The Minnesota Transfer Curriculum (MnTC) is a collaborative effort among all two-year and four-year public colleges and universities in Minnesota to help students transfer their coursework in general education between institutions. Students who complete the Minnesota Transfer Curriculum (MnTC) and then transfer to any other Minnesota public baccalaureate degree-granting university will have fulfilled all lower division general education requirements.

There are ten goals within the 40 required credits. One course may fulfill a maximum of two goals; however, credits will only be counted once in the total. A cumulative grade point average of 2.00 is required to complete the entire Minnesota Transfer Curriculum. The MnTC grade point average will be calculated using grades of A-D (passing grades) earned in all MnTC courses, including both Minnesota West and transfer grades.

Minnesota West Community & Technical College adheres to the General Education definition embedded in the Minnesota Transfer Curriculum guide. Its mission and goals resonate to those ideals.

Area 1. Communication
Goal: To develop writers and speakers who use the English language effectively and who read, write, speak, and listen critically. As a base, all students should complete introductory communication requirements early in their collegiate studies. Writing competency is an ongoing process to be reinforced through writing-intensive courses and writing across the curriculum. Speaking and listening skills need reinforcement through multiple opportunities for interpersonal communication, public speaking, and discussion. **Student Requirements:** Students will fulfill this area by completing:

1. ENGL 1101 Composition I (3)
2. Choose one of the following: ENGL 1102 Composition II (3) OR ENGL 2243 Creative Writing (3) OR ENGL 2276 Technical Writing (3)
3. CMST 1101 Public Speaking (3) OR CMST 1103 Interpersonal Communications (3) OR CMST 1130 Small Group Communication (3)

Area 2. Critical Thinking
Goal: To develop thinkers who are able to unify factual, creative, rational, and value-sensitive modes of thought. Critical thinking skills will be taught and used throughout the general education curriculum in order to develop students’ awareness of their own thinking and problem-solving procedures. To integrate new skills into their customary ways of thinking, students must be actively engaged in practicing thinking skills and applying them to open-ended problems. **Student Requirements:** Students will fulfill this area by: Most courses teach one or more of the critical thinking student competency areas. Any student who completes 40 credits of general education will have completed the student requirements for Critical Thinking.

Area 3. Natural Sciences
Goal: To improve students’ understanding of natural science principles and of the methods of scientific inquiry, i.e., the ways in which scientists investigate natural science phenomena. As a basis for lifelong learning, students need to know the vocabulary of science and to realize that while a set of principles has been developed through the work of previous scientists, ongoing scientific inquiry and new knowledge will bring changes in some of the ways scientists view the world. By studying the problems that engage today’s scientists, students learn to appreciate the importance of science in their lives and to understand the value of a scientific perspective. Students should be encouraged to study both the biological and physical sciences. **Student Requirements:** Students will fulfill this area by completing a minimum of two lab science courses.

1. One course must be from Biology:
   - BIOL 1100 Survey of Biology (3)
   - BIOL 1110 Principles of Biology I (4)
   - BIOL 1111 Principles of Biology II (4)
   - BIOL 1115 Human Biology (3)

   - BIOL 2230 Plant Biology (4)
   - BIOL 2240 Genetics (3)
   - BIOL 2270 Microbiology (4)

2. One course must be from Chemistry or Physics:
   - CHEM 1100 Introduction to Chemistry (3)
   - CHEM 1101 General Inorganic Chemistry I (4)
   - CHEM 1102 General Inorganic Chemistry II (4)

   - PHYS 1201 Fundamentals of Physics I (4)
   - PHYS 1202 Fundamentals of Physics II (4)
   - PHYS 2121 General Physics I (5)

Area 4. Mathematical/Logical Reasoning
Goal: To increase students' knowledge about mathematical and logical modes of thinking. This will enable students to appreciate the breadth of applications of mathematics, evaluate arguments, and detect fallacious reasoning. Students will learn to apply mathematics, logic, and/or statistics to help them make decisions in their lives and careers. Minnesota's public higher education systems have agreed that developmental mathematics includes the first three years of a high school mathematics sequence through intermediate algebra. (Recommendation from the intersystem Mathematics Articulation Council. Adopted by all systems in February, 1992.)

**Student Requirements:** Students will fulfill this area by completing any one of the listed courses:

1. Any 3-5 credit Math course numbered MATH 1105 or higher:

### Area 5. History and the Social and Behavioral Sciences

Goal: To increase students' knowledge of how historians, social, and behavioral scientists discover, describe, and explain the behaviors and interactions among individuals, groups, institutions, events, and ideas. Such knowledge will better equip students to understand themselves and the roles they play in addressing the issues facing humanity. **Student Requirements:** Students will fulfill this area by completing a minimum of 9 credits from three of the following areas:
