while conducting traffic stops. Learners will also be instructed on different tactical approaches to conducting low and high risk stops. Prerequisites: LAWE 1111 & LAWE 2202.

**FOR ADDITIONAL COURSE DESCRIPTIONS ON LAMB MANAGEMENT COURSES (LWMP) GO TO**:  
WWW.MNWEST.EDU/LIST/LAMB-AND-WOOL-MANAGEMENT-DIPLOMA

LWMP 1001  
**Introduction to Sheep Management**  
This course introduces basic sheep management principles. Students will study the year round management and production cycle for a sheep enterprise and understand how each production stage influences enterprise profitability. This course also studies the philosophy of sheep management and its relationship to business goals.

LWMP 1202  
**Equipment and Facilities**  
This course will cover planning for sheep facilities: barn design; lot layout and sheep feeding equipment. Students will become aware of housing and feeding requirements and how to effectively plan for them.

LWMP 1300  
**Introduction to Sheep Health**  
This course helps students become familiar with sheep diseases that need to be managed in a successful sheep enterprise. Topics discussed will be Animal Husbandry, Quality Assurance, Young Lamb Diseases/Health Issues, Metabolic Diseases, Diseases causing Abortion, Diseases causing lameness,
Diseases Affecting Reproductive Performance in Rams, Parasite Diseases, Diseases of the Eye and more.

LWMP 1502 1 cr.
Ewe Ration Formulation
This course provides fundamental sheep nutrition education along with methods used to balance rations to meet the sheep nutrient requirements for each specific stage of production. Topics covered include: Digestive System and Function, Nutrient Requirements, Nutrient Composition of Feed Stuff, Ration Formulation and Feeding systems.

LWMP 1701 2 cr.
Wool Characteristics and Properties
This course will provide an in-depth look at the biological development of wool fiber and the properties that make it a unique clothing fiber. In addition this course will study the factors that determine the value of wool, how these can be improved and methods to measure these qualities.

MATH (MATH)

MATH 0092 2 cr.
Essentials of Mathematics-Pre Algebra
Assists students in developing a thorough understanding of basic mathematics. Intuition and sound mathematical techniques are used to analyze and solve problems in fractions, decimals, ratios, proportions, percentages, introductory statistics and basic metric geometry. Some introductory Algebra may also be included. This course is not considered a transfer course. Prerequisite: STSK 0092 or placement by exam.

MATH 0098 3 cr.
Higher Algebra I - Beginning Algebra
Teaches basic algebraic concepts and skills. Real number properties, algebraic expressions, use of exponents, first degree equations, inequalities, operations on polynomials, factoring, roots and radicals, and quadratic equations and inequalities are emphasized in the course. This course is not considered a transfer course. Prerequisite: MATH 0092 or placement by exam.

MATH 0099 3 cr.
Higher Algebra II
Continues MATH 0098. Coordinate geometry, functions, systems of equations, matrices, determinants, exponential and logarithmic functions are emphasized in the course. Other topics may include sequences, series, binomial theorem, and/or probability and statistics introduction. This course is not considered a transfer course. Prerequisite: High school algebra (one year), MATH 0098, or placement by exam.

MATH 1100 3 cr.
Integrated Math
Focuses on using math concepts to solve applied problems in technology. These concepts include topics in algebra, geometry, and trigonometry. Prerequisite: MATH 0092 or at least an 80% score on the Arithmetic Accuplacer test.

MATH 1105 (Meets Goal Area: 4) 4 cr.
Introduction to Probability and Statistics
Introduces the measures of central tendency, measures of dispersion, frequency distributions, probability, sampling distributions and the central limit theorem, testing of hypotheses, analysis of variance, linear regression and correlation analysis. Prerequisite: Two years of high school algebra, MATH 0098, or placement by exam.

MATH 1107 (Meets Goal Area: 4) 3 cr.
Concepts in Math
Covers topics from various areas of mathematics showing the scope and power of mathematics and emphasizing the mathematical method. For students who are not mathematics majors and who wish to acquire a basic understanding of mathematics. Prerequisite: Two years of high school algebra, MATH 0098, or placement by exam.

MATH 1111 (Meets Goal Area: 4) 3 cr.
College Algebra
Reviews the fundamental operations of higher algebra integrated with a functions approach. Studies polynomial, exponential, and logarithmic functions, graphs and transformations, systems of equalities and inequalities, matrices and determinants, problem solving applications and data modeling techniques. Prerequisite: Two years of high school algebra, MATH 0099, or placement by exam.

MATH 1113 (Meets Goal Area: 4) 4 cr.
Pre-Calculus
Reviews the concepts functions of college algebra and then extends those ideas to trigonometry and analytic geometry. Exponential, logarithmic, and polynomial functions are emphasized in the review. The course explores rectangular coordinates and angles, solutions of right triangles, unit circles, radian measure, trigonometric functions and their inverse, trigonometric graphs, trigonometric equations and identities, complex numbers, conic sections, and other analytic geometry topics such as polar coordinates, parametric equations, sums and geometric series, and vectors. Prerequisite: MATH 1111 or placement by exam.

MATH 1118 (Meets Goal Area: 4) 4 cr.
Applied Calculus
Provides a tour of differential and integral calculus in one variable. Emphasizes formulas and their interpretation and use in applications. Students in programs that call for short calculus, brief calculus or applied calculus should take this course. Engineering students should take the Calculus sequence: MATH 1121-1122. Students concerned about which courses to take should contact the instructor. Prerequisite: MATH 1113 or MATH 1111 or equivalent placement.

MATH 1121 (Meets Goal Area: 4) 4 cr.
Calculus I
Introduces the basic ideas of differential and integral calculus: topics include limits and continuity, differentiation of functions, applications of derivatives, definite and indefinite integrals, the fundamental theorems of integral calculus, numerical integration, and applications of definite integrals. Prerequisite: Four years of high school mathematics, MATH 1113, or placement by exam.

MATH 1122 4 cr.
Calculus II
Continues Calculus I. Begins with further applications of the definite integral. Other topics include the calculus of transcendental functions, techniques of integration, infinite series, plane curves, polar coordinates, parametric equations, and a few topics of analytic geometry of Euclidean 3-space. Prerequisite: MATH 1121.

MATH 2201 4 cr.
Calculus III
Continues Calculus II. Topics include vectors, vector-valued functions with applications, functions of two or more variables, partial derivatives, multiple integrals, and vector analysis topics including line and surface integrals, Green's Theorem, and Stokes' Theorem. Prerequisite: MATH 1122.

MATH 2206 4 cr.
Ordinary Differential Equations
Presents the theory, computations and applications of first and second order ordinary differential equations and two-dimensional systems. Prerequisite: MATH 1122.

MATH 2235 4 cr.
Special Topics Mathematics
Explores specific areas of mathematics to meet specialized student needs or interests. The class may be retaken if the topic varies.

MEDICAL LABORATORY TECHNICIAN (MDLT)

MDLT 1100 3 cr.
Introduction to Laboratory Science
Designed to familiarize the student with a career in the medical laboratory field, MLT education programs, medical terminology, certification process, professional organizations, and ethical/legal issues. The student will also obtain blood samples (phlebotomy).

MDLT 1105 3 cr.
Microbiology I
Introduces the student to the microbial world. The course covers the study of the materials and methods used for identification of pathogenic organisms and the study of these organisms in relation to their disease processes in humans. The course will present microbiology within an epidemiologic, diagnostic, and clinical framework.
MDLT 1110  
**Medical Lab Calculations**  
Prepares MLT students for calculations used in the medical laboratory. Class content includes dilutions, titers, Levey-Jenny charts and quality control, metric system, and calculations used in the disciplinary departments in the medical laboratory. Instrumentation will be discussed.

MDLT 1115  
**Biological Fluids**  
Introduces the student to the practical aspects of renal physiology and the theory of urine chemical, physical and microscopic tests. In addition, analysis of other body fluids (fetal specimens, cerebral spinal fluid seminal fluid, amniotic fluid, synovial fluid) is reviewed in the lecture portion of the class. In the laboratory, the student will perform physical, chemical and microscopic analysis on urine specimens.

MDLT 1120  
**Immunology**  
This course introduces the student to a wide array of clinical laboratory techniques that are based on the concepts studied in immunology. The topics range from the very simple to the very complex procedures that are used in all areas of the clinical laboratory. Prerequisite: MDLT 1100.

MDLT 1125  
**Clinical Chemistry I**  
Introduces methods used in the quantitative analysis of chemical constituents of blood and other body fluids. Quality control is emphasized as integral to all aspects of laboratory medicine. Specific testing procedures for various organ systems are discussed and practiced.

MDLT 1130  
**Hematology I**  
Introduces the student to study of cells in the blood. It covers routine procedures performed on patients' blood in a medical laboratory. Emphasis is on the theory and practice of these skills utilizing both manual and automated techniques. Prerequisite: MDLT 1100.

MDLT 2101  
**Microbiology II**  
Continues Medical Microbiology I. Groups of medically important miscellaneous bacteria, yeast, molds, parasites and viruses are studied and correlated to laboratory practice in identification. Prerequisite: MDLT 1105 or discretion of instructor.

MDLT 2106  
**Immunohematology**  
Teaches the theory of red cell antigen-antibody interaction as it relates to blood grouping and typing, antibody detection and compatibility testing. Blood donor screening and component preparation are also discussed. In the laboratory the student will perform basic blood banking procedures. Accuracy in procedure and interpretation is emphasized. Prerequisites: MDLT 1100 and MDLT 1120.

MDLT 2110  
**Clinical Chemistry II**  
Continues Clinical Chemistry I. Students continue to develop skills in the performance of the chemical analysis of blood. Lectures continue to correlate laboratory results with clinical findings. In addition, material will be presented on markers, minerals and toxicology.

MDLT 2120  
**Hematology II**  
Continues Biological Fluids. Students will carry out wide ranging research into the disease processes that occur in the formed elements of the blood with emphasis on leukemias and myelomas. This course also covers the theory and testing of the coagulation aspects of the blood. The student will prepare a research paper and a journal article report. Prerequisite: MDLT 1105.

MDLT 2125  
**Externship I**  
Provides the first part of the students externship in an affiliated hospital laboratory. The student is assigned to an affiliated hospital for the purpose of allowing them to gain practical experience in a laboratory while under direct supervision. The student will rotate through various departments of the laboratory. The student will review and be tested on biological fluids, microbiology, hematology, and coagulation. The student will be responsible for worksheets and exams.

MDLT 2131  
**Externship II**  
Provides the final part of the student's externship and courses in the medical laboratory technician program. The student will continue their externship at their assigned affiliated hospital laboratory. The student will rotate through the various departments. The student may experience weekend and night call to better prepare them for a realistic laboratory job. The student will receive worksheets and exams on chemistry, immunology and immunohematology. Prerequisite: MDLT 2125.

MDLT 2145  
**Electrocardiogram**  
Teaches electrocardiography which includes understanding cardiac anatomy and physiology, the components of the cardiac cycle and basic heart rhythms. The student learns how to perform a 12-lead ECG while working in a simulated laboratory setting. Prerequisite: HC 1151 or BIOL 1110 or BIOL 1115.

MDLT 2200  
**Externship**  
Consists of 120 contact hours of supervised practice of phlebotomy at an affiliated hospital, private laboratory or clinic. Learning activities are specifically planned and implemented at the clinical affiliated site. Student clinical experience is standardized using a checklist. The student will make arrangements with the Medical Laboratory Technician Program Director regarding their externship time and site. Prerequisite: MDLT 1100.

MDLT 2235  
**Special Topics**  
Covers a wide range of issues of current interest. Topics will be chosen to meet the needs of students. The class may be retaken for credit if the topic varies.

MEDA 1105  
**Clinical Procedures I**  
Teaches the fundamentals of the clinical aspect of medical assisting, and includes learning to perform specific skills. Areas taught include communication and professionalism, basic principles of psychology, medical asepsis, the medical assistant's role in assisting with the medical exam and certain procedures, and documentation.

MEDA 1135  
**Laboratory Skills**  
Studies the laboratory areas of urinalysis, immunology, serology, hematology, clinical chemistry, microbiology, and body fluid analysis. Students will perform waived testing according CLIA guidelines. Prerequisite: MDLT 1100.

MEDA 2100  
**Dosage Calculations**  
Prepares the student for dosage calculations used in the administration of medications. An emphasis is placed on mastering math skills necessary for administration systems and conversions between systems, solving ratio and proportion problems, and working with percentages. The student is introduced to reading oral and parenteral dosages.

MEDA 2110  
**Clinical Procedures II**  
Teaches the continued study of the fundamentals of medical assisting in relation to surgical asepsis and sterile procedures, wound care, physical therapy and the specialty areas of OB/GYN, pediatrics, colon procedures and male reproductive health. The student is taught to perform specific skills related to the above areas of study. The basic principles of respiratory diagnostic testing, radiology and emergency preparedness are also taught. Professionalism, communication and documentation continue to be stressed in this course. Prerequisite: MEDA 1105.

MEDA 2135  
**Pharmacology**  
Introduces pharmacological concepts, drug classifications and the effects of drugs on the clients. Principles of safe, accurate administration of
medications by various routes are emphasized. Classroom and lab are used to teach basic methods of safe drug administration.

MEDA 2140  7
Medical Assistant Practicum
Focuses on the role of the medical assistant in relation to the following areas: self-awareness and self-care, community resources, patient education, teamwork and customer relations. The remainder of the course is designed to provide on-the-job experience. The student will be assigned to work in a physician's office for a total of 6 semester credits. The student will work under the supervision of office personnel doing tasks pertinent to the student's technical program.

MEDA 2235  7
Special Topics in Medical Assisting
Introduces students to specialized topics in the Medical Assisting field. Topics cover a wide range of issues of current interest and will be chosen to meet the needs of students. The course may be retaken for credit if the topic changes.

MASSAGE THERAPY (MSTH)

MSTH 1100  3
Introduction to Massage
Teaches the importance of self-awareness and self-care. Body mechanics are emphasized. Yoga, Tai Chi, somatic stretches and relaxation techniques are taught. Discussions of stress causing events are discussed. Self-knowledge and self-awareness both physically and mentally are taught. The aim is to facilitate the development of student maturity and self-understanding. Professional behavior and standards, ethical and legal practice as it applies are discussed. Introduction to massage therapy, licensure, national certification, professional organizations, malpractice insurance, and the hospice concept are also taught. Client positioning, with the use of the bolsters, pillows, and special tilt, cut-out and firm massage tables, use of hot packs and cold packs or ice (cryotherapy) is covered. The ability to make professional judgments about the application of the appropriate modality for each client situation is taught and practiced.

MSTH 1105  2
Kinesiology
Covers the basic structure and function of the joint, muscles, nerves, and other connective tissues that cause movement and control posture in the human body as they apply to massage therapy. General physics principles including levers, planes, and axis are covered. The interaction of the muscle/bone connections and the forces needed to produce movement are taught.

MSTH 1110  6
Basic Massage I
Covers massage techniques which are applied sequentially to the back, neck, and head, posterior and anterior torso, face, and anterior legs. Pathology of each area is discussed including function, positioning, appropriate strokes, ethical situations, and the appropriate draping. Concurrently the students are gradually led to the application of professionalism, legal issues, and documentation as they apply to stress reduction massage. The relationship of the mind's control of muscles and the resulting posture are taught. Instruction in somatic releases for each body section is practiced. The importance of client education is stressed with the responsibility of the client to participate in their well-being. Postural analysis is taught. Students learn definitions, identification and therapeutic interventions of the three major muscular reflexes at stress in humans. Distinguishing chronic muscular pain and postural distortions as caused by structural imbalance vs. functional imbalances is explored.

MSTH 1115  6
Massage Therapy
Covers the theory, techniques and applications of deep tissue therapy including deep work on the muscles and fascia, methods of tension release, and the injury repair process. Causes of stress are discussed and their relationship to chronic tension as related to neuromuscular therapy (NMT), and stress-tension-pain cycle is taught. Expanded and more detailed interview and assessment techniques are reviewed. The dysfunction theory and formation of trigger points with review of muscle cell activity, joint mobilization and stretching are taught. Students learn in-depth interview skills, working with pressure scales and the importance of client/therapist communication. Development of treatment plans is taught, and how and when to make a referral. This course also covers Swedish Massage, Chair Massage, Mother Massage, Infant Massage, Geriatric (Senior) Massage, and Lymphatic Drainage Massage. The evaluation of special populations is taught. Special massage skills involving positioning, strokes, pathology, documentation, and contraindications and cautions are included.

MSTH 1120  3
Client Massage
Covers the application of Swedish Massage, Chair Massage, Mother Massage, Infant Massage, Geriatric (Senior) Massage, and Lymphatic Drainage Massage. Special massage skills involving positioning, strokes, pathology, documentation, and contraindications and cautions are included.

MSTH 1125  3
Massage Therapy Business Practices
Covers the principles of a massage therapy business. The small business successes and record keeping are taught. The differences between contract work, being an employee, and ownership are compared.

MSTH 1130  1
Spa Techniques
Enables students to effectively incorporate spa services into their business by using a step by step hands-on approach to learning and studying ways to improve their business through marketing. This course is designed for college students as well as persons who are already practicing in the field of massage.

Music (MUSC)

MUSC 1101 (Meets Goal Area: 6)  3
Fundamentals of Music
Covers basic music symbols, vocabulary, rhythm, scale structures, intervals, chords and basic piano skills. This is a required course for all elementary education majors. It is also open to any student who desires a basic introduction to music.

MUSC 1102  3
MIDI Music
Studies electronic music, using music computer program Finale, composing music from the major periods in music history and various American music styles. Prerequisites are: ability to read music, knowing the piano keyboard, and having basic computer knowledge.

MUSC 1104 (Meets Goal Area: 6)  3
American Popular Music
Studies the history of American music including: Native American, African/American, vaudeville, Tin Pan Alley, ragtime, Dixieland, big band, musicals, country-western, folk music, popular song, jazz, rock, and the American Musical Theater.

MUSC 1105 (Meets Goal Area: 6)  3
Enjoying Music
Stresses the art of listening and enjoying music from major musical periods such as the Baroque and Classical as well as jazz. Open to all students who wish to increase their knowledge and enjoyment of music.

MUSC 1108  1
Concert Band
Prepares students for performance of concert band and wind ensemble literature. Open to all students who play band instruments. Performances are given both on and off campus. One major performance each semester. Prerequisite: Audition.

MUSC 1110 (Meets Goal Area: 6)  3
Introduction to Rock Music
Explores the history of rock and roll music, its relevant performers, producers, recordings, and cultural identity. This course is an appreciation of the origins, characteristics, and stylistic development of rock and roll music from the early 1950s to the present. Prerequisite: STSK 0006 or evidence of college level reading ability through assessment test or prior college coursework.

MUSC 1111 (Meets Goal Area: 6)  1
Chorale
Consists of a mixed chorus practicing and performing a wide range of choral literature from Renaissance motets, small works for chorus and orchestra, to avant garde compositions and pop music. Emphasis is on good vocal production. There is one major performance each semester and some touring. In case of low enrollment, this class may be divided into small ensembles such as octets, sextets, or quartets. Prerequisite: Audition.

Page 92
MUSC 1112 (Meets Goal Area: 6)  1  
Chorale  
Consists of a mixed chorus practicing and performing a wide range of choral literature from Renaissance motets, small works for chorus and orchestra, to avant garde compositions and pop music. Emphasis is on good vocal production. There is one major performance each semester and some touring. In case of low enrollment, this class may be divided into small ensembles such as octets, sextets, or quartets. Prerequisite: Audition.

MUSC 1131 (Meets Goal Area: 6)  1  
Pop Singers  
Consists of a mixed vocal ensemble, with accompaniment, performing a wide variety of popular music. At least one major performance and some touring takes place each semester. In case of low enrollment, this class may be divided into small ensembles such as octets, sextets, or quartets. Prerequisite: Audition.

MUSC 1132 (Meets Goal Area: 6)  1  
Pop Singers  
Consists of a mixed vocal ensemble with accompaniment performing a wide variety of popular music. At least one major performance and some touring takes place each semester. In case of low enrollment, this class may be divided into small ensembles such as octets, sextets, or quartets. Prerequisite: Audition.

MUSC 1140 (Meets Goal Area: 6)  1  
Piano Lessons  
Provides regularly scheduled individualized instruction. Open to interested students at all levels of ability.

MUSC 1141 (Meets Goal Area: 6)  1  
Piano Lessons  
Provides regularly scheduled individualized instruction. Open to interested students at all levels of ability.

MUSC 1145 (Meets Goal Area: 6)  1  
Vocal Lessons  
Develops singing technique through a regularly scheduled program of individualized instruction.

MUSC 2108  1  
Concert Band  
Prepares students for performance of concert band and wind ensemble literature. Open to all students who play band instruments. Performances are given both on and off campus. One major performance each semester. Prerequisite: Audition.

MUSC 2111 (Meets Goal Area: 6)  1  
Chorale  
Consists of a mixed chorus practicing and performing a wide range of choral literature from Renaissance motets, small works for chorus and orchestra, to avant garde compositions and pop music. Emphasis is on good vocal production. There is one major performance each semester and some touring. In case of low enrollment, this class may be divided into small ensembles such as octets, sextets, or quartets. Prerequisite: Audition.

MUSC 2112 (Meets Goal Area: 6)  1  
Chorale  
Consists of a mixed chorus practicing and performing a wide range of choral literature from Renaissance motets, small works for chorus and orchestra, to avant garde compositions and pop music. Emphasis is on good vocal production. There is one major performance each semester and some touring. In case of low enrollment, this class may be divided into small ensembles such as octets, sextets, or quartets. Prerequisite: Audition.

MUSC 2131 (Meets Goal Area: 6)  1  
Pop Singers  
Consists of a mixed vocal ensemble, with accompaniment, performing a wide variety of popular music. At least one major performance and some touring takes place each semester. In case of low enrollment, this class may be divided into small ensembles such as octets, sextets, or quartets. Prerequisite: Audition.

MUSC 2132 (Meets Goal Area: 6)  1  
Pop Singers  
Consists of a mixed vocal ensemble, with accompaniment, performing a wide variety of popular music. At least one major performance and some touring takes place each semester. In case of low enrollment, this class may be divided into small ensembles such as octets, sextets, or quartets. Prerequisite: Audition.

NAIL 1101  4  
Nail Clinic/License Preparation  
Prepares students for their written examinations and skill certification.

NAIL 1200  4  
Nail Technology  
Provides students with an opportunity to develop the practical skills necessary for entry-level salon work concentrating on manicuring, pedicuring, artificial nail application. This course will contribute 96 hours towards licensure. The Department of Commerce mandates these hours to go toward the hour requirement. Prerequisites: Successful completion have or concurrent enrollment in preclinical courses.
fluid and electrolytes, rest and sleep, psychological balance, pain and comfort, and elimination.

NURS 1120 Nursing of the Adult I
Introduces the student to alterations in functioning, including basic disease processes throughout the adult lifespan including disruptions in the following: cardiovascular, respiratory, skin and sensory systems. Topics of infectious processes, diabetes mellitus, and drug therapy will be addressed. Gerontological and cultural consideration will be included. Critical thinking through the use of the nursing process, health promotion, and standards of care are used to guide the students.

NURS 1130 Pharmacology
Introduces pharmacological concepts, drug classifications, and affects of drugs on the client. It prepares the student for dosage calculations and the administration of medications.

NURS 1140 Nursing Skills Lab
Focuses on achieving safe and competent practice in nursing skills such as catheterization, dressing changes, NG tube insertions, and medication administration skills.

NURS 1180 Clinical Applications I
Focuses on student demonstration of knowledge and skills learned in the classroom and lab by providing nursing care for selected clients in a long-term care facility. The student demonstrates critical thinking skills in planning and caring for clients and working within an interdisciplinary team implementing standards of care.

NURS 1220 Nursing of the Adult II
Introduces the students to alterations in functioning, including basic disease processes throughout the adult lifespan including disruptions in the following: renal, reproductive, gastrointestinal, endocrine, neurovascular and musculoskeletal systems. Topics of cancer and surgical client care and mental health will be addressed. Nursing and collaborative interventions and critical thinking skills are reinforced. Pharmacological concepts, gerontological and cultural considerations will be included. Critical thinking through the use of the nursing process, health promotion, and standards of care are used to guide the students.

NURS 1250 Family Nursing
Introduces the students to the childbearing/childrearing family. Concepts included are psychosocial, normal physical, and abnormal conditions of pregnancy, the health and illness of the newborn through the adolescent, and the influence of the community on the family. Application of growth and development theory to direct patient care is emphasized. Prerequisite: PSYC 1150.

NURS 1280 Clinical Application II
Focuses on student demonstration of knowledge and skills learned in the classroom and lab by providing nursing care to individuals and families across the lifespan. The student demonstrates critical thinking skills in planning and caring for selected clients in a variety of settings and working within an interdisciplinary team.

NURS 1295 PN Integration
Introduces the first year student to Nurse Practice act, legal and ethical issues and leadership skills in preparation for state licensure. Clinical facilitates the transition role from student to practitioner.

NURS 2100 Professional Nurse Transition
Assists the student successfully transition into an AD Nursing Program with an emphasis on the RN scope of practice. Topics may include, but are not limited to communication, critical thinking, nursing process, math, culture, and boundaries. May include clinical days as needed.

NURS 2120 Nursing Across the Lifespan
Concentrates on health and illness of individuals and families across the lifespan. Critical thinking through the use of the nursing process and standards of care are used to guide the student. Concepts of health promotion, pharmacology, and nutrition are integrated into specific subject areas. Subject areas include individuals with mental health needs, oxygenation needs, fluid and electrolyte balance, the childbearing and childrearing family.

NURS 2140 Professional Nursing Skills
Focuses on mastery of independent and delegated nursing skills necessary for the beginning nurse generalist. An emphasis is placed on refinement of physical and psychosocial assessment skills through the lifespan. Other threads include communication skills, caring interventions, teaching/learning, documentation, nursing process, nursing math, and the nurse's role in intravenous therapy.

NURS 2180 Clinical Applications
Demonstrate critical thinking skills in planning and delivering care for individuals and families across the lifespan with a variety of health care needs. Provides the student the opportunity to demonstrate newly acquired cognitive and technical skills and to integrate previously learned skills and knowledge.

NURS 2220 Nursing Across the Lifespan II
Focuses on health and illness for individuals and families across the lifespan. The student is expected to use a higher level of critical thinking skills during this course. Subject areas include caring for the client experiencing vascular, hematologic, endocrine, neurologic, gastrointestinal, genitourinary, integumentary, or immune disorders; cancer, pain, critically ill episodes, and emergency situations/preparedness.

NURS 2230 Trends and Issues
Introduces the student to contemporary nursing topics such as current trends, advocacy, impact of legislative decisions on health care, reimbursement, boundaries, models of care, complementary/alternative therapies, nursing informatics and access to care.

NURS 2235 Special Topics in Nursing
Topics will be chosen to meet the needs of students. The class may be retaken for credits if the topic varies.

NURS 2240 Manager of Care
Emphasizes beginning management theory and transition into the graduate nurse role. The learner integrates knowledge and skills necessary for caring for groups of clients, nursing team management, interdisciplinary collaboration, delegation, and supervising and teaching nursing personnel.

NURS 2275 Nursing Preceptorship
Provides an opportunity for skill refinement and increased self-confidence in the role of Associate Degree Nurse through working with a preceptor. The learner applies the nursing process in a realistic work setting. Concepts of accountability and professionalism are integrated from prior learning.

NURS 2280 Clinical Applications
Demonstrates critical thinking skills and synthesis in planning and delivering care for increasingly complex individuals and families across the lifespan. Newly acquired nursing skills and classroom knowledge will be utilized in a variety of venues that includes acute care and community settings.

PHYSICAL EDUCATION (PHED)

PHED 1101 Foundations of Health, Physical Education & Recreation
Provides an introduction to the history, philosophy, objectives, and principles of health, physical education and recreation. Topics included will be career opportunities and preparation; professionalism including attitudes; ethics, and
organizations. This is a course designed for persons who plan to major or
minor in health, physical education or recreation.

PHED 1106  2
Psychology of Winning
Studies the basic principles of psychology related to success and motivation. Emphasizing positive-winning attitudes, success traits, goal-setting and basic psychology principles. This course is designed to help students recognize the strong relationship that exists between attitudes and success in school, work, sports and life.

PHED 1110  3
Prevention and Care of Athletic Injuries I
Covers the modern principles of athletic training for people involved in the health care of athletes. This course is designed to help individuals involved in coaching, physical education, or recreation, as well as persons interested in athletic training or sports medicine.

PHED 1114  2
Physical Agility & Self Defense
Provides experiential learning in techniques for self-defense as well as general fitness learning. Techniques in handcuffing, searching, joint manipulation pressure points and counters. Only students formally accepted into the AS Law Enforcement Program may register.

PHED 1120  1
Beginning Archery
Offers fundamental instruction in target archery. Safety, choice and care of equipment will also be taught.

PHED 1125  1
Aerobics
Teaches a moderately strenuous blend of flexibility, stretch and dance using the large muscle groups. Its aims are improving cardiovascular fitness, promoting a multitude of positive and natural changes in the body, enhancing general health and well being, toning up muscles and having fun.

PHED 1130  1
Physical Fitness for Life
Emphasizes aspects of physical fitness for the student wishing to learn methods and tests of physical fitness. Cardiovascular and respiratory fitness, as well as muscular strength and endurance will be emphasized. The course is self-paced.

PHED 1135  1
Beginning Tennis
Introduces the fundamentals of tennis as a leisure time activity. Emphasis is on acquiring technique, knowledge and fitness.

PHED 1136  1
Racquet Sports
Introduces the fundamentals of different racquet sports and leisure time activities. This course is designed to develop skills, technique, sportsmanship, and knowledge of rules in racquetball, badminton, and other indoor racquet sports.

PHED 1140  2
Body Conditioning
Emphasizes body conditioning through weight training and physical training.

PHED 1145  1
Bowling
Provides students with knowledge and practice in the sport of bowling. Students learn bowling rules, skills, techniques, and appreciation.

PHED 1155  1
Cross-Country Skiing
Introduces the student to the fundamentals of the sport. Flat-track techniques, downhill and hill climbing techniques are covered. Equipment provided.

PHED 1160  1
Beginning Golf
Focuses on helping beginning golfers understand the fundamentals of golf as a recreational activity.

PHED 1165  1
Fitness for Acceleration
Provides a high intensity aerobic program focusing on sport specific movements. It aims to teach proper mechanics to prevent injury in physical activities as well as developing or enhancing ones quickness, plyometrics and coordination. The program also benefits cardiovascular, muscle toning and fitness goals.

PHED 1170  1
Intercollegiate Football
Consists of intercollegiate competition in football at the community college level. Football skills, sportsmanship, competitiveness, and sound athletic principles are taught.

PHED 1171  1
Intercollegiate Volleyball
Provides credit to first year students who report for the volleyball squad and who complete the requirements of the course. This includes participation in Minnesota Community College Athletic Conference competition.

PHED 1172  1
Intercollegiate Men's Basketball
Provides credit for first year participants. The course consists of a twenty-game schedule against other community colleges in Minnesota.

PHED 1173  1
Intercollegiate Women's Basketball
Includes participation in intercollegiate competition in women's basketball at the community college level representing Minnesota West Community & Technical College, Worthington Campus in the Minnesota Community College Athletic Conference.

PHED 1174  1
Intercollegiate Wrestling
Provides credit to first year students who report for the wrestling squad and who complete the requirements of the course. This includes participation in Minnesota Community College Athletic Conference competition.

PHED 1175  1
Intercollegiate Women's Softball
Includes participation in intercollegiate competition in women's softball at the community college level representing Minnesota West Community & Technical College, Worthington Campus in the Minnesota Community College Athletic Conference.

PHED 1176  1
Intercollegiate Baseball
Includes participation in intercollegiate competition in men's baseball at the community college level representing Minnesota West Community & Technical College, Worthington Campus in the Minnesota Community College Athletic Conference.

PHED 1177  1
Intercollegiate Women's Golf
Provides credit to first year students who report for the golf squad and who complete the requirements of the course. Completion includes participation in the Minnesota Community College Athletic Conference.

PHED 1178  1
Intercollegiate Men's Golf
Provides credit to first year students who report for the golf squad and who complete the requirements of the course. Completion includes participation in the Minnesota Community College Athletic Conference.

PHED 2101  2
History of Physical Education and Sports
Reviews the reciprocal relationship between sport and America's dominant social and cultural themes from the colonial period to the present. Explores the foundations on which modern American sports were laid and the social forces which led to the organization and institutionalization of amateur, intercollegiate, and professional sports. Includes an examination of the ways in which ethnic heritage, race, socio-economic class, and gender intersect with the social institution of American sport.

</table>
answers philosophers such as Plato, Mill, Kant, Hume, Locke, and Nietzsche have offered. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

PHIL 1102 (Meets Goal Area: 6)  2
Philosophy of Religion
Covers topics relative to religion and God, including arguments for the existence of God, religious experience, faith and reason, the problem of evil, and immortality. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

PHIL 1200 (Meets Goal Area: 4)  3
Logic
Introduces students to formal and informal logic. Students will learn to identify and outline arguments in classic and contemporary texts, to determine whether an argument is deductive or inductive, and to determine an argument’s validity and soundness. Students will learn to diagram categorical syllogisms and to translate propositional statements. Students will also learn to identify and classify logical fallacies. Prerequisite: ENGL 1101. This course counts as a Mathematical/Logical Reasoning course.

PHIL 2201 (Meets Goal Area: 6, 9)  1
Introduction to Ethical Theory
Introduces students to classical and contemporary ethical theories. The main purpose is to critically examine the various approaches to moral conduct through the reading of primary sources and class discussion. This course is required prior to taking any other ethics course (2202, 2222, 2223). Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

PHIL 2202 (Meets Goal Area: 6, 9)  1
General Applied Ethics
Examine ethical issues in contemporary society critically. The focus will be on the application of ethical theories and principles to specific contemporary issues. Prerequisite: PHIL 2201.

PHIL 2205 (Meets Goal Area: 6, 9)  2
Business Ethics
Introduces students to ethical problems in businesses and corporations through presentations by local business, community and corporate leaders on moral behavior and ethical dilemmas in areas such as: medicine, international trade, profit and non-profit organizations, and education.

PHIL 2222 (Meets Goal Area: 6, 9)  1
Medical Ethics
Introduces students to how the principles of ethics apply in health care practice. Students will examine two main ethical theories, utilitarian and deontological, as they apply to questions of health care practice. Students will study the ethical principles of autonomy, nonmaleficence, beneficence, and justice. The focus will be on the application of these theories and principles to specific cases. The course is designed for students intending to major in a health care field. Prerequisite: PHIL 2201.

PHIL 2223  1
Ethics for Human Services Workers
Introduces students to how the principles of ethics apply in the human services field. Students will examine two main ethical theories, utilitarian and deontological, as they apply to questions of ethical practice in human services. Students will study the ethical principles of autonomy, beneficence, nonmaleficence and justice. The focus will be on the application of these theories and principles to specific issues and cases. The course is designed for students intending to major in human services. Prerequisite: PHIL 2201.

PHIL 2230 (Meets Goal Area: 6, 8)  3
World Religions
Explore various world religions through reading about the religions and reading texts from various faith traditions. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

PHIL 2235  1-3
Special Topics in Philosophy
Explores specific issues and topics in philosophy. The class may be retaken if the topics vary. Prerequisite: STSK0095 or evidence of college level reading ability through assessment test or prior college coursework.

PHYS 1100 (Meets Goal Area: 3)  3
Survey of Physics
Includes a general survey of conceptual physics. Topics include a basic introduction to Newton’s Laws of motion, gravity, physical mechanics, properties of matter, heat, sound, electricity, magnetism, light and nuclear physics. This is mainly a lab activity course for students who have not had high school physics. Prerequisite: High school algebra I or MATH 0098 or higher. 2 lec, 2 lab

PHYS 1201 (Meets Goal Area: 3)  4
Fundamentals of Physics I
Develops a foundation for future studies in fields not requiring the calculus. Laboratory and lecture based instruction using both calculator and computer based instruction. Develops a foundation in physics for liberal arts, pre-medical, or pre-pharmacy students. Topics studied include one and two-dimensional motion, forces and acceleration, applications of Newton’s Laws, momentum, gravitation, collisions, work and energy, rotational motion, and angular momentum, harmonic motion and sound. Prerequisite: MATH 0099 or higher. 3 lec, 2 lab

PHYS 1202 (Meets Goal Area: 3)  4
Fundamentals of Physics II
Covers topics including temperature and heat transfer, laws of thermodynamics and heat engines, electric fields, electricity of direct current circuits, electronics magnetism and radioactivity. Prerequisite: PHYS 1201 or consent of instructor. 3 lec, 2 lab

PHYS 2121 (Meets Goal Area: 3)  5
General Physics I
Teaches the fundamentals of physics to students intending to study engineering or the sciences. Calculus and vectors are used throughout. Uses laboratory centered instruction with both calculator and computer based investigations. Topics include kinematics, Newton’s Laws of motion, forces, collisions, momentum, work and energy, energy conservation, rotational motion, angular momentum, and torque, heat, thermodynamics and heat engines. Prerequisite: MATH 1121. 4 lec, 2 lab

PHYS 2122  5
General Physics II
Uses laboratory centered instruction with both computer and calculator based investigations. This course in the fundamentals of physics is for students intending to study engineering or the sciences. Calculus and vectors are used throughout. Topics include heat, thermodynamics, heat engines, electric fields, Gauss’ Law, electric and gravitational potential, electrical circuits, capacitance, magnetism, electromagnetism, electronics, and radioactivity. Prerequisite: PHYS 2121 and MATH 1121 being taken concurrently or before. 4 lec, 2 lab

PHYS 2235 Special Topics
Explores specific areas of physics to meet specialized student needs or interests. The class may be retaken if the topics vary.

PLUMBING (PLMB)

PLMB 1100  3
Code
Covers the Minnesota Plumbing Code, as it relates to the principals, materials, traps, and fixtures in the Plumbing Trade.

PLMB 1106  3
Plumbing Installation
Teaches the installation and repair of fixtures, faucets, and various valves used in the plumbing trade. Also covered will be the manufacturers installation recommendations, uniform plumbing code, and good housekeeping practices.

PLMB 1110  3
Introduction to Plumbing
This course is specifically introducing students to the tools and equipment of the trade. It focuses on the skills needed to enter the plumbing trade, the necessity of safety in the workplace and methods described in the Minnesota Plumbing Code.
Addresses actual plumbing problems and affords the student the opportunity to repair, alter, replace or service existing plumbing systems.

**PLMB 1115**  
**Plumbing Welding**  
Teaches basic arc and gas welding. The proper safety and usage of the equipment of welding.

**PLMB 1120**  
**Plumbing Piping Water**  
Familiarizes students with the types of water piping, the fittings, and the proper installation procedures. They will develop skills in joining and supporting various piping according to the Minnesota Plumbing Code.

**PLMB 1125**  
**Plumbing Piping Fuels/Air**  
Teaches the various techniques of piping gas and air, the materials necessary, and the safety requirements.

**PLMB 1130**  
**Blueprint Reading and Estimating**  
Provides the student a good background in blueprint reading, drawing techniques, materials usage, specifications and the necessity of good estimating skills.

**PLMB 1135**  
**Sewage Disposal and Survey**  
Provides the student with the methods of calculating sewage disposal systems from the Minnesota Pollution Control and the University of Minnesota Extension methods. The student will run percolation tests and install an individual sewage typical.

**PLMB 1140**  
**Plumbing Pipefitting**  
Teaches the student in the applications, and safety of installing piping for various applications. The student will complete a typical pipefitting project and draw isometrically the proper layout.

**PLMB 1145**  
**Plastic Installation**  
Develops the students' ability to install plastic piping for the plumbing industry. The student will install, draw isometrically, and price materials used in the typical installation.

**PLMB 1150**  
**Water Treatment Methods/ Codes**  
Directs the student toward the problems of water and the recommended methods of treatment. The student will calculate the size of many treatment devices and gain an understanding of proper use, servicing and installing of the equipment.

**PLMB 1155**  
**CAD/Estimating**  
Allows the student to work on various computer-aided drafting programs. The student will gain the skills to compete in the residential estimating/CAD marketplace with the knowledge of plumbing.

**PLMB 1165**  
**Trade House Plumbing**  
Allows the student to actually install a system in a building and be involved in actual construction from the ground up to completion of a plumbing system. The student will estimate the materials, and isometrically draw the waste and water systems.

**PLMB 1170**  
**Sheetmetal Technology**  
Focuses on proper and safe installations. The course will require the student to size, design, build, and install air duct. The course will require the student to troubleshoot problems of air and correct them. The ventilation requirements will be calculated into the system.

**PLMB 1175**  
**Special Problems**  
Addresses actual plumbing problems and affords the student the opportunity to repair, alter, replace or service existing plumbing systems.

**PRACTICAL NURSING (PRNU ALSO SEE NURSING)**

**PRNU 2235**  
**Special Topics in Practical Nursing**  
Topics will be chosen to meet the needs of students. The class may be retaken for credits if the topic varies.

**PRNU 2295**  
**IV Skills for Practical Nurses**  
Designed to enhance the knowledge of established IV nursing standards of practice and to qualify the licensed practical nurse to initiate and administer IV therapy to adults and adolescents. Information and hands-on practice for the safe insertion, care and maintenance of a peripheral IV catheter will be provided. Administration of IV therapy via a peripheral site will also be discussed.

**POLITICAL SCIENCE (PSCI)**

**PSCI 1101**  
(Meets Goal Area: 5, 8)  
**Introduction to Political Science**  
Accredits students with the fundamental concepts, institutions, principles and procedures of the discipline of political science. The course will provide a brief background in classical political theory through some exposure to the ideas of past political philosophers (such as Aristotle, Machiavelli, Hobbes, Locke, Marx and others). The course also introduces the study of comparative systems through consideration of the governments of Great Britain, France, and Canada. PSCI 1101 is viewed as a general introductory course. The course also counts as a Global Perspective course. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

**PSCI 1201**  
(Meets Goal Area: 5, 9)  
**American Government and Politics**  
Presents a general survey of the history, philosophy, functions and performance of American national political institutions and processes. This course also emphasizes ethical and civic responsibility. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

**PSCI 2202**  
(Meets Goal Area: 5, 9)  
**State and Local Government**  
Presents a general survey of the history, philosophy, functions and performance of American state and local political institutions and processes. Minnesota, Nobles County and the City of Worthington will be examined. This course also emphasizes ethical and civic responsibility. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

**PSCI 2210**  
(Meets Goal Area: 5, 10)  
**Environmental Politics**  
Examines the political nature of environmental problems and surveys American political institutions and public policies that deal with these problems. The course will also assess and critique current environmental policies. While the major emphasis will be national environmental concerns, certain local and global environmental problems will also be addressed. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

**PSCI 2235**  
**Special Topics**  
Covers a wide range of issues of current interest. Topics will be chosen to meet the needs of students. The class may be retaken for credit if the topic varies. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

**PSCI 2280**  
**Field Experience - Political Science**  
Offers students paid or unpaid work experiences closely related to their academic and career pursuits. Assists students in gaining skills and realism about job demands and future educational choices. Activities are closely supervised by college instructors and on-the-job supervisors.
PSYCHOLOGY (PSYC)

PSYC 1101 (Meets Goal Area: 5, 7) 4
Introduction to Psychology
Provides an overview of contemporary psychology. Topics include the biological bases of behavior, sensation and perception, motivation, learning, memory, development, personality theory and disorders. Emphasis is given to biological, ability, age, gender, personality, and ethnic diversity. This course is a prerequisite for all other psychology courses. Required course for many degree programs. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework. 5, 7

PSYC 1111 3
Psychology of Adjustment
Uses a largely cognitive-behavioral approach to achieving personal growth and effectively managing common problems of daily living. Issues studied include managing stress, love and relationships, sexuality, loneliness and solitude, death and loss, esteem, and life goals. Prerequisite: PSYC 1101 or consent of instructor.

PSYC 1140 3
Child and Adolescent Psychology
Studies the physical, cognitive and psychosocial development of individuals from conception through adolescence, and effective means of fostering positive development in these areas. Prerequisite: PSYC 1101 or consent of instructor.

PSYC 1141 2
Psychology of Adulthood and Aging
Presents the basic views, principles, research findings, and ideas about adulthood from an interdisciplinary, process-oriented perspective. Adopting this perspective allows an understanding of the developing individual through an analysis of the biological, social, and cultural contexts in which aging occurs. An overview of the research methods used to investigate psychological development over the adult lifespan will be explored. Career paths and opportunities within the field of adult development will be presented. Prerequisite: PSYC 1101 or consent of instructor. May be taken in sequence with PSYC 1140, for greater breadth and depth than PSYC 1150.

PSYC 1150 (Meets Goal Area: 5, 7) 3
Developmental Psychology
Describes the ongoing processes in the biosocial, cognitive, and psychosocial domains of human development throughout the lifespan. Analysis of major developmental events from psychoanalytic, learning, cognitive, and humanistic perspectives will be included. How research contributes to the understanding of development and the application of research findings will be considered. Should not be taken for credit if one has taken Child and Adolescent Psychology 1140. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

PSYC 2210 3
Basic Counseling Skills
Provides students with an overview of various counseling theories including Adler and Individual Psychology; Jung and Jungian Analytical Psychology; Rogers and Person-Centered Counseling; Beck and Cognitive Theory; Behavior Therapy and Cognitive-Behavior Therapy; and Existential and Gestalt Therapy. This course also focuses on learning the basic micro-skills of counseling including attending and active listening; questioning; observation; influencing skills; and specific skills critical to multi-cultural counseling. Students videotape counseling sessions in a lab setting. Prerequisite: PSYC 1101 or consent of instructor.

PSYC 2221 3
Abnormal Psychology
Provides students with historical and current views of the major patterns of behavior disorders. Examines the etiology of disorders, their symptom patterns, assessment and classification, their prevention and treatment, and current issues in the mental health field. Attention is given to how social variables such as race/ethnicity, gender, and socioeconomic status affect determination of abnormality. Prerequisite: PSYC 1101 or consent of instructor.

PSYC 2225 3
Addictive Behaviors
Provides a comprehensive overview of psychological models to understanding addiction. Presents the process of addiction as sequence which includes: initiation, maintenance, dependence, and change. Also addressed is prevention of addiction. Describes the biological, social, emotional, and psychological consequences of addictions for the individual and society. Although concentrating on substance-based behaviors (alcohol and drugs) other addictions such as gambling, eating disorders, and compulsive sexual behavior will be considered. Prerequisite: PSYC 1101 or consent of instructor.

PSYC 2230 3
Behavior Modification
Introduces the principles of behavior modification and the application of these principles to the modification of maladaptive behavior. Students learn specific skills to modify behavior including observing, recording and graphing behavior and measuring change; reinforcement; extinction; punishment; stimulus control; shaping; chaining; prompting; fading; and functional assessment. Prerequisite: PSYC 1101 or consent of instructor. This course can substitute for HSER 1132. HSER 1132 cannot substitute for this course.

PSYC 2235 1-3
Special Topics
Covers a wide range of issues of current interest. Topics will be chosen to meet the needs of students. The class may be retaken for credit if the topic varies.

PSYC 2280 1-4
Field Experiences - Psychology
Offers students paid or unpaid work experiences closely related to their academic and career pursuits. Assists students in gaining skills and realism about job demands and future educational choices. Activities are closely supervised by college instructors and on-the-job supervisors.

RADIOLOGIC TECHNOLOGY (RADT)

RADT 1100 3
Introduction to Radiography & Patient Care
Designed to provide the basic concepts of patient care, including consideration for the physical and psychological needs of the patient and family. Routine and emergency patient care procedures will be described, as well as infection control procedures utilizing standard precautions. Legal and ethical concerns related to radiologic technology professionals and information confidentiality as it relates to medical records and other forms of health information will be presented. The role of the radiographer in patient education will also be identified.

RADT 1110 4
Radiological Procedures I
Provides the student with the knowledge necessary to perform radiographic procedures relative to the thoracic and abdominal organs (including GI studies), upper/lower extremities and pelvis girdle. Emphasis will be on radiographic terms, anatomy, positioning, manipulation of radiographic equipment and accessories and related patient care considerations.

RADT 1120 3
Radiological Procedures II
Provides the student with the knowledge necessary to perform radiographic procedures relative to the urinary system, the bony thorax, skull, vertebral column and arthology. Emphasis will be on radiographic terms, anatomy, positioning, manipulation of radiographic equipment and accessories, and patient care considerations related to radiography of the urinary system, bony thorax, vertebral column, skull and arthology. Basic techniques in venipuncture, contrast media types, intravenous medication and emergency response will also be included. Prerequisites: RADT 1100, RADT 1110 and BIOL 2202.

RADT 1130 3
Radiological Exposures I
Provides the student with the knowledge of factors that govern and influence image quality. The course emphasis is on image quality through the discussion of factors that affect density, contrast, recorded detail and distortion. Complex mathematical problems reflect the effect of change in exposure factors and radiographic devices on image quality. Topics include basic physics concepts, radiographic equipment, properties of x-rays, exposure factors, radiographic devices and the principles of automatic processing. The application of radiographic calculations is addressed during discussion of the course material. Prerequisites: RADT 1100 & MATH 1111.
RADT 1140
Radiological Exposures II
3
Provides the student with the knowledge to process and evaluate radiographic images. Requirements will focus on x-ray film, intensifying screens, radiographic processing, processing systems, digital imaging, digital imaging system components and the ability to identify and recognize diagnostic quality. The principle and operation of automatic exposure control is also presented. Advancement in examination difficulty and complexity will be reflected. Prerequisite: RADT 1130 & PHYS 1201 or PHYS 1100.

RADT 1150
Clinical Radiography I
6
Content and clinical practice experiences shall be designed for sequential development, application, critical analysis, integration, synthesis and evaluation of concepts and theories in the performance of radiologic procedures. Through structural sequential, competency-based assignments in the clinical setting, concepts of team practice, patient centered clinical practice and professional development shall be discussed, examined and evaluated. Clinical practice experiences shall be designed to provide patient care and assessment, competent performance of radiologic imaging and total quality management. Levels of competency and outcomes measurement shall ensure the well-being of the patient before, during and after the radiologic procedure. The emphasis of this clinical rotation will be on radiographic positioning and manipulation of radiographic equipment and accessories, related to radiography of the thoracic and abdominal viscera, upper and lower extremity, shoulder girdle, pelvis, upper GI, lower GI, and biliary system. Prerequisite: RADT 1100.

RADT 1160
Clinical Radiography II
6
Content and clinical practice experiences shall be designed for sequential development, application, critical analysis, integration, synthesis and evaluation of concepts and theories in the performance of radiologic procedures. Through structural sequential, competency-based assignments in clinical setting, concepts of team practice, patient centered clinical practice and professional development shall be discussed, examined and evaluated. Clinical practice experiences shall be designed to provide patient care and assessment, competent performance of radiologic imaging and total quality management. Levels of competency and outcomes measurement shall ensure the well-being of the patient preparatory to, during and following the radiologic procedure. This clinical course emphasizes the basic radiographic procedures and positioning related to the digestive system, urinary system, the bony thorax, and the vertebral column. The student also is to continue to acquire and build skills in performing radiographic procedures and positioning related to the thoracic, abdominal cavities, and the upper and lower extremities including the shoulder girdle and the pelvis. The student is introduced to skull radiography and portable and trauma radiographic procedures and radiographic exposure factors. Prerequisite: RADT 1150.

RADT 2210
Radiological Procedures III
3
Provides the student with the knowledge necessary to perform radiographic procedures relative to traumatic injury, surgical and portable radiography. In addition the student will be introduced to the highly specialized studies of the central nervous system, cardiovascular system and cross-sectional imaging. Special imaging equipment, physical settings and techniques used in these highly specialized studies will also be included. Prerequisite: RADT 1120.

RADT 2220
Radiological Equipment
3
Provides the student with a knowledge of basic radiographic equipment. Topics include units of measurement, general principles, structure of matter, structure of the atom, nature of radiation, electricity, and electromagnetism. This course is designed to establish a knowledge base in radiographic, fluoroscopic, mobile, and tomographic equipment requirements and design including circuitry of the x-ray machine. The content will also provide a basic knowledge of quality control. Computer applications in the radiologic sciences related to image capture, display, storage and distribution are presented as well. Prerequisite: RADT 1140 & PHYS 1201 or PHYS 1100.

RADT 2230
Radiological Pathology
2
Designed to introduce theories of disease causation and the pathophysiological disorders that compromise health systems. Etiology, pathophysiological responses, clinical manifestations, radiographic appearance and management of alterations in body systems will be presented. Prerequisites: RADT 1140 & BIOL 2202.

RADT 2240
Principles of Radiobiology
3
Designed to establish a basic knowledge of atomic structure and terminology, and provide an overview of the principles of radiation protection and interaction with living systems. Also presented are the nature and characteristics of radiation, (i.e. its effects on molecules, cells, tissues, and the body as a whole) x-ray production and the fundamentals of photon interactions with matter. Radiation health and safety requirements of federal and state regulatory agencies, accreditation agencies, healthcare organizations, and the responsibilities of the radiographer for patients, personnel and the public are also incorporated. Factors affecting biological response are presented including acute and chronic effects of radiation. Prerequisites: RADT 1140 & BIOL 2202.

RADT 2250
Clinical Radiography III
6
Content and clinical practice experiences shall be designed for sequential development, application, critical analysis, integration, synthesis and evaluation of concepts and theories in the performance of radiologic procedures. Through structural sequential, competency-based assignments in clinical setting, concepts of team practice, patient centered clinical practice and professional development shall be discussed, examined and evaluated. Clinical practice experiences shall be designed to provide patient care and assessment, competent performance of radiologic imaging and total quality management. Levels of competency and outcomes measurement shall ensure the well-being of the patient preparatory to, during and following the radiologic procedure. This clinical course emphasizes the basic radiographic procedures and positioning related to the skull, facial bones, paranasal sinuses, and detailed areas of the skull. The clinical experience provides for an introduction to surgery, evening clinical hours, and working independently. Prerequisite: RADT 1160.

RADT 2260
Clinical Radiography IV
7
Content and clinical practice experiences shall be designed for sequential development, application, critical analysis, integration, synthesis and evaluation of concepts and theories in the performance of radiologic procedures. Through structural sequential, competency-based assignments in clinical setting, concepts of team practice, patient centered clinical practice and professional development shall be discussed, examined and evaluated. Clinical practice experiences shall be designed to provide patient care and assessment, competent performance of radiologic imaging and total quality management. Levels of competency and outcomes measurement shall ensure the well-being of the patient preparatory to, during and following the radiologic procedure. This clinical course provides the student with the opportunity to function more independently in all areas of basic radiography, and to develop clinical skills in regular radiographic areas and procedures, with continuing experience in trauma and surgical procedures. The student will be exposed to special procedures, and will begin rotations through the specialized areas of nuclear medicine, radiation therapy, computerized topography, ultrasound, and magnetic resonance imaging. Prerequisite: RADT 2250.

RADT 2270
Clinical Radiography V
6
Content and clinical practice experiences shall be designed for sequential development, application, critical analysis, integration, synthesis and evaluation of concepts and theories in the performance of radiologic procedures. Through structural sequential, competency-based assignments in clinical setting, concepts of team practice, patient centered clinical practice and professional development shall be discussed, examined and evaluated. Clinical practice experiences shall be designed to provide patient care and assessment, competent performance of radiologic imaging and total quality management. Levels of competency and outcomes measurement shall ensure the well-being of the patient preparatory to, during and following the radiologic procedure. This clinical course emphasizes the development of independence, discretion, and judgment while performing basic radiographic procedures. It provides the student with the opportunity to function as a nearly registry eligible radiographer. The student is expected to correlate all clinical and didactic experiences while demonstrating a high degree of proficiency and efficiency. Prerequisite: RADT 2260.

RADT 2280
Board Review
2
Designed to prepare the student to write the national board exam administered by the American Registry of Radiologic Technologists (ARRT). A review of all course work presented in the program with an emphasis on the ARRT exam specifications will be presented. Prerequisite: RADT 2260.
BIOFUEL TECHNOLOGY (RNEW)

RNEW 1100 3
Process Dynamics
Introduces concepts which deal with physical forces and their relationship to energy through temperature and pressure and are frequently encountered in an operating plant environment. An explanation and understanding of a plant system is crucial to this course. The scientific principles of flow, temperature, pressure, heat, gases, liquids, solids, fluid systems, process dynamics and heat transfer are covered in detail. The curriculum of this course encompasses basic physics and science.

RNEW 1101 2
Ethanol Process Fundamentals
Covers the history, rational, and overall fundamental process of ethanol production. A Process Flow Diagram (PFD) of a typical ethanol plant will be used to examine the sequence of operation including residence time, pressures, and temperatures seen in various stages of production. This course will explain the rational for feedstock and additives used in ethanol processing as well as product and co-product production and use.

RNEW 1102 2
Biodiesel Process Fundamentals
Provides detailed information regarding the overall fundamental process of biodiesel production. The course will include a review of biodiesel chemistry, process engineering, post reaction processing, fuel specification and properties, feedstock preparation, treatment and recovery of side streams, fuel transportation and storage and general plant operations.

RNEW 1103 1
Biodiesel Fundamentals Lab
Designed to offer students hands-on opportunities to investigate the bench-level synthesis of biodiesel. Students will investigate production at the bench level by varying process parameters and feedstocks. Students will also conduct some initial analysis on the fuels produced in the laboratory. Concurrent enrollment with RNEW 1102.

RNEW 1105 1
Introduction to OSHA
Examines questions such as: What is OSHA? Why is it important in an operating plant environment? What safety practices should you implement in a plant operating environment and how to avoid unsafe situations?

RNEW 1110 1
Low & High Pressure Boiler Systems
Covers fuel combustion principles, steam boiler types and their components. Students will gain an understanding of the equipment it’s operation and maintenance to ensure safe and efficient procedures that are in line with regulations and codes.

RNEW 1115 3
Mechanical Fundamentals for Process Controls
Covers a basic understanding and identification of pumps, valves, heat exchangers, cooling towers, compressors, refrigeration principles and boiler systems. Startup, shutdown, operation and troubleshooting of each of these mechanical systems will be explained.

RNEW 1120 1
Mechanical Fundamentals Lab
Provides hands on exposure to pumps, valves, compressors, and heat exchanges. It will explain the proper procedure on how to start, operate and shutdown pumps. Troubleshooting common operating problems of centrifugal pumps will be discussed. Functions & characteristics of reboilers, cooking towers, and condensers will be covered in detail. This lab course, geared toward on-campus students, will fulfill one of the technical elective credits for the Renewable Energy Technology Program.

RNEW 1125 1
P & ID & PFD Reading
Covers the symbols and diagrams commonly used on Piping and Instrumentation Diagrams (P & ID) and Process Flow Diagrams (PFD). Focus will be on identifying the types of diagrams, identifying instrument symbols and line symbols used on P & ID’s, understanding the types of information typically found on a legend, using a P & ID to locate the components of a system and reading a PFD to trace the flow paths of a system.

RNEW 1130 2
Pollution Control Fundamentals
Examines questions such as: What are the sources of pollution from a processing plant? How to mitigate pollution emissions, and why is it important to reduce emissions. What regulatory agencies oversee permitting and enforcement issues state and countrywide.

RNEW 1140 2
Process Plant Chemistry
Designed to overview the relationship of science, technology and management areas in regard to agricultural processing plant operations. The course has a strong emphasis on the product, operational, and business aspects of agricultural processing plants. Prerequisite: CHEM 1150.

RNEW 1145 1
Renewable Energy Seminar
Consists of a seminar series with invited speakers from the agricultural processing industry. Topics will include such things as the future of agricultural processing, new products on the horizon, the role of genetic engineering in agricultural processing, the economics of a processing plant, and supervisory skills important to those in the Ag Processing industry.

RNEW 1155 2
Process Optimization/Troubleshooting
Designed to pull together all the concepts explored in the previous three semesters and apply them in real-life case studies. Participation in class will be critical. The concept that decisions made by the process operator have immediate impacts on the bottom-line of a company will be an important theme running through this course. Emphasis will be placed on report generating and interpreting using real-life examples. Prerequisite: RNEW 1135.

RNEW 1160 3
Instrumentation & Control
Builds on Mechanical Fundamentals and Process Dynamics. This course will cover the essential elements of a process control system. It will cover common types of electrical and pneumatic signals used for data collection while exploring devices used to measure flow rate, pressure, temperature, level and analytical control. This course will compare fundamental control concepts such as on/off and PID. It will explain how control concepts are used in various control loops of feedback, cascade, ratio and feedforward.

RNEW 1165 4
Company Internship
Designed to give practical experience with a local or regional firm. The company selects intern candidates. Rate of pay will be determined by company. Prerequisite: Successful (2.0 grade point average or better) completion of 12 semester credits of the Renewable Energy Program and consent of internship coordinator.

RNEW 1170 2
Microbial Ecology
Introduces students to structure, classification, and ecology of microorganisms, especially as it relates to an industrial processing plant. Prerequisite: BIOL 1110.

RNEW 1171 1
Microbial Ecology Lab
Designed to run concurrently with RNEW 1170. This course will offer practical experience in microbiological laboratory practices and techniques as well as study the enzymes supporting microbial ecology in ethanol processing facilities. Prerequisite: BIOL 1110.

RNEW 1175 2
Industrial Water Treatment
Covers the basic understanding of primary water treatment systems and chlorination. Students will be able to describe problems that can be caused by impurities in the water and explain how they can be removed physically and chemically. This course will also familiarize students with the basic concepts of treating industrial wastewater so it can be reused or discharged into the environment.

RNEW 1185 1
Ethanol Process Fundamentals Lab
Provides hands on exposure to the rational and overall fundamental process of ethanol production. A Process Flow Diagram (PFD) of a typical dry mill ethanol plant will be used to examine the sequence of operation, including...
residence time, pressures, and temperatures seen in various stages of production. This course will explain the rational for feedstock and additives used in ethanol processing as well as product and co-product production and use. This lab course, geared toward on-campus students, will fulfill one of the technical elective credits for the Renewable Energy Technology Program.

RNEW 1195
Biodiesel Technologies and Regulatory Issues
2
Investigates the underlying research and reaction processes that are used to produce biodiesel. Studying feedstock options coupled with past and present technologies provides foundational knowledge about the industry. The course includes an in-depth review of the ASTM Standard for biodiesel and the regulatory issues that can arise from non-compliance.

RNEW 1300
Introduction to Traditional and Renewable Energy
3
Designed to introduce students to various forms of energy stemming from both renewable and nonrenewable sources. Students will study many sources of energy including solar thermal power, solar photovoltaics, bioenergy, hydroelectricity, tidal power, wind energy, wave energy, geothermal energy and fossil fuels. The First Law of Thermodynamics is studied along with conversion and efficiency of various forms of energy. The economics, potential and environmental impact will be covered for each topic.

RNEW 2105
Process Dynamics Lab
1
Provides hands on exposure to concepts, which deal with physical forces and their relationship to energy through temperature and pressure and are frequently encountered in an operating plant environment. An explanation and understanding of a plant system is crucial to this course. The scientific principles of flow, temperature, pressure, heat, gases, liquids, solids, fluid systems, process dynamics and heat transfer, are covered in detail. The curriculum of this course encompasses basic physics and science. This lab course, geared toward on-campus students, will fulfill one of the technical elective credits for the Renewable Energy Technology Program.

RNEW 2120
Ethanol Separation Technology
2
Covers the basic principles of ethanol distillation, evaporation and dehydration. Included will be an understanding of the operating components in a distillation system; demonstrable familiarity with startup, cleaning, operating, and shutdown procedures; and the ability to interpret both normal and abnormal operating conditions. The evaporative process and its role in processing plants will also be covered as well as the theory of molecular sieve dehydration and how it is used in the ethanol process. Prerequisite: RNEW 1101.

RNEW 2121
Distillation and Evaporation Lab
2
Designed to investigate bench-level distillation terminology and practices in the laboratory. Students will become familiar with typical distillation assemblies and equipment in both the batch and continuous processing systems. Mathematical skills will be used to calculate the mass balance of system inputs and product recovery.

RNEW 2165
Instrumentation and Control Lab
1
Provides hands on exposure to the essential elements of a process control system. It will cover common types of electrical and pneumatic signals used for data collection while exploring devices used to measure flow rate, pressure, temperature, level and analytical control. This course will compare fundamental control concepts such as on/off and PID. It will explain how control concepts are used in the various control loops of feedback, cascade, ratio, and feedforward. This lab course, geared toward on-campus students, will fulfill one of the technical elective credits for the Renewable Energy Technology Program.

RNEW 2235
Special Topics in Renewable Energy Technology
1
Covers a wide range of current subjects in the field of renewable energy. Topics will be chosen to meet the needs of students. The class may be retaken.

Robotics (ROBT)

ROBT 1030
Electric Control Sensors
2
This course covers the theory and operation of all automation sensors.

ROBT 1050
Basic Troubleshooting
2
This course covers basic and advanced troubleshooting techniques. Students will discover new and unique methods to correct problems with all types of automated systems.

ROBT 1060
Robot Overview
2
The function, operation, and application of common types of robots used in automation systems.

ROBT 1105
Electrical Circuits Fundamentals
3
Electrical circuits is a foundation course for all students enrolled in the Robotics program. It provides students with an understanding and application of basic electricity and resistive circuits. AC and DC voltage sources, electrical laws, and theorems involving resistive type circuits will be covered in lecture and applied in the associated laboratory course.

ROBT 1106
Electrical Theory I
2
Electrical Theory I is a foundation course for all students enrolled in the Robotics program. It provides students with an understanding and application of basic electricity and resistive circuits. AC and DC voltage sources, electrical law, and theorems involving resistive type circuits will be covered in lecture and applied in the associated laboratory course. (Concurrent with ROBT1111)

ROBT 1107
Electrical Theory I/Lab
3
Electrical Circuits Fundamentals Lab
Provides students with an understanding and application of basic electricity and resistive circuits. DC voltage sources, electrical law, and theorems involving resistive type circuits will be covered in lecture and applied in the laboratory. It provides students with hands-on training. Resistors with capacitors, inductors, transformers, AC/DC source, and bench test equipment will be connected to allow students to test and troubleshoot various series and parallel circuits. Electrical Theory I is a foundation course for all students enrolled in the Robotics program.

ROBT 1111
Electrical Circuits Fundamentals Lab
2
This course covers the theory and operation of all automation sensors. This course will cover power supplies, transformers, three phase power and three phase motors. It will also include the design of 3 phase motor starter circuits.

ROBT 1121
Advanced AC Concepts
2
Covers power supplies, transformers, 3 phase power and 3 phase motors. It will also include the design of 3 phase motor starter circuits.

ROBT 1122
Electrical Theory II
2
Covers power supplies, transformers, 3 phase power and 3 phase motors. It will also include the design of 3 phase motor starter circuits.

ROBT 1126
Advanced AC Concepts Lab
2
An opportunity to practice those skills learned in ROBT1120. A hands-on approach to design and wiring of power supply, three phase power, and motor control circuits.

ROBT 1135
Electromechanical Systems
2
Develops skills in designing, wiring, troubleshooting, and operation of electrical control circuits.

Courses listed include topics such as the study of sociology theory, research, culture, socialization, groups, social stratification, social class, gender, race, and family. Spanish courses cover proficiency in listening, speaking, reading and writing in Spanish, mastering of more complex grammatical concepts including subjunctive mood, and integrating the culture of the Spanish-speaking world. Speech courses focus on oral presentation techniques, audience analysis, research, organization, clearness of statement, and logical thinking. Study skills courses provide individualized assistance to students who need to improve their basic math skills.
STSK 0092 Basic Skills Development 2
Assists students in developing college-level study skills: time management, note taking, scheduling, and homework. Helps students understand how to manage college workload, analyze assignments, and clarify instructor expectations. Offers a review of college-level reading, writing and math abilities and skills. Helps students understand resources available and what is required of a responsible, self-motivated learner.

STSK 0095 Reading Improvement II 2
Provides improvement of reading skills for students underprepared for college level reading. The focus is on basic comprehension with additional instruction in vocabulary and word recognition. Prerequisite: STSK 0090 or placement by assessment test score.

STSK 0096 Increasing College Vocabulary 2
Designed for students who need to increase vocabulary and spelling skills for job success, continuation in college, are culturally diverse students, and others who want to make better use of Standard English.

STSK 1104 Efficient Reading 2
Offers students the opportunity to improve academic performance by developing higher levels of comprehension. Emphasis is on gaining knowledge from college textbooks. Prerequisite: STSK 0095 or evidence of college level reading ability through assessment test or prior college coursework.

STSK 1110 Freshman Seminar 1
Enhances the student’s adjustment and success with the college experience. The Freshman Seminar course provides first-year students with a general orientation and introduction to resources and skills helpful in the transition to college life and to assist in long term academic and personal success. It is designed to facilitate a successful college experience. Students will develop college-level study skills and will learn about college resources to assist them in their personal and academic adjustment to college life. Strategies for a successful college experience, including: time management, studying smart, taking notes from lecture and textbooks, writing, test taking techniques, stress management, learning teaching styles, preparing speeches, introduction to online learning, navigating D2L and ITV/distance learning will be covered.

SURGICAL TECHNOLOGY (SURG)  

SURG 1100 Biomedical Science 1
Enables students to gain an understanding of the principles of electricity, physics, LASERs, endoscopy and a variety of other machines used in surgery.

SURG 1110 Surgical Microbiology 2
Enables students to recognize how they can prevent the spread of disease and promote wound healing. Students will study the structure and function of microorganisms, pathogenic microorganisms and their diseases along with the methods of transmission. The concept of standard precautions will be explored. Various methods of sterilization and disinfection will be discussed. Students will study the wound healing process and classifications in conjunction with the body’s defenses against disease.

SURG 1120 Surgical Pharmacology 2
Enables students to assist in the preparation of drugs used in the operating room. Students will study the uses, routes of administration, equipment needed and possible side effects of these drugs. The metric and apothecary systems of measure will be studied. Students will convert standard time to military time, do temperature conversions, and study how to prepare a solution. Emphasis will be placed on the legal and safety aspects of drug administration.

SURG 1130 Operating Room Theory 3
Enables students to function as an essential part of the medical team providing surgical care to patients in an operating room setting. Students will study the total operating room environment, which includes preoperative, intraoperative and postoperative care. Emphasis will be placed on the principles of aseptic technique.

SURG 1140 Operating Room Practices 4
Facilitates students in the development of fundamental operating room skills, to identify instruments and to prepare necessary supplies for surgical case management. Included will be a basic knowledge of electricity, physics and robotics. Emphasis will be placed on demonstrating the principles of aseptic techniques as they apply skills inherent in the role of surgical technologist. The students will observe, practice and demonstrate these skills in a lab setting. This course must be taken immediately preceding O.R. Clinical Lab I. Prerequisites: SURG 1110, SURG 1120, SURG 1130.

SURG 1150 Operating Room Procedures 7
Enables students to understand various types of surgical procedures. Students will accomplish this by studying surgical anatomy, abnormalities and the preoperative, intraoperative and postoperative processes as they relate to each type of surgery. Students will relate the knowledge learned in previous theory courses to specific surgical procedures. The types of cases to be studied will include laparotomies, laparoscopy and surgeries performed on the reproductive, urinary, digestive, skeletal, muscular, endocrine, sensory, respiratory, nervous system organs, Oral/Maxillofacial and Plastic/Reconstructive. Prerequisites: SURG 1110, SURG 1120, SURG 1130.

SURG 1160 Clinical I 2
Provides supervised occupational experience in the clinical setting. It applies knowledge acquired in the classroom and laboratory to the development and performance of competencies associated with operating room policy and procedure. Prerequisites: SURG 1110, SURG 1120 and SURG 1130.

SURG 1170 Clinical II 6
Provides supervised occupational experience in the clinical setting. It applies knowledge acquired in the classroom and laboratory to the development and performance of competencies associated with operating room policy and procedure. Prerequisite: SURG 1160.

SURG 1180 Clinical III 5
Provides supervised occupational experience in the clinical setting. It applies knowledge acquired in the classroom and laboratory to the development and performance of competencies associated with operating room policy and procedure. Prerequisites: SURG 1160 & SURG 1170.

SURG 1190 Clinical IV 4
Provides supervised occupational experience in the clinical setting. It applies knowledge acquired in the classroom and laboratory to the development and performance of competencies associated with operating room policy and procedure. Prerequisites: SURG 1160 & SURG 1170.

THEATER (THTR)  

THTR 1101 (Meets Goal Area: 6) 3
Introduction to Theater
Introduces theater as an art form, discusses text analysis and examines elements of dramatic construction. This course reviews major movements in theater from Greek to modern theater. It is intended to give students a background in theater history, exposure to text analysis, examination of performance tactics and experience in bringing a text to the stage. Prerequisite: STSK 0090 or evidence of college level reading ability through assessment test or prior college coursework.

THTR 1102 (Meets Goal Area: 6) 3
Acting Basics
Emphasizes voice, body and concentration along with attention to character analysis and development.

THTR 1104 (Meets Goal Area: 6) 3
Survey of Musical Theatre
Exposes students to the path of the form from its birth to the Broadway shows of today. These works will include operas, operettas, vaudeville, reviews and Broadway Musicals. Significant time will be spent studying major works
and songs from the American Musical. Prerequisite: STSK 0090 or evidence of college level reading ability through assessment test or prior college coursework.

**THTR 1105 (Meets Goal Area: 6)**
**Theater Production**
Provides students with the opportunity for participation in major productions as actors or members of technical crews. Instructor will determine the number of credits to be assigned based on the student's role.

**THTR 1106 (Meets Goal Area: 6)**
**Theater Production**
Provides students with the opportunity for participation in major productions as actors or members of technical crews. Instructor will determine the number of credits to be assigned based on the student's role.

**THTR 2105 (Meets Goal Area: 6)**
**Theater Production**
Provides students with the opportunity for participation in major productions as actors or members of technical crews. Instructor will determine the number of credits to be assigned based on the student's role.

**THTR 2106 (Meets Goal Area: 6)**
**Theater Production**
Provides students with the opportunity for participation in major productions as actors or members of technical crews. Instructor will determine the number of credits to be assigned based on the student's role.

**THTR 2122 (Meets Goal Area: 6)**
**Introduction to Film**
Reviews the technical, historical, and dramatic elements of film making. The course is intended to give students a more sophisticated perspective of this unique art form. Prerequisite: ENGL 1102, 1105, 2201, 2243, 2276 or consent of instructor.

**THTR 2235 (Meets Goal Area: 6)**
**Special Topics**
Covers a wide range of issues of current interest. Topics will be chosen to meet the needs of students. The class may be retaken for credit if the topic varies.

### AUTO BODY (TRAB)

<table>
<thead>
<tr>
<th>Course Code</th>

</thead>
<tbody>
<tr>
<td>TRAB 1101</td>
<td>Autobody Repair Overview</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Teaches the basic techniques for oxy-acetylene welding, wire feed welding, sheet metal repair, working with plastic fillers, as well as a vehicle's body construction, part alignment, and component operation.</td>
<td></td>
</tr>
<tr>
<td>TRAB 1102</td>
<td>Autobody Refinishing Overview</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Teaches the basic techniques of sanding and general preparation for complete refinishing of a vehicle. Included will be feather edging, masking, priming, and paint-gun handling techniques.</td>
<td></td>
</tr>
<tr>
<td>TRAB 1200</td>
<td>Auto Body Welding</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Covers safety, setup of oxyacetylene and mig welding equipment. It covers different welds, positions and materials. Also covered are plastic welders, materials and techniques. Plasma arc cutting and oxyacetylene cutting methods are also covered.</td>
<td></td>
</tr>
<tr>
<td>TRAB 1200</td>
<td>Basic Automotive Welding</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Covers the safety and setup of oxyacetylene and MIG welding in flat, vertical, and overhead positions. Oxyacetylene and plasma cutting methods are also covered. Students will be working with aluminum and galvanized metals. Students will also do TIG welding.</td>
<td></td>
</tr>
<tr>
<td>TRAB 1206</td>
<td>Plastic Filler &amp; Adhesives</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Covers the safe use of body fillers, repairs, sectioning, or replacement of fiberglass parts. It teaches students how to identify and correctly repair interior and exterior automotive pieces. Students will be taught how to use the new adhesives for attaching panels.</td>
<td></td>
</tr>
<tr>
<td>TRAB 1210</td>
<td>Collision Repair Metal Technology</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Covers sheet metal repair corrosion protection and rust repair. Tools used in collision repair will also be covered. Vehicle nomenclature will also be covered.</td>
<td></td>
</tr>
<tr>
<td>TRAB 1215</td>
<td>General Body Lab</td>
<td>5</td>
</tr>
<tr>
<td></td>
<td>Provides work in a lab setting performing goals and objectives learned in prior courses.</td>
<td></td>
</tr>
<tr>
<td>TRAB 1220</td>
<td>Introduction to Refinishing</td>
<td>6</td>
</tr>
<tr>
<td></td>
<td>Covers undercoats and topcoats used today. It covers preparation procedures for refinishing; covers 2 tone paint jobs, pinstriping, and some custom finishes. Intro to color is also covered.</td>
<td></td>
</tr>
<tr>
<td>TRAB 1225</td>
<td>Assorted Collision Technology</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Covers glass--both stationary and movable. Covers the removal and replacement of different types of glass. Covers auto reconditioning, paint guns and air supply systems.</td>
<td></td>
</tr>
<tr>
<td>TRAB 1232</td>
<td>Auto Body Specialty Lab II</td>
<td>5</td>
</tr>
<tr>
<td></td>
<td>Covers goals and objectives learned in prior courses, but in a lab setting.</td>
<td></td>
</tr>
<tr>
<td>TRAB 1235</td>
<td>General Night Lab</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>Work on various projects in a lab situation. They will utilize knowledge gained in previous courses.</td>
<td></td>
</tr>
<tr>
<td>TRAB 1240</td>
<td>Intro to Auto Body</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Covers basic shop safety, hand tools, power tools, and hazardous materials. Shop layout as well as careers in auto body will also be covered.</td>
<td></td>
</tr>
<tr>
<td>TRAB 1240</td>
<td>Intro to Auto Body Restoration</td>
<td>1</td>
</tr>
<tr>
<td></td>
<td>Covers basic shop safety, hand tools, power tools and environmental rules and regulations.</td>
<td></td>
</tr>
<tr>
<td>TRAB 1250</td>
<td>Overall Color Application</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Covers the mixing and application of paint. The course will also cover the problems that pertain to painting and how to fix them.</td>
<td></td>
</tr>
<tr>
<td>TRAB 1255</td>
<td>Assorted Auto Technology</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Covers the correct procedures for the removal and replacement of all stationary and movable glass. Also included will be vehicle reconditioning and cleanup, paint guns and air supply systems, and new car cleanup. Prerequisites: TRAB 1200, TRAB 1206, TRAB 1260 &amp; TRAB 2210.</td>
<td></td>
</tr>
<tr>
<td>TRAB 1260</td>
<td>Vehicle Construction</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Provides instruction on vehicle nomenclature and how to remove and reinstall old parts or new ones. Students will learn about the different fasteners that are used in automobiles. How and where to find after market parts and alignment of parts will also be covered.</td>
<td></td>
</tr>
<tr>
<td>TRAB 1265</td>
<td>Introduction to Color</td>
<td>3</td>
</tr>
<tr>
<td></td>
<td>Covers colors and how they are made as well as paint guns and their uses along with air supply. Students will learn about different substrates and how they are prepared for undercoat application. Different undercoats and their used will also be covered.</td>
<td></td>
</tr>
<tr>
<td>TRAB 2001</td>
<td>General Night Lab</td>
<td>2</td>
</tr>
<tr>
<td></td>
<td>Work on various projects in a lab situation. They will utilize knowledge gained in previous courses.</td>
<td></td>
</tr>
</tbody>
</table>

Page 106
TRAB 2100  
**Color Matching & Blending/Spot Repairs**  
Teaches students the identification, color mismatch correction, and blending of single-stage, basecoat-clearcoats, and tri-coats found on today's vehicles.  

TRAB 2105  
**Repair/Replacement of Unibody and Frame Components**  
Teaches the safe and proper alignment, repair, or replacement procedures for unibody and conventional frame parts, components, body shells, and sections.  

TRAB 2111  
**Auto Body Mechanical Repairs**  
Teaches procedures for the replacement of damaged mechanical components as well as four wheel suspension alignment and how it relates to the total repair of a damaged vehicle.  

TRAB 2112  
**Auto Body Electrical**  
Covers rust repair techniques and corrosion material product safety, tools, equipment, and application. The characteristics of sheet metal repair for minor damage will be covered so that the students will be able to apply their skills to repair an actual damaged vehicle.  

TRAB 2115  
**Estimating Repairs**  
Teaches the analysis, identification, and calculation of vehicle damage in hand written form utilizing collision estimating manuals. There will also be an introduction to computer generated estimates.  

TRAB 2120  
**Body Shop Management**  
Covers the theory and techniques involved in joining, both light and heavy guage steel, aluminum, and stainless steel.  

TRAB 2130  
**Custom Paint Layout & Application**  
Covers sheet metal parts fabrication in steel and aluminum using bucks and forms to produce parts that may be used in the customizing of a vehicle.  

TRAB 2150  
**Specialty Lab II**  
Work on various projects in a lab situation. They will utilize knowledge gained in previous courses.  

TRAB 2155  
**Specialty Lab III**  
Work on various projects in a lab situation. They will utilize knowledge gained in previous courses.  

TRAB 2160  
**Auto Body Specialty Lab IV**  
Work on various projects in a lab situation. They will utilize knowledge gained in previous courses.  

TRAB 2165  
**Introduction to Special Interest Vehicles**  
Introduces the construction of specialty vehicles.  

TRAB 2170  
**Specialty Lab VI**  
Work on various projects in a lab situation. They will utilize knowledge gained in previous courses.  

TRAB 2210  
**Auto Body Metal Fabrication**  
Covers the different welding techniques involved in joining, both light and heavy guage steel, aluminum, and stainless steel.  

TRAB 2215  
**Modified Vehicle Construction I**  
Covers the modifications that can be performed on a vehicle's body, frame, suspension, and drivetrain beyond OEM specifications and appearance.  

TRAB 2220  
**Specialty Vehicle Welding**  
Covers the modifications that can be performed on a vehicle's body, frame, suspension, and drivetrain beyond OEM specifications and appearance.  

TRAB 2225  
**Specialty Visual Enhancements**  
Covers repairs that may need to be performed on various vehicles. Non-required technical, elective lab.  

TRAB 2230  
**Modified Vehicle Construction II**  
Continues Modified Vehicle Construction and will also cover the utilization and installation of various aftermarket add-on body accessories.  

TRAB 2235  
**Basic Auto Upholstery & Trim**  
Covers basic automotive upholstery and trim design, construction, and installation. Students will also learn the operation and maintenance of upholstery sewing machines.  

TRAB 2236  
**Industry Collaboration**  
Consists of the actual observation and interaction with various industries, personnel and facilities that provide the student with an understanding of how diverse their industry really is.  

TRAB 2237  
**Industry Interaction**  
Consists of the actual observation and interaction with various industries, personnel and facilities that provide the student with an understanding of how diverse their industry really is.  

TRAB 2240  
**Auto Body Nite Lab**  
Covers repairs that may need to be performed on various vehicles.  

TRAB 2260  
**Specialty Body Modifications**  
Expands on the various body modifications that can be performed to a vehicle's body shell.  

**TRUCK DRIVER (TRDR)**  

TRDR 1100  
**Basic Vehicle Operation and Control Systems**  
Introduces students to the world of transportation. Students will become knowledgeable of vehicle control systems and proficient in the basic operations of trip inspections, coupling and uncoupling trailers, starting, stopping, tuming, backing, and docking techniques. Students will learn to exercise basic control of the vehicles.  

TRDR 1110  
**Safe Operation Fundamentals**  
Concentrates on performing visual checks to the rear and side while driving. Students will learn the effect vehicle weight, center of gravity, potential loss of stability, available sight distance, and surface road conditions have on maximum operating speed. Students will learn to handle and document cargo.
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Credit Hours</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>TRDR 1126</td>
<td>1</td>
<td>Managing Personal Resources</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Teaches strategies for dealing with fatigue and stress. They will learn the benefits of good diet, exercise, and sleep. They will also be taught about the pay process and the importance of a personal budget. Students will also learn to adhere to the requirements of the Federal Motor Carrier Safety regulations Part 395 &quot;Hours of Service Regulations&quot; and complete a Driver's Log and log recap.</td>
</tr>
<tr>
<td>TRDR 1130</td>
<td>1</td>
<td>Vehicle Maintenance</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Teaches the importance of periodic inspections and repair. Students will learn the inspection, repair, and maintenance regulations of the Federal Motor Carrier Safety Regulations.</td>
</tr>
<tr>
<td>TRDR 2297</td>
<td>8</td>
<td>Advanced Operating Procedures Internship</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Experience more &quot;real world&quot; driving scenarios. Extended road trips give students experience in over-the-road driving. Corequisites: TRDR 1100, TRDR 1110, TRDR 1126, TRDR 1130.</td>
</tr>
<tr>
<td>TRPS 1100</td>
<td>4</td>
<td>Engine Technology</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Introduces the student to the design, construction, and operating principles of two and four cycle engines, including servicing, tune-up, troubleshoot and repair.</td>
</tr>
<tr>
<td>TRPS 1105</td>
<td>3</td>
<td>Fuel Systems I</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Teaches operating principles of carburetor systems, including troubleshooting, service and repair.</td>
</tr>
<tr>
<td>TRPS 1110</td>
<td>3</td>
<td>Fuel Systems II</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Covers operating principles of fuel injection systems including troubleshooting, service and repair.</td>
</tr>
<tr>
<td>TRPS 1112</td>
<td>3</td>
<td>Electrical Systems</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Provides instruction on vehicle electrical systems, including starting and charging, troubleshooting, service and repair.</td>
</tr>
<tr>
<td>TRPS 1115</td>
<td>3</td>
<td>Power Train</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Teaches operating principles of vehicle power trains including troubleshooting, service and repair.</td>
</tr>
<tr>
<td>TRPS 1120</td>
<td>2</td>
<td>Shop Operations</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Study and use service manuals, technical information, tools and measuring devices, vehicle setup and pre-delivery, shop safety.</td>
</tr>
<tr>
<td>TRPS 1125</td>
<td>3</td>
<td>Onboard Computers</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Covers the operating principles of onboard computer systems, sensors and controls, including diagnosing, service and repair.</td>
</tr>
<tr>
<td>TRPS 1130</td>
<td>3</td>
<td>Ignition Systems</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Teaches the design and operating principles of ignition systems, including diagnosing, service and repair.</td>
</tr>
<tr>
<td>TRPS 1135</td>
<td>2</td>
<td>Brakes</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Covers the operating principles of brake systems, including diagnosing, service and repair.</td>
</tr>
<tr>
<td>TRPS 1140</td>
<td>1</td>
<td>Business Operations</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Study daily business operations including relationships with the customer, the manager and fellow employees.</td>
</tr>
<tr>
<td>TRPS 1145</td>
<td>3</td>
<td>Steering and Suspension</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Teaches the principles of steering and suspension including troubleshooting, service and repair.</td>
</tr>
<tr>
<td>TRPS 1150</td>
<td>3</td>
<td>Special Topics</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Explores specific areas of power sports to meet specialize student needs or interests. This class may be retaken if the topics vary.</td>
</tr>

</table>
ADMISSIONS INFORMATION

Minnesota West Community & Technical College maintains an open door policy for admissions to the College. If you have graduated from high school or have obtained a General Education Development (GED) Certificate which would qualify for the high school equivalency certificate, you are eligible for admission. If you do not have a high school diploma or General Education Development Certificate, you may be admitted at the discretion of the College. Admission to Minnesota West does not guarantee admission to college-level courses nor to specific programs. New students are required to take an assessment evaluation in Reading, Writing, and Math.

When applying for admission, an application, application fee, and official transcripts are required. Official high school, GED, and college transcripts must be submitted to the campus Admissions Office. Departments may have additional requirements for admission to their programs. Admissions will also assist with the application for admissions, information for prospective students, and tours of the campus.

The campus Registration Office provides services pertaining to reciprocity forms, international students, high school enrollments, applications for programs, and transcripts received from previous institutions. Students may apply to programs which lead to:

- Certificate
- Diploma
- Associate in Arts degree
- Associate in Science degree
- Associate in Applied Science degree

Students may be classified as non-diploma or non-degree seeking applicants.

- Part-time students
- Concurrent high school students
- English as a Second Language student (ESL)

If students have attended another college, an official sealed copy of a transcript must be sent directly to the campus Registration Office. Students should submit an unofficial copy of their transcript to use in meetings with counselors, advisors, or instructors.

Application Fee

All applicants are required to pay a $20.00 application fee. The application fee is non-refundable except when the College denies enrollment due to college determined program requirements or course size limitations, or when there is a program closure.

The application fee does not pertain to PSEO students or High School Contract for Training programs. Non-degree seeking students are not required to pay the application fee until they register for the ninth credit. The application fee is waived for overseas, active duty military service personnel.

To Apply to the College

To apply, you must complete the Minnesota State Colleges and Universities Universal Application form. This form can be obtained by contacting the Minnesota West Information Center at 800-658-2330, any Minnesota West campus, your local high school counselor, or you may apply online at www.mnwest.edu.

Admission of Transfer Students

Transfer students must submit the application form, application fee and official transcripts from all institutions previously attended directly to the campus admissions office. Transcripts do not need to be requested from any college that is part of the Minnesota State Colleges and Universities (MnSCU) system. Those transcripts can be retrieved electronically by our admissions office. Students are also required to provide a high school transcript or GED test scores.

Admission of International Students

If you are an international student (non-immigrant, non-refugee, a resident of another country holding a valid student visa), you must apply to Minnesota West using these instructions for the International Admissions application.

The following items are required for you to be considered for admission and must be submitted to the college three months before you plan to arrive:

1. Fill out the International Student Application for Admission (http://www.mnwest.edu/images/admissions/international_applic.pdf)
2. Fill out the Certification of Financial Responsibility (http://www.mnwest.edu/images/admissions/certif_finan_responsibility.pdf). You must come fully prepared to meet all financial obligations for the entire course of study as a student including tuition, fees, books, medical insurance and all other personal expenses in the United States. The CFR must be completed with supporting documentation attached. It is estimated that you will need $12,000 per year for tuition and living expenses. Minnesota West does not provide financial aid for International students.
3. A $20 (U.S. dollars) non-refundable application fee.

If your native language is not English, you must present proof of English proficiency in the form of test scores on the Test of English as a Foreign Language (TOEFL). A minimum score of 500 on the paper based test, 173 on the computer-based test.
or 61 on the Internet based test is required for acceptance. The TOEFL may be secured from the American Consulate in your country or it may be taken by applying directly to:

Educational Testing Service
Rosedale Road
Princeton, NJ 08541 USA
609-921-9000
http://www.ets.org/toefl

5. Academic Records.
Official transcripts of your entire academic record in secondary school and college, including grades received each year of study, degree certificates, and examination certificates. Photocopies are not acceptable. Transcripts must be translated in English, and a certified copy of the translation must be attached.

All international students are required to purchase the Minnesota State Colleges and Universities international student accident and illness insurance plan, unless they can provide written verification that their government or sponsoring agency accepts full responsibility for any medical claims that might occur.

7. Before you are admitted, you must submit the required immunization form (http://www.mnwest.edu/images/student-forms/immunization_form.pdf). All students born after 1956 are required by Minnesota Law to provide proof that they have been vaccinated against diphtheria, tetanus, measles, mumps, and rubella.

Submit all application materials and correspondence to:
Minnesota West Community & Technical College
International Student Office
1450 Collegeway
Worthington, MN 56187

Admissions for New Immigrants
Potential students who are new immigrants must be able to demonstrate English language proficiency before enrolling in programs or courses at Minnesota West. All students must take the placement tests including new immigrants. Results of those tests will determine placement in either the regular English sequence or the developmental English courses. The Accuplacer assessment or a similar assessment will be used for appropriate course placement.

Senior Citizens
A Minnesota resident who is 62 years of age or older is entitled to enroll in a non-credit open enrollment course at Minnesota West on a space available basis (typically the second day of the class) at no charge. A Minnesota resident who is 62 years of age or older is entitled to enroll in a credit bearing course for an administrative fee of $20.00 per credit plus fees as allowed by MS135A.52. A Minnesota resident who is 62 years of age or older is entitled to audit a credit bearing open enrollment course at Minnesota West on a space available basis at no charge. However, senior citizens auditing a class will be required to pay fees as allowed by MS135A.52.

A Minnesota resident who is 62 years of age or older enrolled in a closed enrollment contract training or professional continuing education course must pay the regular tuition charge for the course.

Readmission to the College
Students who have left the College for one or more semesters may re-enter Minnesota West as returning students. Students who have been out of Minnesota West Community & Technical College for five (5) or more years must resubmit an application and any transcripts since enrolled at Minnesota West.

Fresh Start Readmission
Any former Minnesota West student who has not attended the College during the previous five years and who had less than a “C” cumulative grade point average of 2.0, or less than 67% completion rate may invoke the “Fresh Start” standards by petitioning the Campus Dean. This petition must be completed during the student’s first semester of return. Any grade below a “C” will be bracketed [ ]. These grades and credits will not apply to academic GPA,credits attempted and credits earned, but will be used for calculating Satisfactory Academic Progress, financial aid GPA, and completion percentage for financial aid purposes. The student’s record will reflect all original courses attempted by the student. The student who re-enters the College under this plan must complete at least 15 additional credits with the letter grades of A, B, C, or D. To be eligible for graduation the student must meet all the requirements of his/her program/major and have at least a 2.0 G.P.A. or above completion rate.

Special Student Status
Special students are all students not working on a degree program and not accepted into the College. Special students are frequently part-time students. A student may earn no more than eight credits without making application to the College.

- Special student registration should be completed prior to the first day of scheduled classes each term.
- Special students are encouraged to register with a counselor/advisor to assist them with their program.
- All credits earned in the special student classification will be maintained as a permanent record of the College and will be considered for
application toward a diploma or degree program upon admission to the College.

- New students enrolling for eight or more credits and special students who have accumulated eight or more credits are required to pay the $20 application fee.

Visiting Student Status
Visiting students are all students who are not seeking a degree at Minnesota West, but are currently admitted as degree-seeking students at another college that is part of the Minnesota State Colleges and Universities (MnSCU) system. Visiting students will not be required to apply for admission, but must comply with all course restrictions, such as a course prerequisite, placement test score, or major.

Post-Secondary Enrollment Options (PSEO)
In accordance with Minnesota Statutes section 124D.09 and Minnesota West Policy 3.5, this procedure governs the implementation of the Post-Secondary enrollment Options (PSEO) Program by system colleges and universities.

Admissions Standards
PSEO enrollment shall be available to juniors and seniors enrolled through any Minnesota secondary school, home school, or alternative-learning center, who present evidence of the ability to perform college work. Such evidence includes the following:

1. for juniors, class rank in the upper one-third of their class or a score at or above the 70th percentile on a nationally standardized, norm-referenced test;
2. for seniors, class rank in the upper one-half of their class or a score at or above the 50th percentile on a nationally standardized, norm-referenced test; or
3. for juniors or seniors, documentation other than that specified in Part 2. Subpart A.1. and Subpart A.2. of this procedure of the student’s readiness and ability to perform college-level work as determined by the College or university.

A college or university may set higher standards than those specified in Part 2, Subpart A.1. and Subpart A.2. for all students as needed to ensure student success.

See PSEO Admissions at Minnesota West for more information about the transfer process.

Immunization Policy
Reference: Minnesota Law (MS135A.14) Minnesota Law (MS135A.14) requires that all students born after 1956 or who graduated from a Minnesota High School prior to 1997 and enrolled in a public or private post secondary school in Minnesota must be immunized against diphtheria, tetanus, measles, mumps, and rubella. The student will provide proof of immunization by completing the Immunization Record for Students Attending Post Secondary Schools form prior to registering for classes. This form can be obtained from the Student Service Office.

Exceptions:
This form need not be completed by students who are enrolled for only one class during the full academic semester or for extension, correspondence or Internet courses only. Students may also be exempt for medical or conscience reasons.

Transfer students from a different Minnesota college are exempt if transcripts or other information from the previous school indicate that the student has met immunization requirements.

Assessment/Placement
Minnesota West is committed to institutional improvements and assisting all students in realizing their potential. For this reason, student assessment is part of the College’s educational program. Students participate in a series of assessment tests and surveys designed to assist college personnel in accurate advisement and course placement and to gather information on student satisfaction with college programs and services.

New students are required to complete an assessment (Accuplacer) of their basic skills to enable better judgments of readiness to function effectively within college level curriculum. Mandatory placement in reading, English and math courses is based on the assessment scores. These assessment scores may dictate that some students will be required to first complete developmental courses before enrolling in college level courses.

Minnesota West has developed guidelines that exempt some students from all or portions of the assessment based on previous education or enrollment status.

Orientation
An orientation session for students is held on each campus and online. It allows the student to get acquainted with the campus and available services. Students will receive information on advising and topics related to registration and academic and student life at Minnesota West. Student orientation/advising sessions are held for new students prior to the beginning of each term. It is strongly recommended that all new students attend an orientation session. Contact the campus for orientation dates and time. Online orientation is available for Online students.
Registration

Time of Entrance
Students may have multiple opportunities for entrance to Minnesota West Community & Technical College. Check with the program or major of choice for admission requirements. It is recommended that high school seniors make application for admission during their senior year and include with their high school transcript a current schedule of classes.

Registration refers to the process of signing up for classes. The registration procedures vary depending upon whether a new or continuing student is in a degree, diploma or certificate program or is taking classes but not pursuing a degree, diploma or certificate.

New students who have completed the application for admission process will be scheduled for an orientation/advising session. During orientation/advising counselors or advisors will meet with students to assist in selecting appropriate courses. At the conclusion of this session, registration begins.

State Residency Requirement
Students shall be eligible to pay in-state tuition if they meet the criteria of Minnesota Statute 135A031, Subd. 2. Students may establish domicile in Minnesota before the beginning of any semester. Students have the burden of proving domicile for the purpose of paying in-state tuition.

Procedures:
1. Domicile is the place to which a person intends to return after a temporary absence and is a person’s true, fixed and permanent living place. A person may have only one domicile at a time.

2. Students who seek to qualify for in-state tuition must first meet the following threshold requirements:
   a. Students must have resided in Minnesota for at least one calendar year immediately prior to applying for in-state tuition or are dependent students whose parents or legal guardian resides in Minnesota at the time the student applies.
   b. Residence in Minnesota must not be merely for the purpose of attending college.

3. Students not meeting the requirements for residency may petition for in-state rate consideration.

   a. The following additional facts and circumstances will be considered when responding to a petition for in-state tuition. No one of these factors is either necessary or sufficient to support a claim for in-state tuition.
      i. Continuous presence in Minnesota during the period when not enrolled as a student.
      ii. Sources for financial support are generated within Minnesota.
      iii. Domicile in Minnesota of family, guardian, or other relatives or persons legally responsible for the student.
      iv. Permanent residence in Minnesota.
      v. Ownership of a home in Minnesota.

   b. The following circumstances, standing alone shall not constitute sufficient evidence of domicile to afford eligibility for in-state tuition under these regulations, but may be considered as part of the demonstration of the facts and circumstances listed above.
      i. Voting or registration for voting
      ii. Lease of living quarters
      iii. Statement of intention to acquire a domicile in Minnesota
      iv. Domicile of student’s spouse in Minnesota
      v. Ownership of a home in Minnesota
      vi. Automobile registration
      vii. Other public records, e.g. birth and marriage record.

4. Individuals in the following categories shall qualify for in-state tuition.
   a. High ability students in the top 15% of their high school class or who score above the 85th percentile on a nationally normed standardized achievement test and who reside in states that do not have a reciprocity agreement with Minnesota.
   b. Students who qualify under a college or university affirmative action program consistent with law and approved by the Chancellor or designee.
   c. Students who are recognized as refugees by the office of Refugee Resettlement of the U.S. Department of Health and Human Services.
   d. U.S. military personnel serving on active duty assignment in Minnesota, and their spouses and dependent children.
Tuition and Fees
Tuition and fees for credit bearing courses at Minnesota West are established by the Minnesota State Colleges and Universities Board of Trustees. Future and current students are encouraged to visit the College web site for the most current tuition and fees information at: www.mnwest.edu/business-office/tuition-fees.

Reciprocity
For students who live in a state that has a reciprocity agreement with Minnesota, tuition and fees will be based on their home state’s negotiated rate. Students from Wisconsin and North Dakota need to apply to their home state to ensure the negotiated tuition rate. Students from South Dakota need to complete an application and submit it to the campus they plan to attend. Contact campus registration staff for assistance.

Paying Tuition & Fees
It is the student’s responsibility to check their account online through e-Services Student Account. Statements will not be mailed to students.

Students may choose one of the following options for paying:

Pay Online
Online payments are accepted through E-services. Students may make full or partial payments using a major credit card, debit card or e-check.

Pay in Person
Payments are accepted at the campus business office during regular business hours.

Pay by Mail
Students may pay by mail by including their student ID number on their check or money order.

Enroll in an External Payment Plan
Students are able to enroll, make a down payment and arrange for monthly payments via e-Cashier on the Nelnet website.

Pay by Phone
Students may pay by phone with a major credit card by calling a campus business office.

Third Party Billing
When a student’s tuition, fees and/or bookstore purchases are billed directly to an outside agency or organization, the process is termed “third party billing.” The College agrees to defer the appropriate college costs and collect payment directly from the agency or organization on behalf of the student. The College must receive authorization from the sponsoring agency or organization before third party billing can be processed. Students are ultimately responsible for all college costs incurred.

Students who have not paid their tuition and fees by the payment deadline will have their class registrations cancelled unless one of the following conditions is met:

• Student has made a down payment of 15% or $300.00 whichever is less.
• Student has an active Nelnet tuition payment plan.
• Student has completed the financial aid application and has a ISIR on file with the College (completed FAFSA using the Minnesota West code of 005263)
• Student has provided the College with scholarship or third party authorization for payment of tuition.
• Student is a PSEO student.

Students in jeopardy of having class registrations cancelled will notice a message on their E-services dashboard notifying them that they have not met the financial requirements necessary to remain registered after the tuition due date. Seek assistance early to ensure that class registration will not be cancelled.

Limited circumstances could allow a student to have tuition and fees deferred for a short period of time. Students who believe they have extenuating circumstances that could be considered for deferment must contact the business office. Deferment criteria are well defined. Not all requests for deferments will be granted.

Late Fee
A $30.00 late fee will be assessed to accounts that are not paid by the 11th day of the semester. No late fees will be charged if the payment plan has been implemented by that date. The late fee will also apply to resale activity.

Non-payment
Non-payment of the account could result in an Administrative Withdrawal and submission of the outstanding balance to the Minnesota Department of Revenue, Collection Division for further action. Students having outstanding accounts with the College will not be permitted to register for a subsequent term. Students should not rely on the College to drop them from courses.

Schedule Adjustments - Drop/Add
Terms three weeks or greater in length:
Minnesota West students may drop courses within the first five days of a term without obligation. For purposes of this policy a term is defined as fall semester, fall late start, spring semester, spring late start, Maymester,
Courses less than three weeks in length:
Students are entitled to have the opportunity to attend one class session without obligation. Students who are registered for courses which are less than 3 weeks in length will have one business day after the first class meets in which to drop courses without obligation. A 100% refund of tuition and fees shall be provided to a student who drops a course less than three weeks in length on or before one business day after the first class meets. Students will be obligated for any course dropped after the first business day following the first class session.

Financial Aid Implications:
If dropped credits are used to determine the student’s status for payment of financial aid, the student’s status will be recalculated. Additionally, students who register for classes and never attend will have their financial aid recalculated. Repayment of financial aid can be the result of these recalculation if the student has already received payment. Students who are obligated for dropped classes can petition to apply the amount of the tuition and fees for the dropped class to cover the cost of an added class for the same term. Students must also petition for a recalculation of financial aid for these course exchanges. If the exchange of credits is not credit for credit, financial aid may be adjusted.

Late Registration
Registration for classes will be allowed through the first five instructional days of a term. For purposes of this policy, a term is defined as fall semester, fall late start, winter term, spring semester, spring late start, Maymester, summer session I, and summer session II. Registration for courses which are less then 3 weeks in length will be allowed through one business day after the first class meeting date. Registration after these deadlines will require consent of the instructor, providing space is available.

Withdrawals
The final date for official course withdrawal is the last day on which students may officially terminate their enrollment in a course, and shall be the date on which eighty percent (80%) of the days in the academic semester have elapsed. For courses not on a standard academic semester schedule, the final date for official course withdrawal shall be established as the date on which eighty percent (80%) of the instructional days for the course have elapsed.

Financial Aid Implications
Federal regulations state that students who withdraw after receiving federal financial aid may be required to return a portion of the aid received. Students considering withdrawing from the college should consult an advisor or financial aid specialist before withdrawing from the college. The Minnesota State Grant recalculates throughout the term and may result in a student either receiving an increased or a decreased Minnesota State Grant award. Any student considering withdrawing from a course or courses should speak with their campus financial aid specialist to determine both the academic and financial effects of a withdrawal.

Students in attendance after the 60% point of the term will be considered to have earned all financial aid.

Administrative Withdrawals
The College reserves the right to administratively withdraw students for non-attendance. Notification will be sent students who are administratively withdrawn. There will be no reduction in tuition and fees.

Alternative Methods of Earning Credit
Students may be granted credit toward program completion for prior work, education, and life experiences, which are deemed equivalent to the program requirements.

Earning credit may be achieved through one of the following options: Advanced Placement (AP), College Level Examination Program (CLEP), Competency Based Education (CBE), or Course Test Out.

1. Credits received through alternative methods count toward graduation requirements but are not counted in Grade Point Average or minimum semester credit completion calculations and are not counted for financial aid status.
2. Responsibility for possessing and retaining the content knowledge and skills required by course requirements for which alternative credit is granted rests with the student.
3. Alternative Methods of Earning Credit procedures do not supersede the time frames for drop/add, withdrawal, or any refund of tuition.
4. Credits earned by these alternative methods may or may not be accepted by other institutions.

- Advanced Placement (AP)
Advanced placement courses and examinations completed at a high school will be evaluated upon receipt of an official transcript from The College Board Program. Scores of three, four, and five will be awarded credit at Minnesota West. Credit may be given for a specific college course if a test covers substantially similar material. If the test material does not match an existing course, students may be given elective credits.
Students must notify Student Services of Advanced Placement coursework.

1. AP credits will not be recorded on a transcript at Minnesota West until the student has successfully completed 15 credit hours in residence.
2. An Advanced Placement Guide is available on the college website to assist students in their educational planning.
3. There is no limit to the total number of credits a student may earn through AP examinations. Credits earned through AP examinations are not resident credits and may not be used to satisfy resident credit requirements for graduation.
4. Students must request and submit an official score report from the College Board (www.collegeboard.com). Minnesota West Code: 6945

- **College Level Examination Program (CLEP)**
  
  The College Level Examination Program is a means for highly qualified students to obtain credit in courses without registering for or enrolling in the class. Students wishing to complete one of the tests should contact Student Services for appropriate forms, information, and fees.

  1. Students who have enrolled in a comparable class at Minnesota West or another institution are not eligible to complete the CLEP exam in that area.
  2. The College Board will recommend the awarding of credit on the basis of research and the credit given will be considered equivalent to a comparable class at Minnesota West.
  3. CLEP credits will not be recorded on a transcript at Minnesota West until the student has successfully completed 15 credit hours in residence.
  4. A CLEP Guide is available on the college website to assist students in their educational planning.
  5. There is no limit to the total number of credits a student may earn through CLEP examinations. Credits earned through CLEP examinations are not resident credits and may not be used to satisfy resident credit requirements for graduation.
  7. Students can contact Student Services at the Worthington Campus to test or view other testing site information at http://clep.collegeboard.org/register/exam.

- **Competency Based Education (CBE)**

  Competency Based Education (www.mnwest.edu/academics/earning-credit) refers to learner-demonstrated knowledge, skill, and ability to perform a task or function. The learner uses prior experiences to support course competencies.

  There is a $200 initial fee that includes career planning, development of an academic plan, and the application. Thereafter, regular tuition per credit will be assessed.

  Students may be eligible to earn up to 44 credits for prior learning from work, volunteer services, conferences, workshop attendance, in-service training, and a vocational interest.

- **Course Test Out**

  Students who demonstrate achievement in the content of a college-level course may be granted college credit by Course Test Out. The student would begin the process by making appropriate arrangements with the instructor to test out of a course.

  1. A fee of $40 per lecture credit and $65 per lab credit payable to Minnesota West Community & Technical College is required prior to completing a test out exam. This fee is not refundable even if the student does not pass the exam or is not given credit for the course.
  2. Test outs must be completed 10 days prior to the start of the semester or after the 5th day of the semester; however, the President or designee has the authority to allow a faculty member to grant a test out at any time under extenuating circumstances.
  3. Testing out is not an option for a student who wants credit for a course previously failed or for which the student has received an NC (no credit) grade. A test out cannot be used to improve a grade for a course previously completed.
  4. If the student fails to pass the test out exam, he/she must take the course to fulfill the graduation requirements. No grade will be recorded on the transcript for attempted test out.
  5. Test out exams are instructor-constructed and reflect the objectives of the course. A grade of "C" or higher will be recorded as a PASS grade.
  6. Credits earned by the test out option will not be computed in the student’s GPA; nor will they count toward the enrollment figures of the College.
  7. Testing out is not an option for all courses. A student should check with the instructor and the campus registrar to see if a test out is available.
  8. Credits for successful completion will not be recorded until the student has successfully completed 15 credit hours in residence.
  9. Financial Aid is not available for test out credits.

Test Out Credit Award Recommendation (www.mnwest.edu/student-forms)

- **School to Work Articulated Courses**

  Minnesota West Community & Technical College participates in the school to work program and has
entered into agreements with several area high schools. Students enrolling in articulated high school courses and successfully meeting specific criteria for each course may be eligible to receive credit at the College. Credit will be granted for competency mastered within the preceding two years at a skill level of "B" or better on a grade scale of "A-F". Credit will only be awarded for articulated high school courses in which the student has met the criteria after the student has enrolled in and successfully completed 15 credits at the College.

- **International Baccalaureate Credit**
The IB program is an internationally recognized program through which secondary students complete a comprehensive curriculum of rigorous study and demonstrate performance on IB examinations. The examination for the diploma covers six subjects, three or four of which must be at a higher level and others at the subsidiary level. Students may present a full IB diploma or a certificate recognizing specific higher level or subsidiary level test scores.

It is the policy of Minnesota West Community & Technical College to award credit for the IB programs completed by students who subsequently attend Minnesota West Community & Technical College. Those students completing a standard level course of 150 hours will earn three (3) or four (4) credits as appropriate. Students completing a higher level course of 240 hours will receive six (6) or eight (8) credits as appropriate.

1. An International Baccalaureate (IB) Guide is available on the college website to assist students in their educational planning.
2. A student must provide the college with an official report of an IB diploma or certificate scores in order to receive credit.
3. There is no limit to the total number of credits a student may earn through IB examinations. However, credits earned through IB examinations are not resident credits and may not be used to satisfy resident credit requirements for graduation.

**Academic Information**

**Attendance**
Students should adhere to the attendance policy as stated on each course syllabus. It is the student’s responsibility to check with each instructor concerning assignments, projects, or work missed during and absence.

**Definition of College Credit**
A college credit is a unit of measure that is used to quantify progress in or completion of a college course, program, or degree. A credit comprises elements of both time and academic achievement. In higher education, one semester credit generally involves 45 hours of activity. A lecture credit generally is comprised of 15 hours of classroom instruction from a qualified instructor, and an expectation of an additional 30 hours of student supplemental study or activity outside of the classroom. A lab credit would generally be comprised of 30 hours of laboratory instruction from a qualified instructor with an expectation of an additional 15 hours of supplemental study or activity by the student outside the classroom. An On-the-Job (OJT) credit would involve 45 hours of training at an actual job location, working for an employer, under the supervision of a qualified instructor. All credits would require assimilation of specified knowledge and skills comparable to and consistent with learning objectives established for similar courses and levels at other accredited institutions of higher learning.

Advances in communication technologies have affected how colleges award credit. Distance education courses, such as those offered on-line, stress assimilation of knowledge and skills more than time spent in a classroom. Students taking such courses are expected to acquire equivalent knowledge and skills by devoting more time to independent activities designed and directed by qualified faculty than they would for an equivalent course on campus with an instructor.

A college may grant or waive credit for a course in which the student does not enroll if the student can document a direct correlation between his or her life experience and the prescribed faculty-developed coursework. The student must establish that his or her experience was equivalent or superior to the classroom experience as well as demonstrate mastery of the course’s learning objectives in a manner determined by appropriate department faculty.

**Dean's List and Honors**
To be eligible for the Dean's list and/or honors, students must meet the following requirements:
1. Be a full time student enrolled in a minimum of 12 credits.
2. Earn 12 credits of course work with A-F grading system.
3. Earn a 3.5 GPA.

**Online/Distance Learning**

**Student Responsibilities**

**Distance Learning**
Distance learning occurs when the student and instructor are separated by distance, time and/or location. Minnesota West provides two avenues for distance learning for students; instructional television (ITV) and online courses. ITV courses are offered at the same time in different locations. Online courses are Internet-based courses delivered through Minnesota West Online.

**Instructional Television (ITV)**

Instructional Television is used extensively at Minnesota West. This technology provides students with a broad range of classroom experiences that might not otherwise be available. Using state-of-the-art two-way video conferencing, instructors and students are brought together in full video and audio. In many cases, instructors enhance their teaching with technical tools that are available in these specially equipped classrooms.

When a class lecture or lab is being recorded for any reason, students will be informed that a recording is taking place. Students will be advised as to the purpose of the recording, how it will be used, and the process for destroying the recording. Students wishing to record a class must have written permission from the instructor.

Video taping on the Instructional Television network will only be permitted in situations involving mitigating circumstances (e.g., extended illness, meeting special needs, etc.) at the discretion of the instructor and all students at all sites on the Instructional Television network.

**Minnesota West Online Courses**

The Internet has made it possible for students to have more flexible and personal educational experience by allowing access to learning when and where they want it. At Minnesota West, efforts focus on developing Internet based courses that parallel campus courses. Internet courses at Minnesota West are taught by college faculty who work with students throughout the duration of the course. Instructors apply the same rigorous academic standards for success with an Internet course as they do in their traditional classroom courses.

There is an Introduction to Online Learning course available. To access this FREE non-credit course, contact the D2L Site Administrator at d2ladmin@mnwest.edu to be enrolled. It is recommended that you review this course before you take an online course.

To obtain the maximum benefit of online courses, it is the student’s responsibility to be actively engaged in the online learning experience by:

- attending online classes per the instructor’s requirements, participating in online discussion, and setting aside time for online coursework
- proactively seeking assistance when needed

For information, see Minnesota West Online. ([http://www.mnwest.edu/minnesota-west-online/](http://www.mnwest.edu/minnesota-west-online/))

**Grading System**

At the beginning of each semester, students must be informed by their instructor as to how students will be graded in each course. If the information is not provided by the faculty member, it should be requested.

**Pass/Fail Policy**

A student may request a "pass" (P) grade for any class in which he or she is enrolled. The "P" grade must be requested by the student ten school days prior to the end of the term. The "P" grade indicates the student has performed at a passing level. Any student who achieves less than "C" level work will receive an "F" on his/her transcript. A student may have a total of 20% of his or her credits with a grade of "P". It is not recommended that a student request a "P" grade for any course that will apply toward a major or minor.

**Right to Alternative Complaint**

These procedures do not deny the right of any individual to pursue other avenues of recourse, which may include filing charges with the Minnesota Department of Human Rights, initiating civil action or seeking redress under state and federal law.
Grading System

The following grading system is used at Minnesota West to report academic achievement and to compute the student's grade point average.

<table>
<thead>
<tr>

Definitions/Conditions:

Grade points: A letter grade is assigned at the end of a semester for each course in which the student is enrolled. A grade point value for each credit in the course is assigned to each letter grade.

Grade Point Total: Grade point total is the sum grade points earned as determined by multiplying the grade point value of the grade by the number of course credits.

Grade Point Average: Grade point average (GPA) is the student's grade point total divided by the grade point credits. Each grade report shows the student's GPA for the term and cumulative GPA since admission. "P" does not carry a grade point value and, as such, is not calculated in the GPA. A "P" will not improve the student's GPA. However, the credits count toward registered credits.

Credit: The unit by which academic work is measured.

Registered Credits: The total number of credits for which a student is officially enrolled at the end of the registration drop period each term.

Completed Credits: Completed credits include A, B, C, D, P, and F. They do not include "I" (incomplete), "W" (withdraw), "FN" (Failure for none attendence), FW (no grade point value), audit, no credit, or drops (classes dropped during the first days of class). Completed credits may qualify for retroactive payment of financial aid.

Earned Credits: Earned credits are successfully completed credits that count toward the required percentage of completion. Earned credits include only A, B, C, D, and P.

Incomplete: The mark "I" is a temporary grade that is assigned only in exceptional circumstances. An "I" grade will automatically become an "F" grade at the end of the next semester. Faculty has the option of setting an earlier completion date.

Repeat Credits: Credits awarded when a student repeats a course in order to improve a grade. The most recent grade will become the grade calculated for GPA purposes. A student may repeat a course no more than two times.

Developmental Credits: Credits awarded for coursework below the course prefix 1000. Student may receive financial aid for developmental credits up to a maximum of 30 semester hours.

Transfer Credits: Credits that are accepted by the College. Accepted transfer credits are not included in the calculation of GPA, but are used in the calculation of the 67 percent completion rule.
Cumulative Credits (Cumulative attempted CUMATT on transcript): Cumulative credits are the total number of credits registered for all terms of enrollment at the College, including summer terms and terms for semesters for which the student did not receive financial aid.

Audit: Term used to identify a course taken by a student who wishes to obtain the information presented but does not wish to earn credit. Students who audit a course are not required to complete assigned work or take written examinations. Audited courses do not count toward Cumulative Credits toward graduation and do not figure into the grade point average. Audits are designated by the grade of AU on the transcript. To register for an audit, notify the registrar of intent at the time of registration so the appropriate designation may be made. Audits are allowed on a space available basis only. Full tuition and fees must be paid. No financial aid is available for classes taken for audit.

Policy on Official Withdrawals Requested After Unofficial Withdrawals Have Been Submitted by Faculty: If a student has been submitted as a no-show, the FW cannot be changed to a W. Student cannot withdraw from a class never attended.

If the faculty has entered the FW with a last date of attendance that falls within term dates, students will be allowed to submit an official withdrawal from the course through the 65th day of the semester. Registration staff should change that FW (unofficial withdrawal) to a W and enter the Last Date of Attendance as the date the official withdrawal form is submitted to the registration office.

Appealing Grades
In the case where a student disputes the grade he/she has received in a particular course, class or assignment, the student's first recourse is to meet with the instructor to discuss their concerns of the grade. (See Student Handbook) If no resolution between the instructor and the student can be met the student should then refer to the grievance procedures as found under Student Rights and Responsibilities in the Student Handbook.

Education Plan
Students on Academic Probation will be expected to work with their advisor toward improving their grades by agreeing to an Education Plan. The Plan will outline what activities the student will participate in to raise his/her GPA. Activities may include tutoring, meeting regularly with an advisor, Study Skills Workshops and other support activities.

Students who have been suspended and are re-entering the college will be required to participate in an Education Plan/Case Management Program.

Independent Study
Independent study is approved only in situations where an academic emergency exits. Students may request registration for one or more credits of independent study in a semester and must have the consent of the instructor and Administrative approval for the course in which the credit is being sought. The nature of the project, number of credits to be awarded, and the evaluation procedures must be approved by the instructor on a special form located at: http://www.mnwest.edu/student-forms.

Statement on the Role/Importance of Writing
The College recognizes that clear, correct and concise use of language is a characteristic of an educated person. Papers and examinations that are poorly written may receive a lower grade based on the quality of the writing alone. Poor writing is sufficient cause for a failing grade on a paper or in a course. This pertains to all courses offered by the College.

Library and Academic Resource Center (LARC)
Each Minnesota West Community & Technical College campus has a Library and Academic Resource Center (LARC), which supports the curriculum, students, and staff. The LARC houses the following services:

Library
Minnesota West Community & Technical College has approximately 50,000 items including books, periodicals, audio-visual materials, electronic books, and streaming videos. The library website provides access to the online catalog, full-text article databases and reference books, and other library services. Off-campus access is available through proxy services. Library materials are transported between campuses via U.S. mail. Interlibrary loan for materials not owned by Minnesota West Community & Technical College is provided through the MINITEX system.

Library staff provides reference and user instruction on all campuses and to our distance learners. Each library has open computer and printer access, a photocopy machine, and study spaces designed to create an inviting atmosphere with comfortable seating, individual carrels, and group study areas.
Tutoring
The Library and Academic Resource Center offers free tutoring to students who need help with classes or programs.

- Individualized and small group tutoring is available for students on all campuses. Students use tutoring services in the LARC to receive assistance in oral and written communication skills, math, reading skills, study skills, and technical tutoring.
- Tutors help students prepare for tests, improve study techniques, review course materials, and answer questions about assignments. They assist with fundamental skills such as time management, note taking, and test preparation techniques that are necessary for college success. Tutors will not do work for students, nor do they replace instructors. They will show techniques to keep pace with assignments and help students understand course material.
- Students usually request tutoring on their own, but faculty may also refer a student for tutoring.

Both peer and staff tutors are available at Minnesota West Community & Technical College.

- Peer tutors are fellow students who display a willingness to assist others and who know the course content and the instructor’s expectations.
- Staff tutors provide tutoring and assistance with general study techniques.

Online Assistance
Smarthinking, a live online tutoring service, is available to students at any time, and from anywhere. Students needing assistance in math, economics, accounting, chemistry, physics, Spanish, and statistics will receive real-time assistance from e-instructors by linking to Smarthinking through the Minnesota West Community & Technical College website. Smarthinking also includes an online writing lab, allowing students to submit drafts of writing assignments for assistance in revisions.

Test Proctoring
Make-up tests and testing services for students with documented disabilities are proctored in the Library and Academic Resource Centers at each campus. Hours are set each semester and appointments must be made to schedule a test.

Career Center
Career Services include resume and cover letter assistance. These services are provided at no charge to Minnesota West Community & Technical College students, graduates, and alumni. A Career Assessment tool is also available for current and prospective students.

Computer Access
Each Minnesota West Community & Technical College Campus provides computer access to students. Open computer labs for student use are located in each Library and Academic Resource Center.

Help Desk
The college-wide help desk is housed in the Worthington Library and Academic Resource Center. Students from all campuses and distance learners can contact the help desk via phone or online through our Ask JAY service. Ask JAY is a web-based, self-service database of frequently asked questions. The help desk staff works with students to resolve issues related to online courses, student email, and the MnSCU student services portal.

Financial Aid
Covering college costs is usually a cooperative effort involving student and parent resources and financial aid, which can consist of grants, scholarships, loans, and student employment.

The responsibility of financing a college education begins with students and parents and their financial capability to contribute to the costs. How much parents and students are expected to contribute is determined by a Department of Education Needs Analysis Formula.

Financial Aid
The amount of financial aid available to a student is also based on the Needs Analysis Formula. Like most colleges, Minnesota West Community & Technical College makes these determinations based on information submitted by families on the Free Application for Federal Student Aid (FAFSA).

Submitting a FAFSA allows students to be considered for aid from the following programs:

- Federal aid such as the Pell Grant, SEOG Grant, Direct Loan, and Perkins Loan.
- State aid such as the Minnesota State Grant.
- College employment through the Work Study program.

Scholarships
Minnesota West Community & Technical College recognizes students who have demonstrated outstanding academic, leadership, service, and extracurricular achievements through the Minnesota West Community & Technical College Scholarship program. Qualified students, regardless of financial circumstances, may apply for these awards.

Getting Started with Financial Aid
Minnesota West Community & Technical College is ready to assist students and provide information about financing education. Students must apply for financial aid each year because financial, academic, or personal situations may change.
Satisfactory Progress Standards
Minnesota West Community & Technical College adheres to Minnesota State Colleges and Universities’ policy of maintaining an open door admissions policy, assessing students, and providing developmental coursework and other programs of assistance to support student success. However, students must perform at an acceptable academic level and program completion level to continue enrollment and be eligible to receive financial aid.

Minnesota West Community & Technical College is a publicly supported institution and has an obligation to follow rules and regulations set forth by the state and federal government by providing documented accountability of the taxpayer’s investment in education by closely monitoring all students’ academic progress.

Minnesota West Community & Technical College requires that students make satisfactory academic progress toward a degree, diploma or certificate to remain in good standing. According to regulations governing the federal financial aid programs, a student must be enrolled in a program of study leading to a degree or certificate and must be making satisfactory academic progress according to standards and practices of the institution in order to continue to be eligible for the federal programs (Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, Federal Direct Loan, Federal PLUS, Federal Perkins, and Federal work Study), state programs (Minnesota State Grant, Minnesota Non-AFDC Child Care Grant, Minnesota State Work Study, and Student Education Loan Fund), and institutional programs. All students must comply with the standards of Satisfactory Academic Progress as outlined in this policy without exception for full-time/part-time status or regardless of program of study.

Satisfactory Academic Progress is defined as progressing in a positive manner toward fulfilling requirements for the degree or certificate in a given program of study. Satisfactory progress is the measurement of a student’s performance (credits completed and cumulative grade point average) in meeting the institutional degree requirements.

Minnesota West Community & Technical College believes that students are responsible for their own academic progress and for seeking assistance when experiencing academic difficulty.

Minnesota West Community & Technical College has an established procedure for placing students on academic warning, continued academic probation, academic suspension, financial aid warning, and financial aid suspension.

There is also an appeal process for academic/financial aid suspension based on unusual or extenuating circumstances. Petition and appeal forms for both academic and financial aid issues are available from the Student Services Office, the Campus Administrator Office or online.

The standards that follow are based on Federal requirements and Minnesota State Colleges and Universities Board Policy.

Requirements
1. Qualitative Measure
All students are required to maintain an acceptable grade point average (GPA). The minimum standard is progressive based on cumulative registered credits and is detailed below.

Grades of A,B,C,D, and F will be included in calculating a student’s GPA.

<table>
<thead>
<tr>
<th>Cumulative Registered Credits</th>
<th>Minimum Required GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>0-5</td>
<td>0.00</td>
</tr>
<tr>
<td>6-15</td>
<td>1.60</td>
</tr>
<tr>
<td>16-30</td>
<td>1.80</td>
</tr>
<tr>
<td>31+</td>
<td>2.00</td>
</tr>
</tbody>
</table>

2. Quantitative Measures
a. Required Completion Percentage: Students are required to complete a minimum of all attempted credits as follows:

<table>
<thead>
<tr>
<th>Cumulative Registered Credits</th>
<th>Minimum Completion Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 – 5</td>
<td>0%</td>
</tr>
<tr>
<td>6+</td>
<td>67%</td>
</tr>
</tbody>
</table>

b. The completion percentage will be reviewed after the end of each term. Grades of Incomplete (I), Failing (F), Never attended (FN), Ceased to attend (FW), Withdraw (W), No Credit (NC) or No Grade Assigned (Z) do not count toward satisfactory completion but as attempted credits.

c. Maximum Time Frame: All students are expected to complete their program within an acceptable period of time. Financial Aid recipients may continue to receive aid until they complete all of their required coursework or until they have attempted 150% of the normal time required to complete a program (ex: for a 64 credit program you can attempt 96 credits towards the completion of the program and receive financial aid). There is no warning period for Maximum Time Frame.

i. If a student changes programs after receiving financial aid for partial completion of one program, and if the new completion time will be more than 150% of normal completion of the original program, the maximum time for the student’s financial aid eligibility will be agreed to be the length of time to complete only the additional
courses required to complete the second program.

ii. If a student decides to have a double major, the 150% completion time may be extended. The maximum time for the student's financial aid eligibility will be agreed to be the length of time to complete only the additional courses required to complete the second major.

iii. If a student completes one program and decides to enter into another program, the maximum time for the student's financial aid eligibility will be agreed to be the length of time to complete only the additional courses required to complete the second program.

3. Evaluation Period

**Satisfactory Academic Progress will be monitored as follows:**

All students with registered credits during a term will be evaluated at the end of the term including summer to make sure that all criteria of the satisfactory progress policy have been met. The review is based on cumulative records.

Students who are part-time will not be evaluated until six cumulative registered credits are posted on the student's transcript. Students who are general interest only, part-time students (registered for no more than five credits in a given semester), and are not applying for any financial aid may have all of the satisfactory academic progress requirements waived by the Campus Administrator. However, once a student becomes a degree-seeking student all criteria described within this procedure are applicable.

4. Failure to Meet Standards

**A. Academic and Financial Aid Warning and Suspension**

**Warning**
A student will be placed on Academic and Financial Aid Warning for one term if he/she fails to meet these standards at the end of the review period for one term. Students on warning are eligible to receive financial aid. To be removed from warning, a student must meet the SAP standards at the end of their warning period.

If a student fails to meet the SAP standards at the end of their Warning period, he/she will be placed on Academic and Financial Aid Suspension.

**Suspension**
Academic and Financial Aid Suspension: A student will be placed on suspension if: he/she does not satisfactorily remove him/herself from Academic and Financial Aid warning.

Financial Aid suspension: He/she has reached 150% of credits attempted for Financial Aid suspension or MWCTC has determined it is not possible for the student to raise their GPA or completion rate to meet the college's standards prior to the end of the program for which the student is receiving financial aid.

A student does not have to be placed on academic suspension to be placed on financial aid suspension.

**B. Extraordinary Circumstances**

Students may be immediately suspended from financial aid eligibility in the event of extraordinary circumstances, including but not limited to previously suspended (and reinstated) students whose academic performance falls below acceptable standards during a subsequent term of enrollment; students who register for courses, receive financial aid, and do not attend any classes; and students whose attendance patterns appear to abuse the receipt of financial aid.

5. Notification

The college will notify a student in writing by mail any time they enter into a warning or suspension status. It is the student's responsibility to monitor their Satisfactory Academic Progress.

6. Appeal Process:

The appeal of academic suspension and appeal of financial aid suspension are separate. A financial aid appeal may be completed the same time the academic suspension is appealed. Approval of an academic appeal does not guarantee approval of a financial aid appeal. By federal regulations, the guidelines for approval of financial aid appeals are more restrictive.

**Academic Appeal:**

1. Appeals must be submitted in writing using the Academic/Financial Aid Reinstatement Appeal form available in the Campus Administrator’s office or the College web site.
   a. The appeal must include an explanation of the extenuating circumstances that affected academic progress.
   b. If requested by the Campus Administrator or designee, the appeal must include supporting documentation beyond the written explanation.
2. Appeals must be received by the Campus Administrator prior to the beginning of the next term.
3. A committee of three or more members and the Campus Administrator will consider the appeal.
   a. The appeals committee will meet within a reasonable time frame prior to the start of each term. The Campus Administrator may call other meetings as needed.
   b. The decision will be transmitted to the student within three working days after the decision has been made. The decision will be final.

**Academic Reinstatement**
A student who has been suspended from enrollment may return to the college on probationary status after an appeal has been approved or the period of suspension has passed with the following requirements.

1. Appeal approved: Any student whose suspension appeal has been approved must meet with the Campus Administrator, counselor or advisor to develop an Educational Plan prior to re-admittance to the College. The student must agree to an established Education Plan as defined below:
   a. The Educational Plan must contain a semester-by-semester plan for course completion.
   b. The Educational Plan must contain a plan to correct academic issues, which may have led to the suspension.
   c. The Educational Plan must demonstrate a remediation of the non-academic issues that may have led to the suspension.
   d. The student must contact the Campus Administrator and/or advisor/counselor at least three times each semester to report academic status and prior to registering for the next semester course work.
   e. Both the student and the Campus Administrator and/or advisor/counselor must sign the educational plan.
   f. The student will be continued on probationary status if the student completes 75% of their registered credits in the probationary semester with a 2.5 term grade point average but has not met the institution's cumulative standards.
   g. The student will be removed from probationary status when both the qualitative and quantitative criteria for satisfactory progress have been met.
   h. A student who fails to meet the expectations of the educational plan will be placed on suspension a second time. This student may appeal the suspension.
   i. Students who follow an Educational Plan may exhaust their financial aid resources prior to completion of the program.

2. Appeal Denied: Any student who has been suspended for failing to make satisfactory academic progress and has had an appeal denied or does not appeal the suspension may be reinstated on a probationary status after one year with the following requirements. The student must agree to an established educational plan as defined below:
   a. The Educational Plan must contain a semester-by-semester plan for course completion.
   b. The Educational Plan must contain a plan to correct academic issues, which may have led to the suspension.
   c. The plan must demonstrate a remediation of the non-academic issues that may have led to the suspension.
   d. The student must contact the Campus Administrator and/or advisor/counselor at least three times each semester to report academic status and prior to registering for the next semester course work.
   e. Both the student and the Campus Administrator and/or advisor/counselor must sign the educational plan.
   f. The student will be continued on probationary status if the student completes 75% of their registered credits in the probationary semester with a 2.5 term grade point average but has not met the institution's cumulative standards.
   g. The student will be removed from probationary status when both the qualitative and quantitative criteria for satisfactory progress have been met.
   h. A student who fails to meet the expectations of the educational plan will be placed on suspension a second time. This student may appeal the suspension.
   i. Students who follow an Educational Plan may exhaust their financial aid resources prior to completion of the program.

**Financial Aid Appeals**
A student who fails to make satisfactory academic progress and is suspended from enrollment has the right to appeal based on unusual or mitigating circumstances including but not limited to death of a relative, illness, hospitalization, or injury to the student. Mitigating circumstances are situations that are out of the control of the student and were not present at the time of initial enrollment. An academic appeal must be approved before a financial aid appeal can be considered.

1. The appeal must be submitted in writing on a Financial Aid Appeal form available in the Campus Administrator’s Office or the Student Services Office or Online.
   a. The appeal must include an explanation of the extenuating circumstances that negatively affected academic progress.
7. Financial Aid Reinstatement

1. A student will be eligible for Reinstatement of Aid when:

2. They satisfactorily complete acceptable academic work (2.0 GPA and 67% completion) in a minimum of 6 credit hours taken toward completion of their degree in the same semester. This student cannot receive financial aid for the period during which eligibility is being reinstated. A student who has met this condition must still be approved through the appeal process. Reinstatement of financial aid is not guaranteed.

3. They have had a financial aid suspension appeal approved based on unusual or mitigating circumstances including but not limited to death of a relative, illness, hospitalization, or injury to the student. Mitigating circumstances are situations that are out of the control of the student and were not present at the time of initial enrollment.

4. They have met the conditions specified in his/her academic plan, but have not met the institution's cumulative standards. In such cases, MWCTC shall permit the student to remain on a continued probation status for a subsequent evaluation period.

5. They have a grade of Incomplete (I) turn into an acceptable letter grade during the first twenty days of the semester following the suspension that enables the student to meet the minimum Satisfactory Progress requirements.

6. They have met the cumulative GPA and completion rate requirements by taking credits on their own (no financial aid). Students need to contact the Director of Financial Aid in writing when they have met the requirements.

8. Additional Elements

A. Treatment of Grades: A course repeated with the intent of improving GPA will have both the initial and repeated course counted when calculating courses attempted. Grades of Incomplete (I), Failing (F), Failure, No Show (FN), Failure, Ceased to attend (FW), Withdraw (W), No Credit (NC), In Progress (IP), or No Grade Assigned (Z) shall be treated as credits attempted but not successfully completed.

B. Academic Amnesty: Credits for which students have been granted academic amnesty ("academic forgiveness", "fresh start", etc.) will be included in both cumulative GPA and completion percentage for financial aid warning/suspension calculations.

C. Audited Courses: Audited courses (AU) are not included in any financial aid satisfactory academic progress measurements.

D. Consortium Credits: Credits for which financial aid is received under a consortium agreement will be included in cumulative GPA, completion percentage and maximum time frame calculations for financial aid warning/suspension.

E. Remedial Credits: Developmental courses are those awarded for remedial course work (below 1000 levels). Students may receive financial aid for developmental credits up to a maximum of 30 credit hours (excluding ESL). These credits are included in all financial aid satisfactory academic progress measurements. Up to 30 credits of developmental credits shall be excluded from maximum time frame calculation.

F. Repeated Courses: Repeated credits are credits awarded when a student repeats a course in order to improve a grade. The last grade will become the grade calculated for GPA purposes. Academic policy allows a student to repeat a course no more than two times, however, a student shall not be permitted to receive financial aid for more than one repetition of a previously passed course. All repeated credits are included in the percentage of completion and maximum time frame calculation for financial aid purposes.

G. Transfer Credits: Transfer credits accepted by Minnesota West Community & Technical
College shall not be counted as credits attempted for calculation of cumulative completion percentage, and grades associated with these credits shall not be used in calculating cumulative GPA. Transfer credits accepted and applied by Minnesota West Community & Technical College toward a student’s general education program, or degree requirements shall apply toward the maximum time frame calculation.

H. Withdraws: Credits for courses that a student withdraws from after the drop period will be included in credits attempted but not successfully completed for purpose of monitoring academic satisfactory progress. Thus, a “W” does not impact GPA, but does negatively impact the cumulative completion percentage.

I. Students who have not met the institution’s cumulative grade point average and completion percentage standards and have not met the conditions specified in his/her academic plan, the student shall be re-suspended immediately upon completion of the evaluation.

**Student Eligibility Policy**

A student must meet federal/state requirements to be eligible and receive financial aid.

**Federal Requirements**

1. A student must be a citizen of the United States or an eligible nonresident.
2. A student meets the requirements of the Selective Services regulations.
3. A student may not be in default on a student loan or owe an overpayment on a Title IV funding at any previously attended postsecondary school.
4. A student must be making “satisfactory progress” toward graduation.
5. A student must have a high school diploma or a GED certificate.
6. A student must be enrolled in (or applied for admission to) an eligible program.

**State Requirements**

1. A student must be enrolled in an eligible program of at least three credits.
2. A student must be a Minnesota resident.
3. A student must demonstrate financial need.
4. A student must be past mandatory high school age or if under 17, hold a high school diploma or GED.
5. A student must not be delinquent on child support payments.

**Ability to Benefit**

Every student receiving financial aid at Minnesota West Community & Technical College must be academically qualified for study at a higher education level. A student with a high school diploma or its recognized equivalent (GED) is always considered to be academically qualified. A student who does not have a high school diploma or its recognized equivalent is not eligible for Federal Financial Aid funds, only state funds.

**Enrollment/Degree Verification**

Minnesota West Community & Technical College has authorized the National Student Clearinghouse to act as agent for verification of student enrollment and degree status. The verification service is available 24 hours a day, 7 days a week.

The Clearinghouse receives data electronically from Minnesota West Community & Technical College and, in compliance with the Family Educational Rights and Privacy Act (FERPA), dispenses the information electronically to current students or agencies and organizations requiring proof of enrollment. Student Status is defined as:

- Full-time status: 12 or more hours
- Half-time status: 6-11 hours
- Less than half-time: 1-5 hours

Note: Students who need GPA or grades reported, an official/unofficial transcript is available from the Registrar's office.

**Professional or Business Organizations/Companies**

The National Student Clearinghouse provides instant electronic verification of student degrees and student enrollment to employers, employment agencies, credit card companies, background search firms, travel companies, and various other businesses that offer products or services based on an individual's status as an enrolled student.

Agencies and organizations are required to contact the Clearinghouse at www.dgreeverify.org for Minnesota West Community & Technical College student enrollment information.

National Student Clearinghouse
13454 Sunrise Valley Road, Suite 300
Herndon, VA 20171
Phone: 703-742-4200
Fax: 703-742-4239

**Active Duty With Armed Forces**

Minnesota West Community & Technical College in accordance with MnSCU policy 5.12 recognizes the importance of America’s national defense that is made by students who are members of the armed forces. Students enrolled at Minnesota West Community & Technical College who are members of any branch of the U.S. military reserves and who are unable to
complete a semester due to having been called to active duty shall to the extent possible be provided one of the following options:

1. The student may be given a full refund of tuition. Students receiving financial aid who choose this option should be made aware that they may be liable for any required refunds of state or federal financial aid funds.

2. The student may be given a grade of incomplete in a course and complete it upon release from active duty. Course completion may be accomplished by independent study or by retaking the course without payment of tuition. Under federal financial aid policies a course that is retaken this way may not be counted toward a student's enrollment load.

3. If in the instructor's judgment the student has completed sufficient course work to earn a grade of C or better, the student may be given credit for completion of a course.

Minnesota West Community & Technical College will provide a full refund of required tuition, fees, and other institutional charges, or provide a credit in a comparable amount against future charges for students who are forced to withdraw from the College as a result of a military mobilization. Students affected by a military mobilization will be provided an easy and flexible reentry back into Minnesota West Community & Technical College upon the students release from active duty.

Leave of Absence
Students who have a legitimate reason for an extended absence may request a leave of absence. The leave of absence shall meet these conditions.

1. Must be a written request giving starting and ending dates.
2. Must be approved by the student's advisor and the Campus Dean.
3. Will not exceed thirty (30) school days.
4. Does not require the student to pay any charges to the College during the leave period.
5. Does not require the student to repeat any class time.
6. May be granted to a student only once in a twelve (12) month period.

Note: If a student who has been granted a leave of absence does not return to class at the end of the leave, the student's withdrawal date is the first date of the leave. Consequently, no financial aid will be disbursed during the period.

Graduation Information

Graduation
Students will graduate with an Associate in Arts Degree, Associate in Science Degree, Associate in Applied Science Degree, Diploma, or Certificate upon the successful completion of all program/major requirements.

A minimum cumulative grade point average of 2.0 is required for graduation. Practical nursing, registered nursing, medical lab technician, medical assisting, law enforcement (technical courses), radiologic technology, surgical technology requires a 2.0 per course for satisfactory completion.

To be eligible for a degree, diploma, or certificate, a transfer student must earn at least 30% of the major graduation requirements from Minnesota West Community & Technical College.

Graduation with Honors
A student will be graduated "with honors" if the cumulative grade point average is between 3.5 and 3.74, and "with high honors" if the cumulative grade point average is 3.75 or greater.

Apply for Graduation
Each graduating student must complete an Application for Graduation Form for Student Services during the semester preceding graduation. The cost of the application is $25.

Campus Graduation Ceremonies
Each Minnesota West Community & Technical College campus will host a graduation ceremony at the end of the spring semester recognizing all students who have completed the degree, diploma, or certificate requirements during the academic year.

Student Services

Official Transcripts
A transcript is a comprehensive record of student academic progress. Names will appear on the transcript as it appears on the College record. Academic records are classified as confidential and may be released only with the student's written authorization and signature. Official transcripts include the College seal and signature of the registrar. An unofficial transcript is also available.

To request an official transcript:

Order it online through the National Student Clearinghouse (www.studentclearinghouse.org). Minnesota West has partnered with the National Student Clearinghouse to provide students with the option of ordering a transcript online. Students create a personal profile, submit their requests, pay a fee of $5.00 per transcript by credit card, electronically sign and submit the order. Once the Clearinghouse receives
By Mail or In Person
Print the Transcript Request Form found on the Minnesota West web site at www.mnwest.edu/images/student-forms/transcript_request.pdf

Complete the form and mail (or personally deliver to any campus) along with $10.00 for each copy requested to:

Minnesota West Community & Technical College
Office of the Registrar
1450 Collegeway
Worthington, MN 56187

Students do not need to complete a transcript request if they plan to attend an institution that is a part of the Minnesota State Colleges and Universities system; those colleges will have electronic access to transcripts. Transcripts are sent within two working days. Students who have a hold on a college record will be sent a letter advising how to clear the hold before a transcript can be issued.

Unofficial Transcripts
Current students may print an unofficial copy of an academic record by logging in to their student account. Instructions are found in the "How Do I?" section of the page. Questions regarding transcript requests should be directed to the registrar.

Bookstore
Minnesota West Community & Technical College operates a bookstore on each of the five campuses for the convenience of both students and the faculty. Books may also be ordered online at http://www.mnwest.edu/bookstore
Textbooks, general supplies, and tools/equipment for specific programs are available in the bookstores, as well as gifts, souvenirs, and computer software.

Students dropping courses will be permitted to return texts for a full refund through the 5th day of the semester. Students must show the cash register receipt, and texts must be in perfect, unmarked condition. Texts in shrink wrap cannot be opened. Study guides and solution manuals are not returnable.

All bookstores have extended hours the first week of each semester.

Child Care Services
The Post-Secondary Child Care Grant Program assists low income students who have young children pay for child care while the student attends classes.

Campus Child Care Centers
Contact your campus for a list of local child care providers. You may also contact the county Family Service Agency or the Southwestern Minnesota Opportunity Council (SMOC) Child Care Resource and Referral program at 866-511-2244.

Advisor/Advisee-Counselor/Counselee
It is the philosophy of Minnesota West Community & Technical College that an advisor/advisee system is essential to the growth and development of each individual student. Each student will be assigned an advisor or counselor. Minnesota West Community & Technical College has instituted a process to be in compliance with the Federal Financial Aid Return of Federal Funds requirement.

Two tools have been developed to help the advisor/counselor. Degree audits are available for every student, plus a course applicability system www.transfer.org/uselect/login.htm can help a student and advisor determine how courses will transfer into and out of Minnesota West Community & Technical College.

A student advisee is responsible to use the degree audit to determine how the student is progressing towards graduation. The Registrar should be contacted for any questions. Please note that the audit can only be run once per day per student, and the audit will process for the student’s major of record.

Students have the final responsibility to select and register for courses that meet the program plan requirements. They are encouraged to seek consultation and advice from their advisor or the counseling staff when selecting courses.

1. Consult with an advisor or counselor prior to the first semester registration and before graduation.
2. Make appointments for such consultations during regularly scheduled office hours.
3. If it is impossible to keep the appointment, cancel it in a timely manner.
4. Prepare for the appointment and bring appropriate materials.
5. Discuss academic and career related needs as they develop.
6. Become knowledgeable about college, department and/or program policies, procedures, and requirements and adhere to them.
7. Assure that all courses needed for graduation have been completed.

Advisor/Counselors responsibilities:
1. Inform the student of the advisor, counselor, and advisee relationship.
2. Maintain advising records for each student, monitoring their progress toward educational and career plans.
3. Identify and post office hours of availability.
4. In consultation with appropriate individuals, review students’ previous academic history and placement tests to determine course placement, transfer of credits and/or recommendations for test out.
5. During pre-registration assist students with course selection and the development of semester schedules.
6. During the academic term, assist students with drops, adds, withdrawals and change of status.
7. Refer students to counselors or other appropriate resources as necessary in cases where academic or personal problems are at such a level as to require intervention by other professionals.
8. Inform students of department or program policies, procedures, and requirements.
9. Assist students with job placement or transfer activities.
10. Help students to define and develop realistic educational and career plans.
11. Interpret and provide students with the rationale for institutional policies, procedures, and requirements.
12. Inform students of special services available on campus for remediation, academic assistance, personal counseling, and career counseling.

Counseling
Going to college impacts lives and relationships and occasionally may result in stress and conflict. Counselors are available for purposes of assisting students in their personal and educational concerns. Appointments are encouraged, but not always necessary. Counselors have experience in dealing with the following:

- Personal counseling.
- Assisting students with educational decisions and career planning.
- Career choice and program or major change.
- Interpersonal issues.
- Parenting concerns.
- Family adjustments when a parent or spouse returns to school.
- Referrals for educational assistance and/or evaluations.
- Referrals for drug, alcohol, and gambling concerns.

Long-term counseling is not available, and referrals will be made to appropriate resources if extended help is needed.

Food Service
A private vendor provides each of the campuses’ food service. Morning and noon meals are available in the student commons area. Vending machines are also available in the commons for a variety of snacks and beverages.

Housing
Housing is primarily the responsibility of the student. A listing of available housing is located at all campuses. Contact the campus admissions office for a list of apartment and housing units available for rent.

Student Identification Card
Each Minnesota West Community & Technical College student is issued a permanent photo identification card. The card is the property of Minnesota West Community & Technical College and the lending of the card or failure to present it when requested by a college official is a violation of the Student Conduct Code. The card is for identification and the transaction of college business only. Each student is personally liable for all obligations incurred by its use. Lost or damaged cards will be replaced at a $5 cost to the student.

Student Clubs and Organizations
Minnesota West Community & Technical College is dedicated to the principle that student clubs/organizations are an integral part of the total education program. A group is recognized as a club/organization if it's composition and activities are of such a nature that the College deems itself to be responsible for the actions of the group. Students have the opportunity for representation in college committees involving or affecting student interests to promote appropriate levels of student participation in campus/college decision making and assuring that student perspectives are considered.

For a complete list of college clubs and organizations please reference our website at www.mnwest.edu.

Absences for Attending College Events
Students enrolled at Minnesota West Community & Technical College and who participate in college-sponsored activities and approved Instructor-generated field trips shall be excused from missed classes without prejudice or penalty. This policy is intended to permit students to participate in events and activities without jeopardizing their academic standings or penalizing them in the classes they miss.

The activity advisor, coach or instructor will submit a list of students to be excused from classes along with the name of the event or activity, dates and times of absence to the Campus Dean for approval and notification to the campus faculty. It is the student’s responsibility to contact his/her instructors at least two days prior to the absence to arrange to make-up work missed. Instructors may require make-up work to be complete prior to the absence. The student is responsible for all work missed during the approved absence period.
Once the student has notified the instructor, it is the instructor’s responsibility to arrange for make-up work or alternative assignments so that the student is not penalized for an approved absence. It is understood that all missed classroom experiences cannot be replicated.
